between the Hindus and Muslims. He said he was a strong supporter of the principle that in no province should a majority community be deprived of the opportunity to exercise the full rights of the majority and that at the same time the rights of the minority community should be properly safeguarded.

EXECUTIVE COUNCIL EXPANSION.—When in July 1941 the Viceroy announced the expansion of his Executive Council and the creation of the National Defence Council (see chapter on National Liberal Federation) Mr Jinnah condemned the move on the ground that the persons chosen were neither real representatives of the people nor would they command the confidence and trust of the Muslims. Mr Jinnah was bitter that the Viceroy should have canvassed members of the Muslim League over the head of the leader and the executive of the party.

Mr Jinnah also announced that it had been decided to take disciplinary action against those members of the Muslim League who had joined the expanded Executive Council and the National Defence Council.

Jinnah-Hug Deal.—At this stage there was a crossing of swords between Mr Jinnah and Mr Fazlul Huq who accepted the membership of the National Defence Council. The latter contended that the League President had done him an injustice in announcing that disciplinary action would be taken against him before hearing him fully. It is clear he argued that conviction has been recorded without any trial and has been even followed by judgment. And the only thing now left is to lead us to the scaffold. No useful purpose would now be served by allowing us to read out our defence from the scaffold.

A meeting of the League Working Committee was held at the end of July 1941 at which resolutions were passed demanding the resignations from the National Defence Council of the Hon Sir Sikander Hyat Khan the Hon Mr Fazlul Huq and the Hon Sir Muhammad Saadulla. As Sir Sikander Hyat Khan and Sir Muhammad Saadulla had already tendered their resignations the Working Committee demanded the withdrawal of the Hon Mr Fazlul Huq within ten days failing which they threatened him with disciplinary action. The Working Committee also called upon Sir Sultan Ahmed to resign his new appointment as member of the expanded Executive Council and the Nawab of Chhatari and Begum Saba Hawas to withdraw from the National Defence Council within ten days under penalty of disciplinary action. The Committee also considered a resolution seeking from the Secretary of State for India a clarification of the attitude of the British Government towards League's demand for Pakistan in the future constitution of India. Another resolution on the communal riots which had taken place earlier in 1941 (see chapter on the Hindu Mahasabha) urged Government to take serious note of the situation as the Committee had been informed by its provincial bodies that Government officials had generally been unsympathetic in meeting Muslim demands and removing their grievances.

In reply to these resolutions the Government of India issued a *communiqué* which stated *inter alia* that the Premiers of Assam, Bengal, the Punjab and Sind were invited to serve on the National Defence Council in their capacity as Premiers of their Provinces and on no other basis. It was on that basis that they accepted the invitation extended to them. As a *consequence* should they cease to be Premiers of their respective Provinces they would automatically cease to be members of the National Defence Council and their successors as Premiers in respect of their party or community would be invited to replace them. The *communiqué* also pointed out that the Premiers of all those Provinces in which the Constitution was functioning normally were invited in every case to join the Council and that was the primary and essential basis of the composition of the Council.

Mr Jinnah's Trump Card.—Mr Jinnah repudiated the suggestion that the leaders concerned were appointed to the bodies in their official capacity and in support of his contention released to the Press the correspondence which had passed between the Governor of Bombay and himself. His trump card was the Governor's statement that the Viceroy regarded it as essential that the great Muslim community should be represented on the National Defence Council by persons of the highest prominence and capacity and that he the Viceroy had accordingly invited the Premiers of Assam, Bengal, the Punjab and Sind to serve on it as members. Mr Jinnah asked whether it would be creditable for any individual prominent or capable Muslim belonging to an organisation to accept the invitation contrary to the position and the attitude taken up by that organisation? He maintained that the great Muslim community was represented authoritatively only by the All India Muslim League Organisation.

Commenting on this episode Mr Amery told the Commons that it had been made absolutely clear both by the Viceroy and himself that the purpose of the National Defence Council was to bring the Provinces States commerce industry and labour into closer contact with the Central Government. No claim was ever made by Government that anybody was invited as a representative of the Muslim League. The letter to Mr Jinnah stated that the Muslim community was worthily represented not represented in any other sense except that there was a reasonable proportion of Muslims and Hindus in total. It made amply clear to Mr Jinnah that the basis on which these invitations were issued and accepted was that they were initiated as Premiers of their Provinces and that if they ceased to be Premiers their position would be automatically taken by their successors.

Mr Fazlul Haq resigned both from the National Defence Council and from the Working Committee of the Muslim League. In a lengthy statement denouncing defiance of Mr Jinnah and the League executive, Mr Haq declared that the acceptance of membership of the Defence Council did not in any way involve a breach of the League principle or policy. What the

League had rejected was the Viceroy's offer to form an expanded War Council composed of Indian States and representatives of the various political parties of India. The Defence Council would not be composed of Indian States and representatives of political parties but Indian States and representatives of various provinces. Mr Haq maintained that this made a fundamental difference and therefore membership of the Defence Council did not come within the purview of the resolution adopted by the League.

As Sir Sultan Ahmad and Begum Shah Nawaz had failed to return for the three months imposed by the League Working Committee, Mr Jinnah expelled them from the League and disbanded them from all other activities of the organisation for five years.

Bengal Repression.—The bell started taken up by Mr Jinnah only failed to have repercussions on his position in Bengal. Two of his lieutenants in the Bengal Committee who were staunch supporters of the official League policy and who disapproved of his action caused trouble for him. There were demonstrations against Mr Haq and the provincial League organisation said some unpleasant things about him. The resentment of League Muslims against his action manifested itself even within the Cabinet. This state of affairs reflected itself even on the floor of the legislature. All this eventually led to the formation of a new Coalition Ministry in Bengal with Mr Jinnah as Minister and some members of the Opposition including representatives of the Hindu Mahasabha as members.

About the same time the Muslim League Party in the central legislature withdrew from the autumn session of the Legislature as an expression of its resentment against the manner in which the expansion of the Governor General's Executive Council was undertaken and carried out and the National Defence Council was constituted.

On October 28 1941 members of the Muslim League party walked out from the Central Assembly after a statement made by Mr M. A. Jinnah who declared that they were doing so in order to register their protest against the way in which the Muslim offer of co-operation in the war effort had been completely ignored by the Government.

A meeting of the All India Council of the League held at Delhi in October endorsed the decision of the Working Committee regarding the expanded Viceroy's Executive Council and the National Defence Council and condemned the action of Sir Sultan Ahmad and Begum Shah Nawaz in refusing to accept the mandate of the Working Committee and in insisting to remain on the said Councils in flagrant disregard of the wishes of the Muslims.

A resolution declared that the Muslims taken in the expanded Council of the Viceroy and the so-called National Defence Council are in no way representative of and cannot in any way represent the interests of Muslims. The resolution condemned the attitude of the Government in that connection which it only to create a rift in the ranks of Muslims.

Another resolution deeply deplored the serious riots at Amraoti and Nellore which clearly indicate that they were not merely the outcome of sudden communal outbreaks but were the result of calculated designs to undermine the morale of the Muslims in areas where they are in a microscopic minority. In view of these riots and several others in other provinces the Council urged Government forthwith to devise strong measures to check the growing tendency of lawlessness and terrorism of the Hindu majority and to afford effective protection to the Muslim minorities in the provinces.

Mr Huq Expelled.—About a month later the Working Committee of the League considered a letter from Mr Fazlul Huq and passed the following resolution. The Working Committee excuses the delay in not sending the reply within 10 days on the ground of his ill health as the matter was of such serious import that it required his anxious consideration. The Working Committee notes Mr Fazlul Huq's earnest reaffirmation of his loyalty to the Muslim League and his statement that he has never hesitated to carry out the mandates of the League, the latest instance in proof thereof is his resignation from the National Defence Council in obedience to the decision of the Working Committee. The Committee further notes his assurance that nothing was further from his intention than to hurt the feelings of or to cast aspersions on the President or the Executive of the League and others concerned and as Mr Fazlul Huq requests the Committee his assurance should be accepted. It is resolved that no further action should be taken in the matter.

Later however Mr Jinnah expelled Mr Huq from the League partly because of his continued defiant attitude and partly because of the manner in which he formed a Coalition Ministry in Bengal.

Towards the end of 1941 the League Working Committee expressed itself on the political question. A resolution passed at Nagpur in December said. The Committee are deeply concerned and alarmed that while the policy of the British Government still remains the same as laid down in the Declaration of August 8 1940 there is a growing tendency in a section of the British press and politicians who under the stress of war against the Axis Powers and the entry of Japan in the arena are urging the Government to revise the policy hitherto followed and to start a policy of appeasement of the Congress by making a fresh declaration in utter disregard of previous statements and promises to the Mussalmans of India and in ignorance of the nature and extent of the political religious and cultural differences existing between the major communities in India namely Hindus and Muslims.

The Working Committee therefore consider it necessary to warn the British public and the Government that any departure from the policy and solemn Declaration of August 8, 1940 and pledges given therein to the Mussalmans would constitute a gross breach of faith with Muslim India and that any revision of policy or any fresh declaration which adversely affects the demand of Pakistan or proceeds

on the basis of a Central Government with India as one single unit and the Mussalmans as an all India minority shall be strongly resented by the Muslims who will be compelled to resist it with all the force at their command which would at this critical juncture among other things necessarily result in serious impediment of the country's war efforts which have so far been largely carried on with the help and support of Mussalmans because of the policy and attitude hitherto adopted by the Muslim League in order not to embarrass or impede war efforts so far as possible.

Congress Criticised.—As the year 1941 was drawing to a close Government decided to release all Congress satyagrahi prisoners, whereupon the Congress Working Committee suspended the civil disobedience campaign and formulated its policy. (See chapter on the Indian National Congress). Commenting on this Mr Jinnah said that the new policy of the Congress only reiterated its original demand for an immediate and unconditional declaration of India's independence and freedom with the right of the people to frame their own constitution through a Constituent Assembly to be elected by means of adult franchise on the basis of a united and democratic India. This clearly means the setting up of Hindu Raj which Muslim India will never accept.

Muslim India is fighting and struggling for survival and for its right to self determination whereas the Congress and other Hindu organisations are speeding to establish supremacy and domination over the Muslims as an all India minority by establishing one Central Government over the whole of India and thus even to dominate and control those zones where the Muslims are in a solid majority and interfere even in their internal affairs by virtue of the vital powers which must remain vested in the Central Government such as defence communications customs and finance and various other executive and administrative powers.

If any new declaration is made on the part of the British Government departing from the declaration of August 8 1940 as to the future constitution of India, or any proposal or move which in any way would militate against the Muslim demand for Pakistan or prejudice it or denounce it in any way as seems to be the main effort of the Hindu leaders. It would not only create an unprecedented catastrophe, but result in grave disaster at this critical juncture of the war and the war efforts apart from the fact that it would constitute a gross breach of faith with Muslim India.

With regard to the immediate issue namely the prosecution of war and the war efforts the Muslim League has from the very beginning been ready and willing without prejudice to the major political issues to shoulder the burden of the defence of the country singly or in co-operation with other parties on the basis that real share and responsibility is given to Muslim India in the authority of the Government at the Centre and the Provinces within the framework of the present existing constitution. But so far no serious heed has been paid to this policy of the All India Muslim League by the British Government.

Reply to Chinese Leader.—Similarly while commenting on the statement issued by Marshal Chiang Kai-shek (See chapter on the Indian National Congress) Mr Jinnah said:

Muslim India is not lagging behind any other community in its desire for freedom of all the peoples of India. But India is composed of a constellation of nations and it is not one national State—its two major nations being Hindus and Mussalmans. Apart from that one-third of India is under the Indian Princes who are outside British India and are Sovereign States in relation to the Paramount Power of Great Britain. It is therefore unfortunate that the Marshal should have indulged in generalities without understanding the political situation in India and the constitutional adjustments which are necessary. I am afraid he is saturated with the ideas of those who surrounded him most while he was in India, and it is a pity that he should have without careful study expressed his views which may be exploited to the detriment of Muslim India.

While Muslim India yields to none in its desire to achieve freedom for all the peoples of India it cannot accept the machinations of those who speak in the name of freedom for Hindu India only and not for the Mussalmans. We want our Hindu brethren to be free but at the same time we do not want to be ruled by them. We also want to be free.

There is no difference on the point with regard to freedom of the peoples of India but we desire that both the Hindu and Muslim nations should be free equally in their respective homelands and zones. Any other attempt at this juncture on the part of the British Government which will militate directly or indirectly against the Pakistan Demand of Muslim India will lead to the gravest disaster in India at this critical moment. I therefore hope and trust that the British Government and the British public will not be carried away by the generalities in which Marshal Chiang Kai-shek has indulged after his visit to India for a fortnight.

Let the British Government should announce any new policy with regard to India which might militate against the League ideals. The Muslim League Party in the Central Legislature sent the following cable to Mr Churchill on the eve of Sir Stafford Cripps's visit to India. The Muslim League Party Central Legislature views with grave alarm and apprehension reports that His Majesty's Government and the British Parliament may be stampeded into making a pronouncement or adopting an interim scheme within the framework of the present constitution or regarding future constitutional changes and impresses upon His Majesty's Government through you that no declaration be made which will prejudice or militate in any way against the Muslim demand for Pakistan as the only solution of India's future constitutional problem and that the Sapra scheme should not be accepted because it is highly detrimental to Muslim interests and no other scheme be adopted or constitutional change be made without the consent and approval of the Muslim League.

Allahabad Session.—The annual session of the Muslim League was held in Allahabad in the spring of 1942 while the Cripps negotiations were in progress at New Delhi. Preceding over the session Mr Jinnah said: The main points which emerge from the Cripps formula are first that it object is the creation of a new Indian Union which shall constitute a Dominion associated with the United Kingdom and other Dominions by common allegiance to the Crown but equal to them in every respect and in no way subordinate in any aspect of its domestic or external affairs. Here there may be some doubts as to the functions and the powers. There are three things—firstly status then comes power and finally functions. But that is a matter which will have to be considered when we come to the signing of a treaty or treaties with one Dominion or two Dominions or more.

The next point that emerges is this: Immediately upon the creation of a legislative body shall be taken to set up in India in the manner described hereafter an elected body charged with the task of framing a new constitution for India. So we shall have an elected body charged with the task of framing a new constitution. I shall deal with it when I come to the clause which lays down how that constitution-making body will be set up and how it will be created.

Third there is a provision for the participation of the Indian States. Fourth His Majesty's Government undertake to accept and implement forthwith the constitution so framed. But subject to this there are exceptions. The first exception is the right of any British Indian province that is not prepared to accept the new constitution to retain its present constitutional position provision being made for its subsequent accession if it is so decided that is in the constitution body completes the framing of the constitution and when that constitution so framed emerges from the deliberations of the constitution-making body which will be a sovereign body then it would be open for any province or provinces to say.

We are not in agreement with this constitution and therefore we are not prepared to accede to this constitution.

But the most vital point and the most important of all the points so far as we are concerned particularly is as to how that province or provinces will exercise their will and exercise their right. But that is not in the document. But a suggestion has been thrown out by Sir Stafford Cripps and the suggestion is that if the province that is the Legislative Assembly of the province is in favour of accession by 60 votes then it will be an end of it. It means that the province is bound to accede. But if they get 59 and the minority happens to be 41 then there will be a plebiscite of the people of the province. Then of course the non-acceding provinces can among themselves by the same process form another union or a dominion or any single province may stand by itself as a dominion. That is the cordiality.

Then comes the provision for a treaty or treaties which will have to be

signed and made with the dominion or dominions that may be set up as well as with the Indian States according or not according. I told you that I would refer to the actual clauses of the proposals and how the constitution making body will be set up or formed and the provision is this. Immediately upon the end of hostilities the constitution making body shall be composed as follows unless leaders of the principal communities agree to some other machinery before the end of hostilities. At the end of the hostilities the constitution making body will be composed by this method. Immediately upon the results being known of the provincial elections which would be necessary at the end of hostilities the entire membership of the lower houses of all provincial legislatures shall as a single electoral college proceed to elect the constitution making body by a system of proportional representation. This new body shall be in number about one tenth of the number of the electoral college. Therefore I think you understand that all the members of the assemblies of 11 provinces will meet together as one single electoral college and they will be roughly 1,000 members and they will be entitled to elect one-tenth which means in all 100 members by means of proportional representation. That is the constitution making body.

Whatever may be the constitutional implications of the status and the powers of the dominion or the dominions that may be set up the main objective is the creation of a new Indian Union. Now we'll start with that. For that purpose a constitution making body will be set up which will be the sovereign body. A sovereign body will start—and to use the language of Sir Stafford Cripps—with a preference for an All India Union. Think what will be the composition of that body. The composition of that body would be that first of all it will be elected from amongst the members of the 11 assemblies meeting together as one college and by means of proportional representation not separate electorates. When that body is found I cannot conceive how they can come to any other conclusion except the Union and that is why it is so composed.

But after the constitution making body has framed its constitution by a bare majority it is true that any single province or provinces which do not approve of that constitution are given a chance to go through another test which I shall explain hereafter. At the most Muslims even by separate electorates will not be more than 25 per cent but by the system of proportional representation they might be less in number in the constitution making body. So the overwhelming majority will be non-Muslims and therefore the probabilities are contemplated that the constitution may be by a majority be in favour of only one Indian Union.

The Muslims feel deeply disappointed that the entity and integrity of the Muslim nation has not been expressly recognised. Any attempt to solve the problem of India by the process of evading the real issues and by over-emphasising the territorial entity of the provinces which are mere accidents of British policy and administrative divisions is funda-

mentally wrong. Muslim India will not be satisfied unless their right of national self-determination is unequivocally recognised. It must be realised that India was never a country or a nation. India's problem is international in this sub-continent and the differences cultural, social, political and economic are so fundamental, that they cannot be covered up, concealed or confused but must be handled by all as realists. The alleged power of the minority in the matter of secession suggested in the document is illusory as Hindu India will dominate the decision in favour of one all India union in all the provinces and the Muslims in Bengal and the Punjab will be at the mercy of the Hindu minority in those provinces who will exert themselves to the fullest extent and length for keeping the Muslims tied to the chariot wheel of Hinduism. Thus the Muslims will be doomed to subjection in all the provinces. We cannot barter away with our consent the future for the present while fully realising the danger of foreign aggression and notwithstanding all our anxieties to defend India and to help the prosecution of war. To do so will be a crime on our part to posterity and the generations of hundred millions of Muslim India to come.

As regards the proposals relating to the immediate adjustments in the Central and provincial Governments which we are told must be considered within the framework of the existing constitution it is difficult to gather from the document anything definite and concrete for it must necessarily depend upon the full picture when it is disclosed and it is not known to us nor is it before us yet. The document is a bare skeleton of the proposals and obviously requires a lot of filling in and adjusting before it can be made acceptable and it is one of those cases when the details will become more vital than the bare statement of certain principles.

It has roused our deepest anxieties and grave apprehensions specially with reference to the Pakistan scheme which is a matter of life and death for Muslim India. We will therefore endeavour that the principle of Pakistan which finds only veiled recognition in the document should be couched in unequivocal terms and until the right of the Muslims to keep out or accede is defined to our satisfaction we do not wish to see that the history of Palestine should be repeated as it was after the last war after we have paid for the promises in blood money and material. The document shows that Pakistan is treated as a remote possibility and that a definite preference for a new Indian Union which is the main objective and the rule of procedure and the process indicated in the document and the interviews and explanation of Sir Stafford Cripps so far are against us and we are called upon to play the game with loaded dice.

Resolutions—The open session of the Muslim League passed a resolution authorising the President Mr Jinnah, to appoint a committee to take forthwith all necessary and effective steps for the protection of life honour and property of Muslims.

Mr Jinnah explaining the resolution, referred to the grave internal and external dangers

at this juncture and the need to save the life honour and property of 100 million Muslims. He said it did not mean that they did not also have the concern and care of other fellow-men belonging to different communities, castes and creeds. He emphasised that the Muslims should organise themselves in a systematic and planned manner without any loss of time. On the committee he continued should be the right sort of men capable and selfless who could command the confidence and respect of the people. The function of the committee would be to deal with the situation as it might arise in different provinces and keep in touch with the various provincial district and primary Leagues and guide them to put into effect measures as suggested by the committee. Mr Jinnah made special reference to emergencies like shortage of food-stuffs, other necessities of life and rise in prices and said they must be dealt with. He said there might be villages or towns in which Muslims were in a handful minority and he had grave apprehensions about them in case of any disorder. He suggested that they should in cases of emergency be brought at any cost or sacrifice to places where there were a larger number of Muslims.

Another resolution endorsed the action which Mr Jinnah had taken (see earlier) in expelling from the membership of the Muslim League the Hon Mr A. K. Fazlul Huq who has completely forfeited the confidence of Muslims by his repeated betrayal of their cause generally in India and particularly in Bengal.

A resolution adopted unanimously by the Muslim League session expressed heart-felt sympathies with the Indian nationalists who had settled down in Java, Burma, Malaya and Singapore and who have had to lose their all and sailed homewards in most tragic circumstances.

Other Muslim Organisations.—A feature of Muslim activities in 1941-42 especially during the last four or five months, was the emergence rather than the reappearance of a number of Muslim organisations which claimed that each of them commanded considerable influence among large sections of the community and thereby appeared to militate against the prestige and authority of the Muslim League. Reference has already been made to the dissent expressed by the Premiers of the Punjab and Bengal to the orthodox policy of the League. Other leaders like the Nawab Bahadur of Murshidabad, Maulvi Obaidullah Sindhi, M. Y. Sharief and Sir Rafiquddin Ahmad followed suit. The Mominis, the Shi'ahs, the Azad Muslims all expressed separate viewpoints.

The All India Azad Muslim Board in March 1942 resolved: To avert the fate of those who have succumbed to aggression it is imperative that no effort should be spared to knit all the people of India into a united endeavour. The country's will should be galvanised and its immense potential effectively developed for the task of defending the country and thereby establishing its freedom in a world free of aggression. The Board is convinced that there is a general unanimity in India that the country must forthwith cease to be a Depend

ency if this end is to be achieved and that it should have the freedom enjoyed by the other free countries of the world including England and the Dominions. Representing nine constituent Muslim organisations and speaking for the bulk of the Indian Muslims, this Board fully supports this demand.

Further it feels constrained to conclude that the specious plea of the Secretary of State for India and the British Government that the Muslim League is the authoritative spokesman of the Indian Muslims and that its attitude and demands constitute an insuperable obstacle to the way of India's freedom is an indefensible subterfuge to mask the disinclination of the British Government to part with power. The serious gravity of the situation occasioned by the menace of an early invasion most imperatively demands that the British Government should immediately recognise India's freedom and transfer real power to enable the representatives of the people to assume complete responsibility for the defence of the country as a whole in full and mutual collaboration with the other free countries.

The Committee of the All India Muslim Conference adopted a resolution on the Cripps proposals, expressing the view that the solidarity, integrity and unity of India is vitally essential for the common good of the Indian people and especially in the best interests of the Muslims of India. The resolution proceeded:

The Committee cannot however lose sight of the fact that a section of the Muslims is against the introduction of a single unitary system of Government in this country apprehending such a system to be detrimental to the interests of the Muslims residing in the Muslim majority provinces. But the Committee, being conscious of the fact that the fear and apprehensions of such Muslims are the outcome of the mutual distrust and suspicion of the communities inhabiting this country has full belief that such communal divisions and animosities as exist at present will completely disappear with the establishments of full self rule in India.

The Committee holds that the proposal relating to the option given to the provinces to keep out of the proposed Indian Union has been ingeniously devised inasmuch as its practical effect would inevitably be to create several U-ters within India.

The Committee opines that the constitution making body as envisaged by the proposals would reflect the opinion of only ten per cent of the inhabitants of India and can therefore hardly be called a democratic body.

Stressing the need for transfer of control of India's defence to Indians the Committee declared that the masses must be made to feel that this war is being fought in the interest of India and that it is their own war.

"The Committee considers that the proposals are absolutely unsatisfactory and fall short of the aspirations of the Muslim masses and regards them as quite unacceptable unless they are modified in the manner suggested below—

1. That no province be allowed to keep out of the Indian Union unless the scheme

of one single Indian Union were given a fair trial for full ten years

2 That instead of allowing the existing lower houses of the provinces to nominate representatives to the constitution making body provision be made to constitute that body by electing its members by means of adult franchise

3 That the control of the Defence of India be forthwith transferred entirely into Indian hands and 4 That the peoples of the Indian states be given the right to elect representatives to the constitution making body

These claims and viewpoints of Muslims outside the Muslim League were brought to the notice of the British Government when the latter's spokesman Mr Amery said I have received a telegram from the President of the All India Muslim Conference in the sense stated. The Conference claims to speak on behalf of Muslims a Moslem community consisting chiefly of weavers and agricultural labourers and numbering from four to five millions and not forty five millions. Many Muslims belong to the Muslim League I have also seen a report of the resolutions passed at the end of February by the Board of the All India Azad Muslim Conference under the presidency of Mr Allah Bux Mr Fazlul Huq is reported to have been present. This Conference which has not previously met since 1940 is mostly supported by Muslims associated with the Congress. I am aware that Mr Jinnah's leadership is not accepted by all Muslims but I have no reason to doubt that the Muslim League remains the principal organisation voicing Moslem political opinion

Replying to the Vice President of the All India Muslim Conference said It is a pity that an authority of the rank and position of His Majesty's Secretary of State for India should betray such ignorance as to the real state of affairs in this country. It is the Muslim community, who form the bulk and backbone of the Muslim community in India. Constituted as the Muslims are we represent the masses as against the classes who as we have consistently said, are largely represented by the Muslim League and Mr Jinnah.

Referring to the Muslim League's Pakistan scheme he said The Muslim League's panacea for the ills of the Muslims does not even touch the fringe of the real problem of the Muslim masses. Therefore the Muslims have decided to stand on their own legs and carve their own destiny

Whatever Mr Amery may say or do the surging tide of mass consciousness among the Muslims will sweep all barriers and shackles that bind them. The Muslims will stop at nothing short of complete emancipation from the bondage of the higher classes on the one hand and foreign domination on the other

The Secretary of the All India Azad Muslim Conference said It is true that some of the constituent organisations of the Azad Federation have in the past been associated with the Congress, but they were similarly associated with the Muslim League until a few years ago. They were equally closely associated

with the All India Muslim Conference which once threatened to absorb the League. The Azad Muslims Federation was started in 1940 just as the All India Muslim Conference was started in 1929 to distinguish the bulk of the Indian Muslims from the attenuated League of those days. In 1929 the League had ceased to attract a majority of Indian Muslims. In 1940 it was felt by nine leading Muslim organisations that the League had become sectional and therefore they met and decided to form a federation to which the League was also invited to send its representatives. The League however chose to hold aloof. It is a well known fact that while the main bulk of the N W F P and Sind Muslims do not agree with the League's new politics, a majority of the Bengal and Punjab Muslims are far from endorsing unquestioningly what passes as the political opinion of those whom the League is believed to represent. It is true that the League voices the political opinion of a considerable body of Indian Muslims even to-day. But the Azad Muslims Federation claims to voice the political and religious opinion of a more considerable body of Muslims.

These protestations had no effect on the estimate of the British Government or of the Indian public of the strength or the influence of the Muslim League or the Muslims of India

Crope Scheme Rejected.—The proposals of the British War Cabinet were examined carefully by the Muslim League Working Committee which whilst rejecting the scheme expressed gratification that the possibility of Pakistan was recognised by implication by providing for the establishment of two or more independent unions in India. It is regretted that the proposals of His Majesty's Government embodying the fundamentals were not open to any modification and therefore no alternative proposals were invited and passed the following resolutions—

In view of the rigidity of the attitude of His Majesty's Government with regard to the fundamentals not being open to any modifications the Committee have no alternative but to say that the proposals in their present form are unacceptable.

(1) The Muslims, after 25 years of genuine efforts for the reconciliation of the two major communities and the bitter experience of the failure of such efforts, are convinced that it is neither just nor possible in the interest of peace and happiness of the two peoples to compel them to constitute one Indian Union composed of the two principal nations—Hindus and Muslims—which appears to be the main object of His Majesty's Government, as admitted in the preamble of the draft declaration the creation of more than one union being relegated only to the realm of remote possibility and is purely illusory

(2) In the Draft Declaration a constitution making body has been proposed with the primary object of creating one Indian Union. So far as the Muslim League is concerned, it has finally decided that the only solution of India's constitutional problem is the partition of India into independent zones and it will, therefore, be unfair to the Muslims to compel them to

enter such a constitution making body whose main object is the creation of a new Indian Union. With conditions as they are, it will be not only futile but on the contrary may exacerbate bitterness and animosity amongst the various elements in the country.

Besides the machinery which has been proposed for the creation of the constitution making body namely that it will consist of members elected by the newly elected lower houses of the eleven provinces upon the cessation of hostilities as a single electoral college by the system of proportional representation, is a fundamental departure from the right of the Mussalmans hitherto enjoyed by them to elect their representatives by means of separate electorates which is the only sure way in which true representatives of the Mussalmans can be chosen.

The constitution making body will take decisions by a bare majority on all questions of most vital and paramount character involved in the framing of the constitution which is a departure from the fundamental principles of justice and contrary to constitutional practice so far followed in the various countries and dominions and the Mussalmans by agreeing to this will instead of exercising their right and judgment as a constituent factor be at the entire mercy of the constitution making body in which they will be a minority of about 25 per cent.

The right of non accession to the Union as contemplated in the draft declaration has been conceded presumably in response to the insistent demands by the Mussalmans for the partition of India but the method of procedure laid down are such as to negate the professed object for in the draft proposals the right of non accession has been given to the existing provinces which have been formed from time to time for administrative convenience and on no logical basis.

The Mussalmans cannot be satisfied with such a declaration on a vital question affecting their future destiny and demand a clear and precise pronouncement on the subject. Any attempt to solve the future problem of India by a process of evading the real issues is to court disaster.

In the draft proposals no procedure has been laid down as to how the verdict of the province is to be obtained in favour of or against accession to the one union but in the letter dated 2nd of April from the Secretary of Sir Stafford Cripps, addressed to the President of the All India Muslim League it is stated that a province should reach the decision whether or not to stand out of the Union by a vote in the Legislative Assembly on a resolution to stand in.

If the majority for accession to the Union is less than 60 per cent, the minority will have the right to demand a plebiscite of the adult male population. In this connection it must be emphasized that in the case of the major provinces of Bengal and the Punjab they (the Muslims) are in a minority in the Legislative Assemblies and in the Assemblies of Sind and the Northwest Frontier Provinces the total number, namely 60 and 50 respectively is so small and the weightage given to the non Muslims so heavy that it can be easily manipulated and a decision under such conditions

cannot be the true criterion of ascertaining the real opinion of the Mussalmans of those provinces.

"As regards the suggested plebiscite in the provinces in which the Mussalmans are in a majority in the event of the requisite majority not being available in the Legislative Assembly, the procedure laid down in that reference shall be made to the whole adult population of the provinces and not to the Mussalmans alone which is to deny them the inherent right to self-determination.

(4) With regard to the Indian States it is the considered opinion of the Committee that it is a matter for them to decide whether to join or not to join or form a union.

(5) With regard to the treaties to be negotiated between the Crown and the Indian Union or Unions the proposals do not indicate as to what would happen in case of disagreement on the terms between the contracting parties nor is there any provision made as to what would be the procedure when there is a difference of opinion in negotiating a revision of treaty arrangements with the Indian States in the new situation.

(6) With regard to the Interim arrangement there is no definite proposal except the bare statement that His Majesty's Government desire and invite the effective and immediate participation of the leaders of the principal sections of the Indian people in the councils of their country of the Commonwealth and of the United Nations. The Committee are therefore unable to express their opinion until a complete picture is available.

Another reason why the Committee are unable to express their opinion on the Interim arrangements for participation in the council of the country is that Sir Stafford Cripps has made it clear that the scheme goes through as a whole or is rejected as a whole and that it would not be possible to retain only the part relating to the immediate arrangements at the Centre and discard the rest of the draft scheme and as the Committee has come to the conclusion that the proposals for the future are unacceptable it will serve no useful purpose to deal further with the question of the immediate arrangements.

In conclusion the Committee wish to point out that the position of the Muslim League has been and is that unless the principle of Pakistan scheme as embodied in the Lahore Resolution of March 1940 which is now the creed of the All India Muslim League is unequivocally accepted and the right of the Mussalmans to self determination is conceded by means of a machinery which will respect the true verdict of Muslim India it is not possible for the Muslim League to accept any proposal or scheme regarding the future.

Views on National Government.—A statement issued by Mr. Jinnah after the departure of Sir Stafford Cripps from India lent support to the views expressed by the Lord Privy Seal and upheld the reasons for Sir Stafford's rejection of the Congress demand for a National Government. Mr. Jinnah's statement said:

Regarding the immediate present it was not open to us to suggest any alternatives as we had to accept proposals as a whole or not

at all. Having decided on the future we thought that no useful purpose would be served in discussing the present and we also thought that until a complete picture was available it was not possible for us to deal with it. Details with regard to the present were of vital importance and in this case they were more important than the principles themselves. No discussion however took place between myself and Sir Stafford Cripps regarding the present except that details were to be worked out and settled by the Viceroy with the parties concerned.

I now gather from the maze of correspondence and statements that has been issued that Congress leaders had alleged that Sir Stafford Cripps was discussing with them the alternative proposals of theirs which in fact have been denied by Sir Stafford Cripps. I have no knowledge of what took place between him and the Congress but I may add that if any alternative proposals of the Congress were accepted which means the immediate freedom and independence of India and a Cabinet to be nominated by the major parties with collective responsibility that the Viceroy is to act as a constitutional Governor General and the Secretary of State and H. M. Government will have no power to interfere—which means the setting up of a Cabinet irremovable and responsible to nobody but the majority and would be at the command of the Congress in the Cabinet.

If such an adjustment were arrived at then it would have been a sort of Fascist Grand Council and the Muslims and other minorities would have been entirely at the mercy of the Congress Raj. Then to say that the future would be considered after the war is to my

mind absurd because there would be nothing left for the future to discuss except details. We stand for freedom and independence yielding to none in that respect but the Congress scheme will not be freedom and independence for the Muslims and other minorities of India who will be at the entire mercy of a Congress Cabinet. Therefore we hold that the Congress proposals are short-circuiting the paramount and vital issue in the name of national demand and National Government. This has been the game of the Congress from the very beginning and that is what we have been realising.

The Congress recognised that a Cabinet formed under its scheme would be a composite Cabinet composed of different groups representing various ideologies in the country some coming from the Congress some from the Hindu Mahasabha the Muslim League and Sikhs. I have noted that Pandit Nehru made it quite clear when he said that suppose in a Cabinet of 15 there was a Congress majority of eight or nine. Added to that Congress majority would be the Hindu Mahasabha and Sikhs and the Muslims would be left in a negligible and ineffective minority. The only consolation Pandit Nehru offered was that if Mussalmans did not agree they could resign. If this is not the foregone conclusion of the tyranny of the majority what else could it be? I am also surprised to read Pandit Nehru's statement that I would not have objected to the Congress demand for a national Government. I assert that if the Congress demand had been accepted it would be a death knell to the Mussalmans of India. Mr. Jinnah concluded that the Congress carried on negotiations with Sir Stafford Cripps over the heads of all other parties whom it utterly ignored.

Government of India Act, 1935

The seeds of the Government of India Act which was placed on the Statute Book in 1935 were sown as far back as the autumn of 1930 when the Indian Round Table Conference met in London for the first time. Three sessions of the conference were held and it concluded on December 24 1932. Some months later the British Government published their proposals for the reform of the Indian constitution based on the largest measure of agreement reached at the three sessions of the Round Table Conference. These proposals were embodied in a White Paper (March 1933) which was referred to a Committee of the two Houses of Parliament. The Committee submitted its report in October 1934. Based on the recommendations of this Committee the Government of India Bill was presented to Parliament in January 1935. The Bill has since become law with a few changes in its passage through Parliament.

Federation.—The Act proposed to set up a Federation with linked responsibility at the Centre and provide for autonomy to the eleven provinces of composing British India.

Formally inaugurated in April 1937 the provincial part of the new constitution functioned for about two and a half years with a fair amount of smoothness but at the end of that period it broke down in seven out of the eleven provinces by the refusal of the party in power to carry on the work of Government. Thereupon the Governors of those provinces assumed sole charge of the Administration aided by Advisers responsible to him. The constitution remained virtually suspended.

The federal part of the constitution could not be inaugurated according to plan owing to diverse factors—the difficulties experienced by the Princes in acceding to Federation except on the fulfilment of certain conditions the internal political and communal differences in British India and above all by the declaration of war which militated against any major changes in the governmental machinery at the centre.

Suspension of the Federal idea.—The Viceroy openly announced that steps for the enforcement of the federal part of the constitution would remain suspended, although he also expressed the hope that conditions internal as well as external, would so settle down as to permit of a reconsideration of the position at an early date. Apart from the war situation which precludes any major undertaking relating to the Indian constitution the steadily deteriorating internal political controversies have pushed into the background measures for the revival of the Federation envisaged by the Government of India Act. Indeed present trends indicate that the 1935 Federation is virtually dead. There seems little prospect of a resurrection of the federal ideal of the Round Table Conference. The very principles underlying the structure of the Central Government—and even the Provincial Governments—have been challenged. Wide spread and influential demands have been made for an examination *de novo* of the entire constitu-

tional fabric and the authorities have more or less agreed to those demands. Like everything else in a totalitarian war the Government of India Act of 1935 is in the melting pot: the federal part of it has been put off while the provincial part has been suspended in seven out of the eleven provinces. Thus the account hereinafter relates mainly to the provisions in the statute rather than to what is in vogue. The provincial part is of course in operation in the Punjab Bengal Assam and Sind.

Amendments to the Act.—The Provincial Constitution was suspended in seven out of eleven provinces as the indirect result of the war—the popular Minister in those provinces having resigned on an issue somewhat connected with the war and rendered the formation of other Ministries in their places impossible owing to the numerical disposition of the party strength. The constitution was restored in one of the provinces namely Orissa in the autumn of 1941 thanks to the successful efforts of the Opposition to win away certain members from the obstructive majority party. As against this gain to the constitution however Assam faded out of the picture during Christmas work in 1941. Following the resignation of one of his principal supporters in the *Latin* in the Premier of Assam resigned and the Governor finding it impossible to form a stable Ministry took over the reins of administration. Invoking section 93 of the Government of India Act. Other changes were made in the Act during the past few months as a direct consequence of the war.

One of these changes was effected by an alteration in the King Emperor's Instrument of Instructions to the Governor General. By virtue of the change thus effected the Governor General is freed from the necessity of submitting for the signification of the Crown's pleasure any measure involving certain special responsibilities of the Governor General. It has been laid down that the Governor General need not so submit any measure or measures if he is satisfied that conditions created by the present war have rendered it impossible or inexpedient to do so.

Similarly in order to provide against possible constitutional complications that may arise from an interruption of communications between Great Britain and India it has been laid down by amendments to the Government of India Act of 1935 passed by Parliament that the Governor General should have the power of making appointments to and removal from any office in India which under the original Act is exercisable by His Majesty. The amendment also authorises the Governor General to enact by notifications in the *Gazette of India* provisions which could be made by Orders in Council. There were similar changes made solely with the object of obviating the delay which might occur in consequence of the war in securing prior approval of the authorities in England.

The Federation which the Act as it stands provides differs from those in other parts of the world because its units are not

homogeneous. The Indian States differ widely from the British India Provinces. These complications react upon the constitution. As Sir Samuel Hoare said in the House of Commons they react for instance upon the provisions as to how the federation is to be formed. For it is obvious that the Princes being voluntary agents can only enter of their own volition. They react again upon the kind of executive and the kind of legislature that is proposed each side of the federation obviously demanding adequate representation both in the government and in the federal legislature. They react again upon the relations between the two Federal Chambers the Princes from the first attaching the greatest possible importance to the Chambers having equal powers. They react further upon the list of federal subjects the Princes again rightly insisting that apart from the functions of Government which they surrender to the Federation there should be no interference in their internal sovereignty. These complications make a formidable list of difficulties.

Federal Executive.—The Act sets up a Federal Executive similar to the responsible executives in other federations of the Empire. The whole executive power of the Federation is conferred on the Governor General and his Ministers are appointed to aid and advise him and hold office during his pleasure. The Ministry shall consist of persons in whom the Legislature has confidence and the Governor General shall dismiss them when they lose that confidence.

Governor-General special powers.—In contrast however with Dominion Constitutions the Governor General of India is given special powers by the Act. In the first place the Departments of Foreign Affairs Ecclesiastical Affairs and Defence are reserved and will be administered by him through the agency of councillors. In the second place in all other departments he may act in certain cases and for certain purposes otherwise than on his ministers' advice.

The Act imposes upon him special responsibilities for:

- (a) The prevention of any grave menace to the peace or tranquillity of India or any part thereof
- (b) The safeguarding of the financial stability and credit of the Federal Government
- (c) The safeguarding of the legitimate interests of the minorities
- (d) The securing to and to the dependents of persons who are or have been members of the public services of any rights provided or preserved for them by or under the Act and the safeguarding of their legitimate interests
- (e) The prevention of discrimination
- (f) The prevention of action which would subject goods of United Kingdom or Burmese origin imported into India to discriminatory or penal treatment
- (g) The protection of the rights of any Indian State and the rights and dignity of the rulers thereof

(A) The securing that the due discharge of his functions with respect to matters with respect to which he is by or under the Act required to act in his discretion or to exercise his individual judgment is not prejudiced or impeded by any course of action taken with respect to any other matter

The Federal Legislature.—The Federal Legislature will consist of two chambers the Council of State and the Federal Assembly. The Council of State will consist of not more than 104 representatives of the federating Indian States and of 156 representatives of British India elected by the people of whom six will be chosen by the Governor General in his discretion. The Council of States is to be a permanent body with a provision that a third of its members should retire every third year. The representatives of British India are to be chosen on a communal basis while those of the States will be appointed by the Rulers of the States concerned in accordance with the relative rank and importance of the State. (See table at the end of this chapter for the composition of the British Indian half of the Council of State)

The Federal Assembly will consist of not more than 125 representatives of the federating Indian States and of 250 representatives of British India mostly elected by the Provincial Legislatures—by the lower House of the Provincial Legislatures wherever there are two Houses.

The Federal Assembly is to continue for five years from the date appointed for their first meeting after the expiration of which it will be dissolved. The distribution of seats here will also be on a communal basis. Thus the Hindu Muslim and Sikh seats will be filled by the representatives of those communities in the Provincial Assemblies voting separately for a prescribed number of communal seats. Depressed Classes will have representation from among the Hindu seats. Besides these three main groups Europeans Anglo-Indians Indian Christians representatives of commerce and industry landholders representatives of labour and women will have seats. (See table at the end of this chapter for the composition of the British Indian half of the Federal Assembly)

An annual financial statement setting out the estimated receipts and expenditure of the Federation in respect of every financial year will be laid before both Chambers of the Federal Legislature. The estimates of expenditure will show separately the sums required to meet expenditure charged upon the revenues of the Federation and the sums required to meet other expenditure proposed to be made from the revenues of the Federation. Items falling under the former category will not be submitted to the vote of the Legislature. With a view to the observance of the well recognised principle of public finance that no proposal for the imposition of taxation or for the appropriation of public revenues should be made otherwise than on the responsibility of the Executive it is provided in the Act that no demand for a grant is to be made unless recommended by the Governor General.

The Federal Legislature alone may make laws upon any federal subject and the Provincial Legislature alone may make laws upon any subject treated as concurrent but in case of conflict Federal legislation shall prevail unless the provincial law has been reserved for the consideration of the Governor General and has received his assent.

The foregoing is a description of the framework of the Indian Federation as laid down in the Government of India Act. When half of the Indian States are the basis of population and of representation in the Upper Federal Chamber have acceded and after both Houses of Parliament have presented an address to His Majesty praying that the Federation may be brought into existence a Royal Proclamation will give legal effect to the Federation of India.

New Provinces created by the Act.—The creation of a number of autonomous administrative units including two new ones namely Sind and Orissa some of which have in recent years found it very difficult to make both ends meet and the need for a strong Central Government presented some very difficult financial problems for the farmers of the constitution. The allocation of sources of taxation and the settlement of heads of expenditure and debts not only to enable the provinces progressively to develop but also to provide the Central Government with adequate funds to discharge its All India responsibilities was the main problem. To secure a satisfactory solution of this problem the expert advice of Sir Otto Niemeyer was sought. His recommendations are summarised elsewhere in this volume.

The Government of India Act also establishes a Statutory Railway authority which will take over the executive authority of the Federation in respect of the regulation construction maintenance and operation of railways coming under the jurisdiction of the Federal Government. The powers which the Governor General possesses of taking action in virtue of special responsibilities and in respect of the reserved subjects extend to the giving of directions to the Railway authority.

The Federal Court.—Under the Act a Federal Court is to be established which will consist of a Chief Justice of India and such number of other Judges as His Majesty may deem necessary. The Federal Court will ordinarily sit in Delhi. It will have an original jurisdiction and an appellate jurisdiction in the later in appeals from High Courts in British India and in Federated States. Its original jurisdiction will extend to any dispute between any two or more of the following namely the Federation, any of the Provinces and any of the Federated States. Provision is also made for an appeal to the Judicial Committee of the Privy Council from a decision of the Federal Court.

The Act abolishes the Council of the Secretary of State for India and makes him a Minister of the Crown individually responsible for the exercise of all authority vested in the Crown in relation to the affairs of India. He will however, continue to be a member of the Cabinet and of Parliament to which bodies he will be responsible for his actions.

Provincial Constitutions.—It may take two or three years before the federal part of the constitution is ready to function. In the meantime Provincial Autonomy is in operation. Under the Act there are eleven Governor Provinces namely Madras Bombay Bengal the United Provinces the Punjab Bihar the Central Provinces and Berar Assam the N.W.F. Provinces Orissa and Sind with power to the Crown by Order in Council to create if deemed necessary a new Province increase or diminish the area of any province or alter the boundaries of any Province. The Provincial Executive is similar to that of the Federation in form.

In addition to the Governor Provinces there are the following Chief Commissioner provinces British Baluchistan Delhi Almoravara Coorg the Andaman and Nicobar Islands the area known as Panth Piplia and such other Chief Commissioner Provinces as may be created under the Act which will be administered by the Governor-General acting through a Chief Commissioner to be appointed by him.

The Provinces of Madras Bombay Bengal the United Provinces Bihar and Assam have two Chambers Upper and Lower namely the Legislative Council and the Legislative Assembly while the others have only one Chamber the Legislative Assembly. Representation in the Legislative Assembly is by separate electorates for each community based on the provisions of the Communal Award as modified by the Poona Pact of September 25 1932 under which a number of seats out of the seats classified as general seats are reserved to the Depressed Classes. The life of the Provincial Legislatures is the same as that of the Federal.

In provinces with bicameral legislatures the Upper House will see that the Lower House does not indulge in hasty and ill conceived legislation due to the temporary majority of any party. But the deliberations of the Upper House will also be subject to examination by the Lower House.

While there are no nominated members and no officials in the Assembly—all members of the Lower House are elected—the Governor has the right to fill some seats in the Provincial Council wherever one exists. (See tables at the end of this Chapter for the composition of the Provincial Councils and Provincial Assemblies.)

Franchise.—The constitution sets out the qualifications of electors. There are certain provisions of a general nature applicable to all Provinces while particular Provinces are dealt with separately. Provinces while as in some cases the payment of local taxation in other cases payment of land revenue is the main qualification. The new constitution has extended the existing franchise so as to enfranchise about 10 per cent of the total population of British India. The Acts of 1915 and 1919 provided for an electorate of approximately 3 per cent of the total population the franchise based mainly on a property qualification. Under the reformed constitution women have a much

wider franchise over 8,000,000 women voters as compared with 515,000 provided by the acts of 1916 and 1919. The Act of 1935 secures representation for women for the Depressed Classes for industrial labour and for special interests and for the bulk of the small landholders, small cultivators, urban ratepayers as well as a substantial section of the poorer classes.

Powers of Provincial Governments.—Under the old constitution the Provinces had no original or independent powers. The local Governments were under the superintendence, direction and control of the Governor General in Council and the Secretary of State for India. The first step which the new constitution took was to create provinces with independence of their own and to assign to them a certain exclusive share of the activities of Government. All subjects have been transferred to the control of the legislature. The subjects which are classified as provincial are as indicated above exclusively dealt with by the Provincial Government which have power to make laws for peace and good government. There are no more reserved subjects. All subjects are transferred. The administration of all these subjects have passed from the bureaucracy to the control of Ministers responsible to the legislature. Such subjects include public order, courts, police, prisons, education, health and sanitation, public works, agriculture, forests, land revenue, excise, tolls, unemployment and certain classes of taxation.

Generally the Ministers are entrusted with the administration of their own departments. Under the old constitution they were merely advisers of the Governor. Under the new Constitution they are effective executives. Only in those spheres where the Governor retains a special responsibility does he have the right to act independently of the Ministers should he differ from their views. But normally such occasions are not frequent.

Both the Upper and Lower Houses have power to initiate legislation except that Money Bills can be initiated in the Lower House only. Should there be a difference of opinion between the two Houses with regard to a Bill the Governor has power to convene a joint session of the two Houses. Any Bill affirmed by the majority in the joint session shall be taken to have been duly passed.

Governors' Powers.—Under the new Constitution the Governor has almost the same special responsibilities as the Governor-General except the one relating to financial stability and credit. The Governor has not withstanding the advice of his Ministers power to take whatever action he thinks necessary for the due discharge of his responsibility for preserving the peace and tranquillity of the Provinces.

The following tables give the strength and composition of the Federal and Provincial Legislatures under the new constitution—

THE COUNCIL OF STATE,

Representatives of British India.

Provinces or Community	Total seats	General seats	Seats for scheduled castes	Sikh seats	Muslim seats	Women's seats.

Note—In Bombay seven of the general seats are to be reserved for Marathas

In the Punjab one of the Landholders seats is to be a seat to be filled by a Tumandar

In Assam and Orissa the seats reserved for women are to be non communal seats.

The Indian Legislature

War continued to overshadow the work of the Indian Legislature and several legislative and taxation measures were enacted and 10 amending Ordinances and 9 original Ordinances were promulgated during the year 1941 & to promote the war effort. The Central Legislative Assembly elected normally for three years completed the 8th year of its life on 8 September 1942 and in all probability its life will be extended by another year.

The Central Assembly held 14 sittings during the autumn session of 1941 and 32 sittings during the bulk of session of 1942. The Council of State held 8 and 16 sittings respectively during the corresponding sessions. The Congress Party which constitutes the main opposition in the Central Assembly and had resolved to keep away from the sittings of the House since its 4th session of 1939 returned to the Assembly for one day only each session to fulfil the letter of the Law to prevent the seats of Congress Members from being declared vacant on account of continuous absence. The Muslim League Party withdrew from the autumn session of the Central Assembly as a protest against the scheme of expansion of the Viceroy's Executive Council and returned to the House for the budget session of 1942.

The Viceroy Lord Linlithgow did not address a joint session of the two Houses during the year.

Governor General's Ordinances.—After the invasion of Norway the Government of India Act 1935 was amended empowering the Viceroy to make Ordinances which would remain in force for the duration of the war and one year thereafter. The original power restricted the life of such Ordinances to 6 months. Lord Linlithgow enacted 19 Ordinances during the year ending March 31 1942. The important ones are—

The War Injuries Ordinance 1941.—This is an Ordinance to make provision for the grant of relief in respect of certain personal injuries sustained during the continuance of the present hostilities. Section 3 of the Ordinance empowers the Central Government to make a scheme or schemes in accordance with the provisions of this Ordinance providing for the grant of relief in respect of the following injuries sustained during the continuance of the present hostilities, namely—(a) war injuries sustained by lawfully occupied persons (with such exceptions if any as may be specified in the scheme) and by persons of such other classes as may be so specified; and (b) war service injuries sustained by civil defence volunteers and authorise the Central Government or any authority authorised by the Central Government to make payments under the scheme. By section 5 power is taken to ascertain the earnings of the person injured in respect of any period before he sustained the injury and to punish the person avoiding to satisfy the Government in this respect with fine which may extend to Rs 300. Under section 6 of the Ordinance any person who for the purpose of obtaining a payment of grant under

a scheme either for himself or for any other person knowingly makes any untrue statement or untrue representation shall be punishable with imprisonment for a term which may extend to three months.

The Active Service Ordinance 1941.—This is an Ordinance to declare that certain persons shall be deemed to be on active service for the purposes of the Army Act the Air Force Act the Indian Army Act 1911 and the Indian Air Force Act 1911. By section 2 all persons forming part of a unit (persons who are employed by or as in the service of or as followers of or company any portion of His Majesty's Forces) shall until such time as the Central Government may by notification in the official Gazette declare to be the date on which the present hostilities cease be deemed for the purposes of each of the said Acts to be on active service. By section 3 of the Ordinance no punishment inflicted and no order passed or other action taken in any proceedings held under any of the Acts specified in section 2 shall after the commencement of this Ordinance be called in question in any court on the ground only that the person on whom the punishment was inflicted or to whose prejudice the order was passed or the action was taken was not on active service. If (a) the act for which the punishment was inflicted or in respect of which the proceedings were commenced occurred on or after the 3rd day of September 1939 and (b) such person at the time the act was committed formed part of or was employed by or was in the service of or was a follower of or accompanied any portion of His Majesty's Forces.

The Essential Services (Maintenance) Ordinance 1941.—This Ordinance makes provision for the maintenance of certain essential services. By section 3 this Ordinance shall apply to all employment under the Crown and to any employment or class of employment which the Central Government or a Provincial Government being of opinion that such employment or class of employment is essential for security the defence of British India the public safety the maintenance of public order or the efficient prosecution of war. By section 4 power is taken to order persons engaged in certain employments to remain in specified areas. Provision is made for declaring the disobedience of any lawful order given to him in the course of employment or without any reasonable excuse as endangering such employment or absencing himself from work or departure from any area specified in the order an offence under the Ordinance. Penalties and procedure are provided for under section 7.

The Special Criminal Courts Ordinance, 1942.—This Ordinance provides for the setting up of special criminal courts of Special Judges Special Magistrates and also Summary Courts. It shall come into force in any Province only if the provincial Government being satisfied of the existence of an emergency arising from a hostile attack on India or on a country neighbouring India or from the imminence of such an attack by notification in the official Gazette

declares it to be in force in the Province, and shall cease to be in force when such notification is rescinded. It is the first duty of Government to do all it can to protect the law-abiding population against such outbreaks and to enable Government to act effectively it is essential that it should be able to apply deterrent penalties to offenders with the minimum of delay. The Penalties (Enhancement) Ordinance and this Ordinance have this object in view. Some of their provisions may at first sight seem to be severe but when the circumstances in which and the persons to whom they are to be applied are remembered no one can say that they go too far.

The Motor Vehicles (Drivers) Ordinance 1942.—This is an Ordinance to provide for the requisitioning on behalf of Government of the services of persons capable of driving motor vehicles. By section 4 a Provincial Government is authorised to ask any licensing authority to prepare for the Province concerned a register showing the names of such persons within the Province who are capable of driving a motor vehicle. By section 4, power to requisition the services of any of the persons entered in the register is taken. The services of persons so requisitioned shall be utilised within the Province. Penalties are provided for in section 6 of the Ordinance.

The Cotton Fund Ordinance 1942.—This Ordinance enables a fund to be established for financing measures for the benefit of the growers of cotton. Section 2 of the Ordinance imposes an additional duty of customs on raw cotton imported into any port in British India at the rate of one anna per pound. Section 3 empowers the Central Government to utilise the proceeds of the additional duty in financing such measures for the benefit of the growers of cotton in India as the Central Government thinks fit.

The Civil Pioneer Force Ordinance, 1942.—This is an Ordinance to constitute a Civil Pioneer Force for service in British India and to provide for the organisation control and discipline thereof. This Force will under section 4 of the Ordinance be required to carry out the construction or demolition of buildings the clearing of debris the building of roads the loading or unloading of transport vehicles etc. Penalties are provided for major and minor offences in sections 11 and 12 of the Ordinance.

War Risk Insurance of Factories.—An Ordinance relating to compulsory Insurance of Factories was promulgated as the financial year closed. It covers damages caused by the enemy or in combating the enemy to the plant and machinery and buildings of factories. Damages resulting from destructive measures taken by the Government with a view to deny facilities to the enemy will also be covered. The premium payable is 4% of value of the property payable in instalments cover being provided up to March 31, 1944. The Government's liability is 80% of the damage and the insured will have to bear the first Rs. 1,000 or 20% of the claim whichever is greater. Policies are accepted through insurance companies acting as Government agents.

An Ordinance amending the War Risks (goods) Insurance, 1940, has made three important changes:

(1) That the definition of the expression War Risks now includes damages resulting from destructive action taken by or under orders of Government with a view to denying facilities to the enemy.

(2) That if the premium for a quarter is changed power has been taken to charge the higher rate to persons who have already taken policies at the lower rate.

(3) That the goods owned by firms carrying on business in British India which are situated in the 44th area inside the Cochin port limits and also inside the municipal limits of Erna kulam and Mattancherry are also covered by this amendment on a compulsory basis.

CENTRAL BUDGET 1942-43

The Central Budget for 1942-43 was presented to the Central Assembly by Sir Jeremy Baskin, Finance Member, on February 28, 1942. It disclosed a revenue deficit of Rs. 17 crores for 1941-42 and a prospective deficit on the present basis of taxation of Rs. 47 crores in 1942-43. The revised estimate of Defence expenditure for 1941-42 was placed at Rs. 102 crores. This expenditure for 1942-43 was estimated at Rs. 133 crores. The Finance Member stated that this was only a fraction of the total sum being spent in India on the war. He announced that the amount of expenditure on Defence Services and Supplies that the Government of India expected to recover from His Majesty's Government under the operation of the Financial Settlement would amount to about Rs. 200 crores for 1941-42 and exceed Rs. 400 crores in 1942-43. The share of the provinces in the income tax would be, he stated, 739 crores in 1941-42 and Rs. 837 in 1942-43. The Finance Member observed in this connection that this is considerably more than the total sum which at the time of the Niemeyer Award the provinces were expected to receive at the end of the ten year devolution period or than ever appeared to be possible before the outbreak of the war.

The total revenue estimates for 1942-43 were placed at Rs. 140 crores as compared with Rs. 120.63 crores in the revised estimates of 1941-42. The yield from customs duties was taken at Rs. 30 crores as against Rs. 36 crores revised. The Finance Member explained that this reduced estimate was due to a considerable drop in imports expected as a result of extension of the war to the Pacific. The yield from Corporation Tax and Income-tax together with the Central Surcharge was expected to increase by over Rs. 3 crores and the collections of the Excess Profits Tax were put at Rs. 20 crores as compared with Rs. 8 crores in the current year. On this basis, the Finance Member stated, the divisible pool of Income-tax was expected to increase to Rs. 25.75 crores. On the assumption that the sum to be retained by the Centre from the provincial moiety would be maintained at Rs. 45 crores, the share of the provinces in 1942-43 was expected to reach the figure of Rs. 837 crores.

DEFENCE EXPENDITURE.

The Defence Budget for 1942-43 was placed at Rs 133 crores made up as follows —

(1) Basic normal budget	36 77 crores
(2) Effect of rise in prices	6 52
(3) India's war measures	81 90
(4) Non effective charges	8 41

Of the total amounts shown roughly Rs 4 crores the Finance Member stated represented initial expenditures and Rs 36 crores annual recurring expenditure India's Defence expenditure he further stated was only a fraction—about one fourth—of the gross Defence expenditure likely to be brought to account in India's books during 1942-43. In other words the amount of expenditure on Defence Services and Supplies that the Government of India expected to recover from His Majesty's Government during 1942-43 under the operation of the Financial Settlement would exceed the enormous total of Rs 400 crores.

Civil expenditure estimates showed increases amounting to Rs 9.63 crores as compared with the revised estimates for 1941-42. Chief provisions which resulted in this increased expenditure mainly related to essential measures connected with the war particularly Rs 4 crores under expenditure on Civil Defence.

The financial position for 1942-43 was thus summarized by the Finance Member —

	Crores of Rupees
Civil estimates	54 07
Defence expenditure	133 00
Total expenditure estimate	187 07
Total revenue at the existing level of taxation	140 00
Prospective deficit	47 07

The Finance Member proposed to meet a part of this deficit by fresh taxation estimated to yield Rs 12 crores leaving a deficit of Rs 35 crores to be covered by the borrowing programme.

The Finance Member then announced his fresh measures of taxation. He proposed to make incomes from Rs. 1 000 to Rs. 2 000 liable to tax at 6 pias in the rupee over the first Rs. 50 of total income (subsequently however the exemption limit was raised to Rs. 1 600 in deference to criticisms in the Assembly during Budget debates and discussions over the Finance Bill). This liability would however be completely discharged he stated if the assessee deposited one and a quarter times the amount of tax liable in a Defence Savings Bank Account from which sums could not be withdrawn till one year after the end of the war and on which 2½ per cent interest would be paid. The Surcharge on Income-tax was raised from the previous 3½ per cent level to a scale which runs from 6 pias in the rupee on incomes between Rs. 1 500 and Rs. 5 000 to 9 pias in the rupee on the next Rs. 5 000 1 anna 2 pias on the next Rs. 5 000 and 1 anna 3 pias on the balance over Rs. 15 000 the last being equivalent to a 50 per cent surcharge. At the same time Corporation tax was raised to 1½ annas in the rupee. The

Finance Member informed that for incomes not exceeding Rs. 6 000 an amount of the tax equal to half per cent of the Assessee's income would be fund for repayment to him after the end of the war.

The Finance Member announced that the rate of Excess Profits Tax would be retained at 10 per cent but as an incentive to economy in business administration he stated that Government would contribute an amount up to one-tenth of the Excess Profits Tax paid to a reserve for the re-equipment of industry after the war provided the assessee deposited double this amount. The assessee's contribution to this reserve would be repayable within 12 months of the end of the war and till then would earn 2 per cent simple interest.

The above measures of direct taxation after excluding repayment deposits were expected to bring in Rs. 530 lakhs.

The main proposal of indirect taxation was the levy of an emergency surcharge of one-fifth on all customs import duties. The only exceptions were petrol the tax on which was increased separately from 12 annas to 16 annas a gallon raw cotton on which the duty had been previously doubled and certain imports from Burma which were excluded by the operation of the Trade Agreement with that country. The duty on imported salt was to continue at the old rate and the excise duty on kerosene was raised to the enhanced import duty. This additional revenue from this overall surcharge was estimated at Rs. 50 lakhs.

The final proposal was an increase in post and telegraph rates to yield one crore. The ordinary letter rate was increased from 1½ annas to 1½ pias the postcard remaining unchanged. The minimum rate for ordinary telegram was raised from 10 annas to 12 annas and for express telegrams from Rs. 1-4-0 to Rs. 1-8-0. The surcharge on trunk call fees was also raised from 10 per cent to 20 per cent.

Discussing the ways and means position the Finance Member gave a detailed exposition of the Sterling Debt Repatriation Scheme. Under the compulsory Sterling Debt Repatriation, the total terminable stock acquired amounted to Rs. 97 crores. Including the market purchases which preceded this first compulsory acquisition the total Sterling debt had been reduced by £101 million and the annual interest payments in sterling by over 4 million. The second compulsory scheme of repatriation which had recently been inaugurated in respect of the non terminable Sterling loans would according to the Finance Member require about £70 million for the 2½ per cent and 3 per cent Stocks. Another £70 million would be required at the end of 1942-43 for payments in connection with the 3½ per cent Stock. The Finance Member stated that the Reserve Bank would be able to make these amounts available to Government without any strain on its Sterling resources on account of its continued large scale acquisition of Sterling.

Answering some of the criticisms against the repatriation scheme the Finance Member stated that the real gain to the country lay in the

liquidation of the external obligations, which might prove an embarrassment in future and their replacement by internal debt.

Railway Budget, 1941-42.—Introducing the Railway Budget on February 18 1942 the Communications Member Sir Andrew Clow stated that against the original forecast of a surplus of 11.83 crores the year 1941-42 was expected to end with a surplus of 26.20 crores which was 7.74 crores more than the actual surplus of 1940-41. For 1941-42 the total traffic receipts from State owned lines were expected to be 127 crores, 4.4 about 16 crores more than the previous year and 18.75 crores more than the original estimate. Total working expenses including 12½ crores for depreciation were 73.19 crores or about 7½ crores more than the previous year. Of the expected surplus of 26.20 crores 19.12 crores would go to general revenues and 7.08 crores to the depreciation fund in repayment of the loans taken from it in past years of deficit. Of the 19.12 crores paid to general revenues 4.80 crores would be treated as current contribution while the balance of 14.32 crores would be taken in reduction of the arrears of contribution. The liability of the railway revenues to general revenues at the end of 1941-42 in respect of past arrears would stand at 13.88 crores only while the outstanding loan from the depreciation fund would stand at 23.21 crores. The amount in the railway reserve would stand at the end of the year at 6.79 crores.

1942-43 traffic receipts were estimated at 12.4 crores and working expenses at 70½ crores while the surplus was expected to be 27.96 crores of which 20.13 crores would be transferred to general revenues and 7.83 crores to the depreciation fund.

The moratorium resolution keeping in abeyance the liability of railway revenues to the depreciation fund for the loans taken therefrom and to the general revenues for the arrear contribution expired with the close of the budget year 1941-42. If it were not renewed and the

terms of the separation convention were acted upon strictly the entire railway surplus would go towards repayment of the loans taken from the depreciation fund. As the general revenues cannot in the conditions created by the war afford to do without a substantial assistance from the railway revenues the moratorium has been extended by a year and Sir Andrew Clow promised that Government would in the light of the position reached by the autumn place before the House their proposals either for a revision of the existing convention or for further interim arrangements to meet the war situation only.

During the course of the year there were a few enhancements in rates and fares. The East Indian and the North Western Railways passenger fares were enhanced to bring them into line with those on other large railway systems while with a view to preventing the increasing tendency to send goods by passenger trains the rates for parcels and luggage were increased by another two annas in the rupee leaving the existing exceptions, e.g. newspapers intact. In order to ensure a better use of wagon supplies at a time when they are badly wanted an extra charge of two annas in the rupee has been imposed on consignments of food grains of less than a wagon while the rebate on wheat exported west of Aden has been withdrawn. All these changes take effect from the 1st of May 1942.

During the year 1942-43 the B & N W and R & K Railways and two small branch lines will be purchased by the State at a cost of Rs 90 crores. With this development the entire railway system of Northern India, with the exception of unimportant light railways and some lines owned by Indian States will come under State management the mileage under State management thereby increasing from 17,000 miles to 24,000 miles and the number of railway employees in the service of the State will increase from 3,90,000 to over 5,00,000.

Eastern Group Conference

In order to co-ordinate the industrial war effort of the eastern countries belonging to the British Commonwealth of Nations a Conference known as the Eastern Group Conference was held in New Delhi in October 1940, and was attended by delegates from Australia, New Zealand, South Africa, North and South Rhodesia, Kenya, Tanganyika, Newfoundland, Zanzibar, Burma, Ceylon, Malaya, Hongkong and Palestine. The Indian delegation to the Conference was an official one while the United Kingdom was represented by a Supply Mission headed by Sir Alexander Roger.

The object of the Conference was to bring all the eastern industrial countries together as a single block for the production of war materials and to make them as far as possible self supporting for all supply purposes. One of the functions of the Conference was to devise means to avoid duplication. Although the work of the Conference was limited to war supply problems

conversations not concerned with war supply were conducted outside the Conference proper under the aegis of the Commerce Department of the Government of India.

Eastern Group Supply Council.—The deliberations of the Conference led to the formation of a permanent body called the Eastern Group Supply Council under the Chairmanship of Sir Archibald Carter as the civil organisation responsible for co-ordinating supplies and the Central Provision Office as its military counterpart, with Major General Holden as the Controller General of Army Provision, responsible for co-ordinating military requirements. The primary function of the Eastern Group Supply Council is to arrange supplies from the eastern group countries to meet the demands of the Central Provision Office, and in doing so the Council helps in the co-ordination of production plans within the different Group countries.

The Indian Tariff Board

The Indian Tariff Board is an *ad hoc* body constituted from time to time as necessity arises to investigate the claims made by any Indian industry to protection. It generally consists of a President and two members one of whom is normally a Government official. It has subject to the approval of the Government of India, power to co-opt other members for particular enquiries. It tours over the industrial centres in India where the industry referred to it is located and if satisfied after detailed enquiries that the claim for protection is justified it makes its recommendations to the Government of India. The last Tariff Board became *functus officio* early in 1930 after completing an enquiry into the question of extending protection to the Indian agriculture industry.

Indians Overseas

Numbers.—The total Indian population overseas, according to the latest available estimates is as follows —

Name of country		Indian population	Date of estimates
<i>British Empire</i>			
1	Ceylon	800 000	1940
2	British Malaya*	744,908	1930
3	Hongkong	4 745	1931
4	Mauritius	280 885	1938
5	Seychelles	503	1931
6	Gibraltar	80	1932
7	Nigeria	52	1931
8	Kenya	44 635	1938
9	Uganda	18,800	1937
10	Nyasaland	1 631 (Asiatics)	1937
11	Zanzibar	14 232	1931
12	Tanganyika Territory	23,422	1931
13	Jamaica	19 030	1938
14	Trinidad	161 106	1930
15	British Guiana	142 726	1938
16	Fiji Islands	94 966	1939
17	Northern Rhodesia	421 (Asiatics)	1937
18	Southern Rhodesia	2,184 (Asiatics)	1936
19	Canada	1 590	1931
20	Australia	2,404	1938
21	New Zealand	1 160	1932
22	South Africa—Natal	183 646	1936
23	Transvaal	26 561	1936

General.—The recognition of the importance attached by public opinion in this country to the problems of Indians residing in other parts of the Empire led to the creation of the Department of Indians Overseas under the portfolio of a separate Member of His Excellency the Viceroy's Executive Council in October 1941 to deal with this increasingly complex matter. With the extension of war in the East and Far East and the occupation of Allied territories by the Japanese the problems of the evacuation of Indians from these territories and of the welfare of those stranded in these areas are also being dealt with in this Department.

Origin of Indian Emigration.—Emigration is prohibited by the Hindu Shastras and there is little evidence of any settlement of Indians overseas in early times except in Sumatra, Java and Ceylon. Emigration for purposes of labour dates from the beginning of the 19th century. From 1800 A.D. onwards Indians crossed the Bay to the Straits Settlements to work on the sugar, spice, tobacco and coconut plantations of Penang and this intercourse was allowed to continue for long without regulation. The first officially recorded instance of genuine recruitment for labour emigration occurred in 1830 when a French merchant named Joseph Argand carried some 150 artisans to Bourbon. The abolition of slavery in British colonies in 1834 gave the first great impetus to the movement. The sugar planters of Mauritius at once turned to India as their best recruiting ground and between 1834 and 1837 obtained at least 7 000 recruits from Calcutta. The Government of India at a very early stage realized the necessity of bringing such emigration under regulation. The Law Commission was asked to investigate the case and to make recommendations for securing the well being of emigrants. They advised that no legislation was required except in order to prevent undue advantage being taken of the simplicity and ignorance of emigrants by providing that a magistrate

should satisfy himself that all contracts were entered into freely and understood by them and in order to secure that sufficient provision was made for their accommodation and sustenance during the voyage. A copy of every engagement was also to be transmitted to the Government under which the emigrants were to live. These recommendations were embodied in the first Emigration Act (V of 1857) which also provided that contracts should be determinable after 5 years.

History of Emigration.—Under the above Act emigration during 1857 was permitted to Mauritius, British Guiana and Australia (89 men the first and last direct emigrants to Australia). In 1858 emigration was suspended owing to agitation in England regarding the abuses to which the system was liable and a committee of enquiry reported in 1840 that emigrants were being entrapped by force or fraud, robbed of their wages and treated with brutality. In consequence emigration was prohibited (Act XV of 1842) except to Mauritius and there control was tightened. In Act XXI of 1844 emigration under still stricter regulation was allowed to Jamaica, British Guiana and Trinidad. Act XIII of 1847 removed the restrictions on emigration to Ceylon. The emancipation of slaves in the French colonies in 1848 gave rise to a system of emigration from French Indian ports to Reunion and Bourbon which was largely based on crimping in British territory. This practice was checked by Act XXIV of 1852. In 1858 emigration was opened to St. Lucia, and in 1860 to St. Vincent, Natal and St. Kitts. In the latter year a more elaborate Act based on a convention with the French Government was passed legalizing and regulating emigration to Reunion, Martinique, Guadeloupe and French Guiana. Act XIII of 1864 marks an important stage in the history of emigration, since it elaborated and consolidated the whole system of control. It was itself amended in 1869 and 1870 in important respects with the object of preventing

epidemics on emigrant vessels and improving sanitary conditions in settlements. In 1869 emigration was permitted to Grenada and in 1872 to Surinam. Owing to the removal of the Serala Settlements from the control of the Government of India in 1887 emigration to that colony came under all the restrictions imposed by the Emigration Act and was only permitted from the port of Negapatam. Owing to the injury caused to the agricultural industries of the colony these restrictions were removed in 1872 subject only to magisterial control of recruitment in India. In 1870 complaints reached the Government of India of gross abuses in the treatment of emigrants in British Guiana. A commission of enquiry was appointed and their report led to important legislation in the colony for the protection of Indian immigrants which was subsequently extended to Trinidad. Owing to similar complaints from Natal and Mauritius commissions of enquiry were also instituted in both these colonies and their reports in 1872 brought to light a number of points requiring amendment.

Legislation—In 1871 a fresh consolidating Act was passed (Act VII of 1871) by which the Acts regulating emigration to the French Colonies and two amending Acts to Act XIII of 1864 were incorporated in the general law. The question of revision of the law again came up for consideration in 1882 when several cases of kidnapping and other objectionable practices were reported to the Government of India. The opportunity was taken to depute two officials (Major Fitcher and Mr. Grierson) to ascertain, in the N W P and in Bengal respectively the way in which the system of recruitment actually worked the respects in which it was open to improvement and the attitude of the people towards emigration. Their reports were reviewed by the Government of India and finally in 1883 the law was again recast and consolidated by Act XXI of that year. This Act specifies the countries to which emigration is lawful but empowers the Governor-General in Council to add to the list by notification and also to prohibit emigration to any of the countries in the list on the ground of epidemic disease and/or excessive mortality among emigrants in such country or on the ground that proper measures have not been taken for the protection of emigrants or that the agreements made with them in India are not duly enforced. This Act with certain amendments of no importance to the system of indentured emigration remained in force until 1908 when a fresh revision of the law was undertaken.

Under the Act of 1908 (XVII of 1908) the countries to which emigration was lawful were the British Colonies of Mauritius, Jamaica, British Guiana, Trinidad, St. Lucia, Grenada, St. Vincent, Natal, St. Kitts, Nevis, the Seychelles, the Netherlands Colony of St. Croix, Emigration to St. Lucia, Grenada, St. Vincent, St. Kitts, Nevis, the Seychelles and St. Croix ceased soon after the passing of the Act, the demand for fresh labour having died out. Emigration to Natal was discontinued from the 1st July 1911 as the Government of India were

satisfied that it was undesirable to continue to send Indian labour to that country. Emigration to the French Colonies of Reunion, Martinique and Guadeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment and repatriation of the immigrants.

The labour laws of the several Colonies provide for the protection and welfare of resident Indian labourers. The Government of India also occasionally depute to the colonies their officers to report on the condition of Indian labourers. Deputations from India visited Fiji and British Guiana in 1921. In spite of all precautions certain social and moral evils had grown up in connection with the indentured system of emigration and Indian public opinion has during the last decade been strongly opposed to it. The whole system was exhaustively examined by the Government of India in 1915 in the light of the report received from Messrs. McNeill and Chinnai and they arrived at the conclusion that the time has come when contract labour should be abolished. The Secretary of State for India accepted this policy and authorized the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916.

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration except to countries specially approved by the Legislature. Emigration to Ceylon and Malaya was brought under control and the definition of Emigrant was extended to cover all persons assisted to depart from India.

Another development was the appointment of a Standing Emigration Committee composed of 12 members of the Central Legislature to advise the Government of India on all major emigration questions and more particularly with regard to the terms and conditions on which the emigration of unskilled labour should be allowed. The terms and conditions on which emigration of unskilled labour has been permitted to Ceylon and Malaya since March 1913 are those with which the committee approved after meeting deputations sent by the two countries.

It was found that the lack of power to regulate the total flow of emigration for unskilled work, whether assisted or voluntary and whether under contract or not may operate to the detriment of Indian communities overseas particularly in times of economic depression. The Indian Emigration Act was suitably amended in 1938 and the Government of India took power to prohibit, when necessary even unassisted emigration for the purpose of unskilled work. This amendment was promulgated on December 14 1939.

The Indian Emigration Act 1922 also contains certain provisions to safeguard the interests of persons emigrating for the purpose of skilled work. It was found that illot emigration in some volume was taking place particularly in Bombay with the connivance of some dishonest passage brokers and rules were promulgated

under the Act on the 14th Dec. 1939 providing for the licensing of passage brokers and requiring that a passage broker should not be a party to any arrangement to recover from the emigrant the cost of recruitment. These rules have so far been made applicable to the provinces of Bombay and Sind.

During 1939-40 two minor defects in the Indian Emigration Act, 1939 were remedied by the Indian Emigration Act, 1940. This Act empowers Protectors of Emigrants to exercise the powers of detention search etc for the prevention of offences under the Act and by making the offences under Section 30 of the Act cognizable, removes an anomaly between Sections 35 and 30A of the Act.

Present Position—Indian emigration questions have recently taken on a wider aspect. The status of Indians in the Empire generally is one in which the Indian public now takes keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers. In several colonies and dominions considerable Indian communities have sprung up which although composed largely of the descendants of indentured labourers are themselves free and lawfully domiciled citizens of the countries in which they are settled but have not yet been placed on a footing of legal, social, political and economic equality with the rest of the population. The issues round which public interest at present centres are three—

- (a) Control of emigration
- (b) Rights of Indians to admission to other parts of the Empire.
- (c) Rights and disabilities of Indians domiciled overseas

These questions may be considered separately

Control of Emigration—So far as unskilled labour is concerned the Government of India have assumed absolute powers of control in accordance with powers conferred on them by the Immigration Act of 1922 (See earlier issues of the Year Book for details)

Admission of Indians to Empire Countries.—On the motion of the Government of India this question was discussed at the Imperial War Conferences 1917 and 1918, and the policy accepted by the self-governing Dominions and the British Government was embodied in the following resolutions—

"(1) It is an inherent function of the Governments of the several communities of the British Commonwealth including India, that each should enjoy complete control of the composition of its own population by means of restrictions on immigration from any of the other communities

"(5) British citizens domiciled in any British country including India, should be admitted into any other British country for visits, for the purpose of pleasure or commerce, for temporary residence for the purpose of education such right shall not extend to

a visit or temporary residence for labour purpose or to permanent settlement.

(3) Indians already permanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition (a) That not more than one wife and her children shall be admitted for each such Indian, and (b) that each individual so admitted shall be certified by the Government of India as being the lawful wife or child of such Indian.

The first paragraph of this resolution has regularised the various restrictions on immigration which the self-governing dominions have from time to time, adopted and which, without expressly differentiating against Indians are in practice used in order to check Indian immigration. The objections to which are stated to be not racial or political but economic. Australia prohibits the entry of any person who fails to pass a dictation test of not less than 50 words in any prescribed language. New Zealand prohibits the entry of any person who has not received in advance a permit from the Dominion Government which is refused to any person regarded as unsuitable to settle in the country. South Africa prohibits the entry of any person deemed by the Minister of the Interior on economic grounds or on account of his standard or habits of life to be unsuitable to the requirements of the Union. Canada prohibited the landing of any person who had come to the Dominion otherwise than by continuous journey from the country of which he was a native and unless he possessed in his own right \$20 dollars. Since 1930 Canada has restricted the immigration of Indians to the wife or unmarried child under 18 years of age, of any Canadian citizen legally admitted to and resident in Canada who is in a position to receive and care for his dependents. New Zealand and the Irish Free State impose no restrictions. All the self-governing Dominions have adopted special exemptions in favour of students, tourists and merchants visiting the countries for the temporary purposes of commerce, pleasure, or education. India on its side has assumed power to regulate the admission of immigrants from any other part of the Empire or foreign countries by means of passports. A bill has also been passed by the Indian Legislature empowering the Government of India to make rules "for the purpose of securing that persons not being of Indian origin domiciled in any British possession shall have no greater rights and privileges as regards entry into and residence in British India than are accorded by the law and administration of such possession to persons of Indian domicile." With regard to the Crown colonies and protectorates, the attitude of the Indian Government is that there is no justification for placing any restrictions on the immigration of British Indians, which are not placed on other classes of British subjects, and this principle has in practice been observed by the Colonial Office except in the case of Kenya colony where as stated hereafter, the British Government has reserved to itself the right to impose restrictions on the immigration of classes of people whose entry into the colony may have an adverse effect on the economic evolution of the indigenous population.

Rights and Disabilities of Indians Lawfully Domiciled Overseas.—The policy of the Empire is summed up in the resolution of the Imperial Conference, 1921 which was recorded in the following terms —

"This Conference reaffirms that each Community of the British Commonwealth should enjoy complete control over the composition of its own population by restricting immigration from any of the other communities but recognises that there is incongruity between the position of India, as an equal member of the Empire and the existence of disabilities upon British Indians lawfully domiciled in some parts of the Empire, and this Conference therefore is of opinion that in the interests of the solidarity of the Commonwealth it is desirable that the rights of such Indians to citizenship should be recognised

"The representatives of South Africa regret their inability to accept this resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India while appreciating the acceptance of this resolution, nevertheless feel bound to record their profound concern at the position of Indians in South Africa and hope that by negotiations between India and South Africa a way can be found as soon as may be to reach a more satisfactory position

Summary of present Position—Outside Australia New Zealand and Canada the position stands as follows —

(1) **South Africa**—The main grievances of Indians which led to a passive resistance movement headed by Mr Gandhi, were settled by the compromise embodied in the Indians Relief Act, 1914 and by the guarantee known as the Smuts-Gandhi agreement (See earlier editions of the Year Book for details)

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union. Their main recommendations were published in earlier editions of the Year Book

Cape Town Agreement, 1927

It was announced in April 1926 that the Government of India and the Government of the Union of South Africa had agreed to hold a Round Table Conference to explore all possible methods of settling the Indian question in the Union in a manner which would safeguard the maintenance of western standards of life in South Africa by just and legitimate means. The Conference assembled at Cape Town on December 17th and its session finished on January 12th. There was in these meetings a full and frank exchange of views which has resulted in a truer appreciation of mutual difficulties and a united understanding to co-operate in the solution of a common problem in a spirit of friendliness and good will.

Both Governments re-affirm their recognition of the right of South Africa to use all just and legitimate means for the maintenance of western standards of life

The Union Government recognises that Indians domiciled in the Union who are prepared

to conform to western standards of life should be enabled to do so

For those Indians in the Union who may desire to avail themselves of it the Union Government will organise a scheme of assisted emigration to India or other countries where western standards are not required. Union domicile will be lost after 3 years continuous absence from the Union in agreement with the proposed revision of the law relating to domicile which will be of general application. Emigrants under the assisted emigration scheme who desire to return to the Union within the 3 years will only be allowed to do so on refund to the Union Government of the cost of the assistance received by them

The Government of India recognise their obligation to look after such emigrants on their arrival in India

The admission into the Union of the wives and minor children of Indians permanently domiciled in the Union will be regulated by paragraph 8 of Resolution XXI of the Imperial Conference of 1918

In the expectation that the difficulties with which the Union has been confronted will be materially lessened by the agreement now happily reached between the two Governments and in order that the agreement may come into operation under the most favourable auspices and have a fair trial the Government of the Union of South Africa have decided not to proceed further with the Areas Reservation and Immigration and Registration (Further Provision) Bill

The two Governments have agreed to watch the working of the agreement now reached and to exchange views from time to time as to any changes that experience may suggest

The Government of the Union of South Africa have requested the Government of India to appoint an agent in order to secure continuous and effective co-operation between the two Governments

In February 1930 a Select Committee of the Union House of Assembly was appointed to inquire into and report on certain matters relating to the rights of Indians to own and occupy immovable property in the Transvaal and incidentally to trade. The Committee was required *inter alia* to investigate how far the intentions of the legislature as embodied in the Act of 1919 were being given effect to and whether and, if so to what extent an amendment of the Act was desirable. The Committee came to the conclusion that the position which had arisen as a result of illegal occupation in the mining areas was serious and that there was no doubt that Law 8 of 1885 as amended by the Act of 1919 intended that Asiatics should not own fixed property in the Transvaal outside reserved areas either individually or collectively and either directly or indirectly.

It submitted its report on the 16th May 1930 and embodied its recommendations in a Bill which it urged should be enacted immediately. The Bill was read for the first time on the 14th May 1930 but in deference to the representations made by the Government of India that adequate time should be allowed for careful examination of the far-reaching provisions of the measure the Union Government decided to defer

further consideration of it until the Parliamentary session of 1931. As a result of opposition to the Bill it was later postponed further and a Conference was held in 1932 to examine the provisions of the Bill and to review the working of the Cape Town Agreement of 1927 in accordance with para. 7 of that Agreement.

The results of the Conference were summarised in previous editions of the Year Book.

Since 1932 there have also been several enactments which are capable of being used against Indians in the Union, e.g. the Transvaal Licences (Control) Ordinance of 1932 and the Natal Rural Dealers Licensing Law Amendment Ordinance of 1935. A further development occurred in 1937 when three private Bills affecting the position of Indians in the Union were introduced in the Union Parliament. The first sought to prohibit marriages between Europeans and Asiatics or natives. It was introduced on the 12th January but attempts to have it referred to a Select Committee failed. The second Bill sought to empower Provincial Councils to prohibit the employment of Europeans by non-Europeans in the Union and the third to prohibit the acquisition of fixed property in the Transvaal by any European Coloured or Cape Malay women married to Asiatics and by children of such marriages. Both the Government of India and their Agent General in the Union made representations against these two Bills. Second reading, which would have involved acceptance of the principle of the two measures, was not proceeded with and they were referred to a Select Committee of the Union House of Assembly for investigation of their contents and form. Both the Indian community and the Agent General gave evidence before the Select Committee. The Committee came to no conclusion on the proposal to restrict ownership of land through marriage but after consideration of the other Bill submitted an amended Bill entitled the White Women's Employment Restriction Bill. The amended Bill sought to prohibit the employment of European women by Asiatics except under a certificate of the Minister of Labour and to forbid the issue of such a certificate if the women concerned were to be under the direction or supervision of a non-European or to be housed or employed on premises containing dwelling or sleeping quarters of Asiatics or at places where they might come into contact with Asiatics other than as customers over the counter. Cape Malays and Japanese (while the trade convention with Japan lasted) were to be exempted from the restriction. The new measure was purely anti-Indian and the Government of India protested strongly against it. In the course of oral evidence before the Select Committee a representative of the South African Indian Congress stated that he believed Indians would be willing to terminate employment of European women voluntarily where circumstances showed that particular exception might be or had been, justifiably taken to such employment. The Union Government accepted this statement as an assurance of co-operation by the Indian community in objectionable cases and an announcement was made on the 14th April in the Union House of Assembly that no further opportunity would be given for the discussion on, or for legislation in connection with the Select Committee's report on the Bills. The Union Government however reserved the right to

undertake legislation later should circumstances demand it. The dropping of these two Bills did not, however, satisfy certain sections and an announcement was made in the Union Parliament on the 17th May 1937 that two Commissions—one to enquire into mixed marriages and the other into the question of Asiatic land tenure in areas not covered by the enquiry of the Freehold Commission—would be appointed. These Commissions were appointed in February 1938.

Mixed Marriages Commission.—In September 1938 the South African Indian Congress presented a memorandum to the Commission and also gave oral evidence. It was pointed out that the number of marriages between Europeans and Indians was negligible there was no sign of an increase in spite of the rapid growth in the numbers of each community and that the effect of such marriages had an insignificant effect on the composition and future welfare of the South African population. The Agent General in the Union supplemented the evidence already given by the local Indian community.

The report of the Mixed Marriages Commission was published in August 1939. Four members of the Commission signed a majority report and one member a minority report. The finding of the majority report was that public opinion had failed to prevent mixed marriages and could not be relied upon to prevent such marriages in future and that mixed marriages give rise to social problems of a serious nature. The Commission held that segregation by means of housing schemes and the separation of the sexes at places of work would help in reducing the incidence of mixed marriages. The Commission emphasised the need for improvement of the economic position of non-Europeans on the ground that marriages with Europeans would be less attractive if their present disabilities were diminished. It was also suggested that a separate law should be enacted to govern the validation of the marriages between coloured persons only coloured persons, including all non-Europeans. In the minority report it was stated that legislation was no solution of the problem and it was suggested that the simple laws of heredity should be taught and also that to overcome the disparity between the European male and female population immigration into South Africa of young European women should be encouraged. In January 1940 Dr Malan moved a resolution in the House of Assembly urging introduction of legislation to give effect to the recommendations of the Commission. In the course of the discussion on the resolution the Minister of the Interior stated that as the country was in a state of war Government did not propose to embark upon contentious legislation touching difficult social conditions sentiments and racial pride.

Murray Land Commission.—This Commission was appointed early in 1938 was presided over by Mr Justice Murray of the Supreme Court of South Africa (Transvaal Provincial Division) and had the following terms of reference—

To inquire into and report whether and if so to what extent the letter or spirit of any law restricting or prohibiting the ownership

use or occupation by Asiatics of land is being evaded and to make any recommendations it may think fit in regard thereto

The foregoing terms of reference shall not apply to proclaimed land under the Precious and Base Metals Act 1908 (Transvaal) as amended from time to time to the extent to which it has been dealt with by the Poetham Report

Both the Transvaal Indian Congress and the Agent General in the Union gave evidence before the Commission in October 1938 and its report was published on the 22nd March 1939. The recommendations of the Commission which have been published in the Press are generally considered to be satisfactory from the Indian point of view. No action has so far been taken by the Government of the Union on the report.

In spite of repeated representations from the local Indian community and the Government of India the Union Government passed the Asiatic (Transvaal Land and Trading) Act 1939 which came into force on June 16 1939. The Act restricts three important rights of the Indian community in the Transvaal: (a) the right to occupy land not subject to Gold Law restrictions; (b) the right to trade anywhere in the Transvaal; and (c) the right of Indians holding trading licenses in May 1919 to transfer their business premises in the same township. The main provisions of the Act are as follows: (1) Further protection for two years was granted to such illegal occupation of land by Asiatics in the area under the Gold Law as had been protected since May 1930. (2) The issue of trading licenses except with the permission of the Minister was prohibited unless it was proved that the applicant and the person in control of the business were not Asiatics. (3) The hiring or occupation by Asiatics of any land or premises was prohibited if such land or premises were not occupied by Asiatics or coloured persons on April 30 1939. (4) The Minister was empowered to issue permits of exemption. In April 1941 an amending Act was passed to keep alive the provisions of the Act of 1939 for a further period of two years i.e. till May 1943.

The international situation in September 1939 and the consequent change of Ministry in the Union with General (now Field Marshal) Smuts coming into power altered the position slightly in far as the Indian community was concerned. It was officially announced that the Government of the Union intended to appoint a Commission to ascertain whether penetration had in fact taken place. The Union Government also declared that no fresh statutory measures involving segregation would be introduced during the war.

Broome Commission—The international situation in September 1939 and the consequent change of Ministry in the Union with General (now Field Marshal) Smuts coming into power have not been without effect on the attitude of the Union Government towards the Indian problem. Though the Asiatic (Transvaal Land and Trading) Act 1939 had been brought into force in June 1939 as a result of further representations, the Union Government declared that no fresh statutory measures involving

segregation would be introduced during the war. In January 1940 the Minister of the Interior also announced the intention of the Union Government to appoint a Judicial Commission to ascertain the extent if any of Asiatic penetration of predominantly European areas and the Commission was actually appointed in May with the Hon. Mr. Justice F. N. Broome as Chairman and the following terms of reference:

To enquire into and report whether and if so to what extent Indians have since 1st January 1927 (commenced occupation of or acquired sites for trading or for residential purposes in predominantly European areas in the Province of Natal and the Transvaal (excluding land proclaimed under the Precious and Base Metals Act 1908 as amended, of the Transvaal) and the reasons for such occupation or acquisition.

An attempt made by the Indian community to get the Commission discharged on account of the critical war position in Europe proved futile. The Commission concluded its recording of evidence in the Transvaal in November and enquiries in Natal were in progress during the first half of 1941. A summary of the findings of the Commission was published on October 11th. The two main findings are that in the Transvaal the extent of penetration since 1927 does not appear to be alarming or even surprising and in Natal the extent of penetration into European areas is little more than a trickle. As regards the causes of penetration as had been found it has been stated that the main reason for penetration by acquisition is attributable to the desire to obtain good investments (and this is also held to account for some of the acquisitions with occupation) while the most important reason for acquisition with occupation is given as the lack of housing and civic amenities in predominantly Indian areas. The Commission has also recorded that it is the Commission's considered opinion that the Indian opposition to compulsory segregation will never be overcome but that *de facto* segregation may some day be achieved by voluntary mutual co-operation.

Lawrence Committee—Towards the end of 1939 Mr. Lawrence, the Minister of the Interior suggested that the Natal Indian Association and the Durban City Council should constitute a Joint Committee for the purpose of preventing further penetration by Asiatics into European areas. The Natal Indian Association expressed their opposition to any form of segregation but offered to co-operate with the Durban City Council in the manner suggested in order to establish harmonious relations between the two communities. The object of the Committee was also to draw the attention of the City Council to the housing needs of the Indian community and the necessity for providing proper municipal amenities. The Committee has so far continued to function usefully.

War Effort—The Indian community in South Africa with possibly a few dissentients has co-operated in the war effort of the Union Government both by contributing their mite to the War Funds and by assisting in enrolment of Indians in the Services.

The Feetham Resolutions.—Reference has already been made to the passing of the Transvaal Asiatic Land Tenure (Amendment) Act of 1936 after consideration of the recommendations of the Feetham Commission. Under the Act the Minister of the Interior is empowered to exempt land from the operation of the old Law regarding residence on or occupation of that land by coloured persons but the select Committee on the Bill had unanimously recommended that Asiatics should be given the right of ownership in areas proposed for exemption by the Feetham Commission in Asiatic Bazarani and in areas predominantly occupied by coloured persons provided the proposal was approved by both Houses of Parliament by means of a resolution. Hence what is known as the Feetham Resolutions has been of considerable importance to the Indian community in Transvaal but till early in 1941 the Union Government could not see their way to push the resolutions through Parliament mainly because of opposition among party members to the scheme. The more liberal attitude of General Smuts' Government and the influence on South African public opinion of the magnificent performances of Indian soldiers in the Middle East made it possible for the Feetham Resolutions to be introduced in the Union Parliament in April 1941. The resolutions were passed by both Houses and hence for the first time Indians have been given legal right to continue to occupy and own land in what was known as gold areas.

Immigration. Among other matters in which the position of Indians has lately improved mention may be made of the decision of the Union Government in May 1941 to admit commercial travellers from India into the Union. Under the immigration law of the Union of South Africa prohibited immigrants were not entitled to obtain a license to carry on any trade or calling in the Union and following representations from the Agent General in the Union the South African Government have agreed to issue to *bona fide* commercial travellers from India temporary permits as well as necessary licenses to trade. Also as a gesture of goodwill the Union Government have taken steps to see that the anti Asiatic provisions of the law were not applied to Indian visitors particularly those in transit through the Union.

Change of Status.—Following the appointment of a High Commissioner in the Union of South Africa by the Dominion Government of Canada the Government of India considered that the status of their representative should not be lower than that of any of the sister Dominions and an announcement was made that from 1st January 1941 the status of the Agent General would be raised to that of High Commissioner for India in the Union of South Africa. The announcement was accompanied by a message from General Smuts to His Excellency the Viceroy. While the High Commissioner will be the sole channel of communication between the Governments of India and the Union of South Africa and in official representations and correspondence his views will be those of the Government of India only he will still be available for giving advice to the Indian community and for making any representations on their behalf.

(2) **Kenya Colony.**—The grievances of Indians domiciled in this Colony are fully set forth in the published despatch of the Government of India dated October 21st 1920. The controversy centred round the following points—

(a) **FRANCHISE.**—Indians have not the elective franchise. The Government of India proposed that there should be a common electoral roll and a common franchise on a reasonable property basis plus an educational test without racial discrimination for all British subjects.

(b) **SEGREGATION.**—Professor Simpson who was sent to East Africa to report on sanitary matters recommended segregation on sanitary grounds. The Government of India objected firstly that it was impracticable, secondly that it was commercially inconvenient and thirdly that Indians are in practice unfairly treated in the allocation of sites.

(c) **THE HIGHLANDS.**—Lord Elgin decided in 1908 that as a matter of administrative convenience grants of land in the upland area should not be made to Indians. The whole area has now been given out and the Government of India claim that there is no land left to which Lord Elgin's decision applies. This decision has now however been extended so as to prohibit the transfer of land in the uplands to non-Europeans.

(d) **IMMIGRATION.**—Suggestions have been put forward for restricting Asiatic immigration into Kenya. The Government of India claim that there is no case for restricting Indian immigration and that such restrictions would be in principle indefensible.

The Settlement.—The decisions of the British Government were contained in a White Paper presented to Parliament in July 1923. It was held that the guiding principle should be that the interests of the African native must be paramount and in light of this it was decided—

(a) **FRANCHISE.**—A communal franchise was adopted with 11 seats for elected Europeans, 5 elected Indians, one nominated Arab, one missionary representing the Africans and a nominated official majority. One Indian is also appointed on the Governor's Executive Council.

(b) **SEGREGATION.**—The policy of segregation as between Europeans and Asiatics is abandoned.

(c) **THE HIGHLANDS.**—The existing practice is maintained both as regards initial grants and transfers. A similar reservation in the lowlands is offered to Indians.

(d) **IMMIGRATION.**—Racial discrimination in immigration regulations is rejected. But in the economic interests of the Africans further control over immigration is necessary. Some arrangement is required for securing a strictly impartial examination of applications for entry into Kenya. The Government of Kenya and Uganda have been instructed to submit joint proposals for legislation.

The Government of India reviewed their decisions in a resolution published on August 18th, 1923 and recorded "their deep regret

that His Majesty's Government did not feel justified in giving greater effect to the recommendations made by them and reserved liberty to reopen the case on a suitable opportunity. They stated their intention of making representations regarding the action to be taken to implement these decisions, particularly in the matter of the Immigration regulations.

Following upon the Kenya award statutory action was taken by the local administration on the franchise question. Adult suffrage on communal lines was conferred upon Indians. As regards immigration the Government of India took the opportunity to urge the postponement of the bill giving effect to the decision of His Majesty's Government until such time as the Committee proposed by their representatives at the Imperial conference in 1923 had an opportunity of examining the question of the restrictions therein embodied. Accordingly the introduction of the bill was postponed at the instance of the Colonial Secretary. The Government of Kenya was also asked by His Majesty's Government for an explanatory statement regarding the method proposed for the administration of immigration measures. The Government of India received an assurance from the Colonial Secretary that ample opportunities would be afforded for the expression of their views and that earnest attention would be given to any representation which their Committee desired to make. As has already been stated such a Committee was appointed in March 1924. The following statement made by the Secretary of State for the Colonies in the House of Commons on 7th August 1924 shows the result of the representation made by the Colonies Committee—

(1) IMMIGRATION.—My position is that if danger ever arises of such an influx of immigrants of whatever class, race, nationality or character as may likely be prejudicial to the economic interest of the natives I hold myself entirely free to take any action which may be necessary. Conflicting statistics which have been laid before me have not enabled me to reach a definite conclusion as regards the extent of net Indian immigration. Accordingly steps will be taken to create a statistical department to obtain accurate information with regard to persons of all races arriving in or departing from Kenya. Meanwhile the Kenya Immigration Ordinance will not be enacted.

(2) FRANCHISE.—I have given careful consideration to representations in favour of a common poll but I am not prepared to resist the conclusion already arrived at that in the special circumstances of Kenya with four diverse communities each of which will ultimately require electoral representation the communal system is the best way to secure the fair representation of each and all of these communities.

(3) HIGHLANDS.—I consider that the Secretary of State for the Colonies has no alternative but to continue pledges expressed or implied which had been given in the past, and I can hold out no hope of the policy in regard to agricultural land in the Highlands being reconsidered.

(4) LOWLANDS.—It was proposed to reserve an area in the lowlands for agricultural immigrants from India. The Committee made it plain that it is averse from any reservation of land for any immigrant race, subject to the suggestion that before applications for land in lowland areas are invited an opportunity should be taken of sending an officer experienced in Indian settlement and agricultural methods to report on the area. At present any consideration of the matter is in suspense pending receipt from the colony of reports from the native and agricultural points of view on the areas in question.

The work of the Colonies Committee did much to abate the bitterness which existed in the relations between the different classes of settlers in Kenya and the situation was further improved by the decision of the Indian community to relinquish their attitude of non-cooperation and to select five members for nomination by the Governor to the Legislative Council.

In June 1924 His Majesty's Government announced the appointment of an East African Committee, under the Chairmanship of Lord Southborough to consider and report on certain questions regarding the administration and economic development of British East African dependencies. Since this enquiry was likely to affect Indian interests the Government of India urged that the Indian point of view should be heard before the Committee came to any conclusions. This request was granted but further action in the matter was suspended pending the publication of the report of the Commission presided over by Major Ormsby Gore which visited East Africa to enquire into certain aspects of the questions referred to the Southborough Committee. The report of the Ormsby Gore Commission was published in the United Kingdom on May 7th 1925. On June 9th Major Ormsby Gore announced in the House of Commons that in view of the completeness of the report presented by the Commission which under his chairmanship had visited East Africa, His Majesty's Government had decided that the Southborough Committee should not resume its sittings.

In November 1926 information reached the Government of India that the Government of Kenya contemplated undertaking legislation at an early date in order to make the European and Indian communities responsible for the net cost of their education. It was originally intended to give effect to this decision by levying from Europeans a tax on domestic servants in their employ and from Indians a poll-tax. The Indian community resented this differentiation and ultimately the Colonial Government decided that both communities should pay the same form of tax, viz. an adult poll tax. For Europeans this has been fixed at 20 shillings and for Indians at 10 shillings. An Ordinance giving effect to this decision was passed by the Kenya Legislative Council and came into force from 1st January 1927.

Closer Union.—In view of the issue of another White Paper in July 1927 in which it was announced that His Majesty's Government had authorised the Secretary of State for the

Colonies to send to Africa a special Commission to investigate the possibility of securing more effective co-operation between the Governments of Eastern and Central African Dependencies and make recommendations on this and cognate matters, the question regarding the position of Indians in Kenya again came to the forefront.

In March 1929 the Secretary of State for the Colonies sent out Sir Samuel Wilson, Under Secretary of State for the Colonies to East Africa to discuss the recommendations of the Hilton Young Commission for the closer union of Kenya, Tanganyika and Uganda (and such possible modification of these proposals for effecting the object in view as may appear desirable) with the Governments concerned and also with any bodies or individuals representing the various interests and communities affected with a view to seeing how far it may be possible to find a basis of general agreement. Sir Samuel was also directed to ascertain on what lines a scheme for closer union would be administratively workable and otherwise acceptable and to report the outcome of his consultations. At the invitation of the Secretary of State for the Colonies, the Government of India deputed the Rt. Hon. V. S. Srinivasa Sastri P.C. to East Africa to help the local Indian communities to state their views to Sir Samuel Wilson on matters arising out of the Hilton Young Commission's Report and to be at Sir Samuel Wilson's disposal, if he wished to make use of him in dealing with the Indian deputations.

Mr Sastri left India in April and returned in June 1929. In the Report presented by him on his return he recommended that the Government of India should—

- (a) press for inquiries as to the basis of a civilisation franchise which shall be common to all races alike
- (b) invoke the good offices of the Colonial Office and of the Government of Kenya in securing the consent of the European Community to the establishment of a common roll
- (c) oppose the grant of responsible government to Kenya or of any institutions leading up to it
- (d) oppose the establishment of a Central Council on the lines proposed by Sir Samuel Wilson
- (e) demand in case of the establishment of some such body that the unofficial representatives from each province should include an adequate number of Indians
- (f) advocate the continuance of the official majority in the Legislative Council of Kenya
- (g) demand that the representation of natives in the Kenya Legislative Council should be by natives or by Europeans and Indians in equal proportions.

Thereafter meetings of the Standing Emigration Committee were held and the decision arrived at by the Government of India was communicated to His Majesty's Government.

The report of Sir Samuel Wilson was published on the 5th October 1929. Another meeting of the Standing Emigration Committee was held soon thereafter to consider the report and a further communication was addressed to His Majesty's Government on the subject.

The conclusions of His Majesty's Government as regards closer union in East Africa were published in June 1930, in the form of a White Paper and it was announced that they would be submitted to a Joint Committee of the two Houses of Parliament. In accordance with this decision a Select Committee was set up in November 1930. The Government of India communicated their views in a despatch to the Secretary of State for India on the scheme set out in the White Paper in so far as it affected the Indian population in East Africa. With the permission of the Joint Select Committee of Parliament they also deputed the Right Honourable V. S. Srinivasa Sastri P.C. as their representative to present their case and elucidate in the course of oral examination such questions as the Committee might consider necessary to refer to him. The Select Committee examined Mr Sastri in July 1931.

The report of the Committee was published simultaneously in England, East Africa and India on the 2nd November, 1931, and the decisions of His Majesty's Government on the recommendations of the Committee together with certain correspondence arising from the report of the Committee were also similarly published on the 24th August 1932.

As regards the question of *Closer Union* His Majesty's Government have accepted the view of the Joint Committee that apart from considerations arising out of the Mandatory position of the Tanganyika Territory the time has not arrived for taking any far reaching step in the direction of the formal Union of the several East African Dependencies.

There was no important development in regard to this question until 1935 when certain sections in Kenya attempted to revive the proposal for Closer Union. Early that year an unofficial conference of Europeans held at Arusha was reported to have expressed the view that since 1931 circumstances had changed so rapidly as to justify a reversal of the Joint Committee's decision and that immediate steps should be taken towards the Closer Union of East Africa. A "Memorandum on Union" was also forwarded to the Secretary of State for the Colonies by the European Elected Members' Organisation of the Kenya Legislative Council. His Majesty's Government did not, however, consider that there were adequate grounds for reopening an enquiry into the matter which had been so carefully investigated by the Joint Select Committee as recently as 1931. This decision is contained in Malcolm MacDonald's despatch, dated the 12th October 1935 to His Excellency the Governor of Kenya which has been published in all the countries concerned.

Franchise.—As regards franchise His Majesty's Government stated in the White Paper of 1930 that His Majesty's Government are of the opinion that the establishment of a common roll is the object to be aimed at and attained, with an equal franchise of a civilisation or education

character open to all races. In 1921 the question of franchise was also referred to the Joint Select Committee of Parliament which was appointed to consider the question of Closer Union. After discussing the arguments that had been brought forward for and against a common electoral roll the Select Committee stated in para. 100 of their report that it would be impracticable under present conditions to advocate the adoption of the system of common roll representation in preference to the existing system of election. The Secretary of State for the Colonies accepted the recommendations of the Joint Select Committee in the matter.

Highlands.—The Joint Select Committee of Parliament which was appointed to consider the question of Closer Union in East Africa had recommended that in view of the nervousness among the native population as regards the land question a full and authoritative inquiry should be undertaken immediately into the needs of the native population present and prospective with respect to land within or without the reserve held either on tribal or on individual tenure. In April 1922 a Commission was accordingly appointed by His Majesty's Government and the terms of reference of the Commission included the following:

To define the area known as the Highlands within which persons of European descent are to have a privileged position in accordance with the White Paper of 1923.

The Commission in their report which was published in May 1924 recommended that the boundaries of the European Highlands should be safeguarded by Order-in-Council so that the European community might have the same measure of security in regard to land as the Commission had recommended for the natives. His Majesty's Government announced that they accepted this recommendation of the Land Commission. The Indian community was perturbed by this announcement as the proposed Order-in-Council would give statutory effect to restrictions which were originally considered necessary on grounds of administrative convenience and representations were made to His Majesty's Government both by the Government of India and the local Indian community. An Order-in-Council had been promulgated till the end of 1927 but the position as it affects Indians appears clear from the following extracts from the speech of the Secretary of State for the Colonies made on the 9th July 1936—

(a) What is contemplated, arising out of the recommendations of the (Morris-Carter) Commission is the issue of two Orders-in-Council. There are, of course many other things arising out of these recommendations, but the points which have been raised are chiefly concerned with these Orders-in-Council. One of them is to define the boundaries of those parts of the Highlands which are to be set aside for non-native occupation, and (b) I want to make it clear that there is to be nothing in either Order imposing any legal disability against Indians or against any persons on the ground of race colour creed or anything else. Equally I want to make it clear that the existing administrative practice which was first laid down by Lord Elgin is to be continued. I wish that to be understood

clearly both in India and elsewhere. The existing administrative practice of the Kenya Government which has been followed since 1908 will continue. In the area demarcated as the European area not by law, not by any thing in the Order-in-Council but as matter of administration that practice will continue in the future as in the past. There will be no legal colour bar.

In spite of protests from the Government of India and the local Indian community the Order-in-Council contemplated in the above announcement issued in February 1939. Though the Order does not contain a definition of the privileged position which persons of European descent are to have within the territorial limits to be included in the Highlands His Majesty's Government have made it clear that there is no intention of changing the administrative practice which has been followed for many years with regard to alienation and transfer of land in the Highlands. This decision has caused profound disappointment to all sections of Indian opinion both in Kenya and in India in particular because of the preference which it accords even to non-British subjects of European race.

Lowlands.—Subsequent to the announcement made in the House of Commons in 1924 in connection with the Lowlands, the question of deputing an officer to examine these areas was considered by the Government of India who thought it inadvisable to proceed any further with the idea.

Apart from the major problems outlined above other questions have also been causing concern to the Indian community in the colony. The most important of these are (i) the Ordinance to control and regulate the marketing of native Produce and (ii) the Transport Control Ordinance. The former Bill sought to regulate the selling and buying of native produce by such methods as limiting the number of licences and confining sales to specified localities so as to ensure control over quality. As a number of Indian traders were affected, representations were made to His Majesty's Government by the Government of India and the Bill was revised in certain respects and became law in 1935. It was brought into force from the 1st January 1936.

The Kenya Transport Control Bill which was passed last year was intended to give effect to the recommendations of the Kenya Transport Co-ordination Committee which was appointed in 1935 to investigate and consider the desirability of co-ordinating and regulating all forms of transport in the colony. The Indian members of the Kenya Legislative Council objected to the principle of the Bill as in the attempt to prevent wasteful competition between the railways and other forms of transports in Kenya they felt that the considerable interests of Indians in the transport industry would be affected adversely. The other main objections were directed against the composition of the Transport Licensing Board and the provision relating to the grant of exclusive licences. The Bill has now become law and an Indian has been appointed to the Transport Licensing Board.

In the latter half of 1935 and the beginning of 1936, the Kenya Indians were interested in (1) the Immigration of Jewish refugees (2) the Kenya Immigration Restriction Ordinance and (3) the representation of the Indian community on the Kenya Immigration Board. All these three questions were connected with one another in some form. His Majesty's Government had under consideration a scheme for the settlement of a small number of Jews in the Kenya Highlands. The main objection of the Indian community was that it would accord to foreign subjects within a British Colony privileges which are denied to British Indian subjects. As His Majesty's Government were committed to a policy of settling Jewish refugees from Central Europe it was not possible to meet the objections of the Indian community in the matter. To prevent an influx of destitute and undesirable foreigners into the Colony as a result of the international situation in Europe an Immigration Advisory Board was established in October 1938. The Board was to advise the Commissioner of Police on such matters as may be referred to it in connection with immigration into Kenya but it was not intended that it should consider or advise upon any aspect of Indian immigration. Nevertheless it was felt that the Indian community which is vitally interested in the composition of the population and the economic development of the Colony should be represented on the Board. Representations were made to His Majesty's Government in the matter and the result of the representations is awaited. The objections to the Kenya Immigration Restriction Bill centred round two provisions of the Bill—(i) the provision authorising the Immigration Officer to require any intending immigrant who is without any visible means of support or is likely to become a pauper, to give security by bond to an amount not exceeding £500 and (ii) the provision altering the period of 12 months, within which an intending immigrant has to prove that he is not a prohibited immigrant, to any period the Immigration Officer may fix in his discretion. Though these clauses were intended to apply only to immigrants from Europe the Indian community thought that they might at any time be applied to Indians also.

Both questions have been settled satisfactorily. Indian representation on the Board has now been conceded and under the revised provisions all immigrants are divided into two classes: (a) those who will if necessary be received back by their country of birth or origin and (b) those who will not be so received back, the existing law being left practically unaltered in respect of the former category of persons. Indians therefore will be unaffected by this measure which received the Royal assent in May 1939.

Tanganyika.—In the adjoining mandated territory of Tanganyika the Indian community were deeply concerned at the rumoured transfer of the territory to Germany. Their views in regard to this subject were communicated by the Government of India to His Majesty's Government. It was learned from His Majesty's Government that the rumours were without foundation.

Nyasaland and the Rhodesias.—The report of the Royal Commission which had been

appointed in 1933 to inquire into the question of closer co-operation between Southern Rhodesia, Northern Rhodesia and Nyasaland was received and was under the examination of the Government of India but in view of the war the discussions have been suspended for the present.

Natal.—Out of a total population of about 40,151 Indian male immigrants in Natal in 1940 approximately 84,000 or 8 per cent are (second) to the 1910 report of the Protector of Immigrants in Natal (just published) in employment in the Provinces and many in addition are farming on their own account and carrying on other trades.

Of those in employment, the largest number about 4,300 are in the sugar industry. The next largest number are in the corporate bodies which provide employment for over 2,400. Miscellaneous industries and employment as domestic servants account for 850 and tea, coal and railways employ roughly 1,485.

The average rate of wages paid on the estate is between 4s and 6s per month including food accommodation medical attention and medicines free of charge.

The total number of Indians employed in coal mines in Natal during the year was 1,021, of whom 579 were men, 803 women and the rest children.

The wages on the mines remained about the same as before, namely 1s 6d or 2s 6d per shift, with food, medicine, medical attention and quarters free.

The number of Indians in Natal on 31st December 1940 was approximately 188,985 of whom 40,151 were males, 0,428 females and the rest children. Of the 188,985 about 23,600 represent the original immigrants and 165,385 are Natal born.

There were 291 more births and 58 less deaths during 1940 than in the previous year, bringing the birth rate to 47.88 per mille and death rate to 13.23 per mille. The corresponding figures of 1939 were 48.03 and 14.02 respectively.

There were no arrivals during the year emigration to Natal having been stopped by the Indian Act of 1911. The total number of Indian immigrants who returned to India during the year was 43, of which 4 were sent to India from different parts of the Union under the Assisted Emigration Scheme. The number of Indian children attending the schools, both Government and aided, is about 26,700 out of a total children population of 118,400, thus bringing the percentage to 22.6.

During the year 1939 there was a renewal of the agitation in Durban on the question of penetration of European areas by Indians. Protests were made by the Natal Indian Association in a letter to the Town Clerk Durban but at the suggestion of the Minister of the Interior who visited Durban it was agreed to establish more cordial relations between the European and Indian communities. A joint committee of representatives of the Durban City Council and the Natal Indian Association was accordingly formed. Apart from purchases of property the committee deal with questions of Indian

housing and provision of municipal amenities in Indian areas. Inaugurating the session of the committee the then Agent-General to the Government of India Sir Rama Rau, said that not only the Union Government but also the Government of India would watch with interest the results of this experiment.

(3) **Fiji and British Guiana.**—Emigration to Fiji was stopped in 1917 under Rule 18 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration. With a view to secure if possible a renewal of emigration to the Colony, an unofficial mission composed of the Bishop of Polynesia and Mr. Rankine, Receiver General to the Fiji Government arrived in India in December 1919 and submitted a scheme of colonisation which was referred to a committee of the Imperial Legislative Council on 4th February 1920. To secure a favourable reception for emigration the Fiji Government cancelled all outstanding indentures of East Indian labourers from 2nd January 1920 and also announced their intention to take early measures to provide for the representation of the Indian community on the Legislative Council on an elective basis by two members. In accordance with the recommendations made by the Committee the Government of India informed the mission in March 1920 that they would be willing to send a Committee to Fiji provided that the Government of Fiji and the Secretary of State for the Colonies would guarantee that the position of the emigrants in their new home will in all respects be equal to that of any other class of His Majesty's subjects resident in Fiji. In July 1920, the Government of Fiji informed the Secretary of State for the Colonies of their willingness to give the pledge subject to his approval. Arrangements with regard to the contemplated deputation however were postponed until January 1921 owing to the announcement of Lord Milner's policy in regard to Indians in Kenya and the desirability of consulting the new Legislature in India. After consultation with the Fiji Government as to the terms of reference and personnel of the deputation an announcement was made on the 27th June 1921. But owing to the inability of the two Indian members Messrs. Srinivasa Sastri and Hirdaynath Kuroori who had been nominated to join the Committee which was finally constituted consisted of Messrs. Venkatapati Raju, G. L. Corbett, Govind Sahai Sharma and Lieutenant S. Hissam ud din Khan did not reach Fiji until the end of January 1922.

The labour troubles in Fiji in the years 1920-21 had produced an unexpected result in India. The Government of Fiji cancelled the indentures of Indian labourers as from January 1920 while arrangements were made for the early repatriation of such of them as desired to return to their own country. In consequence large numbers left Fiji. Many arrived in India comparatively destitute while others who were colonial born or whose long residence in the colonies had rendered them unfit for the old social conditions found themselves utterly out of place—indeed foreigners—in their own country. Returned emigrants from other colonies also being in difficulties owing to the unfavourable economic situation in India strongly desired

to return to the territories from which they had come. During the early part of 1921, from all parts of India there was a steady drift of destitute and distressed labourers in the direction of Calcutta where they hoped to find ships to take them back to the colonies in which they were certain of work and livelihood. At the earnest representation of the Fiji Government and after full consultation with representative public men arrangements were made to relax the emigration restriction in favour of those Indians who were born and had property in any colony as well as of such near relations as they desired to take with them. Admirable work was done among these distressed persons by the Emigrants Friendly Service Committee which had been formed primarily to deal with the applications of repatriated Indians desirous of returning to Fiji. The Government of India gave discretion to this Committee to permit persons who could prove that they had been in Fiji to return there if they so desired. The local labour conditions stimulated the return of these unfortunate people by giving them assisted passages. The Legislative Assembly had made a grant of £1,000 for the maintenance of these labourers, until such time as they were able to find work and settle down in India. The deputation from India left Fiji on the 3rd April 1922 and submitted its report to the Government of India. It has not been published.

In February, 1929 Letters Patent under which the constitution of the Fiji Legislative Council was revised were issued. Provision was made *vide infra* for the election of three Indian members on a communal basis. On the 5th November 1929 one of the Indian members moved a resolution recommending the adoption of a common electoral roll in place of the existing communal one. The resolution was supported by the three Indian members and opposed by the rest of the Council including the elected European and nominated Fijian members. As a protest against this vote all three Indian members resigned their seats and, no Indian having subsequently offered himself for election the seats remained unfilled throughout the life of the Council. A fresh election was held during 1932 and as a result two Indian constituencies returned their representatives to the Council but no candidate offered himself for election from the third constituency.

In 1935 the elected Indian members of the Legislative Council advocated a system of nomination in place of the system of election and the proposal was opposed by the local Indian Association. European opinion was divided. The Government of India supported the principle of election and made representations to His Majesty's Government. The decision of His Majesty's Government is contained in the despatch dated the 20th July 1936, addressed by the Secretary of State for the Colonies to the Government of Fiji. The main points of the decision were—

- (a) the Fijian representatives should be selected as heretofore viz. by the Governor from a panel submitted by the Great Council of Native Chiefs
- (b) some of the European and Indian members should be elected and the others nominated

(c) the circumstances were such as to make it impossible to arrange for representation of the three sections of the population by means of a general franchise. The Legislative Council should consist of the Governor, 16 official members 5 European members (3 to be elected on a communal franchise and 2 to be nominated) 5 Fijian members (all to be selected as at present) and 5 Indian members (3 to be elected on a communal franchise and 2 to be nominated)

The Legislative Council as newly constituted met in September 1937. Fresh elections to the reformed Legislative Council took place in 1940.

The most important problem affecting the Indian community in Fiji is that of land tenure. Out of the total Indian population of 94,966 estimated in 1939 a very large majority consists of agriculturists but alienation of native-owned land is prohibited. More than 80 per cent of the land in the Colony is held by native owners as tribal land and the rest is held as Crown grants or as freehold property mainly by the Colonial Sugar Refining Company Ltd. Indians hold land as lessees from the native owners for the cultivation of rice sugarcane etc. and from the Colonial Sugar Refining Co. for cultivation of sugarcane. Practically this whole problem is one of security of tenure and the encouragement given to Fijians to cultivate their own lands with the most stable and profitable crop sugarcane caused some alarm to Indians engaged in agriculture. A number of practical difficulties connected with the leases which in main related to the procedure for obtaining leases and the administration of the land law were also brought to the notice of the Government of India.

In September 1936 the Council of Chiefs of Fiji agreed that all lands (including leases) not required for the maintenance of the Fijian owners should be opened for settlement that to further this end a Committee should be appointed to inquire into and to determine the amount of land needed for proper development by the Native owners and that all land (including leases) not so required should be handed over to the Government to lease on behalf of the Fijians. As a result of the examination of the question the Colonial Government came to the conclusion that the most satisfactory method of procedure would be for Government to take power to deal with all the native lands in the Colony and then to appoint a Commission to determine the lands to be set aside for the exclusive use of the Fijians. These proposals were referred to the Council of Chiefs in October, 1936, and accepted by them. A Bill entitled Native Land Trust Bill was published by the Government of Fiji in the Gazette dated the 17th November 1939 to give effect to the proposals referred to above. The Government of India made suitable representations on the Bill and the Bill with certain amendments passed its third reading on the 22nd February 1940 and was assented to by the Governor.

The Native Land Trust Ordinance 1940, provides for the formation of a Native Land Trust Board to administer all native land in the Colony on trust. A Fijian Commission has been appointed to conduct enquiries into partic-

ulars of land needed for Fijian use and to report to the Board, but with a view to safeguarding the interest of Indians it has been arranged to depute an Indian Assistant to the District Commissioner to accompany the Commissioner and to place before him any representations made by Indian lessees. The Colonial Government have also agreed that existing occupants of land should not as far as possible be disturbed. Though there is no Indian representation on the Board provision has been made for such representation on local committees which have been set up to advise the Board in respect of native land in those areas. Regulations have been framed regarding the terms and conditions of leases to be granted by the Board and provide *inter alia* for the grant of agricultural leases up to a term of 99 years.

On the subject of alleged discrimination in the Fiji Civil Service the Government of India have now been assured by His Majesty's Government that there is no rule preventing the appointment of an Indian as such to any posts in Fiji except those concerned solely with Fijian administration. The Colonial Government had under consideration a proposal to fix a quota for Indian emigrants but the matter has been held over for discussion with the Government of India after the war.

British Guiana—The Indian population in this colony being almost entirely to the labouring classes and their grievances are mainly economic. Towards the end of 1919 a deputation consisting of the Hon'ble Dr J. J. Nanan Attorney General and J. A. Luckhoo a prominent Indian who was a member of the combined court visited India to put forward a scheme for the colonisation of British Guiana by means of emigration from India. This was examined by a Committee of the Indian Legislature which advised that a deputation be sent from India to investigate conditions on the spot. Owing to certain unforeseen circumstances it was not found possible to proceed with the proposal until 1922, when a deputation consisting of Messrs Pillai Keatinge and Tivary visited British Guiana. Mr Keatinge was a former member of the Indian Civil Service who had retired from the post of Director of Agriculture Bombay Diwan Bahadur P. Kesava Pillai was an elected member of the Madras Legislative Council of which he was also Vice President, and Mr Tivary was a member of the Servants of India Society who had done considerable amount of Social Welfare Work among the Depressed Classes in the United Provinces. The two reports of the deputation were published on the 21st of January 1924. Towards the end of the month a deputation from the Colony of British Guiana consisting of Sir Joseph Nanan Kt., and the Hon Mr J. G. Luckhoo K.C. arrived in India for further discussions. The Standing Emigration Committee of the Indian Legislature eventually reported that while they would be inclined to view with favour the colonisation scheme put forward by the deputation they would before making any definite recommendation like the Government of India to depute an officer to British Guiana to report on certain matter. Kunwar Maharaj Singh, M.A. C.I.E. Bar-at-Law, was deputed for this purpose. He proceeded to that Colony in September

1925 His report was received on February 1st, 1926, and published. He made certain criticisms and suggestions and the whole matter was thus satisfactorily settled. The colonisation scheme has not yet come into operation as the Colonial Government are not in a position at present to afford the cost which it involves.

In March 1928 following special inquiries by the Colonial Office reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Government to alter the constitution of British Guiana by Order in Council. The changes eventually introduced by the British Guiana (Constitution) Order in Council 1928 did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declaratory Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of East Indian race resident in the Colony.

Nothing important about the Indian community in that colony was heard till September-October 1930 when there were labour disturbances on certain sugar estates. A Commission was appointed by the Governor to enquire into and report on (a) the causes which led up to the disturbances and (b) *inter alia* the condition of labour on sugar estates and to advise on the measures necessary to obviate the recurrence of similar disputes. From the report of the Commission which was published in December 1931 it would appear that the disturbances were primarily of an economic character and were inspired by grievances and disabilities which the Commission found to be genuine and which were common to both African and Indian labourers whether resident or non resident. There is reason to suspect that the position of the Indian labourer has somewhat deteriorated in the last few years. The abolition of the indentured system was no doubt most desirable and constitutes a theoretical advance, but as things are at present the Indian labourer no longer enjoys the measure of security provided by the Immigration Ordinance in regard to pay hours of work and other benefits and the supervision of the Immigration officers in his relation with the plantation authorities. In order to remedy this state of affairs the Commission has recommended

(i) the creation by Government of some authority with such powers as are considered necessary for the efficient safeguarding of the interests of both employed and employer and (ii) the revision of the provision of the Employers and Servants Ordinance in the light of more modern conceptions of the relations between employer and employed. As a result, the British Guiana Government has appointed a Commissioner of Labour and the other recommendations are it is understood still under consideration.

West Indies Royal Commission.—The decision of His Majesty's Government to appoint a Royal Commission to conduct a comprehensive survey of the social and economic problems affecting the group of the West Indian Colonies was announced by the Secretary of State for the Colonies in the House of Commons on the 13th June 1936 in the course of the debate

on the Colonial Office vote during which the common largely centred around conditions in the West Indies. The actual terms of the Commission (which were announced in the House of Commons on the 28th July) were the following—

To investigate social and economic conditions in the Barbados, British Guiana, British Honduras, Jamaica, Leeward Islands, Trinidad and Tobago and Windward Islands and matters connected therewith and to make recommendations.

In view of the large number of Indians in Jamaica, Trinidad and British Guiana and the importance of the Indian case in these territories being properly presented before the Royal Commission the question of safeguarding the interests of Indians engaged the attention of the Government of India. As a result of representations made by them they were able to secure the approval of His Majesty's Government to the deputation of an officer to represent their views before the Commission and to assist Indians in the West Indies in the presentation of their case. J. D. Tyron, C.B.E., I.C.S. who was secretary to the Rt. Hon. Sir V. S. Srinivas Sastri, P.C., C.B. when the latter went as the first Agent in the Union of South Africa, and subsequently represented the Government of India before the Joint Select Committees in South Africa on the Transvaal Asiatic Land Tenure Amendment Bill in 1930 was the officer chosen in this connection.

The Commission concluded taking evidence towards the end of March 1936 and the report was made available to the press in October 1936. Only a summary of the recommendations of the Commission were available, the report will not be published by His Majesty's Government for the present. The Commission recommended that some officer or officers preferably members of the labour department should specialise in East Indian questions and if suitable candidates are forthcoming should be East Indians. The Commission also recommended that the possibility of the appointment of suitable East Indians to posts in the Government service should be carefully borne in mind by Colonial Governments. They expressed sympathy with the complaints regarding the arrangements for legitimisation and validation of East Indian marriages and recommended that these marriages should so far as the law is concerned be put on exactly the same footing as other marriages.

In effect the commission conceded practically all the demands to which Indians themselves attached importance. The general recommendations which relate to matters of education, housing and labour administration appear satisfactory and likely to be of benefit to Indians. As an immediate step towards implementing the recommendations of the Commission His Majesty's Government have announced their decision to increase the annual allotment to the Colonial Development Fund from £1,000,000 to a maximum of £5,000,000 for ten years and to sanction annually a grant up to £500,000 for the purpose of colonial research. Though the Commission made no recommendation for the appointment of an Agent of the Government of India in the West Indies the matter continues to engage the attention of the Indian Government.

During 1939-40 Major G. Orde Browne was deputed by the Secretary of State for the Colonies to investigate and report on labour condition in the West Indies. The Government of India have taken steps to ensure that any measures undertaken to ameliorate the condition of labour as a result of Major Orde Browne's recommendations should reach also the Indian labour population in British Guiana, Trinidad and Jamaica. The Government of India have suggested with reference to Indian labour in Trinidad that the Industrial Adviser should also concern himself with the evolution of machinery for collective bargaining among rural labour as in the sugar industry and in regard to educational institutions in British Guiana, that the Colonial Government should make every endeavour to assume direct responsibility for their management and control.

Some of the recent developments since the visit of the West India Royal Commission in the Colonies of British Guiana, Trinidad and Jamaica which contain considerable numbers of East Indians (as Indians in these parts are referred to) deserve mention. In Jamaica where Indians are less organised and fewer in numbers than in the other two territories there has been a demand for the revival of the post of the Protector of Immigrants to deal with Indians which was abolished in 1934 as a measure of economy and the revival of the appointment was also recommended by Mr. Tyson in his evidence before the Royal Commission. This claim has now been conceded. It has also been proposed to introduce constitutional reforms in the three Colonies immediately by reducing the proportion of official representation in the local Legislative Councils and increasing the extent of elected representation while retaining the method of nomination for representation of minority or backward interests. In Jamaica where there is not much likelihood of any Indian securing election to the Council in view of the paucity of Indian voters and their not being numerous enough in any electoral district to have their effect felt, the Government of India have suggested that the possibility of nominating a member to safeguard Indian interests should be kept in view. In Trinidad and British Guiana local committees having Indian representatives have been appointed to examine franchise questions.

(4) OTHER PARTS OF THE EMPIRE

Ceylon and Malaya—The Government of India maintain their own agents in Ceylon and Malaya.

The question of the fixation of a standard minimum wage for Indian estate labourers in Ceylon and Malaya which is of considerable importance to the labourers has been the subject of negotiations between the Government of India and the Colonial Governments ever since the emigration of Indian labour to the Colonies for the purpose of unskilled work was declared lawful in 1923 under the provisions of the Indian Emigration Act 1923.

Ceylon—A satisfactory settlement regarding the standard wage and other outstanding questions affecting the interests of labourers was arrived at in 1927 and the legislation to give effect to it was passed by the Ceylon Legislative Council

in December 1927 as the Indian Labour Ordinance No. 27 of 1927. The standard rate of wages agreed upon were introduced with effect from the 1st January 1929. In view of the considerable fall in the cost of living and the precarious condition of the rubber and tea industries during the slump, the rates of wages in mid and low country estates were reduced early in 1932, those in up-country being left intact. A further reduction in wages took place in 1938 in view of the deterioration in the position of the rubber and tea industries. While agreeing to these proposals the Government of India stipulated that the reductions should be treated as strictly temporary and emergent and revision of rates on the upward grade should be considered as soon as the industries revived.

As soon as there was a revival of these industries towards the middle of 1933, the Government of India pressed for the restoration of wage cuts and the rates in force prior to the reductions of 1933 were restored with effect from the 1st June 1934.

Since September 1935 there has been little or no recruitment of Indian labour owing to the depression in the tea and rubber industries. In September 1937, with an increase of prosperity in these two industries the demand from the planters for extra labour became insistent. Their requirements were estimated at 20,000 labourers, but the Ceylon Government decided to permit the recruitment of only 5,000 as they were anxious to absorb suitable labour available for employment. The Government of India did not feel justified in permitting recruitment unless some revision of wages was promised and Indian estate labourers were accorded the village Committee franchise. The position in regard to the village Committee franchise is explained in a later paragraph.

After summoning Wages Boards and completion of the necessary formalities the Ceylon Government restored the wages of Indian estate labourers with effect from the 12th June 1939 to the levels prevailing before the slump period since February 1932 viz.

		Men	Women	Children
Up-country	Cts	40	25	25
Mid Country		4	27	28
Low Country		4	30	27

with provision for the supply of rice at a rate not exceeding Rs. 2 30 per bushel.

With the outbreak of war there was a general rise in commodity prices and a corresponding rise in the cost of living of the labourers. The period synchronised with a period of unrest and there was naturally a demand by the labourers and their associations for an increase in the rates of wages. With a view to meeting this demand the planters agreed to the grant of a war bonus at the discretion of the Superintendent of an estate. In order to place the scale of wages on a statutory basis the Board of Indian Immigrant Labour recommended the following scale of wages after considering the varying recommendations of the Wages Boards.

		Men	Women	Children
Up-country	Cts	54	43	32
Mid Country		52	41	31
Low Country		50	40	30

with the old provision about the issue price of rice to labourers.

These rates were brought into force from the 1st February 1941 the grant of war bonus being discontinued from that date

In 1936 as a result of a resolution passed in the State Council the Ceylon Government appointed an Immigration Commission to consider and report upon the problem of non Ceylonese workers in Ceylon, particularly with a view to the restriction and effective control of immigration into Ceylon of workers from other countries including assisted estate labourers. Indians form the majority of the immigrants in Ceylon and they presented a memorandum to the Immigration Commissioner. The report of the Commissioner was published in April 1938. The Commissioner came to the conclusion that, although in the absence of statistics it was not possible to estimate the extent of Indian immigration, the immigrant came to share the work when it was available and when it was not, he returned to his home. That the immigrant workers made possible an economic and general advance which could not have taken place without them; that Indians did not undercut wages; that the existing means of control of immigration were sufficient and that the restriction of Indian immigration for the protection of Ceylonese employment was not practicable.

This vindication of the cause of Indian immigration into Ceylon did not satisfy Sinhalese opinion. The Board of Ministers were intent on some measure to control Indian immigration and a memorandum containing a summary of certain far reaching proposals designed to restrict the entry of persons into Ceylon whether for purposes of permanent residence or for taking up any occupation in Ceylon was referred to the Government of India in August 1940 in accordance with an assurance given to them in the matter. It was agreed to discuss these proposals during the informal conversations arranged to be held in November 1940 in New Delhi to consider all questions outstanding between the Indian and Ceylon Governments. The Conference was held at New Delhi from the 4th to the 12th November 1940. The fundamental question of the status of Indians resident in Ceylon was first taken up for discussion. The proposals of the Ceylon Delegation were conditioned by one main purpose namely a substantial reduction in the number of Indians resident in the Island and ought to limit full citizenship rights to Indians in Ceylon in the second or third generation while extending certain restricted rights to those Indians with only a Ceylon domicile of choice (which was to include among other conditions to be prescribed a minimum of five years' residence in Ceylon). They further proposed that all other Indians in Ceylon and future immigrants should be debarred for ever from acquiring franchise or other rights of citizenship. The Government of India on the other hand, pressed for full citizenship rights for Indians who had put in five years' residence in the Island and produced evidence of a permanent interest in the Colony and for opportunity for all other Indians in Ceylon on a prescribed date to qualify for such rights in due course. As the Ceylon Delegation were not prepared to modify their attitude, the talks ended in a breakdown of the negotiations.

On 4th March 1941 the Board of Ministers introduced two Bills in the State Council, one to provide for the registration of persons in Ceylon who did not possess a Ceylon domicile of origin and the other to make provision for the regulation and control of the entry of non Ceylonese into Ceylon. After the Bills passed their second reading they were referred to Standing Committee A who have expressed themselves willing to hear all persons who wished to be heard before the Bills were finally considered. The European Association presented its views through counsel but the Indian Association have not considered it necessary or advisable to make any representations as Indians were wholly opposed to the principles underlying the Bills. The arguments for the European Association were concluded on 26th June 1941 when the Committee adjourned *sine die*.

In August 1941 at the request of the Government of Ceylon the Government of India agreed to a resumption of the informal conversations that had ended inconclusively at New Delhi in November 1940. Delegations from the two Governments met at Colombo on the 22nd September 1941 and the conference ended on the 21st when agreed conclusions were reached on all the subjects discussed and a joint report was signed by the two Delegations. This report was simultaneously published in Ceylon and in India on the 11th October. In their report to the Ceylon Board of Ministers published on the 30th October the Ceylon Delegation strongly recommended the adoption of the joint report.

The proposals in the joint report however came in for criticism from prominent Indians and Indian Associations in Ceylon particularly in regard to the provisions about the establishment of domicile of choice, the reservation in the grant of franchise rights to the Indian population already in Ceylon the absence of specific provision for the safeguarding of domicile rights of the children of holders of certificates of permanent settlement the disabilities attaching to absences of more than a year and the conditions on which future immigration might take place. Opinion in India was also strongly against the proposals in the joint report and on 17th November 1941 the Central Legislative Assembly unanimously passed a resolution that Indians in Ceylon on the prescribed date of the agreement and those who had been residents within a specified period prior to the date of the agreement should have freedom of entry into Ceylon and no regional or occupational restrictions should be imposed on them. They should be entitled to full rights of citizenship on the completion of the prescribed period and that for the future provision should be made to protect Indian trade interests. Matters arising out of the joint report are under consideration by the Governments of India and Ceylon.

Another piece of legislation affecting Indians in Ceylon was the Village Communities (Amendment) Ordinance. The amendment sought to enfranchise all persons of either sex other than Indian estate labourers thereby giving the vote to Europeans and Burghers who were previously excluded. This discrimination against Indians roused protest both in India and in Ceylon.

With the object of removing the charge of obvious racial discrimination, the Standing Committee of the State Council made an amendment to the proposed Bill which had the effect of extending the franchise to those members of 'excepted classes' (European Indians and Burghers) who pay land tax and possess a specified area of land (5 acres). The practical effect of this would be to enfranchise the great majority of Europeans and Burghers and leave practically the entire Indian estate labour population without the vote. A further protest was made to the Ceylon Government by the Government of India, who decided to stop the recruitment of labour for Ceylon until this question was satisfactorily settled. The Bill was passed by the State Council but was reserved by His Excellency the Governor of Ceylon for the signification of His Majesty's pleasure.

With a view to meeting the charge of racial discrimination the relevant clause of the Bill was amended so as to exclude all labourers resident on estates, whether Ceylonese or Indian, from the village committee franchise. The Original Bill and this amendment became law on 1st January 1939 and it is felt that though *de jure* discrimination against Indians has been removed, *de facto* discrimination remains as a very large body of Indian estate labourers till in practice be excluded from the village franchise while the effect upon the Ceylonese will be negligible.

Reference should also be made to another matter in which there has been difference of opinion between the Indian and Ceylon Governments. Despite repeated appeals for delay from the Government and people of India the policy of so-called voluntary repatriation was brought into force by the Ceylon Government on August 1, 1939. About 600 Indian ex-employees of the Ceylon Government left the island with the promise of a bonus on reaching their homes. Attempts were continued to squeeze out Indians engaged in other walks of life such as teachers and municipal servants.

As the Ceylon Government were unwilling to modify their attitude in regard to their scheme the Government of India decided to withdraw their offer to enter into trade negotiations with that Government and in view of the uncertainty of employment for unskilled labour in Ceylon they also prohibited the emigration of all unskilled labour to Ceylon with effect from 1st August 1939. It may be mentioned that the Ceylon Government continued to pursue their schemes for the disengagement of Indian daily paid employees and the total number who have retired from Government service is 517 including 1215 workers compulsorily retired.

The Shops Regulation Ordinance came into force on 1st August 1939. As there was great difficulty in fixing closing hours of shops and there were numerous representations that portion of the Ordinance which related to closing hours was not enforced, only the provisions regarding working hours, holidays, leave and other conditions of service of shop employees being put into operation. The Fisheries Ordinance which received Royal Assent in November 1940 discriminates between Indians and Ceylonese and prohibits non Ceylonese from

engaging in fishing in Ceylon waters for profit without a fishing license but the Ceylonese Minister has stated that Indians who have been resident in Ceylon for a number of years and have been carrying on *bona fide* fishing as an industry will experience no difficulty in obtaining licenses.

The question of reform of the Ceylon Constitution which was debated in the State Council from 9th March to 13th July 1939 has been engaging the attention of His Majesty's Government and an Order in Council extending the life of the present State Council which was normally due to expire in March 1941, for a further period of two years was published in the Ceylon Gazette Extraordinary dated 19th October 1940. On 25th October 1941 the following communication from the Secretary of State for the Colonies was read by the Speaker in the State Council—

The urgency and importance of reform of the Constitution are fully recognized by His Majesty's Government but before taking decisions upon the present proposals for reform concerning which there has been so little unanimity but which are of such importance to the wellbeing of Ceylon His Majesty's Government would desire that the position should be further examined and made the subject of further consultation by means of a Commission or Conference.

This cannot be arranged under war conditions but the matter will be taken up with the least possible delay after the war.

Malaya—In Malaya standard wage rates which were considered suitable by both the Indian and Malayan Governments were introduced in certain Key areas in 1928. The rates fixed however were reduced by 20 per cent. with effect from the 5th October 1939 owing to the acute depression in the rubber industry. The Government of India accepted the proposals for the reduction in the wages but they represented to the Malayan Governments that all Indian labourers who wished to be repatriated either because they were thrown out of employment, or because they were unwilling to work on wages lower than the standard rates should be repatriated free of cost. As a result of this suggestion, nearly 71,000 Indians obtained free repatriation between August and December 1939. All recruitment of labour from India to Malaya, moreover, was stopped and only such persons were assisted to emigrate to Malaya as had left their families there. The depression in the rubber industry continued throughout 1931 and 1932, but towards the end of 1933 there was an upward trend in rubber prices. The figures of repatriation showed a steady decrease and it was felt that there might be a shortage of labour if prices continued to rise. The Malayan Governments accordingly requested the Government of India to permit the reopening of voluntary assisted emigration from South India to Malaya which was stopped in 1930. Assisted emigration was resumed in May 1934 and was regulated by a quota system subject to certain safeguards. This system was continued in 1934 and 1935 and was stopped from 1936 when voluntary assisted emigration was allowed without a quota. In 1938 the Government of India sent a deputation

consisting of the Rt Hon V S Srinivasa Sastri, P. O. C. with G S Bowman I.C.S., as his adviser, to Malaya to examine the condition of Indian labourers in Malaya with special reference to the rates of wages. During the visit of the Deputation the Malayan Government decided to restore half the cut which had been imposed in 1930 in so far as labour employed by them was concerned. The estates immediately followed suit and the standard rates in force on the estates were fixed at 45 cents for men and 36 for women. There was widespread labour unrest towards the end of 1936. The Chinese labour on estates and mines struck work and as a result occurred revision of wage rates. Over 12,000 Indian labourers employed by the Singapore Municipality also struck work in November 1936 and the Municipality decided to give a minimum basic wage of 52 cents a day to unskilled labourers with free quarters and corresponding increases in the higher rates of wages of all labourers with effect from the 1st March 1937. The Deputation returned to India in January 1937 and recommended the immediate restoration of the wages of Indian labourers to the 1928 level. As a result of the correspondence between the Government of India and the Malayan Government the latter restored the rates of 50 cents for men and 40 cents for women with effect from the 1st April 1937.

This restoration of wages was however short-lived. The condition of the rubber industry deteriorated and the Malayan Government reduced the wages of the Indian labourers by 10 per cent with effect from the 1st May 1938 and contemplated a further reduction of 10 per cent from the 1st August 1938. The Government of India asked for a statement of the reasons for the first reduction and requested that, in the meantime, the reduction of wages should be postponed. The second reduction was not brought into force and the Government of India prohibited, with effect from 15th June 1938 all assisted emigration to Malaya for the purpose of unskilled work.

With a view to settling the differences that had arisen as a result of the stoppage of emigration to Malaya and in order to discuss other outstanding questions, the Government of India accepted the suggestion of the Malayan Government that a delegation from Malaya should visit India. This delegation came to India in January 1939 and discussed the various points of interest with the Government of India. The Members of the Standing Emigration Committee also met the members of the Malayan delegation and heard their views. The main question discussed was that of the rates of wages of Indian labourers in Malaya. Certain proposals for a recalculation of standard wages, partly on a fresh basis and partly on account of the changed circumstances were made by the Government of India. The Malayan Delegation, after stating certain objections to these proposals agreed to place them before the Malayan Governments for examination on their return to Malaya. The Malayan delegates also agreed to have the suggestion of the Indian representatives on certain other points, e.g. the status of Indians in the Malayan States, the provision of adequate educational facilities for Indians of all classes etc. examined by their Government. Future negotiations were to be

continued by correspondence and the Government of India were in communication with the Malayan Government on all the points raised.

As regards wages the outbreak of war in September 1939 resulted in a considerable increase in the price of rubber and the employers of Indian labour hastily raised the daily wages of Indian labourers to 30 cents for men and 40 cents for women with effect from October 1 1939. The Malayan Government also sanctioned cost of living allowances for daily paid labourers in their employ with provision for review of the rates from time to time. On the subject of similar allowances for estate labourers representations were made to the Malayan Government. It was reported that the United Planters Association of Malaya decided to grant from 1st January 1941 temporary allowances in addition to normal wages. For urban labour also both skilled and unskilled the Malayan Government sanctioned cost of living allowances.

Of labour legislation passed recently by the Malayan Government reference should be made to the Trade Unions and the Industrial Courts Enactments. Though one of the major changes suggested by the Government of India were not accepted the Malayan Government assured that when experience was gained of the administration of the above legislation any suggestions based on the results of the working of the Indian Trade Unions Legislation would be fully considered. The Secretary of State also informed the Government of India that the question of amendments might suitably be pursued after the war.

Burma.—With the separation of Burma the position of Indians in that country had to be watched with special care and attention. Between July and September 1938, Indians in Burma passed through very anxious times. Anti Indian riots of an alarming character broke out in Rangoon on the 26th July and continued till the 1st August. As the news spread to the districts and villages rioting took place in various districts towards the end of July and the beginning of August. In a few places rioting continued till September. Though the first outbreak of riots was brought under control there was acute tension between the Burmese and the local Indian communities which manifested itself in a second outbreak in Rangoon early in September. Indian life and property became insecure during this period and about 11,000 Indian refugees were repatriated to India by the Shipping Companies by private relief committees and at the expense of the Government of Burma. The total number of Indians killed and injured during the riots is estimated at 164 and 711 respectively. The loss of Indian property on account of the riots is estimated between 18 and 54 lakhs.

The serious situation in Burma hastened the decision of the Government of India to send out their Agent whose appointment was already under contemplation. C. A. Henderson, C.S.I. I.C.S., a senior I.O.S. officer from Madras was temporarily appointed as Agent and he took over charge of his duties towards the end of September 1938.

The Government of Burma appointed on the 22nd September a Committee to enquire into the riots and the personnel and the terms of reference are given below

Personnel.—(1) The Honble Mr Justice H. B. L. Brand, M.A. Bar-at-Law (Chairman)
(2) U Po Han B.A. Bar-at-Law member of the Public Services Commission Burma (8)
Senator A. Rahtin of Maymyo (4) U Khin Maung Dwe, Pleader Mandalay, and (5) Dr M. A. Rauf B.A., B.L.L. LL.D. (Bar-at-Law)—
Members F. S. V. Domison L.O.S.—Secretary

Terms of reference.—

(1) to inquire into and report on

- (a) the causes of the recent riots in Burma
- (b) the measures and actions taken by the police and civil officers during the riots and
- (c) the loss of life and property and the desecration and destruction of religious edifices and buildings during the riots

(2) to make recommendations for the prevention of similar communal or religious disturbances.

In view of the importance and urgency of removing the underlying causes of the riots the Committee submitted an Interim Report which was published in January 1939. According to the Interim Report, though the immediate cause or the occasion of the outbreak of the riots was the publication or rather the discovery of Maung Shwe Hpi's book which is alleged to have insulted the Buddhist religion, the real causes were political, economic and social and lay deeper. The unsatisfactory conditions of land tenure and the resultant agrarian discontent, the feeling of uneasiness which exists in the mind of the average Burman as to the future course of Indian immigration into Burma and of its effect upon the economics and social life of the Burmese, marriages of Burmese women with Indian Muslims and the activities of the organisations which have for their motto "Burma for the Burmese" were according to the Committee some of the more important causes of the riots of 1938. The Final Report of the Inquiry Committee was published during April, 1939 and the Recommendations made in these two reports are receiving the attention of the Government of India. The questions under active consideration are (i) compensation for loss of Indian life and property and (ii) Indian immigration into Burma.

The general improvement in Burma was unfortunately marred in the closing days of January 1940 by a communal riot in Rangoon. The casualties were estimated at 15 dead and about 150 injured. The tension did not spread into the interior and peace was restored in less than a week. In this matter R. H. Hutchings C.L.E. I.O.S. who had succeeded C. A. Henderson, C.L.E. L.O.S. as Agent of the Government of India in Burma in September 1939, had the prompt and effective co-operation of the Rangoon City Police and the Government of Burma.

In view of the wide-spread uneasiness about Indian penetration into Burma revealed by the

Riot Inquiry Committee in 1939 the Government of Burma decided to appoint a commission headed by the Honourable Mr J. Baxter and containing one Indian representative. **Batthal Deal**, to inquire into and report on the volume of Indian immigration and its ramifications. The Commission has not yet completed its work.

During the latter half of 1939 the attention of the Indian community in Burma was focused on the land Purchase Bill which sought to establish the principle of individual and independent property in the soil on the Rangoon Municipal Amendment Bill, 1937 which aimed at remedying the inadequate representation of Burman interests in the Municipality of Rangoon, and on the administration of the Tenancy Act, 1938 which affected the Natturalai Chettys Association. Representations were made by the Government of India to the Burma Government on all these matters.

In April 1941, an Indo-Burma Trade Agreement was signed at New Delhi under which subject to the provisions of the agreement the contracting parties undertook to accord each other the most favoured Empire nation treatment.

The more important items of trade affected and the new rates of duty applicable to goods imported into India are as follows.—Rice and other grains and pulses, timber, raw rubber and lubricating fuel and bathing oils to be admitted free of duty, duty to be levied at 5 per cent *ad valorem* on potatoes, cotton fabrics, cutch and gambier and 10 per cent, on candles, wax and grease, turpentine, non-essential oil seeds and oils, betelnuts to pay duty at 20 per cent *ad valorem* while a duty of one anna per pound was charged on unmanufactured tobacco, Motor spirits and kerosene were already liable to full duty.

In accordance with the terms of the revised Trade Agreement, no duty was levied in India on imports of starch from Burma. The general principle underlying the agreement was that goods of Indian and Burmese origin enjoyed in the market to which they were exported a margin of preference of not less than 10 per cent, over similar articles liable to duty at the standard rate.

In June 1941 the Government of India sent a delegation to Burma to negotiate an agreement over immigration of Indians into Burma. The delegation consisted of the Hon. Sir Gajra Shankar Bajpai, R. H. Hutchings Agent to the Government of India in Burma and C. S. Boaman, with V. Viswanathan I.O.S. as Secretary. Indian immigration to Burma is regulated by the Burma Immigration Order since the separation of Burma from India. In 1941 a twelve months notice terminating the Order was given by the Burma Government. A new agreement therefore has to be reached by March 31 1942.

Further consideration of all these questions were necessarily suspended with the extension of war into Burma.

Under the Indo-Burmese Immigration Agreement signed in July 1941, it was agreed that workers would not be allowed into Burma without either an A or B permit and

as A permits cost Rs 500 this will virtually exclude unskilled labourers. B permits would be valid for not more than three years but could be extended with the Burma Government's approval to not more than 9 years in all. A literacy test was laid down for A permit holders would be limited to quotas fixed by the Government of Burma on the recommendation of an Immigration Board on which Burmese Indians and Europeans were to be represented. In addition to the repatriation and entrance fees totalling Rs 32 an unskilled labourer was required to pay a residential fee of Rs 5 a year and extra fees for admitted dependants. Skilled workers were subject to higher levies. Immigrants who have resided in Burma for 7 years between 1932 and 1941 were to be treated as privileged and given the right to further employment without the time limit. The agreement met with hostile criticism in the Indian press generally.

Zanzibar—The small Protectorate of Zanzibar consisting of the two islands of Zanzibar and Pemba has an Indian community of nearly 15,000 out of a total population of 285,000. These Indians are mostly traders, and the trade in cloves—of which Zanzibar furnishes more than 80 per cent of the world's supply—is largely in their hands. No problems of any magnitude faced this community until July 1934 when a group of Decrees regulating the trade in cloves and prohibiting the free alienation of land by Africans and Arabs to others was passed by the Legislative Council of Zanzibar and received the assent of H H the Sultan.

So great was the apprehension of the Indian community in regard to these measures that, after an unsuccessful attempt to have their operation postponed the Government of India despatched K P S Menon, 108 to visit Zanzibar and examine the effect of the Decrees on Indian interests. Mr Menon expressed the opinion that (i) the clove legislation, i.e. the Clove Growers' Association Decree and Clove Exporters' Decree and (ii) the Land Allocation Decree, were objectionable from the point of view of the Indian community. In regard to (i) he stated in his Report which was published in January 1935 that its effect would be to drive from the market most exporters of cloves and also middlemen in the internal market who as already explained were almost entirely Indians.

After consideration of Mr Menon's recommendations and the comments of the late Resident of Zanzibar thereon detailed comments on the Decrees were communicated to His Majesty's Government by the Government of India. Eventually as a result of their representations, His Majesty's Government despatched B H Binder a Chartered Accountant to Zanzibar in April 1936 to review the position of the Zanzibar clove industry. With the concurrence of His Majesty's Government the Government of India despatched G S Boxman I.C.S. to act as an observer in connection with the enquiry.

Mr Binder's Report was published in November 1936 and he made the following recommendation for the control of the clove trade with the object of securing a fair price to the producer and preventing wide fluctuations of prices.

(i) **Internal marketing**—The purchase of cloves should be restricted to licensed buyers, a sale licence to buy and receive deposits of cloves being in the first instance granted to the Clove Growers' Association. The Association should fix purchase prices according to quality from time to time, if possible for each season and in so doing should take into account the profit or loss on each year's working. The Association should have the power to appoint district representatives and local agents for purchasing cloves from the growers, to be selected from existing local dealers and shopkeepers irrespective of nationality.

(ii) **Export trade**—No sales should be made by the Association except for export and to licensed exporters. The Association should not export direct unless overseas buyers desire to buy direct or other circumstances arise which necessitate this course. The right to limit the number of licensed exporters should remain but the licence fee should be reduced to a sum which would be within the means of the small exporter and the levy on the export of cloves should be abolished.

(iii) **Advisory Committee**—Mr Binder recommended the establishment of an Advisory Committee, to consist of two representatives of growers one for Zanzibar and one for Pemba, two representatives of exporters and one of the C.G.A. to confer from time to time with the Board of the Association and to discuss the purchase and sale prices to be fixed.

5 Mr Binder's recommendations were opposed both by the Indian community in Zanzibar and public opinion in India. Legislation which substantially gave effect to these recommendations was, however, passed in the shape of the Clove (Purchase and Exportation) Decree and came into force on the 1st August 1937. As a result of representations by the Government of India safeguards were provided in the form of (i) an assurance that all Indians previously engaged in the internal trade who applied for them would be given buying agent's licences and (ii) Indian representation on the Board of Management of the C.G.A. to the extent of a total membership of seven, and on the Advisory Committee to the extent of two members out of six. These modifications however did not satisfy the Zanzibar Indian community who refused to nominate their representatives and organised an almost complete boycott of the clove trade both in the internal market and on the export side. Their sympathisers in India also organised an equally effective boycott of imports of Zanzibar cloves into this country in this connection it must be remembered that over 26 per cent of the cloves exported from Zanzibar normally come into this country and that India is almost the sole market for cloves of the best quality.

6. The whole question of the clove trade was now re-examined by the new Resident in the light of the boycott and, following representations by the Government of India, the Government of Zanzibar with the approval of the Secretary of State for the Colonies, prepared a modified scheme for the control of the clove trade. Details of this scheme were explained in a memorandum which was published simultaneously in Zanzibar and India on the 3rd March, 1938. The main features of the scheme

was the withdrawal of the monopoly of the Clove Growers Association in the internal market. Any licensed dealer was to be free to purchase cloves, either from producers or from other licensed dealers, at prices to be arranged between themselves and to store cloves as long as they wished. Producers indebted to Government under the Land Protection (Debt Settlement) Decree (explained in paras 10 and 11 below) were to sell only to the Clove Growers Association, but other producers were to be free to sell their cloves to the Association or to any licensed dealer. All cloves were to pass through the Association, before ultimate export, but the Association itself was not to sell to principal overseas markets as long as the normal flow of exports was maintained.

7 The Government of India were of opinion that the proposals were not free from certain features held to be objectionable by local Indians and suggested that the possibility of evolving a satisfactory formula acceptable to them should be explored by means of a conference at which alternate proposals and matters of detail could be discussed. The Government of India also offered to depute an officer to render all assistance in effecting a settlement, if the proposal found favour with the Zanzibar Government. This was readily accepted to by them and the Government of India selected for this purpose G. S. Boorman, I.C.S. (who had been deputed to Zanzibar in 1936 in connection with Mr. Blunder's enquiry)—a choice which was welcomed by the Zanzibar Indian National Association.

Mr. Boorman reached Zanzibar in the middle of April 1938. Though the outlook for an amicable settlement seemed rather gloomy at various times during the negotiations, it became possible to announce an agreement on the 5th May thanks to the co-operation of the local Indian community and the accommodating spirit of the Zanzibar Government.

8 The main objections of the Indian community to the original proposals were (i) that participation in the export trade was very much restricted; (ii) that freedom of purchase in the internal market was permitted only with producers not indebted to Government; and (iii) that the proposed transport scheme for the conveyance of cloves from producers was liable to be used as an inducement to attract all sale of cloves to the Clove Growers Association. According to the compromise arrived at, exporters are free to purchase up to 50 per cent of the quantity to be exported from other than the Association's stocks, so that half the export trade is not subject to control. In the view of the Zanzibar Government this measure of control could not be dispensed with if export prices are to be maintained at a stable level. As regards the internal market, producers indebted to Government are under obligation to sell to the Clove Growers Association only so much of their stocks as will set off the instalment due to Government under the debt redemption scheme. Under the modified transport scheme, cloves will be brought to market centres where dealers and the Clove Growers Association will have an equal chance with the producer. The agreement has been given effect to by the Clove Decree, 1938 and so far has been working smoothly.

9 Closely allied with the control of the clove trade were the problems of indebtedness and the restrictions on the alienation of land. The land alienation Decree passed in 1934, besides restricting the passing of land out of the hands of the Arab and African plantation owners into those of Indians, established, for one year in the first instance a moratorium on debts secured on land mortgages. This moratorium was later extended from time to time, pending a settlement of the whole problem of indebtedness. Mr. Menon's inquiries in regard to these questions also discussed a position unsatisfactory from the Indian point of view. After consideration of his recommendations the Government of India suggested to the Government of Zanzibar that the position was such as to require review. The latter agreed to make a fuller investigation of the indebtedness question, and appointed a Commission for the purpose. This Commission, which included one Indian member (Mr. Tayabji Rajabali), produced a report which on the whole supported the position taken up by the Indian community in this respect. The Government of Zanzibar, however found themselves unable to accept the report as it stood and formulated alternative proposals.

10. Representations were made by the Government of India and after considerable discussion a Bill drafted by the Attorney General of Zanzibar in consultation with Sir Ernest Downson was passed into law as the Land Protection (Debt Settlement) Decree which came into force on the 1st December 1937. The principal features of the scheme embodied in the Bill are —

(a) A liquidation of the debt with a view to ascertaining the actual amount lent (or value of goods delivered on credit) and allowing a fair rate of interest thereon.

(b) Valuation, by an officer appointed by Government for the purpose, of both mortgaged lands and lands sought to be attached by unsecured creditors.

(c) The Government to pay off the creditor to the extent of the value of the land threatened and to assume the position of mortgagee in respect of the amount paid.

(d) Where the value of the land as estimated by the officer appointed to value it is insufficient to satisfy the debt, the creditor will be free to challenge the valuation either by instituting a suit for foreclosure or sale or by applying for an order for sale or attachment.

(e) On any such proceeding being taken the Court will in the first instance proceed to value the property in such manner as it considers proper, untrammelled by the rules contained in the Bill which govern the actual valuation.

(f) The Court's valuation must not be less than the official valuation. If it is greater the Government must give effect to it unless the debtor himself proves that the proceedings against his land which have commenced shall take their ordinary course.

(g) Repayment by the debtor of the amounts advanced by the Government on his behalf and interest thereon to be effected by suitable instalments having due regard to the necessity of leaving means at his disposal to provide for the proper husbandry of the land and for the livelihood of himself and his family.

The moratorium imposed by the Land Alienation Decree of 1934 was lifted at the same time. The new scheme has, on the whole, met with a favourable reception from all communities in the Protectorate.

The decree was amended to by the Sultan on June 16 1939. From information received from the Indian Trade Commissioner in East Africa the Government of India understand that the slave agreement continues to work smoothly so far as can be judged from the figures of total slave exports from the Protectorate and the business handled by Indian firms. Indians have recovered the full share in the trade which they had in 1934 and there is no doubt that this position is a direct outcome of the agreement.

Mauritius.—In April 1924 the Government of Mauritius requested that emigration to the Colony might be continued for a period of one year but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation. The Government of Mauritius agreed to receive an Officer for the purpose and to give him all facilities and in December 1924 an Indian Officer of Government, Kunwar (now Sir) Maharaj Singh left India to conduct the necessary inquiry.

Sir Maharaj Singh's report was published by the Government of India in August 1925. The various recommendations made in the report were commended to the consideration of the Colonial Government.

In February 1926 the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Kunwar Maharaj Singh in regard to the renewal of emigration to Mauritius, viz. that no more unskilled Indian labour should be sent to Mauritius either in the immediate or near future. With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population resident in the Island the Colonial Government expressed their willingness to give effect to several of them.

The condition of Indians in this Colony continued to remain satisfactory till 1937 when there were labour disturbances on certain sugar estates employing Indian labour. The Colonial Government appointed a Commission to enquire into and report on the disturbances. The commission reported during 1938 and the most important recommendations of the Commission related to the necessity for the formation of a Department of Labour and the enactment of suitable labour legislation in place of the Labour Ordinances of 1922 which mainly dealt with indentured labour. Both recommendations have been given effect to and the Labour Ordinance of 1933 which closely follows the Malayan Labour Code should prove of considerable benefit to the Indian labourers, a large number of whom are employed on sugar estates. The Industrial Associations Ordinance of 1936 provided for the regulation of conditions of employment, the establishment of machinery for the peaceful settlement of disputes and generally the formation of industrial Association. This Ordinance, it will be observed, provides for collective bargaining by industrial labourers.

The Government of India had under consideration for some time the question of deputing an officer to visit the Colony and to report on the condition of Indians resident there as no officer of the Government of India visited the Colony since Kunwar Sir Maharaj Singh's deputation in 1922. The suggestion was accepted by H.M.'s Government and in May 1940 S. Midley I.C.S. Secretary to the Agent General for India in the Union of South Africa was deputed to visit Mauritius. He stayed in the Colony for about five weeks and submitted a report to the Government of India.

Canada and Australia.—The present position of Indians in the Dominions is that under the Canadian Dominion Election Act Indians domiciled in Canada enjoy the federal franchise in eight out of the nine provinces in the province of British Columbia, Indians do not enjoy the provincial or the Dominion franchise and efforts so far made to remove this disability have not been successful. In New Zealand, Indians enjoy the franchise on the same footing as all other British subjects. In Australia sub-section (5) of section 29 of the Commonwealth Electoral Act, 1918 24, was amended in 1925 by adding after the word "Asia" the words, "except British India."

This measure gives the Commonwealth franchises to subjects of British India at present domiciled in Australia and is the fruition of the hopes held out by the Commonwealth Government to Mr Sastri on the occasion of his visit to Australia in 1922. As a result of the representations made in London in 1930 informally by the late Sir Muhammad Shafi at the instance of the Government of India to the Prime Minister of Australia the electoral law of Queensland has also been revised to enfranchise the British Indians resident in that State. It was therefore, in Western Australia alone that Indians did not enjoy the suffrage in respect of election for the Lower House. This disability was also removed at the end of 1934 by Act which have recently been passed by the Commonwealth Parliament. British Indians in Australia have been admitted to the benefits of Invalid and Old Age Pension and Maternity allowances from which they were hitherto excluded as Asiatics. Old Age Pension is payable to men above 65 years of age or above 60 years provided such persons are of good character and have resided continuously for at least 20 years. An Invalid Pension is obtainable by persons who being above 16 years of age and not in receipt of an Old Age Pension have whilst in Australia become permanently incapacitated for work by reason of an accident or by reason of being an invalid or blind provided they have resided continuously in Australia for at least five years.

Maternity allowance to the amount of £5 is given to a woman of every child to which she gives birth in Australia, provided the child is born alive and the woman is an inhabitant on the Commonwealth or intends to settle there. This Legislation removes the last grievance of the Indian community in Australia which was remediable by the Federal Government.

War. The extension of war in to the Far East and Burma has given rise to new problems. First under the threat of occupation of territories by the Japanese there was the question of the

evacuation of non-essential civilian Indians particularly women and children to India. In spite of the shortage of shipping about 6000 Indians were safely transported to India by sea. In the case of Burma evacuation by sea was possible till the port of Rangoon had to be abandoned and about 6000 Indians had been evacuated. As regards land routes a total of over two hundred and fifty thousand Indians have reached India by means of the Assam Burma land route and the Prome Akyab Chittagong route. Appreciable numbers of Indians have also been evacuated by air. Secondly following the present occupation of the territories by the Japanese the problem of assistance to the dependants in India of Indians stranded in these territories, and to the evacuees themselves has become of considerable magnitude and the Government of India have generously come forward by authorising Provincial Governments to give necessary advances on behalf of the Government of India. Thirdly the welfare of Indians in the Japanese occupied territories generally is one on which both Government and the public are much concerned. Every effort is being made to obtain such information as may become available through neutral sources and the International Red Cross

Fourthly with the cessation of normal communications with these countries a very considerable number of enquiries are being received for eliciting information regarding the welfare of individuals in those areas and through the courtesy of the Red Cross attempts are being made to secure the necessary information. Fifthly Government have been receiving claims in respect of properties and assets left behind in the enemy occupied territories which are for the present merely being recorded for any possible action later though obviously no guarantee can be given that these claims can at all be settled. Sixthly the question of the rehabilitation of the evacuees in India is also of great importance. The Provincial Governments and National Service Labour Tribunals have been requested to register applications for employment from non technical and technical personnel respectively with a view to the persons being put into touch with employers including Government Departments and industry. Reference has been made only to some of the more important questions which have arisen and for a fuller account reference should be made to the *communiqués* on the various subjects which are being issued from time to time by the Government of India.

Indians in Great Britain

In the middle of the nineteenth century the Parsee community in the persons of the late Dadabhai Naoroji and other members of the firm of Cama & Co. led the way in the sojourn of Indians in England for business purposes. This lead it has since maintained though there are both Hindu and Mahomedan business men firmly established there. Nor are the professions unrepresented for there are in London and elsewhere practising barristers, solicitors and medical men of Indian birth. The number of the latter especially Parsees, is considerable. Three Indians (all belonging to the Parsee community) have sat in the House of Commons. Since 1910 seven Indians—the late Mr Ameer Ali the first Lord Sinha the late Sir Binode Bihari the late Sir Dinabhai Mulji Sir Shadi Lal Mr M. R. Jayakar and Sir Madhavan Nair—have served on the Judicial Committee of the Privy Council. Three Indians are Advisers to the Secretary of State for India. In 1919 the late Lord Sinha was the first Indian to be raised to the peerage and to be appointed a member of the Home Government.

India House.

High Commissioner for India—This post was first established in 1920 and its various permanent incumbents have been—

Sir Wm Meyer 1908 (Retd.) 1920-22 Sir Dadabhai Merwanjee Dalal, 1922-24 Sir Ajul Chandra Chatterjee 1925-31 Sir Bhupendra Nath Mitra 1931-36 Sir Firoz Khan Noon from 1936-1941 and Sir Aizul Huq from the Spring of 1942

In March 1920 the office of the High Commissioner for India was transferred from the inadequate premises in Grosvenor Gardens to the new India House in Grosvenor Gardens erected and furnished at a cost of £224,000. The design of this noble building which has a frontage of about 180 ft opposite the Waldorf Hotel was the work of Sir Herbert Baker B.A. with Dr Oscar Faber as consulting engineer. Although expression of the Indian character of the building is mainly found in the interior the architect has given to the details of the external elevation, by means of carving, heraldry and symbolism an individuality that proclaims it the London house of India. Including basement and mezzanine floors, there are twelve floors in all the available space for clerical work alone being between 60,000 and 60,000 ft. The total height from the lower level in the courtyard on the Strand side to the roof is about 100 ft.

On the ground floor there is a great hall for exhibits of the products and art wares of India. This hall is carried up two floors, the upper floor being represented by a wide gallery and on either side of the exhibition hall there are recesses after the style of an Indian bazaar for special exhibits. From the octagonal entrance hall a great public staircase leads to a gallery round the octagonal hall on the first floor. This gallery in its turn leads to a high vaulted library and reception rooms, and the central portion of the library provides accommodation for large receptions on special occasions.

The staircase exhibition hall octagonal hall and library markedly express the Indian

character of the building. The walls of the staircase and the halls are of red stone similar in appearance to the Agra and Delhi sandstone carved and pierced in the geometrical patterns of the *jali* in Indian architecture. Such of the carving as could be completely separated from the structure was actually worked at New Delhi by Indian workmen from Makara marble. The use throughout of Indian hardwoods, chiefly guggan, for flooring obviates the need for any floor covering. From basement to roof scarcely any wood of non Indian origin was employed. For panelling and decorative purposes in all parts of the great building silver gray koko, laurel and the beautiful dark red padouk have been used. The domes and vaults of the building have been embellished by mural paintings, the work of specially selected Indian artists. The water supply is entirely independent of municipal service being obtained from two artesian wells sunk some 450 ft below the basement, where the central heating apparatus is installed.

The Indian Trade Commissioner and his staff are at India House with all other departments of the Office of the High Commissioner excepting the Stores Department which was housed until the bombing of London at the depot off the Thames at Belvedere Road Lambeth.

The Students

Under normal conditions it is the student community which constitutes the greatly preponderating Indian element and creates a constant problem. Its numbers multiplied ten or twelve fold in the quarter of a century before the 1914-18 war. After a very considerable temporary check caused thereby the numbers rapidly expanded from 1919 in spite of pressure on college accommodation. In addition to the ordinary graduate or under graduate student there are some youths of good family including heirs of Indian States admitted into the public schools such as Eton and Harrow. There are ordinarily some 500 Indians at the Inns of Court. In the last quarter of a century there has been a welcome increase in the number of technical and industrial students. Altogether including technical and medical students there were up to the outbreak of War in 1939 fully 2,000 young Indians (some five per cent. of them women) in London, Edinburgh, Cambridge, Oxford, Glasgow, Manchester, Birmingham, Leeds, Sheffield, Liverpool and a few other centres. London absorbed about half the total. The added dangers of total war under present day conditions and difficulties of transport led to a rapid reduction of numbers since there were few new comers and the stream almost dried up. Happily the decision of H. M. Government in the autumn of 1939 moved thereto by the East India Association, to make open the combatant services to Indian temporarily or permanently resident in Great Britain led to recruitment of a number of the students, some of whom obtained commissions in the R.A.F. Many Indians took a share in A.R.P. and other civil defence organisation. The Indian Soldiers and Sailors Comfort Fund under the leadership of Mrs L. S. Amery has been doing excellent work with headquarters at India House.

SOCIETIES AND INSTITUTIONS IN LONDON CONNECTED WITH INDIA

ANGLO INDIAN ASSOCIATION LONDON—Established in 1906 to promote the interests and welfare of the Anglo-Indians and domiciled European communities wherever resident by such means may be deemed by the Council to be desirable. Anglo-Indians and Europeans whether domiciled in India or not, are eligible. *Hon. Sec* F. L. Sheldon, R.A. 25 Winchester Road, Oxford.

EAST INDIA ASSOCIATION—Founded in 1856 by Dadabhai Naoroji and other public men. Its object is to promote, by all legitimate means, the welfare of the inhabitants of India generally. The methods are—(1) by providing opportunities for the free public discussion, in a loyal and temperate spirit, of important questions affecting India. (2) by promoting friendly social contact between Indians and English people interested in India, through the medium of social gatherings and of private meetings of members to exchange views on current Indian questions. (3) by making representations to the authorities on non-political questions affecting Indian interests, and generally by the promulgation of sound and trustworthy information regarding the many weighty problems which confront the Administration in India, so that the public may be able to obtain in a cheap and popular form a correct knowledge of Indian affairs. Subscription, entitling a member to the free supply of the quarterly *Asiatic Review* £1 5-0 per annum. *President* Major General Sir Frederick Sykes F.C. GCSI G.C.I.E. G.B.Y. K.C.B. C.M.G. M.P. *Chairman* Sir John Woodhead KCSI C.I.E. *Hon. Secretary* Sir Frank Brown Kt. C.I.E. 3 Victoria Street S.W. 1

INDIAN CHAMBER OF COMMERCE IN GREAT BRITAIN—Africa House, 44/45 Leadenhall St. London, E.C. 3. During hostilities Old Wolverton House Wolverton Nr. Bletchley Bucks.

INDIAN EMPIRE SOCIETY—Reorganised since the passing of the India Act to collect and disseminate information as to events in India. *President* Lord Middleton. *Hon. Secretary* Sir Louis Stuart G.C.I.E. 57 Bassett Road London W. 10

INDIAN GYMKHANA CLUB LTD—Thorndury Avenue, Osterley Middlesex. Object: To provide facilities for sports games and social intercourse for Indians particularly students in Great Britain. The Club owns 16 acres of well-situated freehold sports ground with a fine Pavilion. Annual Subscription £11-0. Ladies 10/6d. *Hon. Secretary* David S. Erulkar Africa House, 44/45 Leadenhall Street London E.C. 3. (During hostilities—Old Wolverton House Wolverton, Bletchley Bucks.)

THE INDIA SOCIETY (ART AND LETTERS)—Founded in 1910 to promote the study and appreciation of Indian art and literature in India

and also in these countries which have been influenced by it have influenced India especially Java, Siam, Indo-China, Afghanistan, Iran and the Middle East. Lectures at which papers are read by leading British Indian and other specialists have become a regular feature of the Society's activities. In order that the members resident abroad may be able to share in the benefit of these lectures papers and proceedings are published bi-annually in *Indian Art and Letters* which is issued free to members. In addition members receive free in return for their annual subscription (£11 0) volumes as issued, on some subject connected with Indian art or literature published by the Society. Visits to private collections of Oriental art are arranged from time to time. Exhibitions of Indian art are another feature of the Society's activities. *President* The Marquis of Zetland G.C.I.E. G.C.I.H. *Chairman of Council* Sir Francis Younghusband KCSI K.C.I.E. *Hon. Treasurer* Sir Frank Brown C.I.E. *Hon. Secretary* F. J. I. Richter M.A. 3 Victoria Street London S.W. 1

INDIAN STUDENTS UNION AND HOSTEL—112 Gower Street W.C. 1 partly destroyed by bombing (Clubroom 115 Gower Street). *President* Sir Edward Greaves D.L. *Hon. Treasurer* Harold G. Judd C.B.E. *General Secretary* P. Cox Bar-at-Law Hoephahy. *Secretary* Prakash Datta.

THE INDIA LEAGUE—(Formerly The Common wealth of India League) to support the claim of India for Swaraj (Self Rule). Publishes 'Notes on India' (monthly). *News India* (fortnightly). Sends speakers. *Address*—166 Strand W.C. 2. *Chairman* Bertrand Russell. *Secretaries* James Marley and V. K. Krishna Menon.

INDIAN CONCILIATION GROUP—(Meeting at Friends House Euston Road N.W. 1). *Chairman* Carl Heath. *Hon. Secretary* Agatha Harrison 2 Cranbourne Court, Albert Bridge Road, S.W. 11.

INDIAN VILLAGE WELFARE ASSOCIATION—Its objects are—(1) the collection and dissemination of information on rural activities in India. (2) the furtherance of schemes and experiments to promote rural welfare which are approved at a meeting of the Executive Committee. (3) the holding of Schools and other educational activities to arouse interest in the needs of rural India. *President* The Viscountess Halifax G.I. *Chairman* Sir Francis Younghusband KCSI K.C.I.E. *Hon. Secretary* Sir Gilbert Jackson, 7 Gainsborough Gardens, Hampstead, N.W. 3.

MUSLIM SOCIETY IN GREAT BRITAIN—Formed to safeguard and to maintain the interests of Islam and Islamic institutions. *Chairman* Ismail V. de-York Bar-at-law. *Secretary* M. A. Rashid. *Treasurer* Khwaja S. Mahmud 18, Eccleston Sq. S.W. 1.

NATIONAL INDIAN ASSOCIATION in aid of social
Progress and Education in India—Founded
by Miss Mary Carpenter in 1870 Objects
To extend a knowledge of India, in England
and an interest in the people of that country
to co-operate with all efforts made for advan-
cing education and social reform in India
to promote friendly intercourse between
British people and the people of India
*Chairman of the Committee Sir Selwyn
Seymour* Secy C Lloyd
c/o East India Association, 3 Victoria St
S W 1.

NEW BURMA CLUB—Secretary 3 Bayley
Street, London, W C 1

NORTHBROOK SOCIETY.—Makes grants to deserving Indian students. *Hon. Secretary* I N Wankawala 59 Doughty Street, W C 1

THE OXFORD MAJLIS—Formerly known as the Mavarsatan Club and later as the Oxford United Club The Oriental Club was incorporated with it in 1913 Its attitude towards Indian problems has been progressively Left Full membership is restricted to Indians Meets on Sundays during term Officers elected each term Address President, The Oxford Majlis c/o Indian Society Oxford.

Sport

Despite the many unfavourable conditions produced in India by the War appreciable progress has been made in almost every branch of sport and substantial amounts contributed to the War Fund through this channel

Cricket.—The Board of Control for Cricket in India is responsible for the affairs of the game. The various provinces compete annually on the zonal basis in the Cricket Championship of India for the Ranji Trophy a magnificent gold cup of unique design which keeps green the memory of that illustrious Indian cricketer Ranjitsinhji. The biggest attraction of the year is the Bombay Pentangular Tournament which comprises teams representing the Hindus, Muslims, Parsis, Europeans and The Rest and attracts all the leading players in the country. Despite a renewal of the agitation which had been responsible for the non participation of the Hindus in the previous season the tournament was played in the usual way and resulted in a triumph for the Hindus.

Football.—The game is controlled by subordinate provincial associations in affiliation with the All India Football Federation. It has made tremendous strides in recent years and the institution of a rule by the parent body preventing the wholesale transfer of players during the season has proved most beneficial. There is an official championship for the country competed for by provincial teams and the trophy is the Santosh Memorial Shield presented by the Indian Football Association in memory of the late Maharaja of Santosh who rendered yeoman service to the game. The premier tournaments are the I.F.A. Shield, in Calcutta, the Rovers Cup in Bombay and the Durand Cup usually played in Simla but now transferred to Delhi.

Hockey.—The game which is controlled by the All-India Hockey Federation is easily the most popular in the country and the standard of play is the best in the world a fact which is borne out by India's triumphs at the last three Olympiads. There is an official championship competed for by provincial teams and the trophy is a quickly carved Maori Shield presented by the Maori to the Indian team which toured New Zealand. The principal tournaments are the Aga Khan Cup in Bombay which was not held in the season under review owing to war conditions, the Beighton Cup in Calcutta and the Yadavendra Shield in New Delhi.

The Turf.—Hunting in India is organised on a large scale and all the many courses are controlled between them by the Royal Western India Turf Club and the Royal Calcutta Turf

Club. The standard is very high and the race-courses particularly those in Bombay and Calcutta compare favourably with the best in the world. The class of thoroughbred imported from Australia and England is of the best and the indigenous breed has made remarkable improvement in the last few years. The principal races are the Eclipse Stakes of India run in Bombay and regarded as the Blue Riband of the Turf in the country and the King Emperor's and Viceroy's Cups in Calcutta.

Golf.—The game has a big following and almost every town of any size has its own course. The Royal Calcutta Golf Club's A course is considered the best in the country and the one recently laid out by the Bombay Presidency Golf Club at Chembur holds great promise. In view of the seriousness of the War situation it was feared that the annual Golf Week at Nalk, always popular with followers of the game in Western India would have to be dropped but the excellent support forthcoming made it possible for the event to materialise and prove as successful and enjoyable as any of its predecessors.

Tennis.—Tennis is looked after by the All India Lawn Tennis Association through its provincial associations and a definite effort is being made towards the improvement of the standard of play by the attention which is being given to the appointment of expert coaches and the selection of promising young players for those coaches to work on. The aim of the Association is the training of a Davis Cup team and there are a few players who already show great promise of developing into first class players judged by world standards.

Athletics.—There is an All India Olympic Association with subordinate associations in most of the provinces but athletics generally do not approach the standard of the other games. There was an appreciable improvement at the 1942 Olympic Games held in the major provinces but in no event did the performance approach International standard. Lack of tracks and suitable training grounds is a big handicap to progress being made but the governing body is tackling this question and already cinder and cycle tracks have been constructed at Patiala.

Other Games.—Most of the other games have their controlling organisations. Table Tennis and Billiards have caught on wonderfully with all classes and Badminton has made appreciable progress. Amateur Boxing is strong in Bombay, Bengal and in the Services but is still in its infancy in other parts of the country.

ATHLETICS.

Ajmer

The Third Annual Rajputana Olympic Games finals —

110 metres hurdles —Kartar Singh (Neemuch Police) 1 C N Singhal (Jodhpur Police) 2 S V Mathur (Alwar) 3 Time 17 2 seconds

† Architectural Electrical and Sanitary Specialist officers will take precedence in accordance with the rank in the Public Works Department fixed for their appointments but junior to all Public Works Department Officers of the corresponding rank

and Sugar Engineering Protectors of Emigrants Public Prosecutors in Bengal and in Sind Registrars to Chief Courts Registrars of Joint Stock Companies Research Officer Industrial Research Bureau Secretary to the Court of Wards United Provinces Senior Marketing Officers employed under the Government of India Superintendents of Exile, Bombay Superintendents of Central Jails and Civil Surgeons who are not included in any other article and Superintendents of Telegraph Workshops

1 The entries in the above table which are in alphabetical order in each article apply exclusively to the persons entered therein and while regulating their relative precedence with each other do not give them any precedence over members of the non-official community resident in India who shall take their place according to usage

2 Officers in the above table will take precedence in order of the numbers of the entries. Those included in one number will take precedence *inter se* according to the date of entry into that number with the exception of officers of the Defence Services (including I.M.S. officers in civil employ) who rank *inter se* in accordance with their seniority and of the Chief Justice of Bengal who will rank before all other persons included in Article 14 irrespective of the date of their entry into that Article.

3 When an officer holds more than one position in the table, he will be entitled to the highest position accorded to him

4 Officers who are temporarily officiating in any number in the table will rank in that number below permanent incumbents

5 All officers not mentioned in the above table, whose rank is regulated by comparison with rank in the army to have the same rank with reference to civil servants as is enjoyed by military officers of equal grades

6 All other persons who may not be mentioned in this table to take rank according to general usage which is to be explained and determined by the Governor-General in his discretion in case any question shall arise. When the position of any such person is so determined and notified it shall be entered in the table in italics provided he holds an appointment in India

7 The following will take courtesy rank as shown —

Consuls General — Immediately after Article 35, which includes Brigadiers

Consuls — Immediately after Article 38, which includes Colonels

Vice Consuls — Immediately after Article 59, which includes Majors

Consular officers *de carriers* will in their respective grades take precedence of consular officers who are not *de carriers*

Among themselves Consular Officers will take precedence in their respective grades according to the date of the Government of India notifications announcing the recognition of their appointments. An officiating incumbent of a

grade will rank as an officer of that grade immediately below its permanent incumbent, except that when an officer below the substantive grade of Consul officiates as a Consul-General he will be ranked with Consuls and assigned a place immediately after permanent Consuls

8 The following may be given by courtesy precedence as shown below provided that they do not hold appointments in India —

Peers according to their precedence in England Knights of the Garter the Thistle and St Patrick Privy Counsellors Advisers to the Secretary of State for India Immediately after Members of the Governor-General's Executive Council, Article 9

Baronets of England Scotland Ireland and the United Kingdom according to date of Patents Knights Grand Cross of the Bath

Knights Grand Commander of the Star of India Knights Grand Cross of St. Michael and St. George Knights Grand Commander of the Indian Empire Knights Grand Cross of the Royal Victorian Order Knights Grand Cross of the Order of the British Empire Immediately after Peers Judges of High Courts Article 23

Knights Commander of the Bath Knights Commander of the Star of India Knights Commander of St. Michael and St. George Knights Commander of the Indian Empire Knights Commander of the Royal Victorian Order Knights Commander of the Order of the British Empire Knights Bachelor Immediately after the Residents of the Second Class Article 31

9 All ladies unless by virtue of holding an appointment themselves they are entitled to a higher position in the table to take place according to the rank herein assigned to their respective husbands with the exception of wives of Peers and of ladies having precedence in England independently of their husbands and who are not in rank below the daughters of Barons such ladies to take place according to their several ranks with reference to such precedence in England immediately after the wives of Members of the Governor-General's Executive Council

Given at Our Court at St. James's this Ninth day of May in the year of Our Lord One thousand nine hundred and thirty seven and in the First year of Our Reign

BY HIS MAJESTY'S COMMAND

ZETLAND

In virtue of the provisions of section 9 (h) of the Indian Church Act 1927 a Bishop or Archdeacon who held a bishopric or archdeaconry on the 1st March 1930 takes rank as follows — Bishop of Calcutta Metropolitan of India immediately after Article 8

Bishops of Madras and Bombay immediately after Article 14

Bishops of Lucknow and Nagpur immediately after Article 25

Bishops (not territorial) under licence from the Crown immediately after Article 39

Archdeacon of Lucknow in Article 43

Indian Orders

The Star of India

The Order of the Star of India was instituted by Queen Victoria in 1861 and enlarged in 1866 1870 1876 1897 1902 1911 1915 1920 1935 1937 and 1939 and the dignity of Knight Grand Commander may be conferred on Princes or Chiefs of India, or upon British subjects for important and loyal service rendered to the Indian Empire the second and third classes for services in the Indian Empire thirty years in the department of the Secretary of State for India. It consists of the Sovereign a Grand Master (the Governor-General of India) the first class of forty-six Knights Grand Commanders (24 British and 22 Indian) the second class of one hundred and six Knights Commanders, and the third class of two hundred and thirty-seven Companions exclusive of Extra and Honorary Members, as well as certain additional Knights and Companions.

The Insignia are (i) The Collar of gold composed of the lotus of India, of palm branches tied together in satire of the united red and white rose and in the centre an Imperial Crown all enamelled in their proper colours and linked together by gold chains (ii) The Star of a Knight Grand Commander is composed of rays of gold issuing from a centre having thereon a star of five points in diamonds resting upon a light blue enamelled circular ribbon tied at the ends and inscribed with the motto of the Order *Heaven's Light our Guide* also in diamonds that of a Knight Commander is somewhat different, and is described below (iii) The Badge an onyx cameo having Her Late Majesty Queen Victoria's Royal Effigy thereon set in a perforated and ornamental oval, containing the motto of the Order surmounted by a star of five points all in diamonds (iv) The Mantle of light blue satin lined with white, and fastened with a cordon of white silk with blue and silver tassels. On the left side a representation of the Star of the Order.

The ribbon of the Order (four inches wide for Knights Grand Commanders) is sky blue having a narrow white stripe towards either edge and is worn from the right shoulder to the left side. A Knight Commander wears (a) around his neck a ribbon two inches in width of the same colour and pattern as a Knight Grand Commander and pendant therefrom a badge of a smaller size (b) on his left breast a Star composed of rays of silver issuing from a gold centre, having thereon a silver star of five points resting upon a light blue enamelled circular ribbon tied at the ends, inscribed with the motto of the Order in diamonds. A Companion wears around his neck a badge of the same form as appointed for a Knight Commander but of a smaller size pendant to a like ribbon of the breadth of one and a half inches. All Insignia are returnable at death to the Central Chancery or if the recipient was resident in India to the Secretary of the Order at New Delhi or Simla.

Sovereign of the Order—His Most Gracious Majesty The King Emperor of India

Grand Master of the Order—His Excellency the Governor-General of India the Marquess of Linlithgow K.C. K. (M.S.) G.M.I.E. O.B.E. D.I.J. D.

Officers of the Order—*Registrar* Major Henry Hudson Fraser Stoddy (V.O. O.B.E.) R.M. Secretary of the Central Chancery of the Orders of Knighthood St. James Palace London S.W. 1.

Secretary Sir Gilbert Lathwaite K.C.I.E. C.S.I. Secretary to the Governor-General (Personal) and Private Secretary to His Excellency the Viceroy.

The Orders of the Star of India are

Extra Knight Grand Commander (K.C.I.)
Honorary Knight Grand Commander (G.C.S.I.)
Honorary Knight Commander (K.C.S.I.)
Honorary Companion (C.S.I.)
Knight Grand Commander (K.C.S.I.)
Knight Commander (K.C.S.I.)
Companion (C.S.I.)

The Most Eminent Order of the Indian Empire

This Order instituted by Queen Victoria in December 1877 and extended and enlarged in 1885 1897 1899 1902 1911 1915 1920 1935 1937 and 1939 is conferred for services rendered to the Indian Empire and consists of the Sovereign a Grand Master forty two Knights Grand Commanders (of whom the Grand Master is first and principal) one hundred and fifty Knights Commanders and an indefinite number of Companions (not exceeding without special statute 54 nominations in any one year), also Extra and Honorary Members over and above the vacancies caused by promotion to a higher class of the Order as well as certain Additional Knights and Companions appointed by special statutes.

The Insignia are (i) The COLLAR of gold formed of elephants lotus flowers, peacocks in their pride and Indian roses in the centre the Imperial Crown the whole linked together with chains (ii) The STAR of the Knight Grand Commander comprised of five rays of silver having a small ray of gold between each of them the whole alternately plain and scaled issuing from a gold centre, having thereon Her Late Majesty Queen Victoria's Royal Effigy within a purple circle, edged and lettered gold inscribed *Imperatrix Asiphiens* and surmounted by an Imperial Crown gold (iii) The BADGE consisting of a rose, enamelled gules barbed vert, and having in the centre Her Late Majesty Queen Victoria's Royal Effigy within a purple circle, edged and lettered gold inscribed *Imperatrix Asiphiens* surmounted by an Imperial Crown also gold (iv) The MANTLE is of Imperial purple satin lined with and fastened by a cordon of

white silk with purple silk and gold tassels attached. On the left side a representation of the Star of the Order

A Knight Commander wears (a) around his neck a ribbon two inches in width, of the same colour (purple) and pattern as a Knight Grand Commander pendent therefrom a badge of smaller size (b) on his left breast a star similar to that of the first class but the rays of which are all of silver

The above mentioned Insignia are returned at death to the Central Chancery or if the Knight was resident in India to the Secretary of the Order

A Companion wears around his neck a badge (not returnable at death) of the same form as appointed for a Knight Commander but of smaller size pendent to a like ribbon of the breadth of one and a half inches

Sovereign of the Order—His Most Gracious Majesty The King Emperor of India.

Indian Titles Badges—An announcement was made at the Coronation Durbar in 1911 that a distinctive badge should be granted to present holders and future recipients of the titles of Diwan Bahadur Sardar Bahadur Khan Bahadur Rai Bahadur Rao Bahadur Khan Sahib Rai Sahib and Rao Sahib. Subsequently the following regulations in respect of these decorations were issued—(1) The decoration to be worn by the holders of the titles above mentioned shall be a badge or medallion bearing the King's effigy crowned and the name of the title both to be executed on a plaque or shield surrounded by a five-pointed star surmounted by the Imperial Crown the plaque or shield being of silver gilt for the titles of Diwan Sardar Khan Rai and Rao Bahadur and of silver for the titles of Khan Rai and Rao Sahib (2) The badge shall be worn suspended round the neck by a ribbon of one inch and a half in width which for the titles of Diwan and Sardar Bahadur shall be light blue with a dark blue border, for the titles of Khan Rai and Rao Bahadur light red with a dark red border and for the titles of Khan Rai and Rao Sahib dark blue with light blue border

A Press Note issued in November 1914 states—The Government of India have recently had under consideration the question of the position in which miniatures of Indian titles should be worn and have decided that they should be worn on the left breast fastened by a brooch and not suspended round the neck by a ribbon as prescribed in the case of the badge itself. When the miniatures are worn in conjunction with other decorations they should be placed immediately after the Kaiser-i-Hind Medal.

Indian Distinguished Service Medal—This medal was instituted on June 28th 1907 by an Army Order published in Simla as a reward for both commissioned and non-commissioned officers of the regular and other forces in India. It bears on the obverse the bust of King Edward VII and on the reverse a laurel wreath encircling the words for Distinguished Service. The

medal $1\frac{1}{2}$ inches in diameter is ordered to be worn immediately to the right of all war medals suspended by a red ribbon $1\frac{1}{2}$ in wide with blue edges $\frac{1}{2}$ in wide. This medal may be conferred by the Viceroy of India.

Indian Order of Merit—This order was instituted by the Governor General of India in Council in 1837 and amended in 1839. It is divided into a Civil Division and a Military Division. The Civil Division consists of one Class and is awarded for any act of conspicuous personal bravery in aid of public authority or the safety of others. The Badge consists of an eight pointed star $1\frac{1}{2}$ in diameter composed of rays with in the centre a circular ground of dark blue enamel surrounded by a laurel wreath. On the enamel ground there is the Royal Cypher surmounted by a crown encircled with the words 'For Bravery'. The Badge is of Silver and the laurel wreath and the design in the centre of gold. The Badge is worn on the left breast pendant from a dark red ribbon with blue edges.

The Military Division consists of two Classes and appointments are made for any act of conspicuous gallantry performed in connection with duties. Appointments to the First Class are made only from members of the Second Class for any similar act performed. The Badge of the Military Division consists of an eight pointed silver star $1\frac{1}{2}$ in diameter with in the centre two crossed swords around which is inscribed the words 'Reward for Gallantry' all on a circular ground of dark blue enamel and surrounded with a laurel wreath. In the Badge of the First Class the laurel wreath and the design in the centre are of gold and the Second Class of silver. The Badge is worn on the left breast pendant from a dark blue ribbon with red edges.

The members of the Order use the letters I O M after their names.

Order of British India—This Order was instituted at the same time as the Indian Order of Merit and amended in 1839. It consists of two classes and appointments are made from among those on the active list in the Armed Forces in India for long, faithful and honourable service. Appointments to the First Class are made only from members of the Second Class. The Badge of First Class consists of a Star $1\frac{1}{2}$ in diameter composed of rays of gold and surmounted by a crown with in the centre on a ground of light blue enamel the words 'Order of British India' encircled by a laurel wreath of gold. In the Badge of Second Class the star is of $1\frac{1}{2}$ in dia-

meter on a ground of dark blue enamel. The Badge is worn pendant from a ribbon of dark red round the neck. Members of the Order also use the letters O B I after their names. The First Class carries with it the title Bahadur and an additional allowance of two rupees a day and the second the title of Bahadur and an extra allowance of one rupee per day.

Indian Meritorious Service Medal—This was instituted on July 27th 1888 and on receipt of the medal the order states a non-commissioned officer must surrender his Long Service and Good Conduct Medal but on being promoted to a commission he may retain the M S medal but the annuity attached to it will cease. On the obverse is the dismounted bust of Queen Victoria facing left, with a veil falling over the crown behind encircled by the legend Victoria Kaiser-i-Hind. On the reverse is a wreath of lotus leaves enclosing a wreath of palm tied at the base having a star beneath. Between the two wreaths is the inscription for meritorious service. Within the palm wreath is the word India. The medal $1\frac{1}{2}$ in diameter is suspended from a scroll by means of a red ribbon $1\frac{1}{2}$ in wide. The medals issued during the reigns of Queen Victoria's successors bear on the obverse their bust in profile with the legend altered to EDWARDVS or GEORGIVS.

The Kaiser-i-Hind Medal

This decoration was instituted in 1900 the preamble to the Royal Warrant—which was amended in 1901 1912 1933 1938 and in 1939—being as follows:—Whereas We taking into Our Royal consideration that there do not exist adequate means whereby We can reward important and useful services rendered to Us in Our Indian Empire in the advancement of the public interests of Our said Empire and taking also into consideration the expediency of distinguishing such services by some mark of Our Royal favour. Now for the purpose of attaining an end so desirable as that of thus distinguishing such services aforesaid We have instituted and created and by these presents for Us, Our Heirs and Successors, do institute and create a new Decoration. The decoration is styled The Kaiser-i-Hind Medal for Public Service in India and consists of three classes. The Medal is an oval shaped Badge or Decoration—in Gold or Silver or in Bronze—with the Royal Cypher on one side and on the reverse the words Kaiser-i-Hind for Public Service in India. It is suspended on the left breast by a dark blue ribbon.

Historical Centres.

Abu, Mount—The Dilwara Jain temples form the great attraction of Abu. They belong to a beautifully modified style of the Aryavarta or North Indian or Indo-Aryan school of architecture.

Of the Abu group of temples, two are most important. They form the noblest examples of Jain temples of the North Indian school of art. One of them is dedicated to Adishvara or Adinatha or Rishabadeva, the first prophet of Jainism. Vimala Shah, a merchant-prince of Gujarat, built the temple in 1081 A.D. It is said that he bought the ground covering it with silver coins and that it took 19 years to build the temple at a cost of Rs. 150 lacs plus Rs. 59 lacs towards levelling the hill. The other temple is ascribed to the brothers Vastupala and Tejapala who built the triple temple at Girnar (the name of Tejapala is one is met with in the inscriptions). The temple was dedicated to Nemunatha, the 22nd Tirthankara (the prophet of the Jains). This temple was built 200 years (1281 A.D.) after the temple of Vimala Shah. It is comparatively simpler and bolder.

These temples belonging to the last period of the medieval age record specimens of the culmination of Indian decorative sculptures. The Indian sculptor's proverbial patience reaches its limit here. No example of decorative art known anywhere in the world can beat the richness and delicacy of the sculptural decorations of the ceilings, pillars and walls of these temples. Never before has marble produced such marvellous specimens of artistic workmanship. Both the temples have at the entrance a room containing 9 or 10 elephants. Inscriptions record that the elephants carried riders. Most of the figures are missing. What ever is left records a wonderful amount of life in the figures. Such lively human figures are hard to be met not only in any other Jain temples but anywhere else in India.

Apart from the claims of artistic interests Mount Abu makes the finest hill station of Rajputana. It is on an isolated plateau about 4,000 ft. high. The Nakhi Talao, an artificial lake near which the temples stand, lends a fine scenic effect. A few miles off at Achalgarh on a summit stand a beautiful group of temples. They are smaller temples and lack the finish of the Abu temple, but they have a real appeal of simplicity and charm. South of Mount Abu will be seen the traces of an ancient town Chandravali, the remains of which have been removed by the Sultans of Ahmedabad and the Thakurs of Sirohi.

Agra—The architectural history of Agra dates from the time of the Imperial Lodis who transferred the capital from Delhi to Agra. It had been an early capital of the Moguls. In 1527 Babar made it his capital. Humayun had a preference for Delhi but in 1555 Akbar formally removed the capital to Agra. He proposed to make it a worthy capital of an empire extending from Afghanistan to Bengal and from Kashmir to Ahmednagar. In 1556

Aurangzeb made Delhi again the imperial seat and henceforth Agra was relegated to unimportance. On the banks of the Jumna in the shape of a crescent lies the fort of Agra, one of the greatest relics of Indian art in the Muslim period. The ramparts are a mile and a half long and 70 ft. high, enfold palaces, halls of state, terraces, balconies, kiosques etc. the cost of each of which would be a king's ransom. Salim Shah, the son of Sher Shah laid the foundation of the Fort. Akbar developed it fully. Akbar's tomb at Sikandra is worthy of him, enshrining the unique eclectic spirit of the Great Mogul. It represents the Indian tradition of the multi-storied academic hall where professors of the different schools of art and science could hold discussions in groups. Akbar himself had revived the plan in the council chamber at Fatehpur Sikri. The tomb of Imdad ul Daula is worthy of the exceptional abilities of Nurjahan who was in herself a combination of Elizabeth and Cleopatra. It has distinct qualities apart from its noble grandeur.

Agra had been the favourite seat of Shahjahan and he made contributions to the glories of Agra Fort. In his Moti Masjid (Pearl Mosque) is inscribed: 'Verily it is an exalted palace of paradise made of a single pearl of magnificence in the history of the world, no mosque made of marble could rival its greatness and beauty. The appeal of its noble magnificence lies in its great simplicity. Its refinement of contour is matched only in the Taj. The Jama Masjid, one of the greatest mosques of India, is built in white and red stone in memory of Jahanara. The Dewan I Ahn by some accounts was built by Aurangzeb. This would be Aurangzeb's greatest architectural contribution. As his puritanical policy doomed to death the Mogul empire, the same spirit put an end to the great tradition of Mogul architecture and sculpture. All these edifices would have made Agra second to no other Mogul city but the Taj is an unparalleled monument and gives it a unique position.

The Taj Mahal is the tomb built at Agra by Shah Jahan for his wife Mumtaz Mahal where he is also buried. It was begun in 1632 (in which year the Shah ordered the stopping of all other Hindu temple-building) and was completed by 1650. The Taj Mahal is the most perfect example of the Mogul style and is by some considered the most beautiful building in the world. The tomb proper consists of a domed square white marble building, raised on a terrace from the corners of which rise four slim, white minarets. The whole is set in an exquisite garden surrounded by a red sandstone wall, a gate and a mosque are subsidiary elements in the composition. The tomb building itself is 186 ft. square with a dome 58 ft. in internal diameter rising to a total height of 210 feet. The building is said to have cost over £3,000,000. It was probably designed by an architect named Ustad Isa, traditionally supposed to have been either Turkish or Persian.

Ajanta—The Ajanta Hills contain 29 caves (5 chaityas or shrines or churches and 24 viharas or monasteries all Buddhist) and present a record of an almost unique combination of painting, sculpture and architecture of a period of about 9 centuries (2nd or 1st cen B C to middle of 7th cen A D). Ajanta forms specially the great museum of Indian painting.

The caves excavated as caves and not as cave temples (e.g. Kailash Ellora) extend over a distance of about 600 ft in a perpendicular rock. Thus the roofs were not hewn only the facades were hewn and sculptured. The Archaeological Department numbers the caves from East to West. Paintings have been noticed in 16 caves.

The sculptures and the paintings of one cave may belong to different periods. Frescoes have been painted sometimes long after the excavation of a cave. Sculptures in different periods have been undertaken to continue the decoration of the caves. Paintings reminiscent of the sculpture of Bharat and Sanchi partially covered with later paintings have been found in certain of the caves.

The caves were first noticed in 1819. Greedy ignorances inclemency of weather and much damp natural to the country had done the worst imaginable injuries. That it could survive to any extent is due to the peculiar formulae of plastering and painting. During the present century steps have been taken to wards preservation of the great works. Lately Hyderabad State has taken charge of the caves.

The subjects of representation are almost always taken from Buddhist literature. They generally portray the figure of Buddha and incidents from his lives (his last life as Buddha and his previous births as man or a lower animal). Secular pictures are comparatively few but not unknown. We have a bull fight, many other beasts prowling in their pleasure, a pair of lovers, etc. These drawings are remarkably good. Women have received very great attention in Ajanta. Women with their eyes dreamt half open faces with delicate and tense expressions, poses most graceful and charming and hands and fingers delicately modelled have made indelible impressions upon all succeeding ages of Indian art.

Amritsar—The Pool of Immortality with the Golden temple in it makes Amritsar the most famous shrine of the Sikhs. Ramesha the fourth Guru (Prophet) of the Sikhs (1574-81) is said to have received from Akbar a piece of land within the limits of which he dug a reservoir since well known as Amritsar. Some Sikh accounts however record that the pool had been an ancient one and a Vairagi (recluse) devoted to Rama claimed it as a sanctuary. The Guru however succeeded in ousting him. The appellation Harmandir for Darbar-Sahib is perhaps reminiscent of a tradition that it had been the site of a temple of Shiva. At first the locality was called Raddaspur. The next Guru Arjun (1581-1606) made Amritsar the proper seat of his followers the centre which should attract their worldly longings for a material bond of union. The tenth and the

last Gurm Govind (1605-1-08) declared the equal right of all Sikhs of all castes to bathe in the sacred tank. The temple and the pool suffered great havoc possibly on two occasions at the hands of the Dur ni invader Ahmed Shah Abdali. The Khalsa (especially the Dal or army founded by Jussa Singh Kulial) restored the shrine and rebuilt the temple (1634-64). At this time they held at Amritsar a formal Gur-mukha or council of the Sikhs probably the first of its kind. On defeating the invader's viceroy the Sikh chiefs met at Amritsar and struck for the first time the Govindasahi coins. In 1819 G. Ranjit Singh covered the dome and very possibly the whole structure with golden repoussé copper work. Hence it is known as the Golden temple. As it served as the lot of the Gurus it is called the Darbar Sahib.

The temple stands on a raised plinth 6 ft square in the centre of the tank and is surrounded by spacious verandahs. A white marble causeway 204 ft long with an archway over it joins the temple with the mainland. There are four entrances with doors covered with silver plates nicely wrought. Entrance by the principal gateway leads to the Bhura, where the arms of the Gurus have been reserved. Except the lower parts of marble the whole edifice is wrapped with gilded copper and quotations from the Grantha Sahib (the Sikh bible) are plentifully inscribed. The Grantha Sahib is the material object of veneration.

In the Guru Ka Bagh or the garden of the Guru there is the pretty Bab Atal Tower. There are some interesting late nineteenth century frescoes depicting incidents of the life of Guru Nanak.

Benares (Kasi)—Benares the religious capital of Hindu India for centuries is visited by millions of pilgrims every year. It lies between the Rama and Asi and stretches for three miles on the crescent of the Ganges. Massive medieval looking edifices line the bank which is practically a stretch of ajadous ghats of which there are 64 in good or indifferent condition.

Benares has 1500 comparatively large temples besides countless minor shrines. The most important temple is the one dedicated to Vishwanath (Lord of the Universe). It is also known as the Golden Temple (the domes and spires were covered with gilt golden repoussé copper work) and stands in a typical Benares alley. Although it is the most famous shrine of India it is conspicuous by its comparative smallness and the absence of ornamentation. Later Benares has become the seat of the famous Hindu University.

Bhuvaneshvar—In the Gupta period (4th and 5th centuries A D) the golden age of Indian art and literature most devout Hindus (Vaishnavas) as the Guptas were they built numerous temples all over their great empire. Almost every part of the Gupta empire proved to be lasting seats of Muslim Kings whose spirit of iconoclasm almost thoroughly succeeded in erasing the monuments of the Guptas. Only in one out of the way place have a few comparatively insignificant specimens survived to bear evidence of the glories of the great art of this period.

Bhuvaneshvar a small village on the way to Puri and the seat of Shiva is only second in importance to Benares and contains some four hundred or six hundred temples mostly of Shiva dating from the 9th or 10th century to the 13th century A.D. The temples are entirely covered with sculptures and the artistic vision of the builders appears to be practically unlimited. The representations and patterns have been executed with great care and their artistic merit are high.

The great temple in Bhuvaneshvar is the finest example of a purely Hindu temple in India. The main shrine is now 160 ft. very possibly originally it had been a little (15 to 25 ft.) higher. It stands within a stone wall as strong as the ramparts of a medieval city. The area is 50 ft. by 145 ft. The *Prabhavatsvara* or *Laxya-ajya-Mahadeva* is represented by a block of granite 8 ft. in diameter. It rises 6 inches above the floor.

The Mukteshvar temple is by some to be the gem of Orissan art. It is a small temple but proportionally almost perfect. The whole from top to bottom inside and outside is sculptured. The numerous floral designs very delicate and natural men and women dressed with great care and in very elegant pose dancing girls arrays of very charming couples of lovers very carefully drawn elephants lions etc. marvellously well represented domestic animals true and delicate beautiful figures of gods and goddesses etc. form an endless lavishing of beautiful sculpture.

Bijapur—Yusuf Khan (Yusuf Adil Shah) said to be a fugitive younger son of Sultan Murad of Turkey employed as a very high officer in the Bahmani kingdom on the decline of his masters set up the Sultanate of Bijapur (the city of Victory) in 1489. English in succession Sikandar Ali Shah lost his kingdom to Aurangzeb in 1686. In commemoration of the noble origin of the founder of the kingdom the great edifices of the city were often surmounted with the Turkish crescent.

The most important architectural works in Bijapur are Jami Masjid the tomb and mosque of Ibrahim II or Boli Gumbaz the Meher Mahal Asar Mahal Gagan Mahal (Hindi Mahal Mecca Masjid etc.).

The Jami Masjid one of the finest mosques of India and the greatest mosque in south India was begun and very possibly completed by Ali Adil Shah (1557-80) probably after the fall of Vijayanagar (1565). An inscription records that it stood in the reign of Muhammad Shah (1583). As a matter of fact however the mosque was never completed. The minor domes are so low as hardly to be seen from outside.

Bijapur has the distinction of possessing the second largest dome of the world in the Gol Gumbaz the mausoleum of Muhammad Shah which covers more ground than any other dome or vaulted roof. It dates back to 1650 A.D. and is also known as Boli Gumbaz or the whispering gallery. Loud laughter is answered by a score of friends hidden behind the plaster

Conjeevaram (Kanchipuram)—The Benares of South India. Of 7 holy cities (Sapta-Tirtha) only one is in South India which is Conjeevaram. Jainism Buddhism Shaktism and Vaishnavism have all played great parts in this city. It possesses historical records dating before Christ. The City grew in glory under the Pallavas and the Cholas. It has two parts the western with a large number of Shiva temples is known as Shiva or Big Conjeevaram and the eastern with a much lesser number of Vishnu temples is called Vishnu or Little Conjeevaram. There are well over 1,000 temples in the city of which none belongs to the pre-Pallava period and most of the large ones belong to later Dravidian style. There are very good examples of temples of the first half of the eighth century.

Sculptures are lavished all over the main shrine the porches and the minor shrines. There is a joint figure of Shiva Parvati (Andharanahvara). The Devaraja temple (Vishnu Conjeevaram) would make a good example of later Dravidian style in which the early Pallava and early Dravidian styles are mixed up with a predominance of the latter. The temple has unfortunately been highly reconditioned at later periods. It has a seven storeyed tower 100 ft. high and the original builders had either made it higher or had proposed to make it higher. The hall of Pillars is one of the most beautiful productions of its kind. It had received some injuries from Hyder Ali.

The Ekambaranatha temple is a great monument of the art of Vijayanagar. It is 10 storeyed and 188 ft. high. All the walls run zigzag and no two towers are at right angles. The hall of thousand (540) pillars is typical of the wealth of sculpture of Vijayanagar.

The temple of Kamakshi Amman where the goddess is depicted in the form of a Yantra is very popular.

Delhi—In the course of 3,000 years within an area of about 50 sq. miles rose eight Delhis sometimes one upon another and sometimes one beside another as the Imperial capital of India. In the longest Indian drama the curtain falls after the 9th act and tradition goes that the fall of the 9th Delhi would close finally the career of India's greatest historical city. In the days of the *Mahabharata* (Circa 1,000 B.C.) Delhi under the name of Indraprastha (the site where Indra had worshipped Vishnu) was for the first time declared the capital of India. The epic records that the surrounding moats were as large as rivers the doors of the gateways were of the size of the wings of Garuda the great mythological bird and innumerable palaces filled the city. Later the city was named Dillu (Delhi) in commemoration of Dillu of the Mayura dynasty. The fort of Indraprastha also known as Purana Kila (the Old Fort) is traditionally supposed to mark the site of Indraprastha. The construction of Purana Kila was begun by Humayun and completed by Sher Shah. In the 11th century the Palas of the Tomara clan had their capital at Delhi the remains of which may be traced at Lal Kot. Their successor Prithviraja the last Hindu prince of Delhi (1192 A.D.) built a capital at

Raj Pithora which proved to be an extension of Tomara-Delhi. First within the walls of Raj Pithora and later beyond the same at Siri Qutubuddin and his successors built the first Muslim Delhi. Materials of the Hindu temples were used often as blocks in the construction of the new capital. Images and sculptures representing figures of men and animals were scrupulously destroyed.

In the middle of the 11th century the Lodis removed the capital to Agra. Fir Shah built a wall surrounding the city, his capital however was Agra. His son built Selimgarh after his name. Akbar and Jahangir lived mainly at Agra, Lahore and Ajmer. The last Muslim Delhi is Shahjahanabad the city of Shah Jahan which is now known as Old Delhi. In 1971 in course of the suppression of the Sepoy Mutiny the last Mogul Enrur was taken prisoner and Delhi was formally annexed to the British Crown. At the Delhi Durbar on the 15th December 1911 by an Imperial Proclamation the seat of the Indian capital was transferred from Calcutta to Delhi (New Delhi).

The Qutb mosque the Qutb Minar the tomb of Iqbalnash (Altamash) the mosque of Amir and the gateway of the Qutb mosque. Qutub (U) form the early great Muslim edifices of India. The Qutb mosque was named after a Muslim saint Qutubuddin of Lal near Baghdad. It was built in 1196 under the Viceroy of Qutubuddin Alauk. The present dilapidated mosque preserves only a small portion of the original one.

The Qutb Minar (circumference 47 ft. at the bottom and 14 ft. at the top, height 240 ft.) a five storied detached minar was begun by Qutubuddin Alauk and completed by Iqbalnash (1206). It is the most beautiful example known to exist anywhere. It does not form part of the mosque which has its own minars. Tradition goes that it makes a pillar of victory, first erected by Prithviraj and later reconstructed by the Muslim emperors. Some Muslim accounts say that it had been begun by the Hindus and completed by the Muslims.

New Delhi is the creation of the British wherein European architecture of different periods generally modified or modernised has been observed. Often features of Muslim architecture (e.g. the dome) have been added and improved in that light. The appeal of simplicity in magnificence of correct outlines and proportions forms a great architectural principle.

Ellora—The Ellora Hill containing the cave temples stands about 19 miles north west of Aurangabad (Hyderabad State). It was known as Grishmeshwara (an appellation of Shiva) and held holy by the Hindus especially the Shaivites. It has the largest cave temple in India a form of architecture which in its development makes a most remarkable feature of architecture in India. The caves are excavated in the face of a hill or rather the scarp of a large plateau and ran nearly north and south for about a mile and a quarter, the scarp at each end of this interval throwing out a horn towards the west. The hill has the

shape of a crescent the southern arm being the centre and the northern arm being occupied by the Buddhist Hindu and Jain temples respectively. The caves have been numbered from south to north. The large or main caves are 34 and there are a number of minor caves.

The Buddhist temples in the southern section known locally as Dharmara are the oldest. The caves number twelve. The first cave is a monastery with eight rooms, the second cave is a hall which was probably used as the lecture hall. It verandah has a number of Buddhist figures, the third one resembles the first and is older than the other two caves. Five other caves have been more or less destroyed. Further up is the Mahabharata cave. The height inside is about 11 ft. and the width 28 ft. The roof rests on 24 pillars. On the left of the entrance is a figure of Buddha in meditative posture, a crowd of sages and females attend him. In the south of this cave there is a temple of a seated Buddha attended by a lot of devotees. Older is a carefully carved figure of a deity. Next comes a number of monasteries and tanks. A little further up is the cave of Yakarna the Indian Vedic. Local craftsmen claim to work here. The dating of the Buddhist caves may be made from the style of the 6th century A.D.

Beyond the three stone temples in the Hindu region (containing 17 large and 40 smaller) is the cave of the 18th and 19th number. The Hindu caves are generally more decorated than the other ones and the Kailash Temple is the most famous of all the cave temples of Ellora. Both the architecture and the sculpture of Ellora are high with the Hindu and the Hindu are temple. They work on excellent specimens of Indian sculpture and architecture (see also Ellora 11). The largest collection is the Kailash temple, a masterpiece of Indian architecture and sculpture, with claim to be called unique of its kind in the world. About three million different rock had to be quarried or chiseled to turn this monolithic temple. It stands in a courtyard averaging from 14 ft. width to 1 ft. in width a scarp 107 ft. high at the back. It is a work of art and ambition in plan the work of temple and outside the rock ceiling walls pillars every part of it has been extravagantly sculptured with lavish decorations. The sculptures as in the case of Ajanta, elephants and lions where had been painted with this coating of lime plaster.

The whole execution shows an extraordinary command of glyptic technique not only in the grouping and composition of the but in the powerful and subtle treatment of the varied gradations of relief.

The last temple of the northern section belongs to Parvath of the Jain. It was built by brick by a Jain merchant of Aurangabad in the 16th century. The temple is about 700 ft. above the ground. The figure of Parvath is in niches and is about 11 ft. high. The Jain (Digambar) of Gujarat worship the image on the 14th day of the bright moon of Bhadra. South of the Parvath temple is the Indra Sabha composed of three caves. The first one is

60 ft by 30 ft with 16 pillars. The walls are sculptured with figures of Jain divinities. The second one is Jagannathasabha. A large inner nave or shrine contains figures of Jain Tirthankaras Ambika etc. The temple of Ranchhorji is the third one. Figurines of Jainas Gandharvas etc. are seen on the shrine and the walls. In the porch an elephant carries a male and a female. The Brahmins identify them as Indra and his wife.

Fatehpur Sikri—Fatehpur Sikri was the proud and faithful mistress of the mightiest Mogul emperor Akbar. His son Salim who was also her son had been kind to her in his early days. But she had practically died with the death of her lord. Her noble career is commemorated within the period of half a century. Fatehpur Sikri is now a dead forsaken city.

Again and again Akbar suffered the bereavement of his babies. He was left no son. Stories of miraculous powers of Shaikh Salim Chisti of Fatehpur Sikri reached his ears. When word of science failed him, he turned to the man of God. His prayer was granted. The son was given the name of the saint. This son Salim born at Fatehpur Sikri succeeded Akbar as Jahangir.

In 1569 Akbar founded the city of Fatehpur Sikri 23 miles off Agra. The present town of Fatehpur is on the south west and the village of Sikri is on the north east of the ruins. Both used to be within the walls of the city.

The most striking work of art is the Buland Darwaza or the Great (High) Gateway. It was erected (160 ft.) in commemoration of the conquest of Khandesh. It forms the Southern gateway of the most imposing edifice in Fatehpur Sikri the Jamī Masjid (15 ft.) said to be a copy of a mosque at Mecca or Medina. It measures 560 ft. east to west and 470 ft. north to south. It contains the tomb of Shaikh Salim Chisti. The Buland Darwaza makes the noblest example of the Mogul gateway. It is the highest Indian portal. The summit of the shafts being 176 ft. from the roadway and 184 ft. from the pedestal. In its construction marble is noticeably used with sandstone. The form is Persian but the construction is Indian.

Konark, Konarak—The Sun temple of Konark known as the Black Pagoda stands unsurpassed in the field of Indian art. By the sea shore it is about 20 miles and by motor car 52 miles from Puri. Traditionally it had been built by Shishu, a son of Krishna. In thanksgiving to the Sun for curing him of an incurable disease. The present temple was built by King Narasingha deva I of Orissa (1240-60).

The main temple has been destroyed. It may be that the sandy soil could not bear so enormous a structure. It may also be due to an earthquake. There is a tradition that some Muslim seamen (as their ship foundered because a great lodestone on the top of the temple attracted away the iron bolts of the ship) had destroyed the temple. Ain-i-Akbari records that there were 28 temples adjoining the main temple and a wall 225 ft. high and 28 ft. thick surrounded it. The remains of the great temple formed a heap 70 ft. long and 45 ft. high.

As in the cases of some other ancient lithic monuments so also Konark leaves one to wonder how numerous blocks of stones weighing many tons were conveyed over a long distance (not less than 80 miles) and it is a miracle of engineering how such stones were hoisted to a height of 150 ft. The Konark temple is markedly correct in proportion and symmetry. An image of great beauty of the sun in a temple in the yard of the Puri temple is shown as the image of the sun of Konark. The temple is built of red laterite and was probably called black due to the great shadow it casts. The pillar in front of the Puri temple had been brought from Konark.

Madura—Known as *Kadamba Vanam* (the Forest of Kadambas) in an earlier period it was made the capital of the Pandya Kingdom by Muthu Tirmala Nayak (1623-59). Before the fall of Vijayanagar (1655) Madurai had been an important centre of architecture. On the fall of Vijayanagar it became the principal seat of Hindu architecture. The Nayaka rulers in the 16th and especially in the 17th centuries built the magnificent edifices of Madura and Tirmala. Nayak proved the greatest builder. The town was planned after a coiled snake.

The Great Temple in Madura forms a rectangle 847 ft. by 729 ft. It is an idiosyncrasy of two temples one of Meenakshi (the one with eyes resembling the shape of a fish). Tradition holds that she had been born as a Pandya princess and Sundarashvara took her as his consort) and the other of Sundarashvara (the Lord Beautiful—Shiva). The entrance is by Meenakshi's temple. Adjoining the temple are the Nandi Hall, the temple of the Saktis (Arunavati Navar) wherein there are some remarkable statues of saints and gods, the Jewel House (the jewellery of the deities make one of the finest collections in South India) and the Stable Houses. A Hall of Thousand Pillars (Ayirakkal or Sahasra-stamba-mandapam) stands in the north-east corner. No pillar is a replica of another. In the central row of pillars are statues of 10 Nayak kings together with their queens. In the outer rows are some remarkable sculptural representations of legends connected with Shiva.

Tirmala Nayak's Mahal or Palace in Madura records a landmark in the development of Indian architecture. It makes a great example where Hindu architecture in a masterly way had assimilated the principles of Saracenic and Gothic architectures. The great hall in the Palace is 140 ft. long, 50 ft. wide and 0 ft. high.

Tirmala Nayak's grandson Chokkanathan went back to the old capital Trichinopoly and to build a great palace there the old palace was shorn of all its splendour. As a matter of fact the greater portion of the palace the best parts by his choice were removed.

Mohenjo Daro—The ruins of Mohenjo Daro (the Domain of the Departed) are situated eight miles off Dork station (B & N R R). Indian archaeological history dates from the 3rd century B.C. The excavated remains in Mohenjo Daro belong to the last city which had been built on ancient sites which are suspected generally

to be lower than the water-level. All the objects found have not yet been studied in detail and there are reasons to think that the yield of even the upper layer cannot be strictly confined within 2750 B.C. and the subsequent period. Excavations of the lower strata may be expected to yield the remains of an older period. Failure to read the characters of the seals and inextensiveness of excavation continue to fortify the sealed character of its ancient inhabitants and their civilisation.

It is a very remarkably well planned city. All the streets were laid south to north. Nothing is more welcome to an Indian city than the south wind. The city had necessarily grown most towards the south. Lanes are free from a general deviating or serpentine character. Homes were two-storied and the staircases lead not to the lower storey but to outside. This feature is not unknown in the houses in the hills. Covered balconies or open porticoes are conspicuous by their absence. The courtyards are to an extent small. Proximity of the dwellings points to a very crowded city. Mohenjo-Daro is a city of bricks, fire-burnt and sun-burnt. It had probably stressed more on drainage than any other ancient city. Evidence of underground drains are to be found everywhere. They are large and high and provided with manholes. The vastness of the drainage surely reflects the greatness of the upper structures now very much lost to view. It is not known however whether the drains led to any common dumping place away from the city, although soak pits have been noticed but from their size one cannot be sure that they were used as the main dumping grounds. A flight of steps into one of them would rather suggest that they proved minor temporary repositories refuse from which has been systematically scraped off. Bathrooms are another feature significant of the cleanliness of the city.

The objects found in the remains mainly consist of seals, jewellery, potteries, figures (human and animal) and toys. The seals have on them inscribed characters of a conventionalised form of pictograph writing which have not yet been deciphered. Most of them are of steatite and of square size. The more common animal is difficult to be identified. It has features both equine and bovine with one horn only.

Puri (Jagannatham).—A popular Hindu pilgrimage centre on the eastern seaboard of India, specially sacred to the Vaishnavites. The White Pagoda of Jagannath or the Lord of the Universe is at Puri. The presiding deities are Jagannath (Krishna seen with his disc, Sudarshana), his brother Balaram and his sister Subhadra.

The strict commensal rules of the Hindu caste system have no application in Puri, especially in the matter of taking together the *Mahaprastha* cooked or uncooked eatables ceremoniously offered to the deity. This is unknown anywhere else in Hindu India. It has been asserted that this peculiar feature marks Buddhist influence.

The altar in the temple which is held very sacred is supposed to contain one hundred thousand Shalagrama Shilas (a particular type

of round black stones of the size of eggs which serve as emblem of Narayana or Vishnu).

The court of the White Pagoda is 665 ft. east to west and 644 ft. north to south. A 4 ft. high stone wall was built around it by King Puruabottamadeva. There are four entrances. The lion door in the east is decorated with sculptures. It has a pyramidal roof. Before the door stands a beautiful pillar of the 4th (Arun stambha) 44 ft. high. The temple had originally a pillar surmounted with the figure of Garuda, the legendary bird the carrier of Vishnu.

The temple of Jagannatha is a combination of four temples which adjoin one another.

All the gods and goddesses in the temple and yard are strict vegetarians except *Vimala* in whose honour goats are sacrificed on the second day of *Dussehra* at midnight when Jagannatha and other gods are supposed to be asleep.

There is a very large number of monastic establishments (*Mathas*) at Puri, the most important of which are Shankara, Nimbarka, Chaitanya, Kavi, Nandan Shashi and Nitya Math, Chakratirtha, Svarga Nar and Lokanath.

The most important event in Puri is the Car Festival when an image of Jagannath is taken in procession in a huge *Rath* or wooden vehicle.

Rameshvaram.—An island in the Palk Straits adjoining Ceylon and an important Hindu place of pilgrimage connected with the main land by railway. It forms the terminus of the last act of the great performance of South Indian architecture and sculpture.

The Great Temple in Rameshvaram grew up in 340 years. The principal shrines were built by Udayin Sethupathi with the assistance of Parantapa Sethupathi (1414) of Ceylon or they had been built by the Ceylonese since himself. They are of a dark hard limestone never met again in the temple. It is said that they were begun at Trincomalee. The incomplete north and south *gopurams* are ascribed to a Deccanese *Kirana Nayak* (1400). There are in the temple a number of finished minor *gopurams* and porches and the outer surrounding walls are credited to Udayin Sethupathi and Konattil of Nagur near Negapatam, statues of whom and of whose wife surmount the eastern wall. Some minor edifices were constructed in 1480.

The principal *lingams* in the shrine are supposed to have been installed by Rama chandra. The principal deity is known as Ramanatha or Ramlinga-Svami. The temple stands near a lake with a circumference of about three miles.

Sanchi.—A small village in Bhopal State in which is the largest and best preserved Buddhist stupa (or tope) or pagoda in India. A Buddhist stupa is a mound built on a relic of Buddha or Buddhist saints or the mound is erected to commemorate an incident in the life of Buddha or Buddhist saints. The Great stupa in Sanchi in red stone is about 103 ft. in diameter and 42 ft. high. An encircling pathway of flagged stone goes round it as is common with most Indian shrines.

The sculpture of Sanchi has two very remarkable features—absence of any anthropomorphic figure of Buddha (everything is Buddhist but it is Buddhism without Buddha) and the spirit of naturalism that infuses the art. From the Sanchi art almost a new school born of it developed in the cave temples of which Ellora is the best example.

Shatrunjaya Hills—Shatrunjaya, near Palitana in Kathiawar is also known to the Jains as Siddhagiri or Siddhachula or the Hill of the Perfected Ones. It is the most sacred place (tirtha) of Shvetāmbara Jains. There are a great number of temples in groups on touns or muntals. The most important one is the toun of Adishvara Bhagavan. The ancient image consecrated by the prophet's son Batubal has been replaced. This is perhaps the most holy site within the most sacred precincts of the Shatrunjaya Hills. At this place a large number of saints attained Arvana or absorption. A number of inscriptions have been found here which have been utilised towards writing the history of Western India and the history of the different schools of Jainism.

Shatrunjaya has 108 names. The principal name Shatrunjaya (the conqueror of enemies) is one of the names of Shiva. It is held that the founder of the shrine had conquered his enemies and regained his kingdom by the grace of Shiva. By way of thanksgiving he built a temple of Shatrunjaya Shiva and dedicated the hill to the deity.

Sravana Belgola—A great holy seat of the Jains especially of the Digambara sect. Bhadrabahu a Jain apostle passed away at this place. Jain records claim that as his disciple Chandragupta Maurya (4th cen. B.C.) on renouncing his imperial glories came to live and die here as a Jain monk. Asoka's visit (3rd cen. B.C.) to this place is also recorded in Jain accounts. It is a picturesque spot between two hills. On the larger hill the Dhadabetta or Vindhya giri stands the figure of Gomateshvara the largest statue in Asia carved on the spot by the sculptor Avittanemi (Arikhtanemi) from a monolith of grey stone. It is 56½ ft. in height and the diameter at the broadest point is 13 ft. Five groups of Jain figures in relief are seen on a rock near Gwalior. The largest one is 57 ft. high. The reliefs have little claim to artistic recognition.

At intervals of 12 years or more a ceremony called *Mandakabhiseka* (the anointing of the head) or *Maha-mandakabhiseka* is held which lasts for 10 days.

The Jnanatha-pura-Basti temple near Sravana-Belgola built between the 10th and 12th centuries presents a good example of the finest sculptures of Jain temples in South India.

Srirangam—Between the two-forked Kaveri river an islet, Srirangam contains the largest temple of India known as Koyil or the temple of the Vakhnavas. It is consecrated to Ranganatha (a representation of Vishnu). Inscriptions have been found on the temple of Chola Pandya Hoysala and Vijayanagar Kings dating from the 9th to the 16th centuries. The temple had grown through all this period if not over a little wider period. The north *gopuram* is 152 ft. high. Generally

the *gopurams* are painted with representations of incarnations and mythological legends. In the Hall of thou and pillars (it may be half a hundred or a few more) the pillars have plantain brackets. In one of the front rows of pillars are monoliths of prancing equestrian figures spearing tigers. The great temple has grown combining seven *prakaras* of successively dwindling sizes.

Two miles south of Srirangam is Trichinopoly known as the *Kailash* (a peak in the Himalayas and abode of Shiva) of the South. Trichinopoly is held to be a corruption of Trishiripalli or the quarters of the three-headed demon. It was the strategic capital of the Cholas. In the Fort (there is no fort now) part of the town is the Rock. The temple is consecrated to Jaganmavara (Shiva) and the Rock is also known (Tajumanavara malaya) by the name of the deity.

Jambukeswaram popularly known as Tiruvannakkaval two miles north of Trichinopoly has an important temple. The deity is popularly known as Appulunga or the water phallus because the deity in the adytum is always in water. The temple is of five *prakaras* (court yards). The *mandapam* in front of Akhi (andesvari) represents in carving early legends relating to the deity.

Tanjore—Vishnu of the Hindu Trinity appeared as Nilamanga Perumal at Tanjore to slay the demon Tanjan a great demon. The temple of Vishnu as Nilamanga is situated 1½ miles north of Tanjore. The place (Tamil in Tamil) got its name from the demon. Tanjore had long been the capital of the Cholas and under them it grew in nature and fame as a great seat of culture. Towards the close of the 10th century Raja Raja the Great built the Great Temple of Brihadishwaram (the Great of Shiva). The Naika and probably the Mahrattas may have made only some quite minor contributions. The temple belongs to the earlier Dravidian style but it is almost unique in its plan in reversing the established Dravidian order of the ascending size of the towers from the adytum to the gateway.

In the 2nd *gopuram* of the temple a Tamil inscription is said to refer to the 4th century A.D. The shrine of Subrahmanya a much later construction has for its superb ornamentations received very high appreciations. Between the 1st and 2nd *gopurams* there is a passage 170 ft. long and the 2nd *gopuram* gives entrance to the yard of the temple. There is a black granite monolith bull about 13 ft. high and 16 ft. long. This block of stone is supposed to have been transported over a distance of 400 miles.

The palace in Tanjore has an area of 50 acres. The most noticeable feature about it is an eight-storied *gopuram* 300 ft. high in the 3rd quadrangle. From a distance it has all the prominence of the main tower of the Great Temple. There are two Durbar Halls one known as the Naika court and the other the Mahratta court. The Naik Hall was built before 1614. There is a remarkable sculptural representation of a battle of the gods and the demons on the lateral parts. There is also a large number of pictures of the kings and a library of Sanskrit manuscripts.

The Tanjore Bronze Nataraja in the Madras museum is an able representation of one of the greatest conceptions of Indian art.

Taxila—The name is a Graeco-Roman rendering of the Indian names Takasila and Takshila. The Indian names literally mean a stone cut city and the city of the Taksha clan respectively. The epics record that Rama's brother Bharata conquered the country and the capital took its name from his son Takshila. The *Mahabharata* states that the great snake sacrifice was held at Takshasila. Buddhist records point to the highly flourishing condition of Taxila in 700-800 B.C. and in the light of the epics the date may not be unreasonably pushed to 800-900 B.C. The oldest dateable remains discovered belong to the 4th or 5th century B.C. Surely in the 7th century B.C. Taxila had a far famed university.

The remains of Taxila lie about the east and the north-east of Sarikela 20 miles north west of Rawalpindi. The remains are of three cities within three and a half miles of each other. Those from south west to north-east are contained in Bhil or Vir Hatyal Shikar ka Kot, Kachkot, Barkhaua and Khir Sukh Ka Kot. The Pir or Vir mound represents the oldest city.

Taxila presents historical records extending over a period of about 1000 years from the 4th or 5th century B.C. to the 5th century A.D. Seven different peoples ruled at Taxila: Achaemenian and Alexandrian suzerainty have left almost no records. The Mauryan records consist mainly of almost primitive punch coins (they may be of an earlier date). Jewellery and lapidaries which surely indicate that Indians were in that area the greatest masters in the treatment of the most refractory stones and gold and silverwork of refined workmanship.

The most imposing relic at Taxila is the Dharmrajika or the Great Stupa (Stupa). It is also known as Chir (qilit) tor because of the cleft driven through its center by a former explorer. Around it there are a number of Stupa, Chaityas, Viharas, etc. The construction of the group extended over four centuries (2nd-5th). The original stupa was built in the 3rd century B.C. and the Parthian period and enlargements were made in the Kushan period. The most important architectural features are trefoil arches and Erothan pillars.

Indian Festivals and Observances

Bara Wafat—(Death on the 12th) is called in Bengali *Batal*, Duwadulium (12 days of the 12th). In Turkey and Egypt the day is known as *Maulud* or *Mahul* (Birth of the Prophet). The date is 12 Rabi I.

It is a joint celebration of the birth and the death of the Muslim Prophet. In some parts of India it is celebrated only on the birthday of the Prophet (Jashn-i-Milad Sharif). It is believed that his birth and death took place on the same date although there are differences of opinion on this. It is a great day of feasting for Muslims (the Wahabites however do not observe it) they regard it to be an innovation or *Bidat*. On this occasion the life story of the Prophet is recited and its points of excellence stressed. Prayers are offered for the benefit of his soul. Prayers are also read over cooked food which is then given to the poor. Some observe it on the second day of the month. As the date is disputed the more devout read the prayers on all the days from the 1st to the 12th day of the month.

Dasara (DASHAMA—TEN DAYS)—This festival is held on the 10th of Ashwin Shuddh (Oct.). It is called *Durga Puja* or *Durgotsava* and is supposed to relate to the autumnal equinox. The festival commemorates the victory of Devi wife of Shiva over the buffalo-headed demon Mahishasura. Her image is worshipped for nine days and afterwards consigned to the river. This is also the day on which Rama marched against Ravana the demon king of Lanka (modern Ceylon). Early in the morning Hindus perform *puja* to their household gods or religious books, Marathas and Kahatriyas or those who consider themselves of the martial race worship their weapons and ask protection for them throughout the year in the faith that, to the propitiativeness of the sword they owe every prosperity. In the afternoon they go to the temple in procession.

The day is also considered most auspicious by the Hindus to begin education of their children. The nine preceding days of Dasara are called *nawaratri* a compound word for nine nights. During this period devotees of *Durga* engage a Brahman to read hymns before her, inter-exchanging her exploits and describing her rewards to her votaries. On the ninth day at every temple of *Durga* the sacred fire is made an offering with rice and ghee to the chanting of *mantras*. It is customary among Hindu women to keep up a dance called *garba* during these nine nights.

The celebration of Dasara is also said to owe its origin to the Pandavas (the five sons of Pandu) who selected this day as an auspicious one for making preparations for their war with their paternal cousins the Kauravas which is narrated in detail in the *Mahabharata*.

In modern times Dasara is observed with great pomp in Mysore State.

Dipavali (Corrupted to Diwali or Dewali)—*Dipa* means a lamp and *Dipavali* means a row or collection of lamps. It is a festival of rejoicing at Lord Krishna's triumph over Narakasura, a demon. Rows of lamps at all places sacred and secular make a most beautiful feature on the occasion. Exhibition of fire works crackers etc. add to its festive nature.

On the 14th day of the waning moon of Kartika (Sept. Oct.) known as *Naraka* or *Bluta* (Natar dahi) (Chaturdashi means 14th lunar day) Krishna destroyed Narakasura. The demon was however a great devotee of Krishna and had done severe penance to propitiate the Lord but he had abducted 16,000 women for his harem and had to be destroyed for his sins. In view of his piety however the death anniversary was enjoined to be observed as a sacred day. In the morning a bath is taken and certain rites with a lamp made of rice-dust etc. are observed. New dresses are worn and sweets are served.

Gahambars—These are traditional festivals of Iran (Persia) adopted by the Parsis and mark the six festivals of the six seasons of the year. The first one commences on the 11th day of Ardibehesht (Oct. 15), the second on the 11th day of Tir (Dec. 14), the third on the 26th day of Shikaveer (Feb. 27), the fourth on the 26th of Meher (March 29), the fifth on the 16th day of Dai (June 17) and the 6th on the 1st day of Gatha at the end of the Parsi year (Aug. 31). They were mainly agricultural festivals and necessarily formed formal seasonal celebrations. The Parsis hold public feasts on the days of the Gahambars.

Ganesh Chaturthi—On this day was born Ganapati or Ganesha who is regarded as the god of wisdom and one to be propitiated for the removal of obstacles. As such he is invoked at the commencement of all ceremonies and undertakings. There are varying versions of the circumstances attending his birth. One relates that as the god Kartikavirya was created by Shiva without connubial assistance in like manner Ganapati was formed by his consort Parvati from the turmeric and oil scraped from her body while bathing. The loss of his human head and the substitution of that of a female elephant with one tusk are also variously explained. By some his head is said to have been cut off by Shiva when he endeavoured to prevent the god from entering the chamber of Parvati when she was performing her ablutions. According to others it was reduced to ashes by a glance from Shani (Saturn) who with all the gods went to look at the new born child and it was replaced by that of the animal first found which happened to be an elephant.

The fourth of Bhadrapad Shuddh (Aug.) is the period appointed for the celebration of this festival in honour of Ganapati's birth. His image is installed in Hindu households and offered puja. Some people keep the image for a day and a half, some for five or ten days according to the wealth and wish of the householder. On the final day the image is taken in procession and eventually committed to the river, sea or tank.

There is a legend that one day Ganapati while riding his favourite mouse had a fall at which the moon laughed. Enraged at the insult Ganapati cursed the moon and all who should look at her but afterwards restricted it to one day viz his birthday. Thus, on the day of Ganesh Chaturthi Hindus avoid the moon lest they should incur any calamity during the year. If by any chance they happen to see the moon they try to provoke their neighbours into reviling them in the belief that its ill effects will stop at such abuse.

Gokulashastami—(Also known as Janmashtami and Krishnashtami) The occasion marks the celebration of Krishna's birth on the 8th day of the dark moon in the month of Shravana (July-August) or Bhadra (Aug.-Sept.). In each case (i.e. either in *Shravana* or *Bhadra*) different sects observe it on either of the two consecutive days of Ashtami. At the temple of Furi a Brahmin and a dancing girl play the roles of Vasudeva and Devaki the parents of Krishna.

To the Vaishnavites the devotees of Vishnu, (and therefore also of Krishna who was one of

Vishnu's incarnations) the occasion is a great festival. It is also observed by non-Vaishnavites and thus sets an example of the spirit of toleration. Janmashtami is a day of fasting. A large part of the day is spent in worshipping Krishna. Shri (the consort of Vishnu) and Devaki the mother of Krishna. *Kirtans* or religious songs (relating to Krishna) make a notable feature. Dacca (Bengal) brings out a great procession on this occasion.

Grabana—Grabana means an eclipse. Hindu astronomers were the first to declare that the earth is round and Hindu astronomy was the first to discover the scientific facts relating to eclipses. The popular tradition of other days however stuck in the popular mind. And the sight of an eclipse continues to suggest to the ignorant person that *rahu* (the ascending node) the trunkless demon is devouring the sun or the moon as the case may be. Rahu in the guise of a god had attempted to share the nectar along with the gods. As soon as his tongue had tasted the nectar (a drink having the power of making those drinking it immortal) Vishnu detected the false god and struck off his head. Trunkless up to the throat as the nectar had passed Rahu became immortal. Necessarily when he gulps the divine orbs they emerge out down his throat. Acceptance of the version therefore makes it an unholy sight and the delilement of the gods entails a delilement of the earth. Delilement requires a bath and a bath in holy water is held to be particularly efficacious on this occasion. As a matter of fact two baths are required one at the first contact of the eclipse and another when it terminates. People flock to the Ganges and other holy sites for baths are resorted to. The occasion naturally reminds one of death and oblations are offered to the dead. To ensure full merit of the bath gifts must be offered after the bath. As a matter of fact gifts make an essential condition of all Hindu fasts and festivals. It would be normal to surmise that the same were to an extent ordained to ensure a spirit of charity. The period of the eclipse is a period of fasting. No food should be prepared during this period. Food prepared earlier cannot be used later.

Haj—It means setting out or tending towards and is the term used for the pilgrimage to Mecca. The performance of the *Haj* is to all good Muslims a most cherished ambition. It is one of the five pillars of the practice of Islam (Arkan) and there are the highest Quranic injunctions for its observance. The rites of the *Haj* may be divided into three groups: *Fara* or compulsory, *Makruh* or obligatory (to a lower degree than *fara*) and optional. *Fara* compulsions are three in number: wearing of Ihram (two seamless garments, one worn round the waist and another thrown loosely over the shoulder standing in *Arfa* and doing the *Tawaf* (circumambulation of the Ka'aba). The *Wajih* rites are five in number in the case of those who do not belong to Mecca: to run between Mount As-safa and Mount Al-Marwah, to remain in Al-Muzdallifah to cast stones to the three pillars of Mina (Ramya r rizam) to perform a second *tawaf* and shave the head as the final ceremony. The month of Zul Hijjah (the 12th Muslim month) is the month of the Haj.

Idul Azha (erroneously called Idus Zaha)—It is the Muslim counterpart of the Passover. It is enjoined in the *Quran* (xlii 33-38) and falls on the 10th 7ul Hijrah. The words of the prophet are: Man cannot (by any act) on this day propitiate God better than by shedding blood.

Idul Azha means the (great) sacrificial ceremony or festival. The festival commemorates Abraham's offer to sacrifice the object dearest to him his son Ishmael (not Isaac) on Mount Mina close to Mecca (the Bible gives the name of the land as Moriah). Its observance is one of the necessary acts in the performance of the Haj. All adult Muslims who can afford it are required to make a sacrifice of an animal. If the animal is a big one (e.g. a camel or a cow) it is allowed to be the joint offering of seven (according to some authorities as many as seventy). It is meritorious to sacrifice one animal for each member of the family but on economic grounds the sacrifice of one animal for a whole family is allowed. A fully grown up and sound camel, cow goat or sheep is considered best. The sacrifice is offered with a short prayer absolutely surrendering the soul to Allah and acknowledging His greatness as the accepted creed. The meat is distributed, equally among the poor, the relatives and friends and members of the household.

In India the cow is the usual beast of sacrifice. In other Muslim countries the camel takes its place. The cow being held most sacred by Hindus the more popular Muslim monarchs of India (possibly a few of Afghanistan as well) had stopped its slaughter out of consideration for Hindu sentiment.

Id-ul Fitr—The festival of breaking fast called also *Ramazan ka Id* and the feast of alms is celebrated on the 1st of Shawwal. On this day Muslims bathe pur on new clothes apply antimony to the eyes and perfume themselves then distribute the *fay* or *sadaqah* which is 2½ seers of wheat dates or any grain used for food to the poor or religious mendicants. All then proceed to the *Idgah* repeating God is great. There is no God but God. The *Mulla* ascends the *minbar* or pulpit and after a short thanksgiving reads the *Khutbah* or sermon. He then descends to the lowest step (which with the Shi'ahs is the third but the fourth with the Sunnis) and recounts the virtues of the king and prays for him. Then a general prayer is offered and the congregation rise with a shout of *Din!*—Faith and fire of muskets. The evening is spent in rejoicing and merriment.

Khordadad—The birthday (the 6th day of the 1st Parsi month Farvardin 10th Sept.) of Zoroaster the Prophet of the Parsis. He is the earliest known founder of a great religion of faith courage and hope. The exact date and place of his birth have not yet been fully ascertained. Probably he was born in the province of Media Iran (Persia) about 3,000 years ago. His great sermons are preserved in the *Gathas* (Parsi Scriptures). He was held in great respect by the court of Guastasp. He professed the doctrine of monotheism and held that Ahura Mazda is the Creator of the Universe. He preached the doctrine of *Asha* or piety which would infuse in man the spirit to fight the force

of evil and attain the beatific region of Ahura Mazda.

Muharram (Ar Muharram most sacred)—The mourning held annually in remembrance of the first martyrs of Muslims Hama and Husain from whom the whole race of Sharifs are descended. Abu Muhammad al Hasan and Husain were the two sons of Ali bin Abi Taleb the cousin and Kahlmah the daughter of Muhammad. The Muslims are divided into two distinct sects called the Shi'ahs and the Sunnis. The former regard Ali and his descendents Hasan Husain Zaki ul Abidin Muharram Jafar Badik and Imam bin Jafar Badik as the lawful leaders after Muhammad and the latter the (uliphs as Abubakar Omar Osman and Ali—hence quarrels animosities and dislikes are hoarded up to be avenged during Muharram. *Fatiya* (a term signifying grief applied to a representation of the mausoleum erected over the remains of Husain Husain at Karbala) made of ivory ebony sandalwood cedar and sometimes wrought in silver filigree—and indeed of every variety of material from pure silver to tannish and paper according to the rank and wealth of the party—are exhibited and conveyed in procession through the streets.

Nawroz Nawroz—Jamshed of the seven ringed up who fixed the Parsi calendar marked the day on which the Sun enters Aries (20th or 21st March) to be the New Year's Day. It is held that he chose to make the start of the year on this day to the newly founded capital of Persepolis. The festival was given the name of Id of Jamshed and it has been celebrated with the greatest éclat in both Persia and Muslim Iran (Persia) Shah Jalaluddin commenced his administrative year from this day. The Shi'ahs celebrate the day as Id i Khilafat or the festival in commemoration of Ali's formal accession on this day to the Caliphate. At Hyderabad (Deccan) and Murshidabad (Bengal) the New Year's Day is observed with great pomp and splendour. For the Parsis it is only next to *Pateti* as a festival of social merriment and they begin the Fasal (agricultural) year on this day. Nawroz is one of the three celebrated Jahans of ancient Iran. Modern Iran celebrates the festival as a national event.

Pattusana—A great Svetambara Jain festival. Literally it means serving with a whole hearted devotion. Formerly it was only observed by the ascetic order but now the laity also do so. The festival as is common to all Jain festivals is marked with rigorous fasting and penance.

Two schools both of the Svetambara sect observe the festival on slightly different dates either from the 12th or the 18th day of the dark fortnight to the 9th or the 8th day of the bright fortnight of Bhadra (Aug. Sept.) In either case it lasts for eight days. The more devout observe complete fasting during the whole period while others fast on the last day only.

Pateti—The Parsi New Year being the first day Hormad of the first month Farvardin (Sept. 5). Firdausi associates many historical events of Zoroastrian Iran (Persia) with this day. It is the greatest social festival of the Parsis. In the great gatherings in their Fire Temples the cause of purity and chastity is preached.

Ram Navami—It celebrates the birth of Rama one of the incarnations of Vishnu of the Hindu Trinity on the 9th lunar day (*navami*) of *Chaitra* (March-April). Besides Rama his consort Sita and brothers Lakshmana Bharata and Shatrughna are also worshipped. Prayers are offered to them at intervals of three hours. The day is one of strict fasting. The night is spent in worshipping. The learned give discourses upon Rama's life stressing its excellent points as examples for man to follow. A legend (*the great-battle*) relating to the origin of this ceremony with pointers to the merits of observing it is recited. At Puri (*Jaganath*) an incarnation of Rama (*Jishnu*) in his representative figure *Madanamohana* is dressed as Rama and worshipped with great eclat. On this day oblations are offered to the departed ones.

In some cases preparatory ceremonies commence from the first day of the waning moon. In the evenings sermons or discourses (*kathas*) are delivered in the temples of Rama. The birth is celebrated at 12 noon of the ninth day. This day is observed by a great many people as the New Year's day.

Ram Lila—An open air amateur dramatic representation of selected episodes from Rama's life. The performance continues all through the Navaratri (the first, the days of the bright fortnight of *Avini* (8 pt. Oct.) and the Vijaya Dashami (the tenth lunar day) every day in the afternoon one act is played, the battle between Rama and Ravana being the most popular theme.

Ram Lila is an important festival observed in the Hindi speaking provinces.

Ramzan—This Muslim fast commences from the morning after the new moon of *Ramzan* is first observed and is kept each day throughout the month of this name from 4 a.m. or when the first streak of light borders the eastern horizon till the stars are clearly discerned in the heavens. During the whole period not the slightest particle of food or a single drop of water or any other liquid should pass the lips. The day is spent in occasional prayers besides the usual *namaz* and in reading the *Quran* or the life stories of the prophets. The fast is generally broken by a cooling draught called *Danda*. On the 21st and 22nd the Shi'ahs celebrate the night of Ali, the nephew and adopted son of Muhammad who is said to have died on one of these two nights. They perambulate the streets carrying a *tabut* and beating their breasts. The odd ones of the last ten nights are called *Laylat ul Kadr* or night of power because it is said the *Quran* descended from heaven during one of those nights. It should be observed as a vigil.

Shiva Ratri—The 14th night of the dark fortnight in *Megha* (Jan. Feb.) is known as the night specially consecrated to Shiva. The 15th

night of the waning moon of each month is held as the night of Shiva (Shiva-Ratri). The month of *Shravana* (July-August) is very sacred to Shiva. Hence Shivaratri of *Magha* is generally called *Mahashivaratri* (maha meaning great).

In the *Mahabharata*, Bhishma the great celibate most scholarly and valorous prince relates that King Chitrabhanu of the *Dushvaku* dynasty popularised the festival. On this day when the King was fasting a sage suggested to him that the human soul being one with God, indulgence in pleasure to the self and not infliction of pain to it by fasting would please God best. The King explained that the self of flesh and blood was not the real self and narrated the legend of a fast. In a previous life the King was born a hunter. One dark night he lost his way in the forest and took shelter for the night on a *balea* or bal (Indian wood apple) tree. The hunter had no food for the whole day and was ruminating on how his family must be keenly feeling the double misery of starving and missing him. He wept bitter tears. To make himself comfortable and also to have a better view of the life of the land and approaching game, he tore away and threw down the boughs and leaves obstructing his vision. It so happened that that night Shiva was under that *balea* tree and the tears and leaves fell on him. Shiva was propitiated by this act of the hunter although unknowingly done and declared that if anybody fasted on that day and worshipped him with offerings of water and *balea* petals he would on death be accepted in Shiva's heaven.

Another account in later Puranic stories (e.g. *Janka Purana*) narrates that a hunter spending the day imprisoned in a Shiva's monastery or temple for having failed to pay his debt was let out on parole. His way home lay through a forest and as night grew too dark to continue the journey he took shelter on a *balea* tree with his store of water. Hunger, anxiety and expectation of game kept him awake all through the night. Throughout the day in the monastery he had nothing to do but listen to the incessant recitation of Shiva's name which had made an almost indelible impression upon his weakened brain. He filled his time numbing the term in mock fashion plucking the *balea* leaves and throwing them down. Often his water pot was knocked about either by his movements or the wind and its contents trickled down. Shiva happened to be reclining under the tree and was propitiated. The moral in that act of devotion even if not meant to be so are accepted by the Lord.

Zarhosht No Diso—The anniversary day of Zoroaster's death. The Pahlavi Prophet died a martyr's death at the age of 77 while at prayer in a fire temple at the head of Turbat. On this solemn occasion of mourning discourses on the life and teachings of the Prophet form the most important feature.

LINLITHGOW HER EXCELLENCY THE MAR QUENNESON, is the daughter of the late Sir Frederick Milner Baronet, and married His Excellency the Marquess of Linlithgow in 1911.

Her Excellency inherited her interest in all forms of charitable work for the welfare of the community from her father who spent many years of his life in helping those in distress. In December 1937 Her Excellency launched the King Emperor's Anti-Tuberculous Appeal to which the response from the Princess and peoples of India was encouraging and resulted in the formation of the Tuberculosis Association of India. As a result of Her Excellency's Appeal, many Sanatoria and Clinics have been opened and public interest aroused. Among the many Charitable and humanitarian activities undertaken by Her Excellency since her arrival in India in April 1936, mention should be made of her appeal as President of the Northern India Almshouses Fund on behalf of aged and destitute Europeans and Anglo-Indians resulting in the opening of Homes in Northern India.

SAHEB of Akalkot

Born 13th December 1915

Education Studied at Bishop's High School Poona Passed the Diploma Examination of the Rajkumar College Rajkot with distinction in English and Science Attended the Deccan College Poona Took administrative training in Bangalore for a year and a half

Recreation Shooting riding tennis cricket motoring and racing *Clubs* Vice-Patron of the Cricket Club of India W I A A and R W I T C

Married in 1934 Princess Kamala Devi of Gwalior who unfortunately expired in 1934

Area of State 498 sq miles *Population* 1 03 903 *Revenue* 6 79 919

The Ruler is extremely popular among his subjects whose welfare and prosperity are his constant concern. He has always been alive to the rapid progress in the world and as such has established a Rayat Assembly with a non official majority. The Assembly is empowered to move resolutions ask questions and discuss bills of administrative and public importance. The cause of the agriculturists is nearest to the Ruler's heart and orders have been issued by him to devise means to ameliorate their lot. A Debt Conciliation Act is going to be placed in the forthcoming Session of the Assembly. Nearly Rs 3½ lakhs have been advanced in loans to agriculturists from the State Jowan Fund and Land Bank. Large sums have been set apart for village uplift every year. Social legislation has been introduced into the State the chief of which is the Akalkot Harijan Act. Primary education in village schools is imparted free since the year 1937. To girls of all castes and creeds both primary and secondary education is free. Scholarships and free education are given to poor and deserving students. Voluntary military training has been newly introduced in the schools. There is an independent High School for girls. There is a fully equipped Hospital at the Capital and the same has been enlarged recently. A touring dispensary has been started for giving medical relief to villagers. The Akalkot Water Works constructed at a cost of 12 lakhs supply water to the capital. Electrification of the

town took place about 11 years back. There is a Municipality at Akalkot and a Taluka Local Board. Town planning and removal of congestion in the town is going on rapidly. A development scheme of town-extension is in progress and all possible facilities are being given for the same to the people.

Akalkot is an important trade centre. Last year's imports and exports were 134,053 and 552,129 maunds respectively. All possible facilities such as leasing of land, supply of water and electricity at concessional rates etc., are afforded to the different industries in the State and as a result the Match Factory, the oil producing mill, soap factory, cotton-ginning, hosiery and other industries started in the State limits are working satisfactorily. These industries apart from reducing unemployment have become a veritable boon to the agriculturists as they absorb large quantities of agricultural produce.

Shrimant Raja Sahab is a member of the Chamber of Princes in his own right.

Immediately after the declaration of War, Shrimant Rajasaheb made an announcement that all the resources of the State were at the disposal of His Majesty's Government and donated Rs. 5,000 towards H. E. The Viceroy's War Purposes Fund. Rs. 11,000 were further donated towards the fund specially for purchasing an armoured carrier on behalf of the Akalkot Darbar. Rs. 200 were donated towards the Silver Tanket Fund. A Central Committee with sub-committees has been established under the presidency of the Dewan to systematically organise the various war activities such as collection of funds, propaganda and recruitment etc. There has been a good response from the people who are contributing with willingness their mite to the War Purposes Fund and the Defence Loans. Prior to the appointment of committees an appeal by the State Government for contribution to the Red Cross and St. Dunstan's Institutions was made to the State subjects and the public willingly contributed Rs. 6,000 for the above fund.

Besides these numerous donations were announced by Shrimant Rajasaheb and the Dowager Ramsaheb to several institutions for war purposes.

An appeal was issued by the Darbar to the fighting classes of the State to get themselves enlisted as recruits and as a result a good number of subjects have been recruited in the army. The publication of News Bulletins and other materials supplied from the Publicity Agency has been taken up by the State Publicity Department and circulated to almost all the villages.

UMDAT UL-UMARA AMIN UL MULK ALIMARTABET SARDAR MOHAMMAD

AMIR KHAN

Minister for Education

ALIMARTABET MAJOR SHAMSUDDIN MOHAMMAD BA

Minister for War Purposes

ALIMARTABET SHEIKH MOHAMMAD ABDUL GHANI

BALASINOR H H NAWAB
SAHEB BABI SHRI
JAMIAKHAJI BAHADUR
 the present Ruler of Balasinor
 State

Born 10th November 1894
Ascended the Gadi on 31st
 December 1913

Educated At Raj Kumar
 College Rajkot where he
 achieved the Diploma. After
 wards joined the Imperial
 Cadet Corps Dehra Dun and
 returned with success. He is
 allowed to wear the Imperial
 Cadet Corps uniform. His
 Highness is a ruler of literary
 taste and can compose poetry
 in Urdu and Gujarati. He is
 also endowed with the natural
 gift of writing dramas and

plays which are greatly admired in the province of Gujarat

Married First H H Begum Saheba Shri Subhan Bakhte
 Saheba daughter of the Heir-apparent of Junagadh State but she
 died. At present His Highness the Nawab Sahab has three
 Begum Sahebabs (1) H H Shri Sardar Begum Saheba. (2) H H
 Shri Khurshid Begum Saheba. (3) H H Shri Zohra Begum Saheba.
 The senior Begum Saheba Sardar Begum Saheba the daughter of the
 late Thakor Saheb of Kervada gave birth to a son in 1920 who
 unfortunately died in infancy. The third Zohra Begum Saheba has
 given birth to four daughters.

His Highness the Nawab Sahab comes of a very ancient and
 well known Babi Sunni Pathan dynasty. The ancestors of His
 Highness were the descendants of Sher Khanji Babi son of Bahadur
 Khanji Babi a distinguished officer in the Imperial Service at Delhi
 who enjoyed a very high position at the time of the Mughal
 Emperors. Even to-day the same magnificent position is fully
 maintained. The Rulers of this clan have been famous not for their
 kingly pomp dignity and splendour but for their luxuriance of
 benevolence and exuberance of munificence throughout Gujarat
 and Kathiawar.

Military Force 60 Cavalry 177 Infantry and 10 guns

Permanent Salute 9 guns. The ruler has been granted a sanad
 of adoption. His Highness is also a member of the Chamber of
 Princes in his own right and is entitled to be received by H. E. the
 Viceroy.

BENARES H H MARA
RAJA VIBHUTI NARAIN
SINGH BAHADUR (minor)
the present Ruler of Benares
Born on 5th November 1927
Succeeded April 5 1939

H H the Maharaja being a
minor the administration of the
State is carried on by a Council
of Administration

The State of Benares under
its Hindu Rulers existed from
time immemorial and finds men-
tion in Hindu and Buddhist
literature In the 12th century
it was conquered by Sahab-ud-
din Ghori and formed a separate
province of the Mohammadan
Empire In the 18th century
Raja Mansaram an enterprising
Zemindar of Gangapur obtained
a Sanad from the Emperor

Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738 and founded the Benares State which comprised the four Sirkars of Benares Ghazipur Jaunpur and Chunar Raja Mansaram died in 1740 and his son Balwant Singh became the virtual ruler During the next 30 years attempts were made by Safadar Jung and after him by Shuja-ud daula of Oudh to destroy the independence of the Raja, but the latter withstood them successfully strengthened his position and built the fort of Ramnagar on the bank of the Ganges Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh He was expelled by Warren Hastings Balwant Singh's daughter's son Mahip Naram Singh was then placed on the Gadi The latter proved an imbecile and there was mal administration which led to an agreement in 1794 by which the lands held by the Raja in his own right were separated from the rest of the province The direct control of the latter province was assumed by the British Government under an arrangement by which the surplus revenue was granted to the Raja while the former constituted the Domains On the 1st of April 1911 the major portion of these Domains became a State The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State The State now consists of three districts viz Bhadohi Chakia and Ramnagar H H the Maharaja of Benares though a minor is very anxious to see the successful end of the present war in favour of the British nation The Council of Administration Benares State have therefore purchased Defence Bonds and Postal Saving Certificates worth Rs 1 08 900 and have also invested nearly Rs 30 331 33 in subscription to H E the Viceroy's War Purposes Fund Efforts are in progress for the formation of Civic Guards in the Districts of Benares State The officers and officials of the State have also contributed to His Excellency's War Purposes Fund

BHOPAL LT-COL HIS HIGHNESS SIKANDER SAQLAT IFTIKHAR UL-MULK NAWAB MUHAMMAD HAMIDULLA KHAN BAHADUR GCSI GCIE CVO BA LL D the present Ruler of Bhopal succeeded his mother the late Her Highness Nawab Sultan Jehan Begum in May 1926 when weighed down by age and cares of state she abdicated in his favour. Previous to his accession His Highness had actively participated in the administration for nearly ten years as Chief Secretary and afterwards as Member for Finance and Law and Justice. He was also the Chancellor of the Chamber of Princes during 1931-32 and attended

the various sessions of the Round Table Conference in London to advise and participate in the deliberations of that body and its committees on the subject of political reform in India.

In the game of polo His Highness is well known as one of the greatest players of the generation and enjoys international fame. No less conspicuous are his achievements in administration which works directly under his personal and active supervision.

The administration is assisted by a Legislative Council which represents traders, cultivators, Jagirdars and general urban interests elected through popular constituencies.

Bhopal is notable as the principal Islamic State of Malwa and in India second only to the State of Hyderabad. It is rich in its deposits of iron, bauxite, mica and other valuable minerals and is rapidly growing in industry.

In the present conflict as in the last Great War the response of Bhopal has been most enthusiastic. Apart from contributions in the form of gifts, investments and subscriptions for the purposes of a wide war effort, His Highness' gift of American Securities amounting to over £70,000 has been accepted by His Majesty for the formation of a Bhopal Flight of fighters and the expenditure on the Army already the largest single item in the State budget has now been trebled. It now accounts for no less than 35 per cent of the total revenues of the State. The 20th (Bhopal) Field Ambulance, a hospital unit equipped on a first class scale and the Sultana Infantry are already in the field.

The latter has been replaced by another unit while a complete Mechanical Transport Unit has received its initial training and is now on active service

In March 1941 His Highness visited the Middle Eastern front where he inspected the British and Indian Forces in the field and was present at the famous assault which ended in the subjugation of Keren in Eritrea

Besides two convalescent homes at Bhopal and Mussooree equipped at considerable cost most of the important buildings in the State have been converted to military use. A comprehensive scheme of internal security embracing the organisation of a volunteer reserve for police and the formation of a new battalion which replaces the Sultan's Infantry is designed to relieve the British Military Command of the obligation to maintain the internal tranquillity of the State. An aerodrome somewhere in the state laid two years ago has experienced further expansion to serve as an important link in aerial communications. Every possible expedient is being tried to make the State's contribution adequate to a total war effort. Several non-official committees including women organisations are in charge of soldiers' welfare work whose family needs are especially attended to. The Command Staff of the Bhopal State Forces has been reorganised and arrangements are under way to mechanise a portion of the army.

A new department under the direct supervision of the Ruler has taken over charge of civil defence. Accommodation on a vast scale is made for hospitals for which school and other buildings have been requisitioned. Regular classes are held at several centres in the city to initiate the people in defence services of which the A. R. P. and First Aid sections are already highly advanced. Bhopal has been the first to organise its National War Front. After a preliminary organisation in the city the ramifications of the movement are being steadily interknitted into a scheme of wide rural publicity.

Salute 19 guns (21 guns within the State) *Area* 7,000 sq miles. *Population* about 800,000 *Herress Apparent*: The Princesses Gauhar Taj Surayya Jah Nawabzadi Abida Sultan Bahadur. Other daughters of His Highness Princess Mihr Taj Nawabzadi Sajida Sultan and Princess Qamar Taj Nawabzadi Rabi'a Sultan.

Hayder (in-charge of Finance)

PRINCESS ABIDA SULTAN—SURNAMED AFTER HER RENOWNED GRANDMOTHER HER HIGHNESS THE NAWAB SULTAN JAHAN BEGUM C I GCSI etc is the eldest daughter of His Highness the present Ruler of Bhopal and Begum-consort Her Highness the Nawab Maimuna Sultan Shah Bannu Begum Sahiba. The Princess who is officially entitled the Nawab Surayya Jah Gauhar i Taj Begum is the heir-apparent to the throne.

Born On the 28th August 1913. She was brought up and educated in Bhopal under the enlightened guidance of her illustrious grandmother. In 1933 the Princess was married to Nawab Sarwar Ali Khan Sahib of Kurwai, and has one son.

With her special knowledge of the humanities of classical Arabic and Persian the Princess combines the best accomplishments of the western education which she received under tutors of outstanding abilities. She is well known as an accomplished musician, a fine rider and polo player, a good shot and an entertaining conversationalist quite at home in a large variety of modern topics.

For some years past the Princess is being initiated in the art of administration under the care and guidance of her own talented father His Highness the present Ruler of Bhopal. During this period she has held charge of the Private Estate of His Highness as Chief Secretary in the Department of Deori Khas which is entrusted with the administration of the estate and large schemes of Agricultural Development. She is now the President of the Bhopal State Cabinet, a new body created since the beginning of the war to undertake the charge of administration in any emergency which might entail in the exigencies of war services the presence of His Highness in the field. At present all matters of State Administration decided by the Executive Council are submitted to this body which functions under the direct supervision of His Highness the Ruler after whose approval the decisions taken by it become operative.

BIKANER GENERAL
 HIS HIGHNESS MAHARAJA
 JADHIRAJ RAJ RAJESHWAR
 NARENDRA SHIROMANI
 MAHARAJAH SRI GANGA SINGHJI
 BAHADUR G.C.S.I. G.C.I.E.
 G.C.V.O. G.B.E. K.C.B.
 A.D.C. LL.D. is the present
 Ruler of Bikaner. A fine type
 of Rathore Rajput he affords
 an admirable example of what
 modern training can do for an
 Indian Prince. He is the
 twenty first Ruler of Bikaner
 since its foundation by Rao
 Bikan in 1465 A.D. and is
 worthily upholding the tradi-
 tions of the illustrious house
 for gallantry and loyalty. The
 figure twenty-one is regarded
 by Indians as a very lucky
 number and it had proved to

be so for the Bikaner State because the Maharajah has not only brought it to a pitch of efficiency and prosperity but in his time Bikaner has ranked among the foremost progressive States of India and proved to the World what pillars of strength the Princes can be to the Empire. The services rendered by His Highness Government form one of the brightest chapters in the history of British connection with India.

Born On 13th October 1880

Ascended the Throne on 31st August 1887 and assumed full ruling powers in 1898

Education In 1889 he entered the Mayo College at Ajmer studied there till 1894. His Highness' career at the College where he won seven medals and many other prizes was exceptionally brilliant.

Services His Highness represented the Indian States at the Imperial War Cabinet and Conference held in England in 1917 and in Peace Conference held in 1919. was one of the signatories to the Treaty of Versailles by virtue of his appointment as one of the Pleni-potentiaries Commissioners and Procurators in respect of the Indian Empire by His Imperial Majesty the King Emperor under the Royal Sign Manual and Signet. received the Freedom of the Cities of London, Edinburgh, Manchester and Bristol. represented the Ruling Princes of India at the Assembly of the League of Nations 1924. was leader of Indian Delegation to the Assembly of the League of Nations 1930. represented the Indian States at the Imperial Conference 1930 and was a Member of the Indian States Delegation to the Indian Round Table Conferences London 1930-31 and 1931-32.

State Administration In regard to the enlightened and modern nature of the Bikaner administration the narration of the following facts should be sufficient to establish its pre-eminence not only in Rajputana but in the whole of Northern India —

Judiciary (a) Bikaner was the first state in N India to establish a Chief Court in 1910 (b) It was also the first State to raise the Chief Court to the status of a High Court in 1922 and to give to the Judiciary complete independence and to separate effectively the Judiciary from the Executive

Elective Institutions (a) It was the first State in Rajputana (and so far the only one) to establish in 1913 a Legislative Assembly with an elected majority with wide powers of interpellation discussion of Budget etc (b) Local Self Government is firmly established in the State every Nizamat having a District Board and practically every town with a population of over 5 000 and some even with less a Municipality All Municipalities outside the Capital have elected Presidents

Education (a) Education is free in the State Compulsory Primary Education is in force in the Capital as well as in 5 District Municipalities Besides a College teaching up to M A Classes there are no less than 10 High Schools 3 Middle Schools and 126 Primary Schools in the State (b) Special attention is devoted to girls education and there is in the Capital an institution which is unique at least in Rajputana for the education and training of Kumaris of Nobles families under strict *purdah* arrangements which owes its existence to the interest and initiative of Her Highness the Maharani C I (c) A Montessori School for children of both sexes has also been established (d) The expenditure on education has gone up by 2 156 2 per cent during the last 40 years

Medical Services (a) So far as Medical Services are concerned Bikaner enjoys an enviable reputation The two large and thoroughly well equipped General Hospitals one for Men and the other for Women and Children costing approximately 16½ lakhs have deservedly become centres of higher medical treatment for people belonging to adjoining States and British territory and even distant parts of India Every branch of medical relief is in charge of Specialists—expert and highly skilled Physicians Surgeons Oto laryngologist Radiologist Ophthalmic Surgeon Bacteriologist Pathologist and Dentist—and there are arrangements for the most up-to-date treatment by blood transfusion X Ray deep-ray therapy radium etc There is a separate well equipped Tuberculosis Hospital (b) In the Districts first class Hospitals exist and there are no less than 45 Hospitals and Dispensaries in the State A Maternity and Child Welfare Centre functions in the City (c) The expenditure on Medical Services has gone up by 1 438 5 per cent during the last 40 years

Revenue Gang Canal—(a) The main irrigation in the State is through the Gang Canal It was the cherished dream of His Highness from 1899 1900 at the time of great Famine to secure irrigation for his State and in 1905-06 the Project was mooted for harnessing the waters of the Sutlej to irrigate the northern portion of the State After protracted negotiations during which over 20 schemes were discussed an agreement was reached in 1920 between the Punjab Bikaner and Bahawalpur Governments to carry out this scheme which was designed to irrigate 6 20 000 acres in the north west of the State The Canal was opened on the 26th October 1927 by Lord Irwin (b) The undertaking was one of exceptional difficulty 79 7 miles of Main Canal and 10 miles of feeder in the old Ghaggar bed had to be

lined with concrete at a cost of about Rs.83 lakhs. Railway communications 157 miles in length to open up the Canal irrigated area had to be built involving very heavy additional outlay (c) The following facts about the Canal are outstanding—

- (1) It is by far the longest concrete lined Canal in the world
- (2) The length of the Main Canal from Perozepore Head Works to Shivpur in the Bikaner State is 84.7 miles while the feeder and the distributaries are 853.7 miles long
- (3) The cost of construction of the Canal alone amounted to Rs. 2½ crores
- (4) Other expenditure connected with the Canal Colony like development of Railways etc. amounted to Rs. 30½ lakhs
- (5) Much of this total expenditure of three crores and ten lakhs of rupees has been met from the State Revenues or loans raised in the State
- (6) Lands were sold on conditions previously advertised which were more advantageous than conditions prevailing in the Punjab
- (7) The population of the Colony has risen from 28,937 in 1921 to 1,46,259 in 1931 or an increase of 405 per cent and to 2,63,404 in 1941 or a further increase of 81 per cent
- (8) The production of wheat and sugarcane has during this period increased from 2,935 and 16 Bighas respectively in the year 1928 to 51,888 and 11,073 Bighas respectively in the year 1939

Bhakra Dam There is a very extensive area in the North in the Hanumangarh, Nohar and Bhadra Tehsils which would also be irrigated when the Bhakra Dam Project is put into effect. According to the present project the gross area likely to benefit under this scheme in the State extends to 12,05,600 acres. The States share of the cost of this project is estimated at about Rs. 8 crores. Should this scheme materialise practically the whole northern area of the State would come under irrigation.

Occupancy Rights Recently a most far reaching reform in the revenue administration of the State has been launched for the grant of Occupancy Rights to cultivators throughout the State with powers of alienation and mortgage. In the Canal area full proprietary rights have been given to the colonists and to the old settlers.

Railway The Bikaner State Railway now extends to 883.05 miles and the capital invested amounts to more than 4½ crores in cluding a Capital outlay of Rs. 20 lakhs on its own Workshops.

Census The population of the State according to the Census of 1941 is 12,92,938. This gives an increase of 38.1 per cent over the figure of 9,36,218 recorded in 1931. Even the 1931 Census had recorded an increase of 41.9 per cent over the Census of 1921.

Privy Purse and Civil List (a) His Highness the Maharaja is one of the first Indian Princes who shortly after his coming of age and of his own free will and accord introduced as long ago as in 1902 the system of having a separate and well-defined civil list and privy purse on modern lines and a clear dividing line between his personal expenditure and that of the State. (b) His Highness has now decided

that allotment to his privy purse and civil list shall not exceed 9 per cent. of the ordinary revenue of the State and that in no case the amount drawn for the privy purse and the civil list will exceed the sum of Rs.20 00 000 a year

Nation Building Deficits His Highness has publicly announced that as far as practicable no less than 10 per cent of the total revenues of the State will every year be spent on the Nation Building Departments. As it is the expenditure on Beneficent Departments has increased from Rs 1 30 938 in 1898-99 when His Highness came of age to Rs 17 43 800 in 1941-42 which represents a sum of over 11 per cent of the total Ordinary Receipts of the State

His Highness has recently at a Durbar given a solemn pledge even on behalf of his successors that the progressive character of the administration and the rights and liberties which His Highness subjects enjoy will be maintained for all time. In a Proclamation dated the 23rd October 1941 His Highness announced that the following 8 principles of good government will as heretofore be scrupulously adhered to by himself and his successors—

- (1) Reign of law including certainty of law and the recognition of the equality of all the subjects of the State high or low before the law
- (2) Security and protection of life and property and of rights and individual liberty
- (3) Independence of a competent and trained Judiciary and the provision of adequate machinery for the adjustment of disputes between individuals and between individuals and the State
- (4) Financial credit and stability
- (5) Efficiency and continuity of administration
- (6) Clear demarcation of State expenditure and the personal expenditure of the Ruler and a definite and fixed percentage of the ordinary revenues of the State as the civil list of the Ruler sufficient to meet his personal expenses and to maintain his position and dignity
- (7) Utilisation of as large a proportion as possible of the resources of the State for the benefit of the people and especially in what are known as nation building activities and beneficent departments and
- (8) Beneficent Rule in the interests of the general well being and contentment of the subjects of the State and the increasing association as circumstances and local conditions permit of the people with the Government through the Legislative Assembly Local Boards and other elective Institutions.

Salutes Personal 19 Permanent 17 Local 19

A substantial measure of
responsible government has

been introduced in Cochin. The Government of the State is now carried on by His Highness the Maharaja through the Diwan in relation to reserved subjects and through a Minister responsible to the Legislature appointed under the Government of Cochin Act in relation to transferred subjects. A Legislative Council with a predominant non official majority and elected on a very wide franchise has been constituted.

In point of education the State takes the first place among the Indian States and Provinces. It owns 3 Colleges 53 High Schools 130 Lower Secondary Schools and 532 Primary Schools.

The State maintains 57 Hospitals and Dispensaries. Local administration is carried on by six Municipalities three Town Councils and 84 Panchayats in the villages.

A contribution of Rs 1 lakh for War Purposes Fund and Rs 2 000 each for Red Cross and St Dunstan's has been made. A contribution of Rs 20 000 representing the savings effected in the expenditure for the Installation of H H the Maharaja has also been made towards H E the Viceroy's War Fund. Besides the State has offered to contribute Rs 10 000 every month to the Viceroy's War Purposes Fund for the entire duration of the War. Rs 10 000 per mensem are being given from August 1940 onwards. A committee to collect funds from the public in aid of War Purposes is at work and it has already collected over a lakh of rupees. A sum of about Rs 93 500 has already been paid from the collections made by this committee.

DUNGARPUR H H RAJ
1 RAYAN MAHIMAHENDRA
MAHARAJADHIRAJ MAHA
RAWAL SHRI SIR LAKSHMAN
SINGHJI BAHADUR KCSI the
present Ruler of Dungarpur

Born on the 7th March 1908 and succeeded his father on the 15th November 1918 His Highness married the grand daughter of the Raja of Bhinga on the 8th February 1920 He was educated at the Mayo College Ajmer where he passed the Diploma Examination and studied up to the first year of the Post Diploma course In addition to winning prizes at school His Highness had the distinction of getting the Sword of Honour After leaving the Mayo College in May 1927 he proceeded on a short visit to Europe returning in October 1927 His Highness was invested with full ruling powers on the 16th February 1928 In March of the same year he married a second time a daughter of His late Highness Maharaja Sir Madan Singh Bahadur of Kishentpur His Highness has three Maharaj Kumars and four Princesses The heir apparent Maharaj Kumar Shri Mahipal Singhji Bahadur was born on the 14th August 1931 His Highness has three brothers He was created KCSI in 1935

The Rulers of Dungarpur belong to the Gohlot Ahara Clan of the Sisodia Rajputs and are the eldest branch of the House of Udaipur The separation of the Dungarpur House from the House of Mewar dates from Vikram Samvat 1228 (A D 1171) when Rawal Samant Singh Ruler of Mewar and the eldest son of Rawal Kahem Singh left his patrimony and migrating south slew Chaurasimal the Parmar Ruler of Vagad the ancient name for the Country comprising the present States of Dungarpur and Banswara with its Capital at Batpat rak or Baroda The early rulers of whom Devpaldev and Virsingh are worthy of special note gradually extended their territory by driving out the Parmars from Gahakot and Arthoons It was Maharawal Dungan Singh who founded the present Capital and named it Dungarpur after himself Of subsequent rulers Maharawal Gopinath and Somdas are noteworthy for the resistance they offered to the Sultans of Gujarat and Malwa

On the death of Maharawal Uday Singh a warrior of great repute who fell fighting against the Emperor Babar in 1528 A D at the battle of Khanwa the State of Vagad was split up the portion to the west of the river Mahi with the Capital Dungarpur being retained by the elder son Prithvi Raj and the eastern portion now forming the State of Banswara going to the younger son Jagmal

In matters of administration His Highness is assisted by a Council of Ministers under his direct control. The State Army consisting of Cavalry Infantry and Artillery units is well organized and is considered to be the best among Indian State Forces. The State maintains its own Postal system and a light Railway. Educationally the State is much advanced.

There are two degree Colleges at Gwalior the Capital, including one for women one Intermediate College at Ujjain and High Schools in practically all the districts. There are a few technical schools imparting education in arts and crafts and there is a Public School on the Gwalior Fort which is run on the English Public School lines.

The political reforms announced in June 1939 have been further supplemented by His Highness Proclamation of Sept 1941. The strength of the Praja Sabha which was formerly 85 has been raised to 90 and of this number 55 instead of 50 will be elected representatives thus providing for still greater non official element in the Lower House. The Praja Sabha and Raj Sabha (Upper House) will have identical powers and the range of their functions will be co-extensive. The communities and interests to which special protection has been

afforded are the Muslim Community the Bhils the Backward classes and women To each of these a minimum number of seats have been guaranteed in the Praja Sabha To Muslims and women seats have been guaranteed in the Raj Sabha also

Another special feature of the recent reforms is that the legislature will have the power of discussing the constitution as well

Gwalior is one of the few advanced States which have taken practical steps in associating the public voice with the administration of the State by actually appointing a non-official as Minister for Rural Welfare and Local Self-Government

The Executive Council thus includes a popular Minister selected from among the public

Since the assumption of Ruling powers by the present Maharaja commendable activity has been witnessed in all branches of administration The construction of Harsi Reservoir costing about Rs 1½ crores the grant of one crore of rupees for rural reconstruction and the establishment of a Degree College for women as also the scheme for construction of an up to date Female Hospital are some of the important beneficent measures undertaken during the period The network of roads has been utilized by motor bus services run by the Gwalior and Northern India Transport Company and those places which were unconnected are now being joined with important highways His Highness also constructed at Madhav Sagar a seaplane base which serves as a halting station for the boats flying on the Imperial Air Line

Gwalior maintains an Aerodrome also

This year famine conditions having been experienced in some parts of the State on account of shortage of rainfall His Highness has generously sanctioned about 15 lacs of rupees for relief measures Rupees two lacs were also sanctioned by His Highness for organising locust control

On the declaration of the War His Highness was one of the first rulers in India to place the Army and the resources of his State at the disposal of His Majesty the King Emperor

Immediately after the outbreak of present war Gwalior took steps to sponsor effective measures such as were taken in British India by promulgating rules for the safety of the public registration of European subjects restriction of the movements of foreigners and control of the Press and price control in order to prevent profiteering The pick of his splendid army was offered by His Highness to the British Government The Mountain Battery, the 4th Gwalior Infantry the B Battery the Gwalior Transport the Second and Third Infantry have left the State and are already serving with the British Indian troops Thousands of recruits have been enlisted to provide reinforcements and bring units up to depot strength Besides the contributions in men and material His Highness has also made hand some contributions and investments with a view to successful prosecution of the war The contribution alone reached a total figure of rupees 42 lacs towards the close of 1941

 1941-42 915 73 lakhs Salute 21 guns*

The State has a Legislative Council of twenty members eight of whom are elected and an Executive Council of six officials with a President. It maintains its own paper currency and coinage postal system railways and army. It has a University with six Arts Colleges including one for women and Colleges for Engineering Medicine Law and Teaching. It has also an Honours College affiliated to Madras University a College for Jagirdars and a College of Physical Education. There are also a Village Industries Training Centre a Central Technical College and an Observatory. A State Bank has been recently established with an authorized capital of Rs 1 50 00 000. The State is of great historical and archaeological interest as within its limits are situated many old capitals of ancient and mediæval Deccan Kingdoms famous forts temples mosques and shrines and the wonderful Buddhist sculptures and paintings of Ellora and Ajanta.

In order to afford the people more effective association with Government constitutional reforms of a far reaching character were announced on 17th July 1939. They are based for the most part on the recommendations of a predominantly non-official Committee. Under the new reforms scheme a much enlarged Legislative Assembly with an elected majority and a specified list of matters within its purview is to be established. The basis of representation both for the Assembly and for all the local bodies will be functional with joint electorates. The new constitution also provides for the setting up

of a number of Advisory Committees on such subjects as Religious Affairs Finance Education Agriculture Industries etc to advise the Members of Government concerned on those matters for the reconstitution of the Hyderabad Civil Service Committee the setting up of Appointment Boards to control recruitment to Government services and the establishment of Panchayats and the reconstitution and expansion of existing District Boards and Town Municipalities A new press legislation is also on the anvil

Preliminary work in connection with the contemplated Reforms is proceeding apace and when they come to be fully implemented there will be 16 District Boards 12 Jagir and Illaqa Boards and 100 Municipal and Town Committees and 2 000 Panchayats not to mention the Legislative Assembly itself Appointment Boards for all Departments a reconstituted Civil Service Committee 7 Statutory Advisory Committees dealing with such important matters as Finance Industries Education Agriculture Religious Affairs and Sanitation the District Conferences meeting every year in all the Districts

Hyderabad and War Foremost among the units of Princely India Hyderabad is in the forefront of all Indian States and even many British Indian provinces in the matter of her practical contribution to the war effort of the country No sooner hostilities broke out in Europe than His Exalted Highness the Nizam the Faithful Ally of the British Government in keeping with the traditional policy of the House of Asaf Jah offered unstinted co operation and placed his services and the entire resources of his Dominions at the disposal of the British Government Inspired by the noble example set by their beloved Ruler the people of Hyderabad also have voluntarily put their shoulders to swell the war effort of the State

Not only has His Exalted Highness placed his Delhi and Bombay palaces at the disposal of the Government of India for war purposes but has also donated £50 000 from the Sarf-e-Khas (personal) Estate for aerial warfare made a contribution of Rs 5 lakhs to the Viceroy's Fund and donated another Rs 1 lakh to the Hyderabad War Relief Fund This is in addition to the contributions totalling £150 000 made by H E H's Government to the Air Ministry in London investment of Rs 2 00 00 000 in the Government of India Defence Bonds and the monthly contribution of Rs 1½ lakhs to defray the expenses of the Hyderabad regiments (a cavalry unit and an infantry battalion) stationed in British India for purposes of internal security A noble addition made to these generous contributions is the placing of a sum of Rs 20 lakhs at the disposal of the Admiralty for the provision of a corvette for combating the submarine menace in the Battle of the Atlantic Thus Hyderabad's contribution in the shape of cash alone totals well over Rs 3½ crores

This does not however by any means exhaust the list of measures which have been and are being taken by the Government and people of Hyderabad to contribute their quota to the country's war effort A special organization has been created and entrusted with the task of allying Hyderabad industries with the war effort The N S

Railway workshops are manufacturing war materials and are being assisted in the task by the Public Works and the Commerce and Industries Department. The Road Transport Department of the Railway is training mechanics and drivers for the Indian Army. Hyderabad also has the distinction of having an elementary flying training school opened recently at the Begampet Aerodrome. The institution established at a capital cost of Rs. 1,75,000 will turn out 100 pilots every year.

But this is not all. As has already been stated, public response to appeals for funds has been very encouraging indeed. Nearly Rs. 5½ lakhs have so far been contributed to the Hyderabad War Purposes Fund while the Hyderabad Hurricane Fund started with an appeal from the Rt. Hon. ble late Sir Akbar Hydari and the Resident at Hyderabad has yielded nearly Rs. 20½ lakhs. Many notable contributions have been made from these funds for general war and relief purposes in England as well as elsewhere in Europe. Moreover, the entire countryside has been galvanized into activity and an extensive network of District and Taluqa Committees set up to help in the co-ordination of war relief activities.

Capital Hyderabad—Population 7,28,400 (1941). It is interesting to note that in the race of cities for places Hyderabad has succeeded in retaining her previous position—that of being the fourth largest city in the Indian Empire. The city is beautifully situated on the banks of the river Musi with fine public buildings, broad cemented roads, good electricity and water supply and an efficient bus service run by the State Railway. Among interesting places are the Char Minar, the Mecca Masjid, the fort and tombs of Colconda, the large artificial reservoirs—the Osman Sagar and the Himayat Sagar and the Osmania University.

H H GENERAL WALASHAN
NAWAB MIR HIMAYAT
ALI KHAN AZAM JAH
BAHADUR PRINCE OF BERAR
HEIR APPARENT TO H E H THE
NIZAM OF HYDERABAD AND
BERAR

Born February 22nd 1907

Early education was entrusted to eminent scholars, Indian and European and military training was supervised by the late Major General Nawab Sir Afsarul Mulk Bahadur. Showed special aptitude for all forms of manly sport and excels in polo, tent pegging, pig-sticking and hunting. A fine shot and a keen all round sportsman. Has also received thorough training in administrative work both executive and judicial.

His Highness married Durr e Shahvar the only daughter of H M the Califa Abdul Majid II. Her Highness received the title of Durdana Begum from H L H the Nizam after marriage. Her Highness received her education under the scholarly care of her father and besides being well versed in various languages, is a keen student, an able speaker and an excellent painter. Their Highnesses have travelled extensively in Europe and in 1937 represented H E H the Nizam at H M the King's Coronation. Following the Berar Agreement of 1936 the hereditary title of H H the Prince of Berar has been conferred on the Heir Apparent. Honorary Degree of LL.D. has been conferred on His Highness by the Osmania and the Aligarh Muslim Universities.

His Highness was appointed Commander in Chief of the Hyderabad State Forces in 1934 and has associated himself whole heartedly with measures designed to enhance the efficiency of the Army. Among the more important schemes put into execution during his period of office are the introduction of New Terms of Service, construction of a Central hospital, establishment of a Cantonment at Mominabad, reorganisation of the Military Medical Service and the supply of free rations to all units. A number of reforms have been introduced in the Irregular Forces of the State which are also under His Highness's command. His Highness keeps in close touch with the administration and is particularly interested in rural uplift activities and in social and educational developments. His recent tour of famine-stricken areas evoked memorable scenes. His speeches command wide interest both on account of their simple unaffected language and because of the sympathy and understanding he brings to bear on the various problems.

I D A R H H MAHARAJA DHIRAJ SHREE HIMMAT SINGHI BAHADUR OF—The Idar House was founded 100 years ago by two brothers of the Maharaja of Jodhpur. His Highness Maharaja Shree Himmat Singhji is the 10th of this illustrious line.

Born. On 2nd September 1899
Succeeded to the *Gad* 14th April 1931

Married Shree Jawahar Kunwar Sahiba the eldest daughter of Raja of Bhander in the Jaspur State in 1906

His Highness received his education at Mayo College Ajmer where he remained for 5½ years leaving it after a brilliant career in 1916. He attained his diploma standing first in the list of candidates from all the Chiefs Colleges in India and was awarded His Excellency the Viceroy's medal. He won every class prize from the fifth to the diploma five prizes for English and eleven others for various subjects. He won prizes in each division in succession for riding and represented the College against the Aitchison College for 3 years at tent pegging and also at tennis. For several years he was captain of one or other of the junior football or cricket elevens and he was one of the best and keenest polo players in the college.

As will be seen, he upheld his family tradition as a horseman. From boyhood he was keen on hunting and pigsticking and before he had joined the College at the age of 10, he had accounted for many a panther and bear to his own rifle. His Highness now keeps a racing stable and has had many successes. These active sports are not his only recreation for he has a good ear for music and is interested in painting and photography.

On leaving the college, His Highness Maharaja Shree Himmat Singhji took an active part in the State administration being appointed to His late Highness' Council and later for several years was in charge of the administration under His late Highness' personal directions. He gained further practical experience from an extensive tour throughout India in 1929-30. He was therefore well qualified to take up his responsibilities as Ruler of his State when he ascended the *Gad* of Idar. Since his accession in 1931, many schemes of improvement have been inaugurated which concern the social welfare of his subjects, their education, industries and agriculture. His Highness has embarked on an ambitious programme of reform and advancement which it is expected his experience and keen personal interest will enable him to carry through successfully.

His Highness has two sons, Maharaja Kumars Shree Daljit Singhji and Amar Singhji; the eldest Maharaja Kumar Shree Daljit Singhji, the heir apparent, was born in 1917.

On the outbreak of War His Highness placed all the resources of the State at the disposal of the Government. His Highness is giving Rs. 25,000 annually for the Viceroy's War Purposes Fund. The State has also presented its two Aircraft—a Monoplane and a Hornet. Moth to the Government. Rs. 14,570 to 13 including Rs. 1,500 as annual contributions were contributed by the members of the Ruling Family, the Jagirdars and Officials of the State towards the War Purposes Fund. Rs. 904.8-0 were presented on behalf of the ladies of the State towards Her Excellency's Trinket Fund. A Central War Committee has been established of which is making every effort for the collection of funds.

State *Address* Indore (Central India)
Recreation Tennis Cricket and Shikar

At the outbreak of hostilities in Europe H H the Maharaja placed the entire resources of the State including the State Army and his personal services at the disposal of the British Crown. His Highness donated a sum of Rs 5,00,000 and placed it at the disposal of H E the Viceroy for being utilised in any manner towards war purposes. His Excellency thought best. Subsequently H H the Maharaja and his Government in keeping with the traditions of the illustrious house of Holkar and the close ties that bind it with the British Crown intensified the State war effort and took various measures with a view to contribute to the utmost degree towards the effective prosecution of the war and the speedy success of the cause for which the British Empire has been compelled to take up arms against the ruthless and unscrupulous Axis aggression.

Besides the various administrative measures that were considered necessary for the maintenance of peace and order His Highness's Government deputed the ear marked Holkar Transport Corps to Jhansi for undergoing the preliminary training in the beginning of the year 1940 and in June 1940 two Companies of the 1st Battalion with the Battalion Headquarters were made available for service with His Majesty's Forces if and when required. Subsequently in July 1940 under special orders of H H the Maharaja the whole of the 1st Battalion was placed at the disposal of the Crown and steps have been taken to bring up all units of the Holkar State Forces to full strength. The fullest co-operation is being offered to the Government of India in a number of matters connected with the war e.g. facilities for recruitment of war personnel for different work including technical

personnel such as Motor Mechanics etc. The 1st Battalion of Maharaja Holkar's Army is already serving with His Majesty's Forces overseas.

Liberal contributions were made towards the War Relief Fund the Defence Savings movements and the British Red Cross Indian Red Cross and the St Dunstan's Fund. H H the Maharaja also sanctioned the purchase of Interest Free Defence Bonds of Rs 300,000 and all Government servants of the State getting not less than Rs 50 p.m. offered to pay a day's salary every month towards the purchase of Defence Bonds and Savings Certificates.

His Highness has also sanctioned the purchase of 3 per cent Government of India Defence Bonds for Rs 1,00,000. His Highness the Maharaja gave two donations of Rs 10,000 each from his Privy Purse for the Holkar State Red Cross Society and the Holkar State War Relief Fund and also contributed a sum of Rs 5,000 to the War Fund to be earmarked for the use of the families of Indian Soldiers serving overseas. As a monumental contribution from the people of the city of Indore Rs 50,000 were contributed towards the cost of a Single Fighter to be named the City of Indore earmarked for the defence of India. His Highness has also sanctioned a donation of Rs 3,000 towards the Lord Mayor's War Distress Fund. His Highness also contributed a sum of Rs 50,000 to the Russian Red Cross and a sum of Rs 50,000 to His Excellency the Viceroy's War Purposes Fund to be earmarked for the Chinese Red Cross Fund. H H the Maharaja has contributed a sum of Rs 100,000 to H H the Viceroy's War Purposes Fund to be earmarked for the defence of India.

In July 1940 H H the Maharaja offered the Air Speed Envoy aeroplane to the British Air Ministry for war purposes and the offer was gratefully accepted by the British Air Ministry.

The scheme regarding conferment of Emergency Commissions was brought to the notice of young men desirous of entering Military service during the war and several candidates and officers have been recommended for the purpose. A number of applications for war service from members of the public as well as from State servants including Sub Assistant Surgeons employed in the State Medical Department have been forwarded to the British Indian Authorities. As a precautionary measure an A.R.P. Committee has also been appointed for the city of Indore. His Highness's Government have also recommended candidates to the Government of India under the Bevin Training Scheme. A Holkar State War Front Council has been constituted with the Minister of Police and Civil Defence as its President.

of a number of Advisory Committees on such subjects as Religious Affairs, Finance, Education, Agriculture Industries etc to advise the Members of Government concerned on those matters for the reconstitution of the Hyderabad Civil Service Committee the setting up of Appointment Boards to control recruitment to Government services and the establishment of Panchayats and the reconstitution and expansion of existing District Boards and Town Municipalities. A new press legislation is also on the anvil.

Preliminary work in connection with the contemplated Reforms is proceeding apace and when they come to be fully implemented there will be 16 District Boards 12 Jagir and Illaga Boards and 100 Municipal and Town Committees and 2 000 Panchayats not to mention the Legislative Assembly itself Appointment Boards for all Departments a reconstituted Civil Service Committee 7 Statutory Advisory Committees dealing with such important matters as Finance Industries Education Agriculture Religious Affairs and Sanitation the District Conferences meeting every year in all the Districts.

Hyderabad and War Foremost among the units of Princely India Hyderabad is in the forefront of all Indian States and even many British Indian provinces in the matter of her practical contribution to the war effort of the country. No sooner hostilities broke out in Europe than His Exalted Highness the Nizam the Faithful Ally of the British Government in keeping with the traditional policy of the House of Asaf Jah offered unstinted co operation and placed his services and the entire resources of his Dominions at the disposal of the British Government. Inspired by the noble example set by their beloved Ruler the people of Hyderabad also have voluntarily put their shoulders to swell the war effort of the State.

Not only has His Exalted Highness placed his Delhi and Bombay palaces at the disposal of the Government of India for war purposes but has also donated £50 000 from the Sarf-e-Khas (personal) Estate for aerial warfare made a contribution of Rs 5 lakhs to the Viceroy's Fund and donated another Rs 1 lakh to the Hyderabad War Relief Fund. This is in addition to the contributions totalling £150 000 made by H E H's Government to the Air Ministry in London investment of Rs 2 00 00 000 in the Government of India Defence Bonds and the monthly contribution of Rs 1½ lakhs to defray the expenses of the Hyderabad regiments (a cavalry unit and an infantry battalion) stationed in British India for purposes of internal security. A noble addition made to these generous contributions is the placing of a sum of Rs 20 lakhs at the disposal of the Admiralty for the provision of a corvette for combating the submarine menace in the Battle of the Atlantic. Thus Hyderabad's contribution in the shape of cash alone totals well over Rs 3½ crores.

This does not however by any means exhaust the list of measures which have been and are being taken by the Government and people of Hyderabad to contribute their quota to the country's war effort. A special organisation has been created and entrusted with the task of aligning Hyderabad industries with the war effort. The N S

Railway workshops are manufacturing war materials and are being assisted in the task by the Public Works and the Commerce and Industries Department. The Road Transport Department of the Railway is training mechanics and drivers for the Indian Army. Hyderabad also has the distinction of having an elementary flying training school opened recently at the Begampet Aerodrome. The institution established at a capital cost of Rs. 1 75 000 will turn out 100 pilots every year.

But this is not all. As has already been stated public response to appeals for funds has been very encouraging indeed. Nearly Rs. 5½ lakhs have so far been contributed to the Hyderabad War Purposes Fund while the Hyderabad Hurricane Fund started with an appeal from the Rt. Hon. late Sir Akbar Hydari and the Resident at Hyderabad has yielded nearly Rs. 20½ lakhs. Many notable contributions have been made from these funds for general war and relief purposes in England as well as elsewhere in Europe. Moreover the entire countryside has been galvanized into activity and an extensive network of District and Taluqa Committees set up to help in the co-ordination of war relief activities.

Capital Hyderabad—Population 7 28 400 (1941). It is interesting to note that in the race of cities for places Hyderabad has succeeded in retaining her previous position—that of being the fourth largest city in the Indian Empire. The city is beautifully situated on the banks of the river Musi with fine public buildings, broad cemented roads, good electricity and water supply and an efficient bus service run by the State Railway. Among interesting places are the Char Minar, the Mecca Masjid, the fort and tombs of Golconda, the large artificial reservoirs—the Osman Sagar and the Himayat Sagar and the Osmania University.

At the outbreak of hostilities in Europe H H the Maharaja placed the entire resources of the State including the State Army and his personal services at the disposal of the British Crown. His Highness donated a sum of Rs 5 00 000 and placed it at the disposal of H E the Viceroy for being utilised in any manner towards war purposes. His Excellency thought best. Subsequently H H the Maharaja and his Government in keeping with the traditions of the illustrious house of Holkar and the close ties that bind it with the British Crown intensified the State war effort and took various measures with a view to contribute to the utmost degree towards the effective prosecution of the war and the speedy success of the cause for which the British Empire has been compelled to take up arms against the ruthless and unscrupulous Axis aggression.

Besides the various administrative measures that were considered necessary for the maintenance of peace and order His Highness's Government deputed the ear marked Holkar Transport Corps to Jhansi for undergoing the preliminary training in the beginning of the year 1940 and in June 1940 two Companies of the 1st Battalion with the Battalion Headquarters were made available for service with His Majesty's Forces if and when required. Subsequently in July 1940 under special orders of H H the Maharaja the whole of the 1st Battalion was placed at the disposal of the Crown and steps have been taken to bring up all units of the Holkar State Forces to full strength. The fullest co operation is being offered to the Government of India in a number of matters connected with the war e.g. facilities for recruitment of war personnel for different work including technical

personnel such as Motor Mechanics etc. The 1st Battalion of Maharaja Holkar's Army is already serving with His Majesty's Forces overseas.

Liberal contributions were made towards the War Relief Fund, the Defence Savings movements and the British Red Cross, Indian Red Cross and the St Dunstan's Fund. H H the Maharaja also sanctioned the purchase of Interest Free Defence Bonds of Rs 3 00 000 and all Government servants of the State getting not less than Rs 50 p m offered to pay a day's salary every month towards the purchase of Defence Bonds and Savings Certificates.

His Highness has also sanctioned the purchase of 3 per cent Government of India Defence Bonds for Rs 1 00 000. His Highness the Maharaja gave two donations of Rs 10 000 each from his Privy Purse for the Holkar State Red Cross Society and the Holkar State War Relief Fund and also contributed a sum of Rs 5 000 to the War Fund to be earmarked for the use of the families of Indian Soldiers serving overseas. As a monumental contribution from the people of the city of Indore £5 000 were contributed towards the cost of a Single Fighter to be named the City of Indore earmarked for the defence of India. His Highness has also sanctioned a donation of £3 000 towards the Lord Mayor's Air Distress Fund. His Highness also contributed a sum of Rs 50 000 to the Russian Red Cross and a sum of Rs 50 000 to His Excellency the Viceroy's War Purposes Fund to be earmarked for the Chinese Red Cross Fund. H H the Maharaja has contributed a sum of Rs 100 000 to H E the Viceroy's War Purposes Fund to be earmarked for the defence of India.

In July 1940 H H the Maharaja offered the Air Speed Envoy aeroplane to the British Air Ministry for war purposes and the offer was gratefully accepted by the British Air Ministry.

The scheme regarding conferment of Emergency Commissions was brought to the notice of young men desirous of entering Military service during the war and several candidates and officers have been recommended for the purpose. A number of applications for war service from members of the public as well as from State servants including Sub Assistant Surgeons employed in the State Medical Department have been forwarded to the British Indian Authorities. As a precautionary measure an A.R.P. Committee has also been appointed for the city of Indore. His Highness's Government have also recommended candidates to the Government of India under the Bevan Training Scheme. A Holkar State War Front Council has been constituted with the Minister I/c Police and Civil Defence as its President.

The Ruler has instituted a High Court Bench and separated the Executive from the judicial branch of the Administration. He inaugurated a Peoples Representative Assembly in 1932 and introduced in 1941 diarchy as a further instalment of reforms. Elementary and Secondary education has been free and has made even Collegiate education free by providing for fifty scholarships in the Sir Parashurambhau College Poona so named after his revered father the late Ruler. Medical aid is free. The hereditary title of Raja was conferred on him in June 1935. He is a recipient of the Silver Jubilee and the Coronation medals. He has visited Europe and attended the Coronation of Their Majesties. He is the elected President of the Shikshana Prasarak Mandal, Poona. He was an Hon Aides-de-Camp to two Governors of Bombay for six years from 1927. He was a representative member of the Princes Chamber for Group IV for eleven years and is now a member in his own right.

The Rajasahab contributes Rs 6 000 half yearly to the War Purposes Fund on behalf of himself the Ranasahab and the State and is doing everything to aid the War effort in the State. Such aid amount to Rs 30 000. Contributions to the War Bonds and Defence Certificates amount already to above Rs 40 000. He has also contributed Rs 10 000 for purchasing an Armoured Carrier. Recruitment is being encouraged in various ways and over 320 recruits have been furnished from the State for War Service.

**JATH LT RAJA SHRIMANT
VIJAYASINHRAO RAMRAO
alias BABASAHEB DAFE**
R I N Raja of Jath State

Born on 21st July 1909

Ascended the Gadi on 12th
January 1929

Family History : Jath is one of the ancient Satara States. The Ruling family is a high class Maratha and claims descent from Satvajirao Chavan Patil of Dadapur to whom a Deshmukhi Watan was granted by Ali Adil Shah King of Bijapur in 1670. The Jahagirs of Jath and Karajagi Paraganas were conferred upon him by King Adilshaha of Bijapur in the year 1680.

The Raja Sahab was educated for some time in the Deccan College when he was suddenly called back owing to the serious illness of his father the late lamented Shrimant Ramrao Amritrao alias Abasaheb Dafe. The Ruler exercises full Civil and Criminal powers over his State. During the short period of his rule he has evinced keen interest in the welfare of his subjects by introducing various reforms such as an independent High Court a Local Board etc.

In 1932 he visited England to attend the Third Round Table Conference on the invitation of the Secretary of State for India. He is an all round sportsman and a good cricketer. He takes keen interest in Scouting.

He is a Lieutenant in the Royal Indian Navy and during the year 1940 rendered active war service.

Capital : JATH *Population* 107,036

It is midway between Miraj and Bijapur and is in direct political relation with the Government of India through the Deccan States Agency.

Area : 981 square miles

Revenue : Rs 4,25,000

State Executive Council

2. V B Mardhekar Esqr M.A *Revenue & Finance*
3. D N Pradhan Esqr B.A LL.B *Law & Legislation*

JAWHAR RAJA SHRIMANT YESWANTRAO ALIAS PATANGSHAH VIKRAMSHAH Ruler of Jawhar State is a descendant of the illustrious family of Jayaba Mukne who founded the dynasty. The valour and prowess of the Raja's ancestors won them the proud and princely title of **SHAH** from Mohomad Taghiakh the Emperor of Delhi.

Born 11th December 1917

Education At the Rajkumar College Rajkot and then joined Blundell's Old Public School in England. Received administrative training in England and on return to India in 1937 received practical administrative training under the Collector of Nasik. Recently got training in the Indian Air Force and has become a Pilot Officer.

Married In May 1938 Shrimant Kamala Raje sister of the Rajasaheb of Jath. *Her Apparent* Shrimant Yuvaraj Maharaj Digvijaysinhrao *born* on 5th January 1940.

The State is in direct political relation with the Government of India through the Resident Gujarat States. The Raja was invested with full administrative powers on 16th January 1938. He exercises full Civil and Criminal Jurisdiction and is a Member of the Chamber of Princes in his own right. The State is one of the oldest States in India and pays no tribute either to the British Government or to any other State. The Capital town of Jawhar is 1,500 feet above sea level and the climate is excellent especially in summer.

Sport Shooting Riding Tennis and Motoring *Area* 308 square miles

Average Revenue Rs 5,20,000 *Population* 65,126

Salute 9 guns permanent

khanji Infantry

On the outbreak of the war
H. H. the Nawab Saheb placed

all the resources of the state at the disposal of His Majesty. The state has made liberal contributions both in men and money Rs 2 50 000 have been contributed from the state and Rs 16 000 from the public. An aeroplane was presented to the Government and a cheque for Rs 5 000 has been given to purchase a Spitfire. State servants who have been called for service are given special terms in regard to their service leave pension etc.

A War Committee has been appointed with Sub-Committees to make further collections to the War Gifts Fund, to induce people to subscribe to War Loans for which promises have gone up to Rs 2 00 000 to prevent false rumours and organise Civic Guards. A Ladies Committee formed under the patronage of the Begum Sahibas collected Rs 4 000 and many silver and other articles for Her Excellency's Silver Trinket Fund. A further sum of Rs 1 000 was collected from a Cinema Show for homeless Children in England. Coast watching has also been undertaken by the state at 8 Coastal places where men watch the appearance of enemy vessels. One Guard of infantry is posted at Verawal and landing ground at Junagadh. One section of the Hotchkiss Gun and two sections of Infantry are posted at Verawal for defence at state expense.

All state servants contribute 1% of their pay every month for War Gifts Fund from January 1941. A further sum of Rs 2 lacs has been contributed by the State to the War Fund. Out of this amount two Spitfires to be named *Lady Lankithgow* and *Dilemma* are to be purchased and out of the balance of about Rs. 66 000 half the amount has been allotted to 'Lady Lankithgow Silver Trinket Fund' and half to King George's Fund for sailors in England. A Lucky Bag Lottery in aid of the War Gifts Fund was started in the state. Rs 20 000 were realised from the sale of Tickets out of which Rs 15 000 were allotted to the War Gifts Fund. So far Rs 50 000 are allotted to the War Gifts Fund.

TIKKA RAJA PARAMJIT SINGH Heir Apparent of the State of Kapurthala

Punjab

Born 19th May 1892

Education Elementary education in Kapurthala under highly qualified English and French Tutors. Left for Europe in 1905 for further studies. Joined Cheam School in Surrey and then went to Harrow for a year. Attended Lycée Janson de Sailly in Paris for two years and then again returned to London to resume studies at St. Paul's High School Kensington.

On return to India in 1909 received thorough training in the State in administrative work both Executive and Judicial. Conducted the affairs of the State in the absence of His Highness the Maharaja in Europe in 1915, 1919 and 1922 as Regent with full responsible powers and acted in a most efficient manner. In 1919 during serious troubles in the Punjab gained the praise and appreciation of the Government of India for himself and the State for excellent co-operation of the State in critical time.

Again in 1935 took charge of the State administration for a few months on the retirement of the ex-Chief Minister Dewan Sir Abdul Hamid. Acted as President of the State Council of Administration from April to November 1939 during His Highness's absence in Europe. On His Highness's return from Europe took over charge of the Administration of the State as President of the Executive Council. Has travelled a great deal in Europe, the United States of America, &c. In 1928 accompanied His Highness the Maharajah to Madrid and stayed there with His Majesty King Alfonso XIII as his guest. In 1930 visited His Majesty the King of Belgium with His Highness the Maharaja and attended a dinner party given by His Majesty at the Chateau of Laken near Brussels. In 1936 His Majesty King Carol of Roumania invited him to his summer capital Sinaia where he stayed for a fortnight as the King's guest.

Attended the Coronation in Delhi in 1911. Silver Jubilee of His late Majesty King Emperor George V and Coronation of His Majesty the King Emperor George VI and Queen Elizabeth in 1937.

LIMBDI is one of the Western India States enjoying full powers of internal sovereignty. Maharana Shri Mangaji, second son of Shri Harpal Deo Makwana was the founder of the Limbdi House and established his *Gad*, first at Jambu from where it was later removed to Shiani and finally to Limbdi all of which places are within Limbdi territory. Limbdi is thus one of the original independent houses of the Jhala dynasty.

The State has 51 villages under its full jurisdiction at present. It owns 34 Talukdari villages situated within the British Collectorate of Ahmedabad which constitute what is known as the Khadol Barwala Mahal. The average annual income of the State calculated on the basis of the net income for the last five years is Rs 7 00 000 inclusive of the income of its non jurisdictional villages.

His Highness Maharana Shri Digvijayasinhji expired at the age of 44 on the 6th January 1941 leaving a minor son of only one year of age. A Council of administration consisting of two members has been set up for the conduct of the Administration of the State during the minority of the present Thakore Sahib Shri Chhatrasalji.

Reforms—With a view to secure an increasing measure of association of the people with the administration a wholly elected Shaher Sabha has been instituted in the Town of Limbdi and Village Panchayats also wholly elected have been organised in the jurisdictional villages.

MAYURBHANJ MAHA
RAJA SIR PRATAP CHAN
DRA BHANJ DEO K C
I E Maharaja of Mayurbhanj -

Born February 18 1901

Succeeded on the 23rd April
1928

The Maharaja is a member of
the Chamber of Princes in his
own right

Educated At M a v o
College Ajmer and Muir
Central College Allahabad

Married On the 25th
November 1923 the daughter
of Maharaj kumar Sirdar Singhji
of Shahpura Rajputana

Her apparent T I K A I T
PRADEEP CHANDRA BHANJ DEO

Area of State 4 243 square miles Population 990 977
Revenue Rs 34 00 000 Salute 9 guns

Mayurbhanj ranks first in point of population among the States
of the Eastern States Agency numbering 42 23 of which are known as
Orissa States 16 as Chhatisgarh States and 3 as Bengal States

It lies between North Lat 21° 17 and 22 34 East Long 85 40
and 87 10 and is bounded on the north by Saralkella State and
Singhbhum and Midnapore Districts on the south by the States of
Keonjhar and Nilgiri and the District of Balasore on the east by
Midnapore and Balasore Districts and on the west by Singhbhum
and Keonjhar State The languages spoken in the State are Oriya
Bengalee Santhali and Hindustani

The Capital of the State is Baripada a progressive Municipal
town which provides modern amenities Baripada and the southern
parts of the State are served by the Mayurbhanj Railway which takes
off at Rupsa a junction station on the Calcutta Madras line of the
Bengal Nagpur Railway The northern portion of the State is like
wise served by a broad gauge section of the Bengal Nagpur Railway
which connects with Tatanagar on the Calcutta Bombay line

The Ruling family is the head of the Bhanja Vanshi Kshatriyas of
Orissa and claims to belong to the solar line The emblem of the State
is a peacock and the State crest is a peacock on either side of a shield
which bears the device of a trident a bull a crescent moon and a lotus
in full bloom The geographical and strategic position of the State
constituted it an important buffer State at the time when the East
India Company and the Marhattas were engaged in a struggle for
supremacy in Eastern India and Mayurbhanj supported the British
cause During the Mutiny of 1857 the ruler of Mayurbhanj again
distinguished himself as a loyal ally of the East India Company

The administrative machinery of the State is modelled generally on British Indian lines—Judicial independence being secured for it under a full powered High Court. The State is rich in mineral and forest resources—iron ore mining undertaken by the Tatas forming the principal industry. The State maintains an Industrial School and the Mayurbhanj Tussar Textiles and Cottage Industry products receive appreciation of people both in India and abroad. The systematic Geological and Botanical surveys conducted with a view to improving the potential resources of the State are likely to yield valuable results. There are 3 major irrigation schemes working at present and new projects are being undertaken yearly to provide facilities for water supply both for irrigation and drinking purposes. In order to improve the economic condition of the agriculturists the State has opened an Agriculture Department established granaries and passed several legislative measures besides making liberal annual grants of loans. Free medical relief is being offered by a fully equipped hospital at the Capital with several dispensaries spread over the State. Primary education is also given free. Scholarships are granted liberally and an increased expansion of educational institutions has given a great impetus to the spread of literacy. The State is rich in antiquities. The recent discovery of palaeolithic sites and other archaeological finds testify to its ancient civilization and culture. The State maintains an Aviation Department and a well equipped aerodrome near Baripada the capital town.

With a view to bringing the people of the State into closer touch with the administration the Maharaja has inaugurated 5 Praja Sabhas. These representative assemblies consist of a majority of members elected on the basis of adult franchise and they represent all shades of local opinion in matters concerning the welfare of the people in general. Among other important steps taken during the reign of the present ruler for the amelioration of the conditions of his subjects may be mentioned (i) the opening of the Mayurbhanj State Bank (ii) Installation of electricity and waterworks at the Capital (iii) the introduction of telephonic communication all over the State and (iv) the construction and remodelling of administrative buildings.

By his singleness of purpose and devotion to duty the Maharaja has inspired the entire population of the State where the war drive is daily gaining in momentum and Mayurbhanj is proud of an unbroken history of service to His Majesty the King Emperor and the Empire. Besides placing his personal services and resources of the State at the disposal of His Majesty the Maharaja has contributed his own five seater bi plane D H 90 Dragonfly to the Viceroy's War Purposes Fund and the State has so far given over Rs 6½ lakhs to the various war funds and war loans. The State has supplied and has undertaken to supply large quantities of timber for war purposes. The Mayurbhanj Central War Efforts Committee and its branches are also doing useful work in this direction. An A R P organisation with Major B P Pande the Dewan as Civil Defence Commissioner has been set up and it covers all aspects of the A R P work. With a view to preserve internal security and tranquillity the State has introduced almost all important measures connected with the Defence of Mayurbhanj Order and Rules. The Maharaja has also directed the issue of a war supplement to the fortnightly State Gazette for dissemination of authentic war news.

MALPUR RAOLJI SHRI GAMBHIRSINGHI the present Ruler of Malpur Born 27th October 1914 Educated at the Scott College Sadra and the Mayo College Ajmer Succeeded to the Gadi in 1923 was invested with full powers pertaining to the State on the 16th February 1935

Married in 1934 the eldest daughter of the Rajaji Saheb of Khandela, an old illustrious Shekhavat dynasty in the Jaipur State He has also married the daughter of Maharaj Saheb of Khandu in 1937 and the Kumari of Shriman Maharaj Saheb of Bhadarwa State in 1942

Though young in age he possesses remarkable intelligence and great insight into State affairs He enjoys the sincere affection and esteem of his subjects In consequence of the poverty of the cultivators remissions of large amounts are granted to them every year The occupancy rights to the agriculturists in the State are granted by him as announced on the occasion of his investiture with full powers His relation with his subjects is very cordial There is a great future before the present Ruler who has proved his devotion and loyalty to the Crown and maintains with dignity the great tradition of the illustrious House of Rathod Rajputs During the mutiny of 1857 A.D. the State rendered great help in suppressing disorder and preserving peace in the adjoining country During the great war too it rendered all possible help to the British Government

The State has made rapid progress in all directions including education and medical relief The State of Malpur is well known in Nam Marwar It is situated to the South East of the old Mahi Kantha Agency Its Political relation is with the Government of India through the Honble the Resident in the States of Western India Rajkot and conducted through the Political Agent Sabar Kantha Agency The State ranks first in order of precedence amongst the States and Talukas of the old Mahi Kantha Agency enjoying jurisdiction

The Rulers of Malpur are Rathod Rajputs and belong to the Solar Race of which Shri Rama the hero of the great epic Ramayana was the most illustrious representative They are descendants of Jaychand the last Rathod Ruler of Kanauji (1193 A.D.)

The nearest Railway Station to the State is Talod on the Ahmedabad Prantij Railway at a distance of 35 miles from Malpur via Dhansura and 46 miles via Modasa from where there are regular motor services

Educated —At Daly College Indore and received administrative training at Bangalore

Married —In May 1932 a daughter of H. H. the Maharana Sahib of Dharampur State. He married again on June 10th 1941 daughter of Thakur Shri V. I.endra Bahadur Singh of Bandhu in Sohawal State. C. I. Has four sons and two daughters

Area of State 501.4 Sq Miles
Population 87,911 *Annual Revenue* Nearly 3 lacs *Dynastic Salute* 9 guns *Capital*
Recreation Tennis

Nagod (16 miles from Satna G. I. P. Ry) *Hockey Cricket and Shooting*

Geologically Nagod presents several features of interest. Limestone of a superior quality known commercially as Nagod Limestone is found close to the chief town and is the most valuable source of lime yet known in India. There are very good prospects for industries like the manufacture of sugar, oil, alcohol, soap and the like.

Administration A Legislative Assembly of 25 Members, 15 elected by the public and 10 nominated has been established. Elementary and secondary education has all along been given free in the State. Liberal scholarships are also granted for higher education. The State maintains an Anglo Vernacular Middle School. The State gives free Medical aid to all. Subjects of neighbouring States also benefit thereby.

War Efforts On the outbreak of the War in 1939 the Ruler immediately placed all the resources of the State at the disposal of the Crown and has donated Rs. 8,000 to the War Purposes Funds and subscribed interest free Defence Bonds for Rs. 10,000. Rs. 3,000 are subscribed towards the Indian Red Cross, St. Dunstan's Hostel and Silver Trunk Funds by the public as well as officials. The subject and officers of the State have also substantially subscribed the Defence Loan.

SINGH MANDHATA the
present Ruler of Nayagarh
State E S Agency

Born 1911 *Succeeded*
December 1918 Invested with
Ruling powers on the 20th July
1933

Married January 1930
A son and heir was born on the
4th September 1933 For the 2nd
time married in February 1941

The founder of the State was
a heroic noble named Surjya
mani Singh from Rewa. The
present Ruler of the State is
26th in descent from the founder

The Raja Saheb has intro-
duced many reforms in the
administration of the State

Forced labour which was prevalent in the State from time immemorial
was totally abolished and tenants were given fuller and better
rights of disposition in their landed properties

Primary education is free and compulsory. The State spends
about 10 per cent of its total income on education and illiteracy among
the public is fast disappearing. A High English School has been
opened with a competent staff. There are well equipped charitable
dispensaries under qualified doctors. Keen interest is taken in leprosy
relief work. A considerable amount is being spent to improve the
irrigation facilities in the State and to solve the drinking water problem
by excavating tanks and wells. A Cottage Industry Institute has
been opened in order to improve the economic condition of the people
and to educate them in various kinds of industry. With a view to
provide food and shelter to the orphans of the State an orphanage
has been opened and kept under the supervision of a matron and one
experienced teacher. An Agricultural Department has been opened
to teach the people to improve agricultural resources of the State and a
Dairy Farm has been started to improve the live-stock of the State.
With a view to regularise the measurement in the State and to supply
periodical information to the people about market rates and conditions
a Marketing Board has been formed. A spacious free Central Library
has been started for the public. An Advisory Committee has been
created with elected members to associate popular elements in the
administration of the State.

Law and justice is being administered by competent Courts on
the lines of British India. A Bar Library has been opened to afford
ready legal assistance to the people. The Ruler is immensely popular
among his subjects and he has won their affectionate love and regard
by sincere and earnest devotion to his duty and interest in the welfare
of his people.

HIGHNESS MAHARAWAT
SIR RAM SINGHJI BAHADUR
KCSI of Partabgarh

Born In 1908

Succeeded to the Gads In
1929

Dynastic Salute 12 Guns

Partabgarh State also called
Kanthal was founded in the
16th century by a descendant
of Rana Mokul of Mewar

The town of Partabgarh was
founded in 1698 A D by
Maharawat Partabsingh the
ancient Capital being at Deolia
among the Hills In the time
of Maharawat Sawant Singh
(1775 1844) Kanthal was
invaded by the Marathas but
the Maharawat arranged to
buy off the Holkar by agreeing

to pay Rs 72 700 *Salam Shahi* which were being coined in Partabgarh and were accepted as legal tender throughout the surrounding territories in place of Rs 15 000 formerly paid to Delhi The first connection of the State with the British Government was formed in 1804 The earlier Treaty having been cancelled by Lord Cornwallis a fresh Treaty was entered into in 1818 Holkar by the Treaty of Mandsoor ceded to the British Government all claims of tribute and revenue of every description which he had or might have had upon the Rajput Princes according to which Partabgarh paid the stipulated Rs 72 700 *Salam Shahi* (converted later to Rs 36 350 British Coin) to the British Government As the said amount of Cash Contribution was found to be excessive it has been reduced to Rs 27 500 from the year 1937 38

Partabgarh enjoys the high Izzat of being one of the Treaty States in India and possesses plenary jurisdiction The highest administrative and executive office is termed Mahakma Khas presided over by the Ruler and the Dewan of the State There is a duly graded judiciary under a separate High Court Judge who is unconnected with the Executive Annual average revenue Rs 5 82 000 Population 91 967

PATDI DARBAR SHRI PRATAPSIHJI NARAN SINGHI SAHEB Ruler of Patdi State

Born 2nd June 1895
Succeeded to the Gadi on 17th December 1941 on the death of his father the late lamented Darbar Shri Naransinhji Saheb. On the auspicious occasion of his installation he donated Rs 10 000 for the use of the Surajmalji High School Rs 1 000 to the Patdi Kadva Patidar Education Society and also declared to carry out his father's promise to found a Maternity Home at Patdi where it is greatly needed. Rs 2 500 were donated for giving clothes and gram to the poor.

He takes keen interest in Agriculture Horticulture Cattle breeding and Irrigation. The experimental farm put up by him in Patdi and distribution of improved seeds to cultivators of the State are some of the acts showing his intense desire to improve cultivation. To increase water supply for irrigation purposes he is thinking of Artesian wells and digging or deepening tanks wherever possible to provide an unstinting supply of monsoon. His fine selection of animals will be evident from the fact that out of 14 animals sent at the recent Bhavnagar Cattle Show 13 won prizes and certificates. All these are his favourite subjects.

He has four sons (1) Yuvrajshri Kishansinhji (2) K. S. Dulipsinhji (3) K. S. Rajendrasinhji (4) K. S. Laxmansinhji and two brothers K. S. Ranjitsinhji and K. S. Bhanusinhji.

Patdi the capital of this State has one Anglo-Vernacular School two Vernacular Schools (Gujarati and Urdu) and two Girls Schools. In the villages 7 Vernacular Schools are maintained by the Local Board and 8 by the State. There are no taxes or Veth (forced labour) in the State. The State supplies electric street lighting medicine and bore pipe water free of charge. The State encourages education by scholarships grant of school fees and books to poor students. In times of scarcity the State made liberal advances of Taccavi and free distribution of grains clothes etc. and also opened relief works.

Most of the famous Kharaghoda Salt Works which were formerly known as the Patdi Mitha Agar (Salt Works) belong to this State but they are at present held by the Government of India on lease.

The State enjoys jurisdiction as under—Criminal—3 years rigorous imprisonment and fine upto Rs 5 000. Civil upto Rs 10 000. Area—165 sq miles. Population—17 225. Revenue—Rs 1 73 075.

UMRA MAHARAJADHIRAJ RAJ
RAJESHWAR SHRI MAHARAJA I-
RAJGAN SHRI SIR YADAVINDRA
SINGHJI G B C YADU VANSHA
VATANS BHATTI KUL BHUSHAN
the present Ruler of Patiala
which is the largest of the
Phulkian States and the Premier
State in the Punjab

Born 7th January 1913

Succeeded 23rd March
1938

His Highness is an all round sportsman—a first class shot a great angler a crack tennis player and a superb cricketer. He was awarded the All India Colours in 1933 when he played against the Australian Cricket Team at Bombay.

Since his accession to the Gadi His Highness has introduced many reforms calculated to improve the material well being of his people. Extension of medical facilities through the opening of touring dispensaries abolition of Gamu Preserves remission of arrears in land revenue passing of Small Towns Act addition of a Maternity Ward costing Rs 75 000 to the Rajindra Hospital building of an Olympic Stadium at Patiala and the establishment of Cement Works these are some of the important measures recently introduced. Early in March 1942 Her Excellency laid the foundation stone of the Lady Lintthgow Tuberculosis Hospital which will have accommodation for 70 beds and 15 model cottages with a recurring expenditure of Rs 26 000. The estimated cost of the building will be Rupees five lacs.

The State is rich in antiquities especially at Pinjour Sirhind Bhatinda Narnaul etc. It possesses valuable forests. One hundred and thirty-eight miles of broad gauge Railway line have been constructed by the State at its own cost.

The State maintains three colleges including one for girls and ten High Schools. Primary education is free throughout the State.

His Highness maintains a Contingent of two Regiments of Cavalry and four battalions of Infantry also one Battery of Horse Artillery Since the State entered into an alliance with the British Government it has rendered military and financial help on all critical occasions Its proud record of service during the last Great War is unsurpassed and in the present war also His Highness is doing his best to maintain the glorious traditions of loyalty to the Crown and duty to the country for which the State is so well known The 1st Rajindra Sikhs the 2nd Yadavindra Infantry the 1st Rajindra Lancers and the 56 M T Company have proceeded on active service Only recently a Labour Corps of 636 men was raised and sent for active service The State has also provided 12 000 recruits for the Indian Army and it is a matter of gratification that over 30 000 soldiers from the Patiala State are serving in the various branches of the Indian Army His Highness personally paid a visit to Singapore a couple of months before the Japanese made their treacherous attack on the Allies

In matters of monetary contributions the State stands second to none His Highness initiated the subscription list by a personal donation of Rs 2 lacs to the Viceroy's War Purposes Fund Rs 5 000 to St Dunstan's Fund for the Blind £ 1 000 for the relief of Air Raid Victims Rs 1 000 to King George Fund for Sailors Rs 1 000 to the Aeroplane Fund started by the Simla District War Committee and Rs 5 000 to the Greek Relief Fund His Highness has also remitted to His Excellency the Viceroy a sum of Rs 7 lacs as a voluntary contribution from the subjects of the State to the Viceroy's War Purposes Fund The State servants and landlords have also invested about Rs 7 lacs in the Interest Free War Loans

As the leader of the Sikhs His Highness issued a special appeal to his community to render all possible help in securing an early victory to British arms To give an impetus to recruitment amongst Sikhs His Highness donated Rs 51 000 with a monthly contribution of Rs 1 000 to the Khalsa Defence of India League formed under the patronage of His Highness The League is doing useful work in the sphere of recruitment and has been instrumental in providing 14 000 recruits for the Indian Army

A son and heir to His Highness was born on 11th March 1942

Area of the State 5 932 square miles

Population 1 625 500

Gross Annual Income Rs 1 67 00 000

Salute 17 guns

Permanent local Salute 19 guns

PATNA MAHARAJA
RAJENDRA NARAYAN
SINGH DEO the present
 Ruler of Patna State

Born 1912

Ascended the Gadi 1933

Educated At Mayo College Ajmer where he passed the Chiefs College Diploma Examination at the head of successful candidates and at St Columba's College Hazaribagh where he passed the Intermediate Arts Examination of the Patna University topping the list of successful candidates of that institution

Married In 1932 the daughter of His late Highness the Maharajadhiraj of Patiala

History Maharaja Rama

Deo a direct descendant of Prithwi Raj Chauhan the last Hindu Emperor of India founded the State of Patna about 1159 A.D. The Maharajas of Patna have enjoyed the hereditary title of Maharaja from the very beginning. Patna State is identical with the ancient

Dakshina Kosala, which was the kingdom of Kusha the second son of Rama. Its various architectural ruins bear testimony to the ancient culture and civilization which flourished there in the olden times. The State was taken under British protection in 1803 and it has remained ever since extremely loyal and is well known for its uniform devotion to the British Government. Patna is a well governed and progressive State and all its valuable resources are spent on works of public utility. It possesses very good educational and industrial institutions. Subject to certain exemptions primary education is compulsory for all boys and girls between the ages of 6 and 11. It has a fully equipped Hospital and a X-ray and Electrotherapy Institute at the Capital with several outlying Dispensaries and two Child Welfare Centres. There are telephone and telegraph connections in the important places of the State. It has beautiful valleys having enchanting scenery and an abundance of Shikar of all kinds of birds and beasts particularly tigers. The Maharaja is a member of the Chamber of Princes in his own right and takes keen interest in the administration. He is also a Patron of the All India Cattle Show Society.

Raje Chorpade born on 13th September 1940

Sandur is an Indian State in South India ruled by the Mahratta Dynasty of the Gootyker Ghorpades. The Ruling House of Sandur belongs to the family of the Ghorpades which is identical with that of the Bhonsles of Satara and according to the family tradition their ancestors acquired the surname of Ghorpade during the Bhamini dynasty for having scaled an impregnable fort in the Konkan with the aid of an iguana known in Marathi as Ghorpad. The honorific title of Ghorpade was acquired by Bheemasinha the grandson of Rana Ugrasen who was the common ancestor of Chatrapathi Shivaji Maharaj the founder of the Maratha Empire and of the Mudhol and Sandur branches both of which were descended from Bheemasinha Subhakrishna the founder of the branch of Chatrapathi Shivaji Maharaj and Karnasinh the father of Bheemasinha Ghorpade were both descended from Ugrasen. Bhonsle Ghorpade Hindurao's family of which the Ruler of Sandur is a descendant is the elder branch of the family. This family greatly distinguished itself under Shivaji Maharaj his son and his grandson and for the useful services rendered to the House of Satara the Jaghir of Gajendragad with the title of Hindurao was conferred on them. Siddoji the son of Bhyrji Hindurao was the founder of Sandur having conquered the same in 1728 from a Poligar of the Bedar tribe. This family holds the estate of Gajendragad and Sandur in its possession long anterior to Maratha Sovereignty. Raja Siddojirao Ghorpade conquered Sandur and Kudatini in the early 18th century. He was also receiving tribute from the Poligar of Harapanahalli. Sandur State formed a part of the possessions of Siddojirao's son Murar Rao renowned in history as the famous Chief

of Gooty. During the time of Raja Murar Rao Ghorpade Sandur reached the zenith of its territorial expansion and was a Power to be reckoned with among the various belligerents for political supremacy in South India. Speaking of the extent of the territory and sway held by Raja Murar Rao Ghorpade Rao Saheb C. S. Sardesai the famous Historian of the Mahrattas has observed thus. Stray notices of the Ghorpades in Kanatak are discovered in old papers here and there and refer to such places as Sondha, Bednur, Savanur, Shira, Shirangapatnam, Chittaldurg, Gutti, Sondur, Guntakal, Kadappa, Trichinopoly and as far as Chennapatna (Madras) and Pondicherry on the east coast. The career of Murar Rao appears to claim all this region as his legitimate heritage acquired by the heroism and often by the blood of the several members of the large Ghorpade family. It was the great Shivaji who first traversed this large territory and after him it was the valour of the Ghorpades that prevented in it the extinction of the Marathi Power. Sir Philip (ibbs) writing as recently as June 1938 has described the signal assistance rendered by Murar Rao to Lord Clive at the siege of Arcot thus. It happened that on the flanks of Raja Saheb's Army a tribe of wild Mahratti Horsemen under a Chief named Murar Rao was watching the progress of the siege with increasing admiration. Clive sent out messengers to him and his joy may be imagined when the Indian chieftain expressed his willingness to unsheath his sword in aid of so gallant a captain. All that night Clive and his men awaited a renewal of the assault but when morning came the enemy were no more to be seen and the glittering array of the Mahratta tribesmen moved through the mist of dawn to do honour to the man who was to be famous henceforth as Sabat Jung. Orme a contemporary British Historian described the Sandur troops to be the best soldiers of native Indians at this time in Indostan. In the Myoro Treaty V of 1783 the British have observed thus. The Company will reserve to themselves the liberty of reinstating the Family of Murar Rao in the Country of Gooty a promise which yet remains to be fulfilled. The Ruler of Sandur for the first time came into political relations with the British in 1817 and Munro described the Ruler of Sandur to be as much a Sovereign in his own valley as any Prince in India. The State has the status of a Treaty State by virtue of the Treaty of 1847 with the East India Company regarding Ramgad cantonment jurisdiction. The Ruler of Sandur is one of the 146 important Ruling Chiefs who received the Sanads of Adoption in 1862. The State possesses powers of life and death and is unfettered in the exercise of its sovereignty. The State pays no tribute to the Crown and is free from all pecuniary demands.

The State has rich mineral wealth particularly manganese iron and gold.

The Ruler is the fountain head of all authority Judicial Executive and Legislative. The Government of the State is conducted in the name of the Huzur through an Executive Council. A State Council has been constituted in 1931 with a predominant non official majority. It has the right to initiate legislation to move Resolutions and to ask questions. An independent Chief Court has been constituted under the Sandur Chief Court Act II of 1932 and arrangements have been

made with the Madras Government to lend the services of the District and Sessions Judge Bellary for appointment as the Nyayadish of the Sandur Chief Court. The Sandur Chief Court can state cases to the Federal Court. A further step in constitutional advance has been taken by the Ruler in reviving the ancient body known as the Darbar which is as old as the State itself and which is now charged with the governance of the State as a second Chamber. By a Proclamation issued in 1933 the Ruler has thrown open all temples, religious institutions, wells, schools and all Government institutions to the Harijans. Village Panchayats have been constituted in every village throughout the State on which devolves a large measure of local administration. With a view to enable the representatives of the people to maintain close touch with and influence the every day administration of the State a Standing Committee has been constituted from among the members of the Darbar and the Prajamandal—State Legislatures—with a view to help the administration in an advisory capacity. The Police and State Forces have been re-organised in 1939.

War Efforts—The Ruler has invested a sum of Rs. 50,000 in interest free War Bonds and has placed at the disposal of His Majesty for the duration of the war large areas in the State containing manganese and iron ore deposits free of all rents and royalties for being utilised in the manufacture of munitions. He has also issued an appeal to the Marathas to join the army in large numbers. He has also placed certain buildings at Ramgad (Ramandrug) at the disposal of His Majesty for the purpose of Prisoners' camp or other war purposes. A Trinket Fund started by Shrinant Sow Matoshri Ramsaheb Maharaj has received a very generous response from the Mahila Samaj and the ladies in the State. A State War Board with three sub-committees has been constituted to aid the successful prosecution of the war.

The Ruler presided over the Karnatak Sammelan in 1938. He presided over the Inter Group Sports & Tournaments of the University of Bombay in December 1940. He unveiled the statue of Tanaji Malusre at Sinhgad in February 1941. The Ruler presided over the All India Maratha Educational Conference in April 1941. He is a Representative Member of the Chamber of Princes and is on the War Efforts Committee constituted by His Excellency the Governor of Bombay.

Educated At home and later at the Rajkumar College Rajkot.

Sachin is the Senior Habshi State in India. The Rulers of Sachin are Sunni Mohammedans and are the lineal descendants of Nawab Bahadur Sidi Abdul Karim Mohammed Yakut Khan I. Over a family dispute for the Throne of Janjira Sidi Abdul Karim Mohammed Yakut Khan I left Janjira and joined forces with the Peshwa. In 1791 a triple treaty was concluded between Sidi Abdul Karim Mohammed Yakut Khan I the Peshwa and the East India Company on the basis of an offensive and a defensive alliance. By this Triple Alliance Sidi Abdul Karim Mohammed Yakut Khan I took the State of Sachin. The Ruler of Sachin is a Member of the Narendra Mandal (Chamber of Princes) in his own right and is internally fully Sovereign. The State pays no tribute either to the British Government or to any other State.

Sachin The Capital of the State and a pretty town on the B. B. & C. I. Railway.

Dumas The Summer Capital of the Ruler is a delightful sea resort ten miles by motor road from Surat. It is the only summer resort of its kind on the Western coast connected with Grand Trunk Telephone and other modern conveniences. *Amusements in Dumas* : Sea bathing promenade tennis cricket motoring etc.

EXECUTIVE COUNCIL

Rao Bahadur Y A Thombare B A Diwan and Vice-President Rao Bahadur M H Limaye Second Councillor and High Court Judge and B S Kore Esq B A LL B Minister in charge of Transferred Departments.

SANT MAHARAJA SHRI JORAWARSINGHI, the present Ruler of Sant State. Born on 24th March 1881. Installed on the Gadi in 1896. Formally invested with full powers on 10th May 1902.

Educated at the Rajkumar College Rajkot and was associated with the administration of the State for more than a year preparatory to his being invested with full powers.

He is an intelligent Prince who keenly supervises the administration of the State. During his regime many improvements have been made and the State is making good progress. The revenue of the State increased—its lands have been surveyed and regular settlement introduced—Provision for English education made for the first time and Primary and Secondary education made free throughout the State—Election system sanctioned for Municipality—Free medical relief extended by opening new dispensaries in the district. Many other improvements have been introduced during his regime such as founding of a permanent

Famine Relief Fund and granting of liberal tagavi loans to the agriculturists during the time of scarcity. Money is also advanced to local merchants by way of encouragement at a low rate of interest. Other improvements of utility such as installation of electricity in the towns of Sant and Rampur, clock tower, public gardens, installed roads in parts have also been made. The regime of Maharaja Shri Jorawarsinghji has been anything but a bed of roses. Famine and lean years had made the financial condition of the State far from satisfactory but wise management has been instrumental to keeping its head up.

The Rajaji Sahib exercises full powers and enjoys a dynastic salute of 9 guns. Primogeniture is the rule of succession to the Gadi and the Durbar's right of adoption has been recognised and confirmed by Government.

During the Great War the services of the Rajaji Sahib were appreciated by Government. The Government were also pleased to recognise the right of the Rajaji Sahib to be a member of the Chamber of Princes.

On the outbreak of the present War the Rajaji Sahib sent a message of unswerving loyalty to the Crown and the Government. He has also contributed generously towards various War Funds totalling in all upto 31st Dec. 1917 to Rs. 65,816. A sum of Rs. 1,00,000 was invested in 3% Defence Loan 1919-20. A State War Committee for collection of War Funds and propaganda work has also been formed.

The Ruling Family in the Sant State belongs to the Puar or Parmar caste of Rajputs and is believed to have descended from the celebrated family of Vikramaditya and Raja Bhoj of Ujjain. They first came from Dhar and settled at Jhalod and finally about the 15th Century at Sant. The founder of the family was Rana Sant who with his uncle Landev was forced to leave Jhalod and established himself at Sant.

With effect from the 1st April 1933, all the Bombay States were brought into Political relation with the Government of India through the Agent to the Governor General for the Gujarat States and Resident at Baroda with headquarters at Baroda. Since then the Sant State has been in direct political relation with the Government of India.

The supervision and management of the Vaccination Department of the State has been transferred to the State from 1st December 1932 by Government and the Chief Medical Officer of the State has been appointed as the head of the department.

Unrestricted control and management of the State schools was transferred to the State by Government from 1st May 1933.

Area of the State 804 Square Miles. Population 94,257 as per census of 1941. Revenue Rs. 4,45,420.

square miles Annual revenue
10 00 000

Population
156 074 (Census 1941)

Salute 11 Guns

In recognition of his exceptional administrative abilities the present Ruler was installed to the *gadri* in November 1933 when he was only 21 years old. He has introduced remarkable constitutional and administrative changes within the short period of seven years since he took the reins of Government. He has set up a council of

Ministers who not only advise him on all important matters of administration but are also responsible for the successful running of the departments under each. He has completely separated the judiciary from the executive by creating a separate High Court with a bench of two judges. He has introduced all possible benevolent activities in the State under his personal supervision. He is easily accessible and is in constant contact even with the poorest of his subjects. Minute details of every branch of administration interest him very much. He works hard in the interest of his people and is fully keeping up the traditions of his illustrious ancestors who have ever been recognised as rulers running a model administration. He is a young man of versatile genius and has been taking keen interest in all the federal and administrative discussions affecting the States carried on in regional groups and in the Chamber. He has since last year been elected as a member of the Standing Committee of the Chamber of Princes.

The Rural Uplift Committee which was appointed by him in the year 1937 to make an economic survey of the State and go into the extent of rural indebtedness has submitted its report. In pursuance of its recommendations a permanent Rural Development Board has been formed. The activities of this Board cover Co-operative movement, Co-operative Banking, Marketing, Education, Medical help, Communication and Industries. The Co-operative movement has received a great impetus from the activities of this Board and is rapidly extending to all the villages. The question of Rural Indebtedness which is only ten times the land revenue in this State as compared to the average of nineteen times in the rest of India has been taken up seriously by this Board. This question difficult as it is has been tackled by an enactment, the Sirmur Relief of Indebtedness Act on the one hand and by the Nahan National Bank on the other. A Central Agricultural

Demonstration Farm has been established in a suitable locality and various cottage industries too are to be introduced shortly. Much useful and instructive work is done by the Chief Medical Officer and his subordinates among the rural people by means of lectures and slides on maternity and child welfare and village hygiene and sanitation.

Many restrictions on the shooting of wild animals have been removed. Every cultivator has been allowed free grazing for a certain number of cattle. Several important concessions and forest rights have been given to the agriculturists. The question of consolidation of holdings and fixity of tenures is being seriously considered by the Development Board. Several primary schools for boys have been opened in villages where free primary education is imparted. A Scheme for Free Primary education of a type best suited to the needs of agriculturists is being worked out. The Mandalsa Kanya Mahavidyalaya which was started about three years ago is now a full fledged Girls High School.

Communications are being developed very rapidly. The construction of a main road connecting Nahan with the Tehsil headquarters of Renka a distance of about 25 miles is already under construction. Feeder roads are being developed by the District Board and village roads are being constructed by co-operative methods in the villages where Co-operative Societies exist. In addition to the existing, Allopathic Hospitals and dispensaries which exist at Nahan and at the Tehsil headquarters and the St. John Ambulance touring doctor qualified Vaidas have been appointed to administer indigenous medical aid to the agriculturists.

The Maharaja an all round sportsman takes great interest in the training and progress of the Sirmur Sappers and Miners. The Force served in Afghanistan and offered aid in Egypt. They served in Mesopotamia also but were unfortunately shut up with General Townshend's forces in Kut and only a small portion of the corps which was employed at the base at Basra escaped capture. On the outbreak of the War His Highness hastened to place his personal services and the resources of the State at the disposal of the Government. He has also contributed Rs 50,000 to begin with towards the Viceroy's War Purposes Fund and Rs 2,000 towards St. Dunstan Fund and has placed the Sirmur House at Simla at the disposal of the Government War Committee to collect subscription for the different War Purposes Funds to provide recruits for the Army to co-ordinate the War efforts of the Sirmur public and the different Departments of the State and to disseminate correct war news amongst the public to protect them from the false propaganda of the enemy have been established throughout the State. The Field Co. Unit (Sirmur State Sappers & Miners) with an efficient and fully trained personnel under the command of an excellent and veteran Officer Major C. A. G. Rundell M.C. left for British India on active service on the 23rd of November 1940.

SIR DILKEEP SINGH JI BABA
DUR KCIE Raja of Sailana

Born On 18th March 1891

Educated At the Mayo
College Ajmer *Ascended the*
Gods On the 4th July 1919

Married The daughter of
H. H. the Maharawatji Sahib
of Partapgarh in 1909 and after her
demise the daughter of the
Rawatji Sahib of Meja

Her Apparent Maharaj Kumar
Digvijaya Singh Ji M. A. born on
the 15th October 1918

His Highness is a descendant
of the Rathor Rajput clan of the
Jodhpur House and is the eleventh
Ruler of Sailana a mediatized in-
dependent State in Central India.
The Judicial Powers of His High-
ness are plenary. The Rajputs of
the surrounding non Rajput States

consider His Highness as their head. The Rajputs of India in general
consider His Highness as one of the foremost leaders and a distinguished
member of the community. His Highness has held various offices in
the All India Kshatriya Mahasabha ever since he joined it in 1919 till
1933 when he ceased to take an active part for reasons of health.
He is still a member and his advice and guidance are always eagerly
sought. The Head Office of the Mahasabha remained at Sailana for 10
years between 1919-1933 when His Highness held the office of the
General Secretary. His Highness is a patron of the Mahasabha and
has presided over its annual sessions 6 times. is President of Kurnkshetra
Restoration Society Thaneshwar and Council of Bharat Dharma Maha-
mandal Benares. Member General Council of the Mayo College Ajmer
Daly College Indore and Princes Chamber Delhi.

During His Highness's reign the local Vernacular School was
raised to a High School and a new School building and a Boarding House
were constructed. Education is compulsory and almost free and medical
aid is free throughout the State. A new Hospital has been built
with facilities for in-door patients and an up-to-date Maternity Ward.
He has granted a democratic constitution to the local Municipality
and established an Industrial free Mandi at Dilkeepnagar and an
Agricultural Farm in the Capital. The judiciary has been separated
from the Executive and a High Court has been established.

At the outbreak of the present War in 1939 the Darbar placed
its entire resources at the disposal of His Majesty the King Emperor.
So far the State has contributed Rs. 20,103.40 to the Viceroy's General
Purposes Fund, Rs. 25,801 in Defence Bonds and Certificates and
Rs. 3,945 in other Miscellaneous Funds.

TALCHER Raja K C B
Harichandan the present
Ruler of Talcher State

Born 9th June 1880

Succeeded on 18th Dec 1891

Assumed ruling powers 9th
June 1901

The State of Talcher was established at the end of the 12th Century by Raja Narauhari Singh Deo a scion of the Raja Thakur family of Jaipur. The Rajas of Talcher never submitted to the sovereignty of Puri or the Maharathas and they all along maintained their independence. The British Government recognised their independence and entered into treaty relations with the great grandfather of the present Ruler in 1803. Raja Dayanidhi Birabar Harichandan

helped the British Government with his troops in quelling the Angul rebellion. The present ruler placed himself and the resources of the State at the disposal of the British Government during the Great War. He also helped in quelling the Daspalla and Keonjhar rebellions.

The administration is conducted under the personal supervision of the Raja Sahib. He is easily accessible to all his subjects and gives a patient hearing to those who seek redress from him. He takes keen interest in improving the administration and conducting it on modern lines. Besides many administrative and constitutional reforms the Raja Sahib also introduced three Brabastha Parishadas in the State during the year 1939 with 50% elected members.

The State maintains an independent judiciary. There is a Municipality at the headquarters of the State which is controlled by a Committee of Officials and non officials. Roads are lighted by electricity. Education is compulsory in the State. There are 75 primary Schools, one H. E. School and one Sanskrit Vidyalaya. There are 12 dispensaries including one travelling dispensary and one Ayurvedic Dispensary.

The State is noted for its coal mines which cover 224 square miles of which 8 square miles are now being worked by Railways and a Bengal English Firm. There is a match factory in the State. Area 399 square miles. Population 86,368 souls according to 1941 census.

Annual Income Rs 6,96,219 (gross)

Hereditary Yuvaraj Sree Hruday Chandra Deb born on 27th February 1902. Educated in Ravenshaw College Cuttack at present in charge of the Judiciary in the State.

Patilayet Promode Chandra Deb second son of the Ruler and Revenue Minister. State Magistrate and Chief Executive Officer.

HIGHNESS SRI PADMANA
BHA DASA VANCHI PALA
SIR BALA RAMA VARMA KULA
SEKHARA KIRITAPATI MANNEY
SULTAN MAHARAJA RAJA RAMA
RAJA BAHADUR SHAMSHER JANG
GCIE D Litt Maharaja of
Travancore

Born 7th November 1912

Ascended the Musnad on 1st
September 1924 Invested
with Ruling Powers on 6th
November 1931

Educated Privately Has
travelled extensively in India
Europe Ceylon and the Dutch
East Indies The Andhra
University has conferred the
honorary degree of D Litt on
His Highness the Maharaja and

Her Highness the Maharam mother of His Highness the Maharaja
The Benares University has conferred the honorary degree of D Litt
on her Highness the Maharam

His Highness is Colonel in Chief of the Travancore State Forces
and Honorary Colonel of the 12th Malabar Battalion He is the
founder and Chancellor of the Travancore University

Although the Ruler of Travancore is legally the source of all
authority judicial administrative and legislative yet for more than
half a century the Maharajas have acted as constitutional monarchs
without however failing to maintain effective personal contact with
the administration of the State His Highness the present Maharaja
has not only sedulously adhered to these great traditions of his House
but has readily responded to all the legitimate aspirations of his subjects
There is a Legislature consisting of an Upper and a Lower House with
a majority of elected members and possessing large legislative and
financial powers and powers of interpellation

In November 1936 His Highness promulgated the epoch making
Proclamation throwing open all the temples under his control and
that of his Government to all classes of Hindus including those hitherto
regarded as untouchables a reform which evoked universal satisfaction
and thankfulness all over the world By another Proclamation in
November 1937 a University designed specially to promote technologi-
cal studies and research has been established

Among the notable legislative measures recently introduced are
the Debt Relief Act which is designed to alleviate the burden of
indebtedness and is wider in scope and application than similar enact-
ments elsewhere and the Trivandrum City Municipal Act which makes
provision for the better management of the municipal affairs of the
city through a Corporation

The Government of His Highness have taken in hand the first
instalment of a scheme of nationalising the transport system of the

State and have established The Travancore Credit Bank for granting long term loans to the agriculturists and small industrialists of the State To reduce unemployment and to exploit the immense natural resources of the State the Government have embarked upon a programme of industrialisation

Among the first fruits of this policy may be mentioned the Pallivasal Hydro Electric Scheme the Ceramic Factory at Kundara and the Travancore Sugars and Chemicals Ltd The last mentioned is a company incorporated in Travancore and is manufacturing besides sugar 260 varieties of pharmaceutical products liquid extracts liquors pulves spirits syrups and specialities including Caffeinaspirin Aspirin and Lysol

The Rubber Factory at Trivandrum has been reopened and is largely engaged in the manufacture of articles for War purposes An Aluminium Smelting Factory is being constructed at Adwayan an enterprise full of great possibilities for the future

The State stands in the forefront of educated India Accord

ing to the recent census the percentage of literates aged 5 years and above is 67.9 and 41.1 for males and females respectively

On the outbreak of the war His

Highness the Maharaja generously offered to place the entire resources of the State at the disposal of the British Government He has not only made munificent contributions to the War Fund but sent the First and Second Infantry of the State Forces for active service He has contributed six hundred and fifty thousand rupees for equipping the trawler and mine sweeper H M I S Travancore for the use of the Royal Indian Navy and donated a further amount of 1½ lakhs for the purchase of two fighter planes for the Royal Air Force Besides His Highness has contributed a sum of Rs 7 lakhs to

the Viceroy's War Purposes Fund Her Highness Maharani Setu Parvati Bayi Mother of His Highness the Maharaja has contributed for equipping a Field Ambulance Unit

His Highness's benefactions include large sums of money for earthquake relief for fight against tuberculosis and similar purposes and annual donations to several

H H Maharani

Mother of His Highness

philanthropic and scientific bodies. Amongst his other charitable works is the establishment of a home for the destitute and the infirm. He has founded an Art Gallery at the capital in addition to the one he maintains in the Palace.

His Highness hobbies are tennis photography riding and motoring.

Travancore is one of the most populous and important of Indian States and occupies the south west corner of the Indian Peninsula. It is bounded on the North by the State of Cochin and the District of Coimbatore on the East by the Districts of Madurai, Ramnad and Tinnevely and on the South and West by the Indian Ocean and the Arabian Sea. It is one of the most picturesque portions of India containing an extensive hill region, numerous rivers and a succession of backwaters and vast and rich forests.

Trivandrum the capital of Travancore is a terminus of the South Indian Railway. The whole State is covered by a network of roads and canals with a well regulated system of road and water transport. There exists also a weekly air mail service between Bombay and Trivandrum. This has been extended to Trichinopoly which is on the Madras-Colombo Air Mail Route.

Area of the State 7 661 75 square miles

Population 6 070 018 according to the 1941 census

Revenue 280 73 lakhs of Rupees

The administration of the State is carried on by His Highness with the help of a State Council which has recently been re-organised and put on a firmer constitutional basis by the passing of the State Council Act. A State Assembly consisting of 27 members with representatives of urban and rural areas has been introduced. All education is free throughout the State.

War Efforts A Central Committee with His Highness as President and M Syed Maqul Ahmad B A as Secretary and two Sub Committees have been constituted. A war news sheet is issued every week in Urdu and Hindi. A loud speaker has been installed.

Contributions Uptill now besides Rs 1 000 per month to the Viceroy's Fund Rs 1 07 171 8 4 have been sent to His Excellency the Viceroy's War Purposes Fund and other Funds. Defence Bonds and Certificates of the approximate value of Rs 2 00 000 have been purchased. War Fund Labels bearing the Photo of clock tower have been made by the State Press and they are being sold throughout the State. 1146 articles for the comforts of soldiers have been sent by the War Committee.

Private Secretary—Captain Ramgopalji Trivedi

VADIA DARBAR SHRI SURAGWALA SAHIB the present Chief of Vadia State Western Kathiawar Agency is aged 37. He belongs to the Virani Branch of Kathis. The Kathis once dominated the whole province of Kathiawar and the province since then has been named Kathiawar.

Area : 92 square miles

Revenue Rs 3 lakhs

The Darbar Sahib married A S Kunvarbaisaheb in 1921 and has two sons and three daughters. The rule of primogeniture governs succession. The heir apparent Kumar Shri Krashnakumar Sahib is aged 11 and is getting educational training at the hands of an expert

and competent retired Educational Officer of W I S Agency Rao Sahib M S Dwivedi.

The Darbar Sahib has earned the reputation of a progressive and benevolent ruler and takes personal and keen interest in the administration of the State. Reforms of far reaching importance—medical, social, economic, educational and political—have been inaugurated by him.

The subjects of the State enjoy the benefits of free education, free medical relief, Child Marriage Restriction Act, the Farmers' Relief Act, the State Bank, prohibition and an electric power house.

The growth of industrial concerns are adding to the prosperity of trade and commerce. Match factory, Oil mill and gunning factories are among other industrial concerns.

The Darbar Sahib has contributed Rs 5,000 towards His Excellency the Viceroy's War Purposes Fund and Rs 500 towards the Western India States War Plane Fund.

Contributions have also been made by the public of Vadia towards the Western India States War Plane Fund and the Red Cross Society, Western India States Rajkot Branch, Rajkot.

This year Namdar Darbar Sahib has been elected as a Representative Member to the Chamber of Princes for the Western Kathiawar States comprised in Group 11.

WHO'S WHO

INDIAN
NOBLES

AND

PROMINENT
PERSONAGES

1942—43

A GARWALA B BHAGWATI PRASAD SAHRB a Premier Rais and Landlord of the District of Gorakhpur in the United Provinces comes of a distinguished Vaishya Agarwala family various leading members of which did extensive and prosperous river borne trade during the pre mutiny period when the Railways had not yet made their advent in India from Ghazipur and Calcutta where the family still has its kothas though at present on a very small scale. The main business at present includes his Zemindari which extends over the Gorakhpur Basti Azamgarh Ghazipur and Saran (in Bihar) Districts and comprises well over 300 villages for which

over Rs 60 000 is paid as the annual Government Revenue. He is well known for his peace loving and unassuming habit and his charities. His philanthropic nature is such that he did not make any collections from his tenants for a period of about 12 years and paid the Government Revenue from his own pocket thus foregoing a sum of about Rs 1, 00 000 in rents.

In the last war he contributed about Rs 3 00 000 in War Loans alone. In the present struggle he has so far contributed Rs 50 000 in War Loans and Funds.

He is of a deeply religious bent of mind and is very cautiously thoughtful in regard to all matters relating to life here and hereafter. Throughout his long life and unique career of about 67 years he has been a perfectly loyal and faithful subject of the Crown and a staunch supporter of the Government. He is at present leading a very simple almost an ascetic life in the quiet of his family surroundings and very rarely moves out of them.

His son B Mahadeva Prasad Sahrb now looks after his estate and other work. He has an uncommon regard for truthfulness sincerity and straightforward dealings. He is of a very amiable and charitable nature and is a keen supporter of all humanitarian and philanthropic causes.

His grandson B Bittthal Dass Sahrb is a promising young boy aged about 16 years and is a student of Class X in the local Government Jubilee High School.

BADNORE MAJOR THAKUR GOPAL SINGH OF BADNORE ESTATE UDAIPUR Rajputana is a Rathore Rajput of the Mertia clan

Born in 1902 *Educated* Privately *Succeeded* to the Estate in 1921 *Married* the daughter of Thakur Devi Singh of Chomu (Jaipur)

The Thakur Sahib is a descendant of Rao Dida a younger son of Rao Jodha of Jodhpur who was the founder of Mertia and the Mertia family. His illustrious ancestor Rao Jaisal emigrated to Mewar in the time of Maharana Udai Singh and is immortalised in history for his heroic fight unto death against Akbar during the siege of Chittor in 1567.

The town of Badnore has good buildings and gardens with pictures que fountains. There are excellent shooting facilities and its jungles are noted for panther pig black buck partridge and duck shooting.

The Thakur Sahib takes very keen interest in the administration of his Estate which is conducted on modern lines. He has always been solicitous for the welfare of his subjects which has won for him their love and affection. He has served Mewar in various capacities with distinction and is at present the President of the State Legislative Committee. As the Chairman of the State Legislative Assembly Draft Committee he has prepared a Draft Scheme which is now under the consideration of the Mewar Government. In 1933 he made a tour of England and some European countries. He has a great taste for history and antiquities and is the author of 'Jai Mal Vansh Prakash' a historical work of outstanding merit. Many works of public utility have come into being in the Estate. New buildings with a Power House tanks and roads have been constructed and many old ones have been repaired. A system of regulated Taqqavi Loans to the peasants has relieved them from their constant anxiety to borrow. Revenue Settlement is being made and arrears of the cultivators amounting to more than three lacs of rupees have been remitted. Many village Schools have been opened to spread literacy in the rural area in addition to the separate Schools for boys and girls in Badnore proper. In the town of Badnore there is a hospital where free medical aid is afforded to the poor and the destitute and travelling compounders distribute medicines in the villages. The Estate keeps its own Police and exercises Judicial powers.

and motor boating Interested in big game hunting and possesses a
good selection of fire-arms an expert with the camera and is a good
hand at oil and water colour painting First Taluqdar to obtain
a pilot a licence and to own a private plane in the Province

DALMIA SETH RAM KRISHNA whose ancestors were very rich aristocrats of the Marwari community runs a chain of cement factories all over India a paper mill many sugar factories, which rank among the largest of their kind in India a chemical plant, a number of collieries a public railway carrying passengers and goods, the Bharat Insurance Company and a bank but he lives a life of rigorous simplicity spending most of his income on charities

He entered business at the early age of 12 with hardly any assets except that of his brain His schooling had been desultory but by assiduous home study he mastered principles of economics and finance and also acquired a good knowledge of English Hindi Bengali and Gujarati all of which he speaks with ease and grace His knowledge of Hindu scriptures and philosophy is very extensive

His industrial career commenced only ten years ago and he became one of the biggest industrial magnates of the country within an incredibly short time In a few years the centres of his activities which were small isolated places grew into towns and were aptly named after his ancestors—Dalmanagar (Bihar) Dalmia Dadri (Punjab) and Dalmaipuram (South India)

He entered the cement industry in 1937 and in the initial stages had to face a powerful combine which put up a very keen competition hitherto unknown in the history of industrial enterprise in India His untiring energy patience and courage brought about an end of the competition and set the industry on a sound and prosperous footing

Seth Ramkrishna Dalmia eats the plainest food wears pure homespun confining his personal expenses to the barest necessities of life He keeps himself abreast of latest developments in world politics trade and industry and devotes hours daily to a comparative study of religion and ethics He has rare oratorical gifts and his extempore speeches enthral his hearers and carry them with him His connections are vast and widespread He is on terms of close friendship with eminent Congress leaders commercial magnates foremost ruling princes and provincial Governors They often visit Dalmanagar

His charities run into millions but few know much about them as publicity is avoided Following the precepts of the Gita he gives because he should and makes no distinction of caste or creed in dealing with his charities He spends generously in providing amenities of life to labour employed in his factories In spite of having monumental achievements to his credit Seth Dalmia views them with a sense of detachment and sincerely believes that he is one of those through whom God fulfils Himself

Address Dalmanagar (Bihar)

DINAJPUR THE HON BLE
CAPTAIN MAHARAJA
JAGADISH NATH RAY
FRSA of Dinajpur

Born December 28th 1894
Educated At the Hindu School
and Presidency College Calcutta
and has had military training
He was appointed to be
an Officer in the Indian Land
Forces from January 1924 by
His late Imperial Majesty King
George V. He became attached
to the 11/19th Hyderabad
Regiment I T F as an honorary
Lieutenant and is now an
honorary Captain of the Force

The Maharaja Sahib was for
several years the Chairman of
both the District Board and
the Municipality of Dinajpur
He was elected a member of the

Bengal Legislative Council 1930 and nominated a member of the Council
of State 1933. His speeches are always marked by freedom from fear
or favour. He is President of the All India Kayastha Conference
representing five million Kayasthas and a Vice-President of the British
Indian Association. His voluntary monthly contribution of Rs 100 to
the War Fund since the commencement of the war besides four substan-
tial lump payments to the heads of Govt has been greatly appreciated.

Raja Ganesh the founder of the Dinajpur Raj defeated the
Mussalman ruler of Bengal and occupied the *mussnad* in the beginning
of the 15th century. The Raj descended in 1642 from the Dutta
family of Ganesh to Raja Sukdev Ray a scion of Ghosh family
Sukdev's son Prannath was given the title of Maharaja Bahadur by
Emperor Aurangzeb. His grandson Ramnath obtained it as a heredi-
tary distinction in 1745. He owned numerous muskets and many
pieces of cannon some of which are still preserved with care. His
grandson Maharaja Bahadur Radhanath's sanad was given under
the hand and seal of the first British Governor General of Bengal.
Shyammohini the talented widow of Maharaja Taraknath received
the title of Maharani and her son Maharaja Bahadur Sir Girja Nath
Ray KCIE left the *gadi* in 1919 to his son the present Maharaja.

The great temple of Kantanagar on the Dinajpur Darjeeling
Road—which Dr Buchanan visited between 1807 and 1814 and declared
as by far the finest in Bengal—was built by the Maharaja Bahadurs
Prannath and Ramnath Ray. Maharaja Jagadish Nath is a devoted
Vaishnav and his financial contributions to the many religious, cultural
and charitable institutions of the country are too numerous to mention.

Son and heir MAHARAJ KUMAR JALADHI NATH RAY b January
18th 1928 died March 4th 1941. *Personal Assistant* BABU ABINASH
CHANDRA ROY. *Revenue Secretary* Rai Sahib NALINI MOHON
SINHA. *Private Secretary* MR SUDHANSU BOSE. *Address* Dinajpur
Rajbati, B. & A. R. Road, Calcutta.

GAEKWAR SHRIMANT MAHARAJ KUMAR UDAYASINH RAO B A (Bom.) B A (Cantab.) cousin of the present Ruler of Baroda. Born at Baroda in the year 1915

Educated under capable European and Indian Tutors and at Motibaug Princes School Passed the Matriculation examination from the Baroda High School and B A from the Baroda College in 1936 where throughout his career he was known for his social and amiable nature and was spoken of very highly by his Principal and Professors The Maharaj Kumar attended the Deccan College Poona for one academic year

The late Prince Shivajirao father of the Maharaj Kumar was a great personality of the ruling house of Baroda a noble hearted prince He was hailed as another Ranji in English cricket.

His mother Princess Kamaladevi Baisaheb who hails from the famous Sardar Kadam family is wellknown for her proficiency in outdoor sports Riding Tennis Badminton and many acts of benevolence

Shri Maharaj Kumar Udayasinh Rao possesses in him the literary qualities sporting gifts and generosity of his parents to which he has added the vast and varied experience of a scholar having stayed at Cambridge for three years

He is a sportsman in the real sense of the word He was a popular and courteous leader of his School and College Cricket XI and a patron of some of the brilliant star-cricketers of Baroda He is fond of shukar and is a good shot He is also a good tennis player

The Maharaj Kumar went abroad in 1936 for higher education and joined Jesus College Cambridge He was also a member of the Middle Temple and had a distinguished career both in study and sports He returned to India after the death of his grand father His late Highness Maharaja Sir Sayaji Rao Gaekwar He is now reading for the Barrister's Examination Address Shiva Mahal Palace, Baroda

the present ruler of Baroda and
a grand son of His Highness
late Sayajirao Gaekwar

Born at Baroda in the year
1916

Educated under capable Euro-
pean and Indian Tutors at
home and at the Princes School
at Motibaug Baroda. Passed
the Matriculation from the
Baroda High School in 1931
and joined the Baroda College

coached privately for the School Certificate Examination (Senior Cambridge) which he passed in 1936 from the Lahore centre. The Prince then went abroad for higher Education, joined his brother at Jesus College Cambridge as an undergraduate in 1936-37. The Maharaj Kumar possesses in him the literary qualities and sporting gifts of his illustrious parents. Unfortunately the Maharaj Kumar could not finish his studies at Cambridge due to outbreak of the War.

He is an all round sportsman, played cricket for his school and college, played in the Ranji Trophy Tournament and against Lord Tennyson's team at Baroda. He had a good season in England when he played a few matches for his college and Cambridge University against some County teams and the West Indian touring side that visited England in 1939.

He is a member of the Willingdon Sports Club, Fenners Club, Cambridge and took part in important matches. He is good at Tennis also. He is fond of Shikar and is a great shot.

Returned home after the death of his grand father. He has just completed his training at the Indian Military Academy and has qualified himself for a commission in the Indian Army. He is very popular and loved on account of his courteous behaviour and sweet manners.

Address Shiva Mahal Palace Baroda.

HARKISONDASS LUKHMIDASS Esq JP is the proprietor of the well known firm of Messrs Harkisondass Lukhmidass Share & Stock Brokers

He set up the firm in 1932 by becoming a member of the Bombay Stock Exchange and within less than a decade has earned for himself a distinguished name both among the Stock Exchange fraternity and the commercial community. He combines in himself those personal qualities which bring success in business as well as affection of those with whom he comes in contact. His personal charm and magnetism easily win for him the trust and confidence of those he meets. His utter devotion to duty and sound business instinct strengthens the relationship so formed.

Mr Harkisondass was born in Bombay on 31st October 1904. He was educated at the Bharda New High School and then joined his father's firm of Freight Brokers wellknown in freight line as Messrs Aspinwall Lukhmidass & Company. Soon after he was taken as a partner he joined freight business at the early age of 18 and his association with his father's business which continued for ten years enabled him to come in contact with many businessmen as well as shipping and export houses. Due to diversion of export trade from Bombay to other Indian ports and to general world depression he turned his attention to the Stock Exchange in 1932. Mr Harkisondass is also a member of the East India Cotton Association and the Bombay Bullion Exchange. The training of his father combined with his own abilities helped him to bring the firm to its present position.

The firm of Messrs Harkisondass Lukhmidass is today among the front-line firms on the Bombay Stock Exchange. It has set before itself the aim of specialising in genuine investment business for which a Stock Exchange primarily exists. For promotion of such business correct information should be supplied to the investing public and Mr Harkisondass has made it a point to develop a statistical department which publishes from time to time Wall Charts as well as Special Surveys of industries.

Mr Harkisondass has displayed a broad progressive outlook in business activities and in other walks of life as is evident from the financial assistance he has given privately to many institutions and individuals. Address: 17 Carmichael Road Bombay.

JAIKAZBHOF Mrs AL HAJJA KHOORSHID KHANUM QASSIM ALI JP Bombay Born in 1903 educated in Rangoon married the late Al Haj Qassim Ali Jairazbhoy JP on 4th May 1919 in Bombay A leading society lady Mrs Jairazbhoy takes keen interest in the welfare of her community She has rendered useful service as a member of the Bombay Presidency Women's Council and National Council of Women in India and of the Advisory Committee of the Cama Hospital She used to take a prominent part in all activities connected with the Princess Victoria Mary Gymkhana A charming hostess with winning manners Mrs Jairazbhoy was a remarkable helpmate to her husband who was an ardent follower of the Prophet of Islam She takes particular interest in the education of Muslim women and a leading part in welfare movements of her sex especially those connected with her own community

In 1932 Al Haj Jairazbhoy took her to perform the Haj when she took films of the Ceremony and different scenes of Mecca and Medina with quotations of the Quran inscribed These were unique During their world tour these films were shown at different places in Europe and America and were greatly appreciated

In recognition of her social and charitable work Government was pleased to appoint her a Justice of the Peace of the Town and Island of Bombay

Muhammed the Seal of the Prophet was written by her and dedicated to her loving husband to whose kindly help the completion of this pamphlet was due The booklet is only a glimpse into the life of the Prophet A more extensive book by her late husband entitled *Muhammed A Mercy to all the Nations* is very instructive There are several very interesting chapters, one of which is a special one on the Advent of the Prophet Muhammad as prophesied in the Scriptures of World Religions with original references from the Bible Atharva Veda Bhavishya Purana and Zend Avestas

Mrs Jairazbhoy returned from England in 1939 she had gone for an indefinite period to look after the education of her four sons who were in one of the public schools there She used to be member of the Inter Religious Fellowship (in England) in which she takes keen interest

Address Goolshanabad Pedder Road Bombay

JAUNPUR NAWAB SIR MUHAMMAD YUSUF, Kt. Barrister-at-Law is the biggest and most influential landholder in the eastern districts of the United Provinces. He is an hereditary Nawab and has been a member of the Legislative Council since 1921. He was appointed a Minister in 1926 and continued in that office for nearly 12 years until the introduction of Provincial Autonomy. He was also in the Interim Ministry formed under the new constitution. He has travelled widely and has made a special study of the peoples and problems of the United Provinces. He has rendered great public service by infusing a real spirit of self government in the local bodies which has enabled and encouraged them to discharge their duties and obligations towards the public more effectively and efficiently. His personal interest and guidance in the affairs of the local bodies has been responsible for greater amenities to the public. It was through his patronage that the U P District Boards Conference was originated and has been working successfully ever since.

The high standard of the provincial roads that the province can rightly boast of is the result of the continuous and untiring efforts of Nawab Sir Muhammad Yusuf in the Public Works Department. The great progress made by the Public Health Department, the increasing efficiency and popularity of the Medical Department, the growth of the co-operative movement and the general efficiency of the Registration and Veterinary Departments are all due to his sound and efficient administration during the last 12 years. He has always shown the spirit initiative and enthusiasm for the good of the people and the province.

His services in the cause of the landholders are too well-known to be reiterated. In the well-being and uplift of the zamindars and the tenants he has always evinced keen and personal interest. As President of the Agra Province Zamindars Association, he carried on an intensive campaign throughout the province and did his best to consolidate the position of the zamindars throughout India. In fact, it would be no exaggeration to say that the Agra Province Zamindars Association is a lasting monument to his untiring and zealous efforts.

Several educational and religious institutions owe their existence to his generous and charitable disposition. His courtesy and obliging nature have won for him a popularity which is coveted by many to-day. He has always been very popular in the Council and during his term of office as Minister wielded enormous influence over the members of the Legislative Council. He is one of the best speakers in the U P Legislative Assembly and his influence in the legislature has proved beyond a shadow of doubt that he is a pillar of real strength both to the Government and the public at large.

He is one of the most influential leaders of the Muslim community of All India importance. He has contributed in no small measure in maintaining and consolidating the solidarity of the Mussalmans in India and has helped them in following a wise and sound policy in the interests of the country. He has rendered signal services to the Muslim community and by dint of his patriotism, is held in high esteem by persons of all schools of thought. As Chairman of the Reception Committee of the All India Muslim League Conference held at Allahabad in 1942, he delivered a thought-provoking speech on the solution of the problems of India and the world which was broadcast by the B B C. and noticed in the Press.

He is universally liked and respected both by officials and non-officials—Muslims and non-Muslims—and in him one can find a real example of a selfless worker who is always striving to do some real good to the people. His impartiality is well-known and he commands the confidence of the Hindus and Muslims alike in these provinces.

Address 2 Nawab Yusuf Road, Allahabad Urdu Kothi, Jaunpur

KUREISHY RAFTUSHAN
 IFTIKHARUL MULK KHAN
 BAHADUR LT-COL HAJI
 MAGBOOL HASSAN MA LLB
 Home Minister Bahawalpur Govern-
 ment belongs to a respectable
 family of the Kureish of Arabia
 Though hailing originally from the
 Meerut District his ancestors had
 long settled in the State before he
 was born at Bahawalpur in 1900
 He received his early education in
 the State and later on joined the
 Muslim University Aligarh where
 he passed his MA LLB in 1925
 From his earliest childhood he exhi-
 bited traits which gave promise of
 his future eminence

His personal magnetism made itself felt in the sphere of his employment where he won the golden opinions of his colleagues as well as the ruler under whom he served. He began his career in 1925 when he joined the personal staff of His Highness the Nawab Ruler Bahadur of Bahawalpur as an Aide de-Camp. But it did not take long to discover that the young incumbent had in him the makings of a capable administrator. Accordingly in less than two years from the date of his appointment he was promoted to the rank of Assistant Military Secretary. But this was only a stepping stone as in January 1930 he was given the combined office of Private and Military Secretary with the additional charge of the portfolios of Education and Municipalities and was subsequently raised to the status of Minister in Waiting. In 1932 he paid a visit to England and other Western countries in company with His Highness the Nawab Ruler Bahadur—a visit which he repeated in 1935 and in 1936. The beautiful volume in which he has chronicled the impressions of his first itinerary is an eloquent testimony of his great powers of observation and expression. He has also been to the Near East and performed the holy pilgrimage. Recently his services to the State were recognised by the Government by the grant of the title of Khan Bahadur which is the first distinction of its kind to be conferred upon a purely Riyasti Vazir in the State. He is also the recipient of many decorations and distinctions from the State and is His Highness the Nawab Ruler Bahadur's representative in the Senate of the Punjab University.

During the 17 years of his incumbency he has been in charge of several departments and in each he has left the impress of his personality in the shape of many useful administrative reforms which he introduced from time to time. It is due mainly to his efforts that the Chief Court of Bahawalpur has been raised to the Status of High Court. He is a very capable and efficient administrator having won the highest praise of both the ruler and the ruled by his politeness, impartiality and keen sympathy with the people of the State. He is immensely popular with all classes of His Highness's subjects.

LALITESHWAR PRASAD SINGH B.A. (*alias* Gopalji) proprietor of Shakarpura and Bahadurpur Estates Monghyr Dist (Bihar)

Born Dec 16 1915 only son of late Rai Bahadur Udit Narayan Singh *Educ* Raj kumar College Raipur matriculated from Patna University and graduated from Benares Hindu University

Succeeded his father July 1941 married into the Chandel family of Mahuliagarh the nearest kinsmen of the Gadhaur Raj prominent among reformers of this community working for eradication of social evils

Address Shakarpura Estate P O Bakhti Bazar Monghyr Rly Station Salouna (B. & N W Rly)

LIAQAT HYAT KHAN
NAWAB SIR Kt K.B.E
K.B. is the eldest surviving son of the late Honble Nawab Mohammad Hyat Khan CSI of Wab in the Attock District Punjab

He entered the Punjab Government Service in 1909 as a Deputy Superintendent of Police and received unusually early promotion to the Imperial Police where he held several important appointments with conspicuous success. His services were recognised by the grant of the King's Police Medal and the titles of Khan Bahadur and O.B.E. as also a grant of land from Government. During the visit of H.R.H. the Prince of Wales to Lahore he

was put in charge of the special arrangements. His services in this connection received special commendation from His Royal Highness (now Duke of Windsor) and H.E. the Viceroy.

In 1923 his services were lent to H.H. the Maharaja of Patiala as Home Secretary but His Highness soon raised his status to that of Home Minister and placed under his control some of the most important departments of the State. It was as Home Minister that Sir Liaquat distinguished himself as an officer of high administrative capabilities. He gave effect to a considerable number of measures which have already had or are likely to have in future far reaching results in improving the condition of agriculture and industry in the State. In 1928 his services were recognised by the Government by the grant of the high title of Nawab which is now a rare distinction.

During the Dalhousie Enquiry it was Nawab Sir Liaquat Hyat who was responsible for the conduct of the Patiala State case and the very meritorious services rendered by him in that connection were gratefully recognised by His late Highness. Besides other rewards of a personal character Sir Liaquat was elevated to the position of Prime Minister and given the status of the premier *Jagirdar* in the State. In all the work connected with the Round Table Conferences and Federal discussions Sir Liaquat had been very intimately associated. He represented the State twice at the Round Table Conference and again as a delegate to the Parliamentary Joint Select Committee.

He was knighted in 1933 and in 1934 His late Highness conferred on him the Honorary Rank of General. In 1939 His Majesty the King Emperor conferred on him the Order of K.B.E. He retired from the Patiala State Service in April 1940.

Sir Liaquat has been closely connected with the work of the Chamber of Princes during the last few years. His politeness, impartiality and keen sympathy with the people of the State made him immensely popular with all classes of His Highness subjects.

KUMAR SHREE SHAIKH
MAHOMED NASIRUD-
DIN the Heir-apparent
 of Mangrol

Born on the 9th of
 August 1916

Having completed his early education at home under special tutors he joined the Rajkumar College Rajkot in 1930 and studied there till 1934. He then went to Dehra Dun and joined Col. Brown's Cambridge School to prepare himself for the senior

Cambridge examination. He remained at Dehra Dun from 1934 to 1936. He proceeded to England in 1937. In England he was under the guardianship of the well known cricketer and litterateur Mr R J O Meyer who is also a Cambridge man for about two years and there passed his School Certificate with credit. He was then accepted by the Cambridge University in 1938 and he got first class in his first year of the tripos. He came to India in August 1939 for the vacation and was to proceed again to England for the completion of his educational term at Cambridge, but unfortunately the war broke out and he could not go back and finish his remaining terms.

In April 1940 he married the younger sister of the Nawabsaheb of Manavadar.

He is taking a keen interest in the State affairs and assists his father to a great extent in the State administration. The Sheikh Saheb has delegated some of his powers to him.

While in England he played Cricket for two years for the County of Northamptonshire. His highest score was 42 not out against Sussex. He also played in the last Pentangular Cricket Tournament in Bombay and on his first appearance gave a good account of himself by scoring 64 against the Parsis and 44 against the Rest. His principal recreations are Cricket, Hockey, Tennis, Shooting and Hawking.

MEHTA P N LTM AMST Gold Medalist

One of the most successful of the students of the V J T Institute from which he passed out in 1897 with the highest scholarships for the first two years and Lord Reay Gold Medal with Honours Diploma. From 1898 to 1905 he worked as a Weaving Master in sole charge of his departments in The New Great Eastern Mills Ltd Bombay. Late Mr Nansukhbhai Bhaghubhai's Mills Ahmedabad and The Presidency Mills and The Colaba Land & Mills at Bombay when he left for England for

further study of Textile manufacture. Was the first to obtain the Government of India State Technical Scholarship in 1903 and proceeded to Manchester and obtained the certificate in the Faculty of Technology of the Victoria University and Honours Diploma of the Municipal College of Technology of that City. At the City and Guilds of London Examination he obtained the highest award of the Silver Medal and Money Prize in Carding and Spinning and also first class Honours and Bronze Medal in dyeing of Cotton Yarn and Piece goods and First Class Certificates in various textile manufacturing and designing subjects and in bleaching dyeing printing and finishing of Textile fabrics. Returned to India in 1908 when he was appointed Textile Expert to the Government of Bombay to organise and conduct a survey of the hand loom weaving industry in the Presidency. This was completed in 1909 from which period Mr Mehta has been acting as Technological expert and adviser to different cotton Mills in India and is also interested in the import of English Yarns piece goods and Textile Machinery.

Since 1909 devoted his wholehearted attention in introducing in India the weaving of fine piece goods with the help of fine yarns imported to India of 40s to 120s counts. Met with considerable success and his help and assistance has been always in request from Mills in Bombay Ahmedabad Rajputana Bengal and other towns of India.

When Mr P N Mehta returned to Bombay from England at the end of 1907 he found his late father Mr Nusserwanji K Mehta established as a sole Cloth Selling Agent of various Mills in Bombay and Ahmedabad viz The Kurla, The Globe and Lord Reay Mills in Bombay for all the markets of India. For all the Mills of Late Seth Mansukhbhai and Seth Lalbhoy Dalputbhoy of Ahmedabad he was their sole Cloth Selling Agent for Calcutta and Bombay Markets. He was also for some period the Cloth Selling Agent for the Calcutta Market of the Maneckji Petit the Bomanji Petit and the Dinshaw Petit Mills of Bombay. In 1907 Mr P N Mehta was invited by his father to join him and help him in his business of sole Cloth Selling Agent and worked for his father till the latter died in 1913 when this business was closed. Mr P N Mehta besides his business as importer of English yarns and piece goods carried on business as a Cloth Merchant buying his requirements from local Mills of India till the end of trade boom in 1920 when he closed his business as a Cloth Merchant. He has done very useful service to this country by advising and helping to introduce the spinning of fine yarns and the weaving of fine cloth all over India and his services and advice have always been available and offered free of cost to all his clients acquaintances and friends. He is at present doing business as (1) Importer of cotton spun silk and Art Silk yarns and Piece goods from England the Continent of Europe China and Japan (2) Importer of Textile Machinery for the Weaving Dyeing Bleaching and Finishing of Cotton Piece goods (3) Cloth Selling Agent for Local Mills.

In 1935 he bought the Crescent Mills of the Currimbhoy Groups with the help of his friends and converted it into a fine spinning and weaving Mill complete with up to-date Bleaching Dyeing and Finishing Machines. This mill is successfully working and spins only fine yarns from 50s to 120s average about 65s counts and cloth made out of the same.

Besides his commercial and manufacturing business he takes great interest in social and public activities specially for the benefit of the Parsee unemployed. He has made liberal contributions both privately and publicly to help various social and other institutions to relieve distress and to help those who are willing to work and improve their prospects. He has donated large sums to Dr Vassina's Hospital. He has built a cheap rent chawl for the benefit of Parsees, has founded a Lying in Hospital at Udwarda and is engaged in promoting employment centres to educate and give employment to the Parsee unemployed. Address: Cook's Building, 324 Hornby Road Fort Bombay.

MOHAMMED AFZAL ALI KHAN B Sc (Calcutta) B Sc (Tech) (Manchester) AMCT AMIEE AMIMechE is the second son of the late Nawab Ali Yawar Jung who belongs to the well known Noor ul Umara family of Hyderabad Dn. He traces his descent from Nowsherwan the just King of Persia. His ancestors Nawab Arustu Jah and Nawab Noor ul Umara distinguished themselves in the history of the Deccan.

Nawab Arustu Jah Bahadur was Prime Minister of Hyderabad Dn. during the reign of Nawab Nizam Ali Khan (Asaf Jah Second). He rendered valuable service to the State.

NAWAB KAMAL YAR JUNG BAHADUR, a nobleman of Hyderabad, is a son of the late Nawab Khan : Khanan. Few families that came out to India from Persia have such a brilliant record of services to their credit as the one represented by Nawab Kamal Yar Jung Bahadur. His ancestors were Governors and Generals under Moghal Emperors and Shah Nawaz Khan was Prime Minister of the Deccan after the death of Asaf Jah I. Nawab Sahib's father who was Military Minister was a brother-in-law of the late Sir Salar Jung the famous Prime Minister of Hyderabad, and had accompanied the latter on a political mission to England where he was presented to the Queen Empress and had the honour of dining with Her late Majesty.

Educated partly in Algeria and partly at the Nizam College. Married a daughter of his uncle the late Nawab Fakhru'l Mulk II. His age is 44.

He is the President of the Hyderabad Jagirdars Association and a supporter of the Hyderabad Mansabdars Association.

In 1939 he was elected President of the All-India Muslim Educational Conference and a committee, called Kamal Yar Jung Education Committee was formed under his presidency to frame a comprehensive and broad-based scheme suiting the special needs and requirements of Muslims. A Touring Committee toured round the country extensively and recorded its valuable suggestions in the shape of an executive scheme.

The Nawab Sahib is taking keen interest in fighting against the evils of war. Besides many handsome donations to various items he contributed Fifty Thousand Rupees in a lump sum towards the War Purposes Fund.

Nawab Kamal Yar Jung Bahadur owns an estate covering an area of about 312 sq miles having a population of 80,000 souls and yielding a Revenue of about Rs. 6 lakhs annually. The estate is divided into four Talukas which comprise 90 Villages and possess 24 Schools, 8 Dispensaries, 30 Tanks, 117 Ponds, 25 Canals and 18,000 Houses. The administration of the estate is conducted on modern and progressive lines. The Civil establishment consists of about 700 hands, including village Officials, and costs about a lakh of Rupees annually. On pensions, Scholarships and gratuities, the Nawab Sahib spends Rs. 20,000 annually.

The Nawab Sahib's loyalty to the Nizam is proverbial. The relation of his house with the Residency has always remained cordial. His father and uncle were recipients of a Guard of Honour on the occasions of their visits to the Hon'ble the Resident.

Partial, a village in the Nawab Sahib's estate, contains diamond mines. The World famous KOH-I-NOOR Diamond originally came from the Partial mines—a reference to which fact is also to be found in Murray's Handbook for Travellers in India, Burma and Ceylon.

Deoni, a taluka in his estate is a well known cattle market. The Fort of Arangir a relic of the ancient Andhra Kingdoms, is also one of his proud possessions and the Nawab Sahib is taking all possible steps to preserve it in its pristine glory.

His Shahmirpet Lake about 18 miles from Secunderabad, is an attraction for excursionists.

Estate Secretary Nawab Yesomyung Bahadur

Private Secretary Syed Badshah Hussain.

Address Khan-i-Khanan Palace, Hyderabad Deccan.

NAWAB MUHAMMED ZAH

NAWABZADA IMAD UL-DAULAR YEMIN UL MULK RASHIDUZZAFAR KHAN B A MAJOR younger son of the late General Nawab Moham ul mulk Obaidullah Khan C S I and the nephew of His Highness the Ruler of Bhopal

Born November 1908

Educated Privately later joined the Muslim University Aligarh. Graduated in 1932 with a brilliant career. Was the Secretary of the Historical Society which toured many historic places all over India under his secretaryship. Captain of the Muslim University Hockey XI in 1932

Received administrative revenue training in Bhopal. He was responsible for colonisation work entrusted by H H the Ruler

Being a keen lover of art and literature he has been responsible for elevating the literary standard of Bhopal to a great height by patronising the leading Urdu poets in India

At the outbreak of the present War the Nawabzada offered his personal services and placed all the resources of his private estates at the disposal of His Majesty's Government. He has just completed a course of Military training in the C I States O T C at Indore with remarkable success. He is now doing War work as a G S O in the Bhopal Army. He donated Rs. 10 000 and Rs. 500 per month for the duration of the War to H E the Viceroy's War fund also generously to other War purposes. The Nawabzada takes a keen interest in education and is always contributing towards private and local charitable institutions. Together with his brother he recently donated Rs 1 44 000 to the Muslim University Aligarh for the enlargement of higher Technical Education. Is a Member of the Court Muslim University Aligarh. *Sports* Being the Vice-President of the All India Hockey Federation the Nawabzada takes a very keen interest in Hockey. The famous Bhopal Wanderers XI owes its very existence to the Nawabzada's generous help and support. The Nawabzada owns a fine string of racehorses and it will be recalled that his famous Mas D Antibes won two Viceroy's Cups and one King Emperor's Cup in 1936 and 1937 respectively

He is the Founder of THE BHOPAL STUD FARM which due to his keen interest is rapidly progressing and is becoming an important centre of horse breeding in India.

Other Recreations Big game hunting yachting and tennis. Vice-Commodore of the Bhopal Yacht Club. He has travelled extensively both abroad and in India. *Address* Said Manzil Palace Bhopal C I

NEMIVANT GOVIND
RAO B.A. son of Ram
Rao Nemivant is the fifth
descendant of the ancestor of
the family—one of the ancient
illustrious and historical Hindu
noble families of Hyderabad
Deccan

Family History Raja
Nemivant 'Bahadur' rendered
heroic and meritorious services
to the British and the Nizam
in the famous battle of Khairata
and a number of other battles
that were fought against Tipu
Sultan. He was the Attorney
of Nawab Arastu Jah Bahadur
the famous Prime Minister of
Asaf Jahi Dynasty. It is a
historical fact that when the
Peshwas had detained the Na-

wab in Poona Raja Nemivant Bahadur was instrumental in procuring
his release and conducting his safe return to Hyderabad. In recognition
of this service he was granted the Killedari of Ousa the Jagirs and
Mansabs with all its paraphernalia of Umari Nowbat and Roshan
Chowki and was honoured with the title of Raja Nemivant Bahadur.
These services to the State were even recognised and appreciated by
the British Government. His son held an important and responsible post
in Saraf-e Khas Mubarak. One of his descendants Raja Janardhan Rao
Bahadur was appointed to an important military post and his
younger brother Raja Hari Har Rao Bahadur for his excellent Urdu
and Persian calligraphy was conferred with the hereditary post of
Tosha Khana Mubarak and was also the custodian of Royal Jewellery.
Raja Ram Rao Bahadur another well known descendant of the family
was appointed Talukdar during the Zilla Bandi and also enjoyed the two
important posts mentioned above. Thus it is evident that faithful and
meritorious service to the State and the Crown is the hallmark of
distinction of this family.

Born 30th August 1910 *Educated* At Madars-e-Alia and
Nizam College Hyderabad. He graduated from Ferguson College
Poona in October 1937.

Govind Rao Nemivant is a lover of art and literature. He is
very fond of collecting good literary books and works of art for his
home library. Befitting the established tradition, his is the burning
desire to hold an important and responsible post in the State suitable
to his high rank and position. He is interested in many games like
riding and swimming and himself plays tennis well. He helps with an
open hand many of the public institutions in the State and has also
contributed liberally to the War Fund.

Address Malkajgiri Hyderabad Deccan.

RAMGARH RAJ MAHA
RAJA KAMAKSHYA NARAIN
SINGH BAHADUR of

Ramgarh Raj Bihar

Born 10th August 1916
Assumed full control 10th
August, 1937

Educated at the Rajkumar
College Raipur and afterwards
at Mayo College Ajmer

Married Princess Lalita
Rajya Lakshmi eldest daughter
of His Excellency General Sir
Shingha Shumshere Jung
Bahadur Rana SMNT
SPG DB KBE Minister
Extraordinary and Envoy
Plenipotentiary of the King of
Nepal at the Court of St James
London and niece of His
Majesty the King of Nepal

The Ramgarh Raj is situated in the District of Hazaribagh in Bihar. It consists mostly of hills, forests and lands brought under cultivation. It has beautiful valleys with picturesque scenery and attracts a large number of visitors. There are numerous waterfalls and hot springs and the country can boast of an excellent road system which affords facilities for travel such as are rarely met with in other parts of India. Of late the mineral wealth of the country has been attracting industrialists from all over India.

The ancestors of the present Maharaja Bahadur were Rathor Rajputs and trace their descent from Maharaja Manikchand a brother of the illustrious Maharaja Jaychand of Kanouj. In 1368 A.D. Singh Deo came from Kharagarh Kanti in Bundelkhand to this part of the country and established a new Kingdom of 22 Parganas with the capital at Sisia in Pargana Karanpura. The twenty-two Parganas represented the states of tribal chiefs the ruins of whose forts can still be seen. They stand as landmarks bearing witness to a hoary past and afford to historians and antiquarians a subject for fruitful study. From Sisia the capital was moved first to Urda, then to Badam and eventually to Ramgarh. The latter place was named after the fort built by Maharaja Dalel Singh in memory of his father Maharaja Ramsingh. The fort is still in existence and supplied the name by which the Raj continues to be known. Maharaja Mukund Singh the last ruler who reigned at Ramgarh conquered and annexed Pargan Chai consisting of petty Chieftainships, namely Jagodhi Rampur Itkhon Paroria and Petiz. During the Moghul Rule in India the Maharajas of Ramgarh enjoyed and exercised sovereign rights and privileges. Maharaja Tej Singh Bahadur removed the capital to Ichak and thence in 1873 to Padma the present capital. The Maharajas of Ramgarh rendered valuable service to the Crown and helped in suppressing the Mutiny of 1857 and the Santal Insurrection of 1831-32. In Moghul times and at least as late as 1771 the entire

districts of Ranchi and Palamau and portions of Manbhum and Gaya were included within the ambit of the Raj. The whole territory of the Raj was known as the district of Ramgarh in the early annals of The East India Company. The district corresponded more or less with the Munda Rastra referred to in the Bihra inscription of Emperor Samudra Gupta. In the time of Lord Chaitanya it was known as Jhar Khand. The present territorial limits of the Raj extend beyond the Hazaribagh District to Pargana Basatpur comprising the entire Northern portion of the Ranchi district.

The present Maharaja from his infancy showed promise of his future greatness. Immediately after assuming charge of the Raj in August, 1937 prior to which the Raj was managed by a Court of Wards the Maharaja Bahadur diverted his full attention to the interests of the Raj and by his manifold benevolent activities has become extremely popular among his Rayats. He tries to keep himself in direct touch with all his subjects especially the poorer section and is therefore accessible to all. He is keen on inaugurating some new scheme to foster the growth of a healthy and progressive peasantry. His methodical ways of living have resulted in his infinite capacity and constant desire for hard work. His chief pleasure is to be at his office table where he works harder and longer than the hardest worked officials of the Raj. The Raj is making good progress in all directions. The Maharaja Bahadur has brought about a remarkable change in the life of Ramgarh people.

The Maharaja Bahadur is a sports man, a public man and a distinguished scholar. His travels throughout India have enabled him to conduct the administration on highly progressive and efficient lines. The famous Congress Session of 1940 was held in Ramgarh, and even the more prominent Congress leaders were full of

Raj Crest

praise for the cordial relations existing between the Maharaja and his subjects. Recently it has been decided to open centres throughout the Raj in furtherance of a scheme of rural uplift for which the Maharaja has allotted a sum of Rs 2,000 to start with. A bigger scheme in the shape of rural credit banks

has also been sponsored. The tenants have been given the right to reclaim waste lands free of Salami. To provide irrigation facilities in every village a grand scheme has been projected at an annual cost of Rs 25,000. The rare privilege of getting free supply of wood for fuel and agricultural purposes has also been granted to the tenants.

The democratic instincts of the Maharaja Bahadur have prompted him to constitute an Advisory Board at which the tenants are represented by three members to be elected by them. The Raj is trying to render all possible help to Agricultural Exhibitions in the shape of melas etc. at Ramgarh and Chaitra—the two big centres of the Raj. The Raj owns three hospitals, one high school, one middle school and one primary

school and gives monetary help to almost all other schools and dispensaries run by the District Board. In addition to these the Raj has travelling Dispensary Vans under qualified doctors to render first aid to the tenants and is employing a number of qualified vaidas to administer indigenous medicines to the agriculturists.

The Maharaja Bahadur has already made his mark in the public life of Bihar. He was the Chairman of the Reception Committee of the All India Kshatriya Mahasabha which was held in Patna. He is a member of the General Council of the Rajkumar College at Raipur nominated by His Excellency the Governor of Bihar to represent the landlords of Chota Nagpur and South Bihar and was later on elected to the Managing Committee. Last year he was elected President of the Provincial Hindu Mahasabha. He is Vice President of the Bihar Landholders Association and the Hazaribagh War Committee. He is also a Member of the executive body of the Bihar War Committee. All public causes receive the willing support of the Maharaja Bahadur and the following donations testify to his generosity —

Rs 1 00 000 to the Bihar Earthquake Relief Fund Rs 1 00 000 to the George VI Coronation Fund Rs 67 000 for the Indoor Hospital Building at Hazaribagh Rs 40 000 for the Nurses Ward in the Mission Zenana Hospital Hazaribagh Rs 25 000 to the Prince of Wales Fund Rs 15 000 to the Leprosy Fund Rs 10 000 to the Thanks giving Fund Rs 14 102 to the Zenana Mission Hospital at Hazaribagh Rs 25 000 to the King George V Memorial Fund Rs 25 000 to different Schools and Hospitals in the Raj Rs 9 000 to the poor and destitute when the Maharaja Bahadur was touring in the Raj recently Rs 50 000 to the Viceroy's War Purposes Fund Rs 2 000 to the Bihar Flying Club besides investing Rs 1 00 000 in the Defence War Loan.

Besides the monetary contribution towards the successful prosecution of the War he has given about 4 000 acres of land free of compensation for the Military Cantonment which was opened at Ramgarh last year.

His Apparent Tikkait Indrajitendra Narain Singh, was born on the 27th January 1938 amidst great rejoicings of the people of Ramgarh. To commemorate the occasion the Maharaja Bahadur was pleased to announce valuable concessions to the tenants and further when he went on tour he sanctioned the sum of Rs 50 000 to finance agricultural and irrigation works in the Raj.

On the occasion of his third birthday a District Sports meeting was held (first of its kind in Padma) under the patronage of the Maharaja Bahadur.

The Maharani Sahiba is benevolent by nature and accords generous support to all public charities. Recently she contributed a handsome amount from her private purse to meet all expenses for the construction and maintenance of a Maternity & Child welfare Centre in Padma, the foundation stone of which was laid by Lady Hallett, wife of the then Governor of Bihar.

Maharajmata Sahiba is the mother of the present Maharaja Bahadur and the eldest daughter of the late Raja Saheb of Porahat. She is very fond of music painting and needlework and takes great interest in the social and educational uplift of women. It was at her instance that her father started a girls' school and a fairly large Zenana Hospital in

his capital She has travelled extensively in India England and the Continent

Rajmata Sahiba Grand Mother of the present Maharaja Bahadur is better known as the Grand Old Lady of the Raj From her very infancy she has been brought up in the midst of a religious household and she has rightly kept the tradition of the Ramgarh Raj family by her numerous charities which are sure to be remembered with gratitude From the income of her estate which is a Khorposh grant to her by the Raj she has constructed a magnificent building in Padma which is known as Sreenagar and is a real piece of typical oriental architecture

Lieutenant Kumar Basant Narain Singh M R A S (Eng) F R E S (Lond) M A M N H (U S A) the younger brother of the Maharaja Bahadur was born in 1918 He was educated along with his brother at the Rajkumar College Raipur and Mayo College Ajmere after which he received forest training under the Conservator of Forests Bihar He is the Chief Secretary of the Raj a member of the Executive Committee of the Bihar Landholders Association Vice-President of the Rural Reconstruction Association Hazaribagh and the District Scouts Commissioner for Hazaribagh He is an honorary Lieutenant of the 11/19th Hyderabad Regiment now styled the Bihar Regiment He has made extensive tours of various foreign countries

SAIYEDNA TAHER
SAIFUDDIN SAHEB H H
SARDAR (Mullaji Saheb)
High Pontiff of Dawoodi Bohra
Shia Mohommedan Community
and First Class Sardar of the
Deccan *Born* At Surat on 5th
August 1885 *Succeeded* 1915
Silver Jubilee of accession cele-
brated all over India 1940

He is the 51st incumbent of the pontifical office of Dai-i-Mutlaq. He derives his succession from Prophet Mohommed (peace be upon him) through his descendants the Fatemide Caliphs of Egypt. Nearly 900 years back owing to political upheavals in Egypt the last Fatemide Caliph Imam Saiyedna Tayeb retired into seclusion while his Dawat was transferred to Yemen where the incumbents ruled as Sultans. From Yemen the 23rd Dai transferred the seat of Dawat to India. In India the Dais were the recipients of high honour and enjoyed special privileges from the Moghul Emperors. They were also accorded royal honour by the Peshwas, the Holkars and the Scindias. The East India Company counted the Saiyednas among the Indian nobility. His Holiness besides being a First Class Sardar of the Deccan enjoys all the concomitant privileges including exemption from the operation of the Arms Act and personal appearance in Civil Courts. Has twelve sons and eight daughters. His apparent Prince Mohomedbhai Saheb Burhanuddin is the 52nd in line.

He wields supreme command and jurisdiction civil and religious over the members of his community who owe him allegiance and are bound to obey him and abide by his decisions which are absolute and final. He appoints his deputies called Amils in every town wherever his followers live to maintain a constant contact with them. His Holiness is a liberal patron of Education, Arts and Industry and has established a separate department to administer the 350 Madressahs including High Schools with hostels attached to them. At these Madressahs free education is imparted to children. He is an eminent Arabic Scholar and one of the greatest exponents of Islamic culture. Every year during the month of Ramzan he writes a brochure in Arabic on religious and philosophical subjects. These writings are acknowledged masterpieces of Arabic literature. His charities and benevolence know no bounds. Amongst his multifarious munificences the construction of Qubla in Masjid e-Aqsa at Jerusalem, the preparation of Kiswat, i.e. an artistic carpet of silver brocade for the covering of the inner walls of the Holy Kaaba at Mecca, the presentation of Gold and Silver Zarih (sepulchres) to the Mausoleas of the Saints of Najaf and Kerbala at Iraq and also the erection of a Minaret outside the shrine of Moulana Hussain the Martyr of Islam are a few striking examples. *Address* Saifi Mahal Malabar Hill Bombay

TAMKOHJI RAJ Raja
INDRAJIT PRATAP BAHADUR SAHI the present
Raja Sahib of Tamkohni

Tamkohni Raj in the Gorakhpur District (U P) dates its origin long before the Mohammedan rule in India though recognition of titles and Mansabs were obtained during the reigns of the Emperors of Delhi by Raja Kalyan Mai and Raja Hamir Sahi and from the British Government in the time of Raja Kharag Bahadur Sahi

The present Raja Sahib Indrajit Pratap Bahadur Sahi at the age of 5 years, succeeded his father Raja Shatrugit Pratap Bahadur Sahi after his death in the year 1898 Since then

many improvements have been made to the Estate in almost all directions— Political Industrial Social and Educational. His generous contributions to the Educational institutions Pathshalas Schools & Colleges particularly those as awarded to the St Andrews College of Gorakhpur and Buddha A V School of Kasia combined with the annual grant of scholarships for indigent and needy students are instances of the keen and unqualified interest taken by him towards the cause of Education

The Raja Sahib was a member of the U P Legislative Council from 1900 to 1931 He is holding the office of the Chairman District Board for 4 consecutive terms and was awarded the title of C I E in January 1936 He is also connected with many Government and Public Institutions and has contributed liberally to the well being of his ryots and for the progress of the Estate since he has had charge of the Raj He is popular among all sections of the public of Gorakhpur as well as with the British Government

During the last war he helped the British Government with a large number of men and money He is associated with all the war efforts in his districts He is a good shot and is fond of many games He was awarded the Silver Medal at the last Coronation Durbar in 1912 and the Silver Jubilee Medal in 1935

The Raja Sahib is closely related to Benares State in U P and to Bettiah and Tekari families in the Bihar Province

The Estate is comprised of 462 villages in the districts of Gorakhpur and Basti in U P and Chapra Gaya Muzaffarpur and Darbhanga in Bihar Province paying Government Revenue Rs 1,28,886-13-0 in all

Address P O Tamkohni Dist Gorakhpur (U P)

Vizy (as he is known in the field of Sport) was Captain of the Indian Cricket XI which toured Britain in 1936 Patron of Indian Sport ex minister for justice U.P. Government President Andhra Mahasabha has travelled extensively in Europe and America Married in 1923 has two daughters and a son. His father established many charitable institutions and was for some time a Member of the Madras Legislative Council his grand father and great grand father were members of the Imperial Legislative Council Both of them had enjoyed the personal distinction of His Highness and also a salute of 13 guns and 19 guns respectively They had both established many charitable institutions in Benares Allahabad and other places and the former had also built a fountain in Hyde Park London The Town Hall and the Carmichael Library Benares the Vizianagram Hall in Muir College Allahabad are a few of the many acts of munificence of the Vizianagram House His nephew the present Mirza Raja Maharaj Manya Sultan Bahadur Raja of Vizianagram who is a minor is the only Zemindar in India who has a salute of 11 guns within the district of Vizagapatam The distinction Mirza Raja Maharaj Manya Sultan Bahadur was conferred by the Moghal Emperors and was subsequently recognised as a hereditary family title by the British Government

Born On 28th December 1905 **Educated** at the Princes College Ajmer and Haileybury College England Whilst he was at the Princes College Ajmer he won his Colours at Tennis and Cricket and set up a record as he was the youngest student to get a double blue (Pachranga) and this record has not yet been broken In 1934 he stood for election to the Central Assembly from the Landholders Constituency of the United Provinces and was returned unopposed On the eve of the inauguration of the reforms he stood for election to the U.P. Provincial assembly from one of the largest rural constituencies and was returned by a large majority One of the well known big game hunters in India and has reached the coveted figure of a century of tiger He was appointed interim Minister of Justice of the United Provinces Government under the New Act 2nd April 1937 He has been a member of the Court of the Benares Hindu University since 1935 and was elected to the Executive Council unanimously in 1940 He was called upon by Sir S. Radhakrishnan Vice-Chancellor of the University to accept the highest Blue ribbon of the University as a special mark of distinction at the convocation of 1940 Unanimously elected President of the 22nd Andhra Mahasabha held at Vizagapatam in November 1941 and President of the U.P. Kshatriya Mahasabha for the year 1942

WALIDUR RAHMAN KHAN BAHADUR MOULVI, B.L., a Tea Planter and Zemindar of Jalpaiguri. Born in July 1861 in the famous Kan family of Cheora District Tipperah. He received his early education in his native village, graduated in Arts and in Law from the Presidency College Calcutta and the Government College Dacca, respectively. He is the third Muslim graduate of the Tipperah District. He lost his father while yet a boy but was brought up by his uncle the late Khan Bahadur Moulvi Rahim Bakhsh. Married Begum Manja Khatun youngest daughter of the late Kazi Mahammad Asghar of Cheora in May 1889. Has six

sons and three daughters. He joined the Jalpaiguri bar in December 1890 and practised law there for about 30 years. While at the bar he became connected with the tea industry of which his uncle was the pioneer among Indians. By dint of zeal industry frugality and honesty he has now become the sole proprietor of several tea gardens and holder of a considerable number of shares of Jt Stock Companies and owner of extensive Zemindary and other properties in Bengal and Assam. He has served in an honorary capacity in public bodies and organisations and participated in all social and loyal political movements in Jalpaiguri. He is a Life Member of the Sir Sahnullah Muslim Orphanage at Dacca and has endowed two beds, the Lady Carmichael Bed and the Lady Jackson Bed in the female section of the Jalpaiguri General Hospital. He contributed Rs 5 000 towards King George V Jubilee Fund, part of which together with other contributions has enabled the X Ray installation in the Jalpaiguri General Hospital to be made. He has established a charitable dispensary at Walpur in the Darrang district in Assam and has been maintaining it at his own cost. In Cheora he has built a fine mosque and excavated tanks which supply pure drinking water to the people. He has done many other works of public utility. For his public services, munificence and loyalty he has been honoured with the title of Khan Bahadur. The naming of two nice buildings he has built in Jalpaiguri as Nur Manzil and "Alma Manzil" is very strong testimony of his love and esteem for his father and mother respectively. Though now in his 81st year he is still active and is himself managing his vast-estates with the help of some of his sons. He is still acting as a Director in 12 joint stock tea companies and is known as The tea magnate of Jalpaiguri. He is going to convert his properties into a Private Joint Stock Company consisting of himself, his wife and children.

Address Alma Manzil, " Jalpaiguri.

ACME

THREAD CO., LTD.,

BOMBAY.

Managing Agents

WM GRIMSHAW & SONS

MILLIONS of needles in India are threaded with Acme thread. The housewife the tailor the cobbler the tentmaker—they all rely on Acme thread and there is a type of Acme thread to meet every individual requirement. Chances are that most of your own garments and shoes are sewn with Acme thread. The life of your garment depends largely upon the strength of the thread it is stitched with because if inferior thread has been used it may come apart at the seams. That is why all reputable tailors use Acme thread almost exclusively.

BIRTH OF THE FIRM

The firm of Acme Thread Co Ltd., was founded in 1933 by Mr William Grimshaw and his son Mr J A Grimshaw. With its factory housed in spacious premises in the grounds of the Atlas Mills Reay Road Bombay production started in 1934. It was and perhaps still is the only European owned and managed factory manufacturing sewing thread which finds its way into thousands of homes on this sub-continent.

THE FACTORY

The Acme factory of today is entirely different from the Acme factory of 1934. Many important changes have been brought about since it was first started. New machinery has been added and production takes place along more efficient lines. With every improvement in the factory came improvement in the product.

Acme thread improved in quality and more types and brands of thread were turned out the most popular of the lot being

Shiraj Brand thread More and more workers have been engaged to meet the growing demands from the Indian markets and some foreign markets Of the factory staff today

are 250 men and women all skilled workers The factory works night and day not only to meet a heavy civilian demand but also the demand from Army Clothing Factories Tent Factories and Leather Goods Factories

The Winding & Packing Dept

The Acme enterprise is run on modern principles under expert European supervision and management It is the largest factory of its kind in India and uses the latest British and American machinery

PACKING AND PRINTING

Acme thread goes on wooden reels and paper tubes before it is put on the market Every reel and every tube bears the Company's trade mark and has gaily printed labels attached

All the labels wrappers tickets letterheads billheads and other printed stationery required by the firm is printed in its own Printing Press which is housed in the factory premises This press turns out exquisite colour work too

AGENCIES

The firm has Branches and Agencies in many parts of India including Calcutta Madras Cawnpore Lucknow Karachi Delhi Lahore Sialkot Petlad Ahmedabad Peshawar and Bangalore

EXPORT

The firm has also a large export trade Its products are in great demand in Egypt South Africa East Africa, Syria Persian Gulf Burma and the East Indies They are regularly exported to these places

Alembic

**Chemical Works
Company, Ltd.,
Baroda.**

**PIONEERS
OF INDIA'S
CHEMICAL
INDUSTRY**

Raj Mitra B D Amun

THE history of Alembic is the history of the development of chemical and pharmaceutical industry in India and also reflects the industrial progress of Baroda State

Some four decades back, during the early period of the rule of His Highness the late Maharaja Sayajirao Gaekwar III of Baroda was laid the foundation of the notable industry which is one of the major industries that owe their origin to the progressive outlook of His late Highness

In the promotion and incorporation of this company the late Prof T K Gajjar the late Prof A S Kothbhaaker and Mr (now Raj Mitra) B D Amun took a leading part. Later the rapid expansion of this enterprise was mainly due to the genius and indefatigable energy of Raj Mitra B D Amun who is considered one of the earliest

pioneers of the pharmaceutical industry in India. In spite of the initial almost insurmountable difficulties and heavy financial losses, Raj Mitra B D Amin persevered with a determination that knew no defeat until he succeeded in converting a small losing concern into a huge profit making enterprise

Realising the need for well trained and qualified chemists and chemical engineers Alembic has pursued the policy of sending suitable employees to England Germany and America for training in Pharmacy and Chemistry The manufacturing and research laboratories of the factory are now manned by these trained engineers and chemists with up-to-date knowledge and ideas Scientific investigation and development in the various branches of the chemical and pharmaceutical industry is constantly taking place

Alembic is to-day one of the most prosperous industrial enterprises in India manufacturing on a large scale chemical and pharmaceutical products The factories are being rapidly extended and from the early alcoholic basic industry the company by persistent efforts and gradual progress has developed to-day into a huge chemical and pharmaceutical concern manufacturing all kinds of medicinal products such as tinctures extracts elixirs *vinums* ointments tablets injections pharmaceutical specialties several medicinal chemicals including anæsthetic ether chloral hydrate ethyl chloride alkaloids etc The company's services to the country in supplying the medical profession with standard reliable products are great and specially during these critical days of scarcity of medicines the untiring zeal with which the company's efforts are directed to step up production and maintain quality with ever increasing vigilance speaks of its spirit of service to the millions of suffering humanity

The reins of management are now in the hands of the Board of Directors and the immediate activities are looked after by Mr R B Amin and Mr M B Amin both sons of Raj Mitra B D Amin They have introduced numerous and far reaching improvements in every direction thereby assuring for the company a long era of leadership and prosperity

Alembic Chemical Works Factory Baroda.

J. B. ADVANI & CO., LTD.

(Established 1908)

BOMBAY,

Three intimate friends Kanwalsing Pohumal Vasanmal Kishen chand and Jotang Harising in 1908 formed themselves into a Company called J B Advani & Company with a view to specializing in the import of Paper and Printing Materials. This Concern was the first of its kind in Sind for up to the time it commenced business there was not a single business house in the whole of Sind specializing in the import of Paper and Printing Materials. The pioneers who envisaged a great future for this line of business opened an office in Karachi. In a very short time their confidence was justified and the venture became a huge success. The markets within-reach having been tapped to the fullest extent, a Branch was opened in Bombay in 1921. In spite of the very keen competition that usually prevails in Bombay which is the premier and largest paper market in India the Company very soon became one of the leading firms in the line with its business growing in volume from year to year.

In 1924 the original owners of the Company decided to convert their firm into a Private Limited Company—J B Advani & Co Ltd—with a capital of Rs 6 00 000.

In 1925 the management decided to explore the Punjab market more energetically with a view to developing the business handled by the Head Office at Karachi and a Branch was accordingly opened in Lahore. This was followed by the opening of a Branch in Madras in 1927 which has made steady progress year by year. Three years later a Branch was opened thus time in Calcutta.

With branches in all the important centres in India J B Advani & Co Ltd with its huge stocks today reaches every notable consuming centre in India.

The Company has a paid up Capital of Rs 6 00 000 and a Reserve Fund of Rs 6 00 000. Besides it has the substantial backing of its partners and the Working Capital is actually in the vicinity of Rs 30 00 000. The Company with its four branches is one of the largest importers of paper in India with a turnover of Rs 70 00 000 per annum. It deals in all grades of paper printing machinery and materials and is open to take up representation of Indian and foreign Milla.

The Asian ASSURANCE CO., LTD.

Head Office —
ASIAN BUILDING,
BALLARD ESTATE,
BOMBAY

Established
1910

The Asian Assurance Co Ltd Bombay claims a place in the front rank of Indian Life Offices. With a standing of over thirty years the company has shown quite a good progress both in the matter of expansion of business and consolidation of its financial position.

The following figures tracing the progress of the company during the last fifteen years speak eloquently in this connection —

Year	Premium Income	Life Fund.	Total business in Force
1925	Rs 3 50 211	Rs 7 38 819	Rs 62 62 500
1930	, 6 48 793	, 18 10 948	, 1 24 51 232
1935	, 13 43 137	, 42 98 820	, 2 52 08 418
1940	20 95 146	85 98 458	, 4 17 48 221
1941	22,54 000	97 00 000	4 46 00 000

'The Indian Finance' of Calcutta remarks as follows regarding the Investment Policy of the Company — The Investment policy adopted by the Asian satisfies the two well-known canons of a life office investment policy namely absolute safety consistent with the maximum return.

The following remarks of the Consulting Actuary Mr G S Marathey at the time of the last valuation of the Company will denote the strength of the Company and the progress achieved. Mr Marathey says: While many other companies find it impossible to work without increasing the expense ratio you have actually been able to reduce it to an appreciable degree. You are to be complimented on having maintained the same rate of bonus. The expense ratio has been reduced further in 1941 and works out at 25.4% to the total premiums.

The company offers to the public quite a variety of suitable schemes of which special mention may be made of (1) Golden policy (2) Safeguard policy (3) Capital policy and (4) Retirement Income plan. Besides the policies of the Asian contain important facilities like permanent disability and automatic non forfeiture without any extra charges being levied for these.

THE ASSOCIATED

IN 1939 a company was established called The Associated Textile Engineers, to deal in textile machinery and in 'windmilling' and air-conditioning equipment. Due to the serious dislocation in the textile machinery trade on account of the war this firm is at present engaging itself in the organization of the sales and marketing of Indian China clay which is extensively used in textile sizing.

Before the outbreak of the war India used to import all her requirements of China-clay from England. China-clay in its crude form is available in a number of districts in this country and one of the best and finest deposits of China-clay is located in the State

of Travancore. The Government of Travancore made extensive surveys and research to determine the possibilities of the commercial exploitation of these deposits in the year 1936 and on satisfactory reports sanctioned the necessary amount for the installation and construction of a large Clay Washing and Refining Plant and also a fully equipped Ceramic Factory.

The whole scheme was entrusted to Sardar Dogar Singh, F.C.S. (England) and Travancore China-clay was first put on the market in the beginning of the year 1940. It got a ready response from the Textile Mills of this country and it has established its reputation as India's best and finest China-clay. It compares very favourably with English China-clay in chemical composition and physical properties and is found to be ideally suitable for use in Textile sizing and finishing. It is also used in the paper, leather, rubber, paints, pigments and ceramic industries.

Mr S H Bhagwati

TEXTILE ENGINEERS

The Sole Agency for India for the sale of Travancore China-clay was given to Messrs Industrial and Agricultural Engineering Co Bombay who have appointed Messrs Associated Textile Engineers 43 Forbes Street Bombay as their sole distributors

All the three partners of the firm—Messrs R D Char B E D Ramanna L T M and S H Bhagwati B com—have had previous business connections with the textile industry. Mr Bhagwati is well known in the textile centres of India and has a good knowledge of marketing conditions. He has been on an extensive tour of the Continent of Europe where he had the unique opportunity of working in the factories and laboratories of leading textile machinery manufacturers and visited several textile mills. Mr Bhagwati also visited Japan to study artificial

Mr D Ramanna

Refining Plant

silk weaving printing and calico engraving. With his fine reputation for handling machinery and air-conditioning equipment Mr Bhagwati has been helpful to his firm and also to the Mills and factories who are its clients. No wonder Messrs Associated Textile Engineers did not take much time to establish themselves and their efforts have been successful in putting Travancore China-clay on the industrial map of India.

Spacious Garaging Accommodation

THE BANDRA BUS CO., LTD.,

*Ghodbunder Road,
Santa Cruz,
Bombay 22*

Mr Akbar Chinoy

THE Chinoy's well known for the last forty years as automobile pioneers in India bought over the Bandra Bus Service in 1938. The concern when purchased owned just a few good buses and a lot of ramshackle old vehicles. But the new proprietors were determined to solve very thoroughly the passenger traffic problem of the Suburbs.

They set about it by promoting a limited company called the Bandra Bus Company Limited with its office at Santa Cruz. The Board of Directors comprised Sir Sultan Chinoy as Chairman, Mr Akbar Chinoy as Managing Director, and three other directors.

The Bandra Bus Company popularly known as the B B C gradually replaced all the old buses with the very latest models. These spacious new buses brought luxurious comfort to the travelling public. This naturally resulted in a heavy increase in traffic and more buses had to be purchased. The Bombay Garage premises could no longer house the offices and the bus fleet of the Bandra Bus Co. It was therefore resolved to erect a special building and devote it entirely to the requirements of the Bandra Bus Co. The new edifice is situated on Ghodbunder Road and consists of an office building, residential quarters for the officers and a big depot for garaging the buses. The depot is so designed that all buses are parked in single file, thus lessening the dangers of destruction by fire etc.

In 1940 when the international situation showed no signs of improving the Company anticipated a shortage of petrol and began experimenting with a Charcoal Producer Gas Plant. As the experiment proved successful the Company converted many of its buses to be operated by gas. Thanks to the foresight of the Company the suburban public is now enjoying the same travelling facilities it did before the outbreak of war.

How successful the new Co's venture has been may be gauged from the fact that an average of 10,000 passengers travel daily by B B C buses which collectively do 3,200 miles a day on various routes which form a network over the Bombay Suburban District.

Special charcoal being sorted out for Buses fitted with Producer Gas Plant

BARODA STATE INDUSTRIES

The industrial progress of Baroda State can be attributed to the progressive outlook of His late Highness the Maharaja Sayajirao the grandfather of the present Maharaja. The first modern textile Mill was built as early as 1895 and the State now occupies a prominent place alongside the industrially advanced provinces of British India. 148 factories associated with a variety of industries producing war supplies are spread over 8000 square miles and employ 41 104 workers.

TEXTILES

Sixteen Cotton mills are capable of producing 40 million lbs of yarn and 32 million lbs of cloth a year from cotton grown in the State while the manufacture of canvas durries tapes newar pattu absorbent cotton woollen rugs blankets etc is being undertaken by a firm. The State's woollen mill is busy on war work and received an order for supply of 120 000 blankets from April 1941 to March 1942. Another important item of manufacture is the production of bobbins shuttles and other wooden parts required by cotton and jute mills. These are being produced at Navsari mostly for the jute industry in Bengal. The plant is capable of doubling its present output.

CHEMICALS

Leading important chemical manufacturing concerns supply a variety of pharmaceutical products drugs fine chemicals alkaloids heavy chemicals rectified spirit and spurious preparations textile soap and finishing materials. Tata Chemicals Ltd a joint-stock company floated with an authorised capital of Rs 1 25 00 000 will start production of soda ash and other heavy chemicals in the course of the next few months. Another concern is considering the production of morphine strychnine caffeine and other alkaloids on a commercial scale while a third has started the manufacture of dichromate of potash.

ENGINEERING

In addition to the workshop of the Gaekwar's Baroda State Railway there are important Ironworks in Baroda. They manufacture agricultural implements cast iron articles bleaching machinery, lathes drilling machines sterns and locomotive cylinders boilers and other plants and equipments.

OTHER INDUSTRIES

The Salt Works at Mithapur near Dwarka cater for the salt needs of Bengal Cement Sugar Matches, Rubber mechanicals and China clay are other materials produced in the State Though the State cannot claim many natural and mineral advantages the vigorous exploitation of its resources is principally responsible for the springing up of new industries which are helped by the supply of electricity and a well developed port at Okhamandal Large ocean going liners call at this Port which lies midway between Bombay and Karachi and offers excellent facilities to industry

Plans for new industries include the construction of a paper mill in the Navsari District for manufacturing writing paper kraft paper and straw board from bamboos and other raw materials which are plentiful in that area and a glass factory in Baroda A factory for the manufacture of pencils is being erected at Petlad A small Brush Factory is already in production

SPECIAL ADVANTAGES FOR STARTING NEW INDUSTRIES

To a person who is planning to start a new industry Baroda State offers splendid facilities for the successful execution of the undertaking Whether he is a big capitalist and wants to start a large scale factory or has only small means and desires to launch a moderate scheme he will find that Baroda state will provide an ideal field for his activities The State follows a liberal policy in granting to suitable persons financial assistance and various other concessions to encourage new industries The State is richly endowed with raw materials and is well served by railways and road communications Moreover the rich province of Gujarat with its flourishing agricultural population and many industrial centres provide a wide market for industries.

PORT OKHA

The new gateway to Western Northern and Central India Port Okha is the cheapest and most modern port equipped with unrivalled facilities for quick and safe discharge of goods including heavy machinery and fragile articles Extensive sheds warehouses and open storage accommodation are available at moderate charges.

THE HOUSE OF *Bata*

The importance of footwear as a protection against various diseases and inclemency of extreme climate need hardly be stressed

In India thousands of people die every year due to snake bites tetanus hookworm and various septic infections Widespread use of good footwear can to a great extent remedy the situation But the average annual consumption of shoes in pair per head is only 0.09 in India while it is 3.37 in the U.S.A. and between 3.25 and 1.97 in other countries The total output of both hand and machine made shoes in India does not exceed 80,000,000 pairs per annum but the requirement is 800,000,000 pairs per annum

Yet in India favourable conditions obtain for the development of the shoe industry There is the demand and almost all the raw materials needed for shoe-production are obtainable in India The only thing that requires to be done is to adjust the price-level of shoes with the buying capacities of the Indian people The problem is not an insoluble one if the production of shoes is undertaken in modern factories with up-to-date machinery and proper and economic marketing arrangements made

SHORT HISTORY

The Bata organisation has developed from a very small factory at Konnagar into a spectacular city of shoes Batanagar about 13 miles away from Calcutta proper A large plain with overgrown bushes and sub-tropical vegetation gave place to the modern Batanagar where the foundation stone was laid in October 1934 Through years of patient endeavour and sincere service Batanagar has now attained that status and importance in the Indian shoe industry which is simply admirable from every point of view

A community of more than 8,000 people exhibiting efficient skill and commendable team spirit with a keen sense of mutual help and fellow feeling keeps

Batanagar humming with activity Another decentralised group of 2,500 men is maintained in the Sales organisation as shop managers salesmen repair hands and other personnel Of those who are working in the production unit 1,000 were formerly cobblers by profession and are now earning about three times their former income

A view of the Factory Main Road

A recent move towards increased production and convenient service to customers in Northern India has been the establishment of a sister organisation in Batapur 12 miles away from Lahore on the road to Amritsar

PRODUCTION

The production is mainly divided into leather and rubber groups of factories. In these factories up-to-date machinery for shoe-production has been projected and a specialisation in individual works consequent on the division of labour being extended to the furthest limit effected with the result that every part of production bears testimony to an efficiency and skill hitherto unknown in shoe production. And this super quality of the products has been no less due to a conscious co-operation among makers of different parts in a common endeavour. Shoes of various sizes shapes and qualities are made to suit a variety of pockets seasons and places.

And there is a host of subsidiary products such as socks polish and other accessories. In the leather shoe production it is firstly the upper and sole tannery which provides the basic raw material for manufacturing leather articles. A number of departments play their respective parts in converting the tanned leather into the different parts of a shoe as toe-cap vamp counter soles heels etc which are at last brought to the assembling plant for finishing operations.

Besides the above there is a number of auxiliary departments which help the production in many ways. Machinery Engineering Electrical and Chemical Departments Saw Mills Carpentry are only some of them. The importance and utility of them can hardly be exaggerated in a big industrial organisation like Batanagar.

SALES ORGANISATION

The Sales organisation of Batas consists of no less than about 800 shop units interspersed throughout India situated at convenient distances so as to facilitate shopping for local people. A brotherhood of about 2500 managers salesmen repair hands and pedicurists exert their utmost in providing the

A Section of the Leather Shoe Department

Rubber Rolling Workshop

people with suitable shoes and accessories and thus enlivening that spirit and motto of Service which is the guiding principle of the Sales organisation

To cater to the requirements of individual shop-units there is the Supply Department which has thus acquired a say over production. And with a view to turning every manager every salesman, every repair-hand, every pedicurist into a perfectly efficient businessman the organisation runs a training school where Sales personnel have to undergo a course of six weeks thorough training under expert and experienced instructors

WORKING CONDITIONS

All the factories and auxiliary departments have been housed in airy well-lighted spacious buildings where cleanliness is strictly enforced. The flowery lawns and handsome lanes within the factory-compounds provide aesthetical food to the employees. The elimination of drudgery from the process of manufacture consequent on the introduction of the latest types of machinery helps the employees do their work with more ease and greater peace of mind. A sympathetic but disciplined supervision is exerted on the employees works helping them to work more efficiently and hence earn a growing scale of wages. The daily work leaves enough scope and space for recreation and culture amidst a friendly association of fellow workers which makes every Bata man a specimen of happy contented normal manhood

LIVING CONDITIONS

All the amenities of a city life and all the facilities of a modern home have been carefully provided. Airy and spacious bungalows for married officers and hostels for bachelor workers fitted with electricity tap-water and other modern equipments are built in open lawns. A post office a cinema house a railway booking office play grounds two big sports clubs cultural and educational institutions library and reading rooms places of worship and a general market where almost everything is available a hospital provided with modern equipment of treatment such as X Ray apparatus etc are to name only a few some of the facilities

Bata Shoe Co Ltd is straining every nerve by all means at their disposal to produce in the people a habit of wearing some kind of foot wear and has so far been successful in meeting the growing demand for footwear to an appreciable extent thus rendering a positive service to the country at large

A view of the Living Quarters

The House of BALIWALLA & HOMI LIMITED.

THE position of leadership as optical manufacturers now enjoyed by Messrs Bahwalla & Homi Ltd is the result of over half a century of perseverance and unselfish work

The firm was started on a modest scale at Gunbow street in 1886 by Mr Nowroji J Bahwalla under the name of Nowroji & Dinshaw opticians. Within a few years it shifted to Kalbadevi Road and became well known there as N J Bahwalla & Co. Later on when his son was admitted as a partner in 1911 the name was changed to Phiroze N Bahwalla & Co.

At that time pebble lenses were very much in vogue in India and this enterprising firm was the first to install machinery to work locally cylindrical and Compound Pebble Lenses and thus saved the spectacle wearer public a lot of bother and annoyance of ordering each pair of lenses from England and having to wait several months for their arrival.

The firm also took in its stride the manufacture of gold and silver Spectacle Frames. In 1913 Mr Homi Nowroji Guzder having joined the firm its name was changed to Bahwalla & Homi. At this time Toric and Meniscus Lenses were quite in demand and being equipped with new precision machinery the firm was the first to manufacture Toric and Meniscus Lenses in India. Later on the firm introduced in India the manufacture of Invisible Bifocal Lenses and all kinds of complicated lenses in Crookes Glass which absorbed all Ultra-Violet harmful rays.

They are the largest optical manufacturers in India and they have been awarded several Gold Medals at the various Industrial Exhibitions. Specimen of their lenses have been acquired by several Museums in India. They have been appointed opticians to H E Sir Roger Lumley Governor of Bombay and have lately been appointed to Royal Indian Navy. Several ruling Princes such as H H The Maharaja Saheb of Bikaner H H The Jam Saheb of Navanagar H H The Maharaja of

Kashmere have been greatly satisfied with the special lenses that have been manufactured for them as well as an Independent Monarch in the person of His Majesty the King of Afghanistan.

A battery of machines at work in a corner of the factory.

Enterprise and Progress are the firm's watch word and the name of Bahwalla & Homi Ltd is synonymous with the progress and developments of spectacles and optical lenses in Bombay and India.

Bharat Building Lahore

THE BHARAT INSURANCE CO., LTD.

Head Office BHARAT BUILDING LAHORE

BACK in 1896 Lahore saw the birth of one of the first purely Indian Life Insurance Companies. The Bharat true to its name was Indian in capital management direction and outlook just over one thousand rupees was Bharat's premium income during the first 9 months the humble foundation on which today's nationwide business with a yearly premium income of Rs 40 lakhs and a yearly average of Rs 20 lakhs of claims paid was built. Bharat has ever stood like a rock through storms of war calamities floods famines earthquakes depressions foreign competition and financial slumps. Even in these war years Bharat's march of progress and prosperity continues unimpeded.

The bonus declared for the quinquennium ending in Decem-

ber 1938 was Rs 22/8 per Rs 1 000 on whole life and Rs 17/8 on endowment policies.

The current rate of intermediate bonuses stands at the handsome amount of Rs 20 and Rs 16 respectively.

Bharat offers a wide range of different policies to its assureds some with quite unique features and all affording great advantages and facilities.

The company is fortunate in having on its board eminent Indian industrialists led by the Chairman Seth Ram Krishna Dalmia. Bharat is one of the foremost and strongest life offices in the country as will be seen from these figures.

Total claims paid exceed Rs 2 Crores 36 lakhs. Life Fund exceeds Rs 2 Crores. Total Assets Rs 2 Crores & a half.

Seth R. Dalmia
Chairman

THE BINOD MILLS CO., LTD., Ujjain, (C.I.)

(Including the Deepchand Mills)

UNDER the patronage of His Highness Maharaja Scindia of Gwalior the Binod Mills Company was promoted in the year 1913 with a Capital of Rs 21 00 000. The well known firm of Seth Binodiram Lalchand, Bankers and Jagirdars (Jhalawar State) are the Managing Agents and own more than 60% of the total shares. The Mills are one of the biggest in Central India giving employment to more than 4 000 persons. There were in the beginning, 19 912 spindles and 480 looms. The Company acquired the Deepchand Mills (formerly the Sipra Mills) in 1935 and has since spent large sums on replacement of much of its old machinery. As a result of the progressive policy of the Managing Agents the Company now runs 51 236 spindles and 1 340 looms. Yearly production is 80 98 986 lbs of yarn and 78 84 075 lbs of cloth. There is a complete dye and bleach house and a printing plant. The Mills have their own iron and Brass foundry.

The products of the Mills have wide sales in Gwalior State U.P. and the Punjab and are well known for their durability. The Company has its branches and agencies at Cawnpore Delhi Agra and Amritsar. Saris Dhotis Susis Shirtings Coatings Chaddars Towels Dosuti, Canvas Barrack Sheetings Mosquito Netting are its chief manufactures. There is an absorbent cotton wool plant having an output of 10,000 lbs. per month. An anti gas-fabric plant is a recent addition.

The Mills are managed by Rai Bahadur Vanijya Bhushan Seth Lalchand B. Sethi partner of the Managing Agents firm. Since he took over management in 1928 the Mills have made steady progress

both in profits and production. The Rs. 100 share is at present quoted about Rs 400 in the share markets at Indore and Ujjain. Rai Bahadur Seth M. B. Sethi who is senior partner of the Managing Agents firm is the chairman of the Board of Directors. The other directors are Sir Hukamchand Sarupchand Kt. Vanijya Bhushan Seth Nemichand B. Sethi Seth Bhanwarlal D. Sethi, Seth Onkarmal Chunnilal Seth Javerilal Gangwal and R. C. Jall, Esqr. M.A., LL.B.

BOMBAY CYCLE & MOTOR AGENCY LTD. — Bombay.

BOMBAY'S OLDEST MOTOR DEALERS

ONE of the earliest pioneers of the Motoring Industry in India and certainly the oldest existing Motor Agency in Bombay is The Bombay Cycle & Motor Agency Ltd which had its beginnings in the Bombay Cycle Agency formed in 1885 to carry on the business of importers of bicycles. By 1900 the firm had come into prominence as Agents for a number of well known English Continental and American makes of motor cars and motor cycles. In 1914 the Company secured the Sole Agency of Dodge Cars and Trucks and the concern was converted into a Limited Company in 1919. When in 1927 the Dodge Corporation was amalgamated with the Chrysler Corporation the Company also acquired the agency for Chrysler cars.

Kharshedji Limji Esq J P

Business expansion continued. In 1931 the Company acquired the Wolseley premises on Sandhurst Road in the very heart of the Motor Capital of Bombay and made it a striking building with extensions and improvements. In 1931 too the Management of the Bombay Cycle & Motor Agency Ltd decided they should start an Assembly Plant of their own in Bombay. Indian workers were trained up to turn out just as good work as any factory finished product in England and America. The Assembly Plant of the Bombay Cycle & Motor Agency Ltd is run so efficiently that it would be most difficult for the keenest and most experienced observer to detect any difference between a Car assembled, painted and finished in the Company's Assembly Plant and one received direct from the foreign factory. The Assembly Plant turns out five to six complete cars a week.

The driving personality behind the Company has been since 1900, Mr Kharshedji Limji. He became by hard work and force of character the Agent and Director of the Company in 1919. Mr Kharshedji is still at its head.

1885 to 1942—57 years of continuous business is the proud record of the Bombay Cycle & Motor Agency Ltd.

THE BOMBAY PIECE-GOODS NATIVE MERCHANTS' ASSOCIATION

Established in 1881 this Association is one of the oldest commercial institutions representing the piece goods trade in the hands of the native merchants in the city of Bombay. It has had close connections with the Bombay Chamber of Commerce and with several reputable European business houses. This close collaboration resulted in the framing of mutually advantageous arrangements and in the general improvement of trade.

From 1882 to 1915 the Association made periodical contracts with steamship companies by which members of the Association were charged a fixed rate of freight for the carriage of piece goods from Lancashire to Bombay. A rebate was also allowed to the Association. The Association then entered into a contract with the Bombay Chamber of Commerce for the mutual safeguard of interests.

Mr D M Thackersey
J P

Being the oldest institution of its kind in India the Association is recognised for the purpose of reference in matters relating to the trade not only by the Local Government but by the Central Government as well.

Many a prominent merchant has at one time or another been the Association's chairman.

The present office bearers are —MR DEVIDAS MADHOWJI THAKERSHY J.P. *Chairman* MR PURSHOTTAM MULJI KAPADIA (ADVOCATE) *Vice Chairman* MR PADAMSI DAMODAR GOVINDJI J.P. MR HIMATLAL TRIMBALKAL MUNI *Honorary Jt Secretaries* MR MULJI LAXMIDAS *Hon Treasurer*

The objects of the Association are as under —

To encourage Piece-Goods Trade in Bombay by creating unanimity and friendly feelings amongst merchants to safeguard and protect its interests and to debate upon matters relating to trade.

To attempt as far as possible to remove all obstructions and difficulties relating to the business of Piece-Goods so that it may go on smoothly.

To collect and examine statistics relating to Piece-Goods Trade and to correspond with public bodies and departments and trading companies and firms with a view to carry out its objects or any of its objects.

If disputes are submitted to the Association for arbitration by any trade organisation or a merchant the same to be decided by appointing arbitrators or arbitrator from members.

And generally to do anything and everything necessary or expedient to carrying out the above objects.

THE BOMBAY SHROFFS (BANKERS) ASSOCIATION, LTD.

233, Shroff Bazar, BOMBAY

FOUNDATION

THIS association was founded in 1910 under the name and style of the Bombay Shroffs (*Indigenous Bankers*) Association. It has now been converted and registered as the Bombay Shroffs (*Bankers*) Association Limited as from 17th October 1941.

Sir Chunilal B. Mehta,
J.P.
(President of the Association)

THE BOARD OF DIRECTORS

Sir Chunilal Bhaichand Mehta (*President*)
Mr Mohanlal Ambalal Parikh (*Vice President*)
Mr Jayantilal Maneklal Shah (*Hon. Secretary*)
Mr Popatlal Hakamchand Shah (*Hon. Secretary*)
Mr Shrivall Chhotatal Shah Mr Mangulal Trikamal Mr Kalyandas Bhaidas Shroff Mr Manilal Tribhovandas Mr Shankarlal Chandulal Mr Ganpatlal Rughnathdas Mr Bhagvanji Bhanji Mr Vitthalrai Manilal Mr Kantilal Keshavlal Mr Nagindas Govardhandas Shah Mr Bhikhabhai Laxmidas Mr Lalchand Harachand Mr Chhotatal Mansukhlal Mr Chhotatal Sankleshwar Mr Jethalal Jekisandas Mr Shantilal Maganlal Mr Chimanlal Kevaldas Mr Mohanlal Maganlal Mr Nagindas Gordhandas Mr Lalubhai Karamchand Mr Nagardas Ranchhodas Mr Tarachand Narbheram Mr Manilal Ramchand Mr Jayantilal Gangadas Mr Hiralal Vallabhbai Mr Dhurajlal Gopalji Mr Chunilal Vrajlal Mody B.A. (*Secretary*)

This association is working for the common and collective good of the shroffs (*Bankers*) throughout India. Its all India representative character is accepted by the Provincial and Central Governments Reserve Bank and other bodies and institutions.

OBJECTS

The objects of the association are To foster harmony amongst Shroffs and commission agents and to promote and protect their interests to correspond with public bodies and others on matters pertaining to the objects of the association to make representations to Local and Central Governments on any matter affecting trade commerce banking and industry of the country to make rules and regulations for Hundis to hear and decide matters referred for arbitration.

The association supplies Hundi forms to its members as well as to non members almost at the cost price so as to bring into use one standard Hundi form throughout India.

THE firm of W H Brady & Co Ltd the present head of which is Sir Joseph Kay who has associated with him a Board of whole-time service Directors viz Messrs Baker Motr, Ferard, Slater-Eventt and Jenkins dates back to the year 1895 when the late Mr Bradbury in conjunction with the late Mr W H Brady, commenced business in partnership as Machinery Agents and Importers and advisers on all matters technical relating to the Cotton Textile Industry. The business soon assumed considerable proportions and as was to be expected, progressed rapidly. The Managing Agency of one or two Mills was taken over by them some 40 years ago.

FAST PROGRESS

In the year 1913 the firm was converted into a private limited liability Company under the name and style of W H Brady & Co Ltd with its head office in Bombay and Branches at Calcutta Cawn pore Madras Ahmedabad and Manchester England. As the busi-

W. H. BRADY &

ness had still further progressed the restrictions in the Articles of Association which kept the Company in close hands were lifted in 1928. The Capital was also increased and today it is a joint-stock Company without any restrictions on its shares.

The operations of the concern now cover a very wide field but for many years its main business was closely connected with the cotton textile trade in India and many large contracts have been undertaken. In several cases orders for complete Cotton and Woollen Mills have been placed in its hands and executed to the satisfaction of the purchasers. The Textile Machinery Import Department is keenly alive to all changes which take place in textile methods and is always ready to advise on up-to-date systems and to supply machinery in keeping with the changes which constantly take place in the manufacture of cotton and silk goods of all descriptions.

ENGINEERING SECTION

Messrs W H Brady & Co Ltd have a very large general engineering connections. They carry comprehensive stocks of the manufactures of a number of British firms who are generally recognised as makers of the highest repute amongst them may be mentioned Hopkinsons, Ltd of Huddersfield Herbert Morris Ltd of Loughborough, G & J Weir Ltd of Glasgow The Renold & Coventry Chain Co Ltd The Hoffmann Mfg Co Ltd Geo Kent Ltd etc etc. They also act

as Agents for Duncan Stewart & Co Ltd of Glasgow having supplied to India a number of complete sugar factories fabricated by this firm

TEXTILE INTERESTS

In addition to the large machinery business which Messrs W H Brady & Co Ltd do they are also Managing Agents for The Colaba Land & Mill Co Ltd The New Great Eastern S & W Co Ltd. The New City of Bombay Mfg Co Ltd and also The Empire Dyeing & Mfg Co Ltd so that the Company is directly and indirectly closely connected with the textile trade

SUGAR INDUSTRY

In their Agency and General Department they have control of the management of The Belapur Co Ltd This Pioneer Company manufactures pure Indian sugar from cane which is grown entirely on its own estate by the most modern methods and is one of the largest of its kind

COMPANY, LTD.

BOMBAY.

in India This Company has recently erected a new factory which is the most up-to-date in India They also control the Caxton Press which undertakes all kinds of printing and book binding work

IMPORT AGENCIES

Messrs W H Brady & Co Ltd also handle several important agencies for goods which are consumed in India and have built up a very extensive connection with the Bazaar Dealers who import proprietary articles such as Nicholson Files Nettlefold Screws and Signode Steel Strapping etc

INSURANCE

Insurance is another important line of business with which the Company has been connected for a considerable number of years They have an expert staff control agencies of first class British and Indian Insurance Companies and are always in a position to give advice on and transact practically all classes of Insurance business with the exception of Life insurance

In a brief resume of the Company's operations of this description it is impossible to enumerate a complete list of firms for whom they act as representatives but the Company is well known to be a progressive and live House with experts in each branch and is always open to handle lines of merchandise both for import and export

THE BRITISH INDIA S. N. CO.

THERE is probably no shipping company with Indian trade and connections which from its very start has been so closely connected with India or whose enterprise in the early days was of such mutual benefit to the Company and to India as transport as the British India Steam Navigation Company or as it was first known, the Calcutta-Burma Steam Navigation Company. The Company was founded in Calcutta by Mr. Robert Mackenzie who was engaged in a general merchanting business there and who took into partnership a young man Mr. William Mackinnon. The partners were building up a considerable business and for the shipment of their goods to other parts of India they used whatever coastal shipping was available and had from experience full knowledge of the difficulties and delays which at that time hampered Indian trade. In 1854, the East India Company called for offers for a contract for transport of mails, passengers and cargo by steam between Calcutta and Burma, and Mackinnon and Mackenzie raised sufficient capital between them and amongst their friends to allow them to tender for the contract. When they secured this, they bought two small steamers, the *Baltic* and *Cape of Good Hope* and formed a Company for the running of the service under the title of the Calcutta-Burma Steam Navigation Company. It began with a fortnightly service between Calcutta, Akyab, Rangoon and Moulmein.

B I Liner Amra built just before the War

This it will be remembered, was at a time when steam transport in India and the East especially was struggling against many difficulties. The engines of those days had low efficiency and a high coal consumption. Docking and repair facilities for steamers were also lacking and although the new Company was not the first to attempt steam transport in Indian waters others had lost heavily on their venture. The Calcutta and Burma Steam Navigation Company however began to forge slowly ahead, and although they were hard hit by the loss of two of their steamers, the "*Cape of Good Hope*" being sunk by collision in the Hooghly and a new ship the *Calcutta* wrecked on the Wicklow Coast on her way out from the builders, two new steamers were added to the fleet and orders were placed for two more.

In 1866 Mackinnon and Mackenzie offered not only to renew their existing mail contract but also put forward a project for the new development of other lines round the Indian Coast and to adjacent ports. They proposed to run one line to ports of the Persian Gulf and others eastward to Singapore and Malacca Straits ports. The proposal was so daring that there was considerable hesitation and doubt as to the possibility of a contract being carried out. Up to that time no steamer had been able to continue an all-the-year-round coastal service

against the seasonal monsoons, while the conditions of postal services, especially round the Persian Gulf, were in a state of chaos. Postal arrangements had to be concluded with a number of Gulf Chiefs, who could give no guarantee of regularity or safety and had to be bribed or otherwise induced to carry out their part of the work by tribute payments. Piracy was rife in the Straits and Seas of Singapore and Malacca and even steamers were not immune from attack, especially on the fairly frequent occasions when engine breakdowns left a steamer helpless against the attack of swarming pirate prahus.

An early B I Liner Rasmara

These dangers and difficulties were thought to be more than any Company could overcome, but at last the Supreme Council of the Government Department was sufficiently convinced to make a contract and give the new services a trial. The name of the Company was taken over to the one which it has carried ever since—the British India Steam Navigation Company, as it is generally known over the whole of the East, the B I.

Further troubles were met, especially when five steamers including two completely new, were lost in cyclones but the lost ships were replaced additional ones added and the mail sailings increased.

In 1869 the opening of the Suez Canal brought a flood of competition from new Companies and steamers which broke into the established trade of the B I with the advantage of using what was then regarded as the greatest advance in steam navigation the new and economical compound steam engine. The B I practically had to re-engine the whole of their fleet but were now able to send their ships through the Canal to England to have this work carried out. This led to the opening of a new service between England and the East and another between London and East Africa. In 1881, a contract was made with the Queensland Government for a monthly service between London and Brisbane by the Torres Straits. Objections were raised to non-Australian Companies being engaged in this trade, so the B I in 1886 acquired an interest in the Australian Steam Navigation Company which, amalgamated with the Queensland Steam Shipping Company formed the Australasian United Steam Navigation Company which remains one of the associated companies of the B I.

The story of the Chairmanship of the late Lord Inchcape and the negotiations under him which led to the amalgamation of the B I with the P & O in 1914 is all too recent and well known a history to repeat here. From the earliest days of the B I their services have always fitted in usefully with those of the P & O and the amalgamation has only resulted in showies being more closely drawn. Up to the outbreak of war the B I services were spread in a vast network over the whole of the East and centering on India extended to the Straits and Far East down to Australia, Westward to the Persian Gulf, Ports of East Africa and to England. The Company had then more ocean-going mail, passenger and cargo steamers under its House Flag than any other shipping company in the Empire. This in itself is striking evidence of the success of a little Company which was founded less than a century ago with two small steamers, and that very extension of the Company's enterprise is evidence also of the tremendous expansion in which they have shared of India's sea transport, trade and commerce. Nothing may be said now of the work which the Company's ships, sea and shore establishments, are engaged in the war but there will certainly be a great deal of that to be told after our day of Victory has come.

Certain it is that now as in the past, India has good reason to be proud of the record and service of the Indian-born B I.

THE BRITISH INSTITUTES

THE Institutes specialise in preparing ambitious men and women for successful careers in Engineering, Business, the Professions and Government Service. In particular the Engineering Profession holds unusual opportunities for highly remunerative employment, and since the outbreak of War the demand for trained men has outstripped supply. Those who are working at the bench or in any other subsidiary Engineering position, and in any other positions which are crowded and low paid, often think that well paid jobs are beyond their reach but the Institutes have proved otherwise and have numerous regular successes to their credit during their many years establishment as a Training Centre for India, Burma and Ceylon.

THE BRITISH INSTITUTE OF ENGINEERING TECHNOLOGY makes the way easy to the man of small means to obtain a University degree or a Professional Qualification in any branch of Engineering and also to qualify for the highest positions in the Engineering Profession and Government Service.

The B. I. E. T. is recognised in all quarters as the leading Training Institute of its kind. The system of tuition is entirely by correspondence although students are invited to visit British Institutes House in Bombay whenever they are in the neighbourhood to obtain personal advice, information and assistance. If students are unable to call they are welcome to write as frequently as they wish to their Tutors and Advisors for additional and personal assistance. The obvious advantage of the British Institutes system is that the student can study in his spare time for a few hours a week, and he is not retarded or hastened by other students, since each student is trained individually according to his abilities and position. The subjects taught by the B. I. E. T. include Building and Civil Engineering, Mechanical, Electrical, Radio, Talking Pictures and Television Engineering, Automobile and Aeronautical Engineering, Textile Technology and Manufacture, Irrigation, Agriculture etc. In addition students are prepared for Government Service Examinations, and for London University and Cambridge School Certificate Examinations.

The Prospectus Engineering Opportunities which gives full details of courses of instruction is sent free to all enquirers on application.

THE BRITISH INSTITUTE OF COMMERCE & ACCOUNTANCY which is associated with the B. I. E. T. prepares students for successful careers and for recognised examinations in Commerce, Accountancy, Secretaryship, Banking, Insurance, Salesmanship, Advertising, Journalism, General Education, etc. The Prospectus Commercial Opportunities is sent free to all enquirers on application.

The fees charged by the B. I. E. T. and B. I. C. A. are moderate. The Institutes offer a unique Guarantee that tuition fees will be returned if the student is not satisfied with the tuition at the end of the course, or if he fails to pass his recognised examination. This remarkable and Legal Guarantee definitely safeguards the student and proves the confidence which lies behind the British Institutes Organisation as a result of their successes.

All interested persons are welcome to visit British Institutes House, Bombay and to see the Principal, Mr. J. Lee, B.Sc. (Lond.) for advice and guidance on careers in all branches of Engineering, Business, the Professions and Government Service. Parents are particularly requested to communicate with him regarding careers for their sons.

A special feature of the British Institutes is their Students' Employment and Welfare Department which secures positions with good pay and practical experience for students while they are progressing with their studies.

We began over 80 years ago in the ancient and historical Seaport of Cochin now a Major Port of India We have expanded with the development of the Port and have the honour of an appointment as Boat builders in Ordinary to H E The Governor of Madras

Our Workshop and Press are at Cochin while our Boat building Yards and Foundry are at Vypeen on the opposite shore We construct Wooden and Steel ships of about 1000 tons build Motor Tugs Barges and Boats Speed Launches Sailing Cruisers Dinghies Life Boats etc At our ship building yards at Vypeen we undertake repairs to Steamers Machinery etc besides the manufacture and fabrication of Structural Steel Works Castings Iron Pipes and special Non ferrous and Alloy Castings, and also Industrial Machinery for Soap Textile Tea Rubber and Cor Factories Sugar Mills etc

At present all our resources have been placed at the disposal of the Government and we are actively engaged in the execution of Naval Admiralty and Government of India Supply Department orders

Due provision has been made to meet the enlarged Engineering requirements of the Country in peace time

The CENTRAL BANK

THE idea of starting a purely Indian bank was first conceived in the year 1911 by the late Sir Sorabji N Pochkhanawala who was fired with the ambition to venture into a region which was practically the monopoly of British and foreign institutions. He had to his credit some years practical experience at the Chartered Bank and also held an important position for five years at the Bank of India.

THE DREAM FULFILLED.

The Central Bank of India came into being on the 21st day of December 1911. From the very start it had to face many difficult situations which were at once in the nature of an opportunity and a trial.

The Bank was singularly fortunate in having Sir Pherozeshah Mehta as its first Chairman. He rendered invaluable assistance to Mr Pochkhanawala in guiding the destinies of the Bank during the earlier years.

Frequently the Bank has had to encounter squally weather but thanks to its sound general policy and the prudence of the Directorate and the Management it not only withstood all the shocks but actually emerged stronger and sounder on each occasion.

In 1923 two epoch making events of great significance took place namely the Central Bank's assumption of control over the Union Bank of India and the amalgamation of the Tata Industrial Bank and the Central Bank.

The Union Bank had been started in 1918 by a few Marwar merchants with a huge subscribed capital of Rs 4 crores. But the Bank did not get on well and it looked as if it would be compelled to close down. Mr Pochkhanawala came on the scene to rescue it. Negotiations were soon completed and the Central took over the management of the Union Bank. That the Union Bank has profited enormously is proved by its rapid recovery and subsequent progress.

The late Sir Sorabji N Pochkhanawala

Mr H C Captain.

OF INDIA, LIMITED.

The amalgamation of the Tata Bank with the Central is another remarkable episode. Established in 1917 the Tata Bank experienced a sudden and inexplicable breakdown in 1923. Mr Pochkhanawala boldly took the initiative and mooted the idea that the Central might absorb the Tata Bank. The amalgamation was a signal triumph as is proved by the unbroken record of successes which attended the Central Bank in subsequent years.

Prior to the advent of the Central Bank all banks used to confine their activities to banking operations pure and simple. Of the striking features in the Central's comprehensive scheme of national service may be mentioned the Home Savings Scheme, the Safe Deposit Vault, the Executor and Trustee Department, Depositors' Benefit Insurance, the Ladies' Department and the Cash Certificates.

THE PASSING OF A GREAT FINANCIER

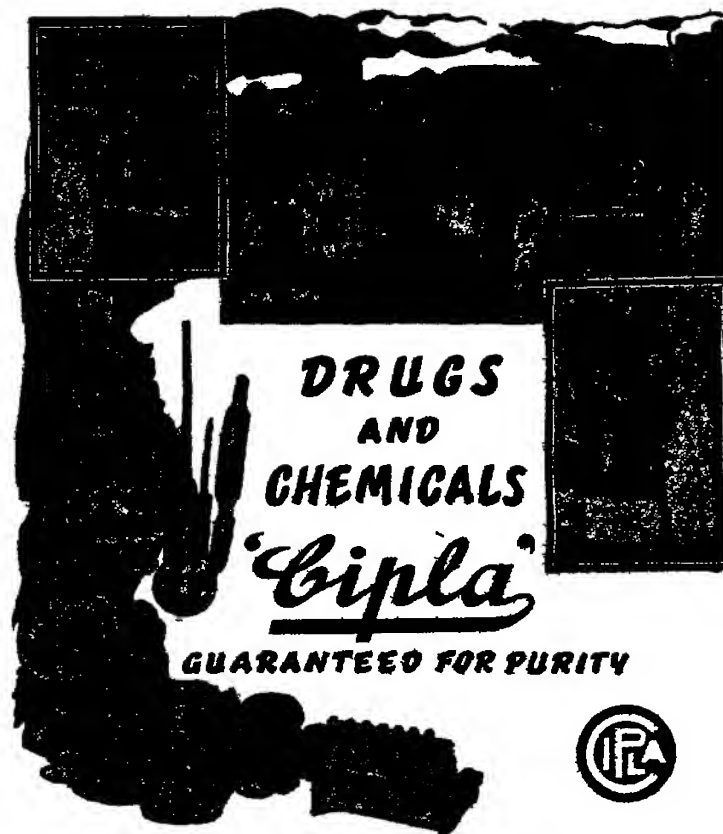

In 1937 Sir Sorabji Pochkhanawala, the founder manager of the Bank, passed away. As *The Times of India* once pointed out, there is no single person in India today to whom Indian indigenous banking owes a greater debt of gratitude than to Mr Pochkhanawala. On his death the Chairman of the Bank, Sir Phiroze Sethna, was appointed Managing Director and Mr H. C. Captain, the Secretary of the Bank, was appointed Manager. On the death of the Honble Sir Phiroze in 1938 the chairmanship passed on to Sir H. P. Mody, while Mr H. C. Captain became the General Manager. On Sir H. P. Mody's becoming Supply Member Government of India, Mr Haridas Madhavdas was appointed Chairman of the Bank and Mr H. C. Captain its Managing Director. In charge of Mr Captain the Bank is today successfully weathering all the storms of a war-torn world.

RETROSPECT

Out of the tiny acorn sown in 1911 has sprung up the mighty oak which we witness today with its branches spread throughout the length and breadth of this vast sub-continent. While adhering to the orthodox canons of sound banking, the Central has also been progressive in providing better and more varied facilities for the benefit of the public.

Mr Haridas Madhavdas

NATIONAL INDUSTRIAL PROGRES.

**DRUGS
AND
CHEMICALS**
Cipla
GUARANTEED FOR PURITY

**CHEMICAL, INDUSTRIAL & PHARMACEUTICAL LABS. LTD.**

" CIPLA "

• India's Foremost Chemical & Pharma- ceutical Laboratories

THE Chemical Industrial & Pharmaceutical Laboratories Ltd briefly known as Cipla was registered in August 1935 as a public limited Company and officially inaugurated in April 1937 when a number of preparations were placed in the market for the use of the medical profession and the public

During the short period of its existence Cipla has made rapid strides in the field of chemical and pharmaceutical industry under the able guidance of its Technical and Managing Director Dr K A Hammed B.Sc. MA Ph.D AIC FCS M.L.C

The house of Cipla is wellknown for its high class pharmaceutical and fine chemical preparations. New products have been made for the first time in India such as Pyridin B-carboxylicacid diethylamide a product sold under the proprietary name of Cardiamid Cipla which has now been included in the British Pharmacopoeia under the name Nikethamide. Cipla has also succeeded in making Dehydrocholic Acid known to the public and the medical profession under the name Neocholin. Among various other chemicals manufactured by Cipla mention must be made of Nicotinic Acid, Calcium Lactate Calcium Lactobionate Ephedrine Hydrochloride Acriflavin Caffeine Sulphonamide soluble and rubrum. The manufacture of alkaloids and other active constituents from indigenous drugs is being carried on by the house of Cipla and rapid progress has been maintained. Perhaps Cipla is the only firm manufacturing Emetine Hydrochloride in India and probably in the East.

Since the outbreak of War Cipla has been able to help the medical profession and the public by manufacturing and supplying many of the products which were being imported from foreign countries.

Cipla products are being extensively used in all the neighbouring countries viz Afghanistan Egypt Iran Iraq etc. Cipla has taken part in War effort by supplying various medicines and drugs to the Supply Dept. Government of India including some very important medicines which were not manufactured in India up to now.

Besides the manufacture of pharmaceutical products and fine chemicals research work on a number of problems is being ceaselessly carried on by experienced and well-qualified chemists.

THE CHITALDRUG OIL & INDUSTRIAL COMPANY, LTD.

Registered Office—CHITALDRUG (Mysore State)

THE Chitaldrug Oil & Industrial Co. Ltd. was started with the object of manufacturing edible and non-edible oils of quality and oil cakes graded for cattle feeding and manure and with the object of investigating certain possible substitutes for Olive oil, invalid foods and with the object of manufacturing on a commercial scale products of high protein content.

Photo taken after Rajamanjra Pravina K V Ananiharaman Esq B A Minister for Revenue and Finance laid the foundation stone to the Company's factory buildings at Chitaldrug

The Company has a very influential and efficient directorate with Mr S Veerabappa B A LL B President District Board Chitaldrug as Chairman

The rich resources of raw materials available in the locality the liberal policy of the Government of Mysore in affording several concessions to industrial enterprises, the efficient management of the Company by Messrs Jaidas & Co all augur well for the success of this venture. The availability of large quantities of oil seeds in and around Chitaldrug which today are being exported to outside markets and the large imports of oils and oil products into Mysore indicate the great scope for the successful working of the Company.

His Holiness Sri Jayadeva Jagadguru Murugharajendra Mahaswami; His Holiness Jagadguru Sree Sivakumara Raja Desikendra Mahaswami of Singere Mutt and Sir Mirza M Ismail Kt C I E O B E Ex Dewan of Mysore, have all blessed this company and lent their support to the new venture. Mr J Md Imam B A LL B Minister for education Mr H B Gundappagowda B A B L Minister for public Health and Local Self Government Mr D H Chandrasekharaiya B A B L the first president of the Reformed Legislature in Mysore and B S Puttaswamy B A B L M L C and other prominent people of Mysore have spoken very highly about the prospects of this company.

The Government of Mysore have waived the conversion fine on the land acquired for the company's factories and buildings.

THE HOUSE OF CHINOYS

Sir Rahimoola M. Chinoy

ing practically one-fourth of India. In 1933 Refrigeration was added to the franchises already held by this firm. Most of the important Mills Hospitals Factories Schools Government and public institutions have since been equipped with one or another type of Frigidaire installation supplied by the Bombay Garage.

Mr. Nurmahomed M. Chinoy

AMONG the famous Houses Serving India The Bombay Garage can easily claim the reputation of being the leading Automobile House. This premier position and reputation is the result of 38 years of steady and consistent progress and represents the perseverance foresight and character of the men behind the organization.

The immense popularity Chevrolet today enjoys in Western India is due to the thorough management and efficient service established by this firm through its network of Dealer and Branch organizations cover

Sir Sultan Chinoy

What India owes today for Radio communication is also due to this firm because it was in 1922 that the Company obtained the representation of Marco

n's Wireless Telegraph Company Ltd as the Sole Agents for external communications and the Entertainment field. The establishment of the Indian Radio Telegraph Company Limited (now known as The Indian Radio & Cable Communications Company Limited) for whom they act as Secretaries & Treasurers is noteworthy in that this is the first Indian Company to be entrusted with a service of such public utility and importance.

1904

Board of the Imperial Bank of India. He was the President of the Federation of Indian Chambers of Commerce and Industry. He is also connected with several benevolent and philanthropic institutions.

To Sir Sultan Chinoy Managing Director of the Company is due the honour of having been the pilot of the House since its inception. His dynamic personality, his business ability and his farsighted policy have earned for him a great name in the business world. Sir Sultan is also very actively interested in important public and civic affairs. He too was Mayor of Bombay. He is a Director of the Reserve Bank of India and is connected with numerous other institutions.

Mr. Nurmahomed M. Chinoy, the third director, in addition to making his own contribution to the development of the firm, has devoted considerable time to the problem of Transport and Roads. He holds a directorship of the Central Bank of India, is Chairman of the Motor Manufacturers and Importers Association Limited, President of the Federation of Motor Transport Development Association, Member Motor Vehicles Insurance Committee. He led a deputation of Motor trade interests to the Government of India. Mr. Dostmahomed I. Chinoy is director in charge of the Company's business in the Southern Mahratta Country with head quarters at Poona.

Gulamhusein F. Chinoy is Director in charge of Finance and Mr. Habib N. Chinoy Director in charge of Refrigeration.

The House of Chinoy is a fitting memorial to the late Mr. Fazalbhoy M. Chinoy whose name the company perpetuates by worthily following in the footsteps of its illustrious founder.

As in the Industrial World so also in Civic and Public affairs the House of Chinoy has played an important part and enjoys wide popularity and universal esteem.

The Chairman of the Company, Sir Rahimtoola M. Chinoy, is a Director of several important Joint Stock Companies, was Mayor of Bombay, is a member of the Council of State and is the present Chairman of the local

1942

THE COMMONWEALTH TRUST, LIMITED

Manufacturers of Tiles, Textiles and Steel Safes

Indian Head Office—Calicut, Malabar

THE Commonwealth Trust Limited was instituted in London in 1919 by arrangement with the Secretary of State for India for taking over and administering certain factories in Madras Presidency. The Company having been formed as a practical expression of the principle that commercial development in India should be in the interests of the inhabitants the dividend payable to its shareholders is limited to 5% per annum and all surplus profits earned in India go to a body of Trustees to be used for religious and charitable purposes in India.

The Company operates on a similar basis in the Gold Coast West Africa.

The Company's predecessors commenced operations in 1859 to find employment for the local population handloom weaving was then as now a popular occupation in Malabar and the material known as calico is said to be named after Calicut. They interested themselves in developing this particular industry and it is worthy of mention that the colour known as khaki is said to have been originated by the Company. Lord Roberts saw this khaki on the Company's premises and recommended its adoption by the Army.

In 1866 the Company started the manufacture of roofing tiles at Mangalore and several tile factories were erected by them in the following years.

This expansion necessitated the starting of a workshop and in 1874 the present engineering works was opened in Mangalore. In 1890 the Hosiery Factory was started in Mangalore and in 1902 the Embroidery Department was opened in Calicut.

With the general development of the mill industry it was decided to open a large powerloom factory at Cannanore for the manufacture of popular priced shirtings and suitings.

A Section of the Handloom Factory

The Commonwealth Trust, Ltd. have now 17 Factories and branches employing nearly 5 000 employees to whom large sums are distributed every year in the form of Sick and Maternity Benefit Provident and Pension Funds. A Crèche is attached to each Factory and at Cannanore a free Clinic is maintained under the supervision of a European Doctor.

The Company has its own branches for the sale of Textile and Hosiery productions at Madras and Ootacamund with stockists and agents in all the main cities and towns throughout India Ceylon Burma Straits Australia Africa etc.

More detailed information regarding the various manufactures is given below.

Textiles

Handloom Factory Calicut

Superior handwoven CURTAINIA furnishing fabrics and COMTRUST dress materials suitings shirtings wool and cotton rugs wool blankets towels and household linen of all descriptions.

Embroidery Department Calicut

The exquisiteness of the work of this department has to be seen to be realised.

Coloured suitings shirtings bed sheets towels table cloths, dusters filter bagging tent cloth etc.

Hosiery Factory Mangalore

All classes of Men's Ladies and Children's underwear and Sportswear in cotton wool and silk.

Dye works Calicut

Only the very best available dye stuffs are used.

Tiles

The seven Tile Factories are well equipped with up-to-date machinery and the regular output of Roofings Ceilings Floorings Bricks etc. is large enough to meet a nationwide demand.

Engineering Works, Mangalore

Although primarily established to service its own factories the Company specialise in the manufacture of Cash Chests Treasure Safes and Strong Rooms. Outside repair work is also undertaken.

CTL Tile Factory Feroke

THE CONSOLIDATED PNEUMATIC TOOL COMPANY, LTD.,

Contractors to the British Admiralty,
War Office, Air Ministry, India Office
and Railways, Foreign Governments
and Railways.

Branches all over the World

WHENEVER the world's expert builders want a reliable steel structure they specify the Boyer Pneumatic Riveting Hammer. Towards the end of the nineteenth century Boyer perfected the pneumatic riveting hammer which has since been steadily and consistently improved by the Consolidated Pneumatic Tool Company until today it has become the world's standard riveting hammer for steel bridge construction.

The Boyer riveting hammer is perhaps the most notable of the Company's products. If any proof of its superiority were necessary the fact that ten million rivets were put into the hull of the *Queen Mary* with this hammer and that most of the world's famous bridges have been riveted with it proves that it is still the world's pioneer riveting hammer.

The world's famous bridges built with the tools of the Consolidated Pneumatic Tool Company include Sydney Harbour Bridge, San Francisco-Oakland Bridge, Chelsea Bridge (London), Tyne Bridge (Newcastle) and the Khartoum-Omdurman Bridge across the White Nile.

INDIA'S GREATEST PIPE LINE

The rapid growth of the City of Bombay called for the laying of a new pipe line. This great undertaking involved over 110 miles of water pipe and the construction of 150 bridges. Thanks to C P Pneumatic Tools the project was completed speedily and economically. Caulking hammers of the Consolidated Pneumatic Tool Co. enabled each workman to caulk 25 ft per hour. After caulking the interiors of the pipes were spray painted with a bituminous solution by pneumatic paint sprays supplied by the Consolidated Pneumatic Tools Co.

*Pneumatic riveter at work on the
Pipe Line*

Several hundred of the well known Boyer Riveting Hammers and Boyer B K Chipping Hammers were used on the work. Compressed air was supplied from steam driven portable air compressors.

PROUD PROGRESS

The fact that the world's largest steel structures have been built with the tools made by the Consolidated Pneumatic Tool Co. Ltd. which has been established for close on half a century is the best guarantee of the efficiency and reliability of the Boyer Hammer and its progeny. The products of the Company range from light tools for aeroplane manufacture weighing a few ounces and running at a speed of 12,000 revolutions per minute to rock drills weighing a hundredweight or more used in mining or tunnelling and air compressors weighing several tons.

The DALMIA

GROUP OF INDUSTRIES

THE Dalmia Group of Industries is composed of different companies manufacturing goods and offering services diverse in character. The Group comprises a number of sugar factories, collieries, cement factories, a paper mill, a chemical plant and public utility concerns including a Railway, an Insurance Company and a Bank. The activities of Seth Ramkrishna Dalmia, the founder of these industries, began with the establishment of a 1600-ton sugar factory known as THE SOUTH BEHAR SUGAR MILLS LIMITED at Bihta near Patna. He put up in quick succession two other sugar factories which rank among the largest of their kind in the country and his group of factories turn out nearly 57 000 tons of white sugar per year. With unerring instinct he visualised the commercial possibilities of Dehri, then an obscure place and made it the seat of ROHTAS INDUSTRIES LIMITED. It has steadily grown into a well-planned town beautifully electrified, laid out with filtered water and having picturesque lawns, parks and wide cement roads.

Rohtas Industries Limited—runs with Indian labour and under Indian supervision a 500-ton Cement factory, a 2 000-ton Sugar factory, a Paper mill producing about 10 000 tons of paper per year and a large Chemical plant.

Dalmianagar with Cement Factory in the background

Turbo Alternators supplying power to this industrial area and also to the Bihar Government Irrigation and Power Scheme utilise steam at 400 lbs and 800° F and permit bleed steam at 120 lbs and 40 lbs pressure to be used for the various process works in the factories. The Power House has one of the tallest steel chimneys in India rising to a

majestic height of some 400 ft. It supplies electrical energy to the towns of Dehra and Sasaram for household consumption and also to a number of villages for purposes of irrigation.

The Cement Factory comprising a single unit plant produces from stone quarried from the neighbourhood by the wet process about 500 tons of finished cement per day. The giant rotary kiln is about 12 ft. in diameter and 500 ft. long.

The Sugar Factory produces on an average about 200 tons of the finest quality sugar per day by the double carbonation process. A ropeway has been erected at considerable expense for the transport of sugarcane from the canalhead right up to the cane carrier. On the other side of the Son river the Company has acquired large tracts of land for the cultivation of sugarcane.

The Paper Factory produces chiefly from bamboo several varieties and grades of paper. So far it is the only factory in India manufacturing special paper like Duplex (Carton paper), Triplex (for tickets) and Machine glazed boards.

The Chemical Factory produces out of common salt sulphuric acid, alum, table salt, caustic soda and bleaching powder. The greater part of which is consumed in the Paper factory. A considerable

quantity of the Caustic Soda utilised in the Paper factory is recovered by a separate plant thus effecting production economy.

The Central Workshop is fitted with the latest appliances for turning, moulding &c. All sorts of repairs of machineries and accessories as well as the manufacture of spare parts are carried out.

Ample provision has been made for the welfare and recreation of the employees. There are libraries kept up to date with latest books and periodicals, free reading rooms and two large clubs providing radios, musical instruments, gymnasiums and arrangements for all sorts of indoor and outdoor games. There is a free Middle school for boys and girls and a free night school for adults. There are a spacious hospital and a dispensary providing Allopathic, Ayurvedic and Homeopathic systems of treatment. The Hospital accommodates a number of indoor patients and there is a female ward for maternity cases. The operation theatre is fitted with all modern appliances and instruments. Arrangements have also been made for the treatment of ophthalmic cases.

The town has been fitly named Dalmianagar after the name of the ancestors of the founder.

Paper Machine

*Slurry Salos and basm Cement
Factory*

Dalmia Cement Limited runs at Karachi a 500-ton cement factory to which was added another unit of the manufacturing capacity of 250 tons. The other factories of this Company each of the manufacturing capacity of 250 tons are situated at Dandot north of Lahore and at Dalmiapuram in the Presidency of Madras.

Dalmia Dadri Cement Limited runs a 250 ton cement factory at Dalmia Dadri. This factory is situated within a very short distance from Delhi.

The Dehri Rohtas Light Railway Co., Ltd. The management of this company has recently been acquired by Dalmias. Since its acquirement there has been an all round expansion of its activities

bringing about extension of its lines and an increase in goods and passenger traffic. This railway leads to the famous fort of Rohtas which is reputed to have been built by King Rohitashwa.

India Investment Bank Limited transacts all sorts of banking business. Situated as it is in an industrial town it affords banking facilities to the workers at Dalmianagar and also to agriculturists of neighbouring villages.

Kharkhari Coal Co. Ltd. and Maheshpur Colliery Ltd.—situated in the Jharia Coal fields raise excellent steam coal, a large portion of which is consumed by the Dalmia Group of factories.

The South Behar Sugar Mills Ltd. at Bihta manufactures about 500 000 maunds of best quality white sugar per year.

S.K.C. Sugar Limited at Hathwa produces by the Double Sulphitation process over 500 000 maunds of high grade white crystal sugar per year.

Dalmia Cement & Paper Marketing Co., Ltd. is a public limited company having a capital of Rs. 50 Lakhs. It is a trading concern dealing in various kinds of goods and has offices in Calcutta, Bombay, Delhi, Lahore, Karachi, Cawnpore, Madras and other places.

Dalmia Investment Co., Ltd.—A public limited company having a paid up capital of Rs. 45 Lakhs transacts business in securities on sound lines and its holdings comprise largely of securities of the Dalmia Group.

The Bharat Insurance Co. Ltd., Lahore. Since Seth Ramkrishna Dalmia's taking over control of this Company it has been making astonishing progress and writes life business round about Rs. 2 Crores every year. It ranks amongst the foremost companies operating in the country. The Life Funds of the Bharat exceed Rs. 2½ Crores. It has paid claims exceeding Rs. 2 Crores.

The Dalmia Group has 65 offices and all its employees enjoy the benefits of a Liberal Provident Fund.

DAVANGERE VANASPATI VEGETABLE OIL COMPANY, LTD., DAVANGERE

(Incorporated under the Mysore Companies Act XVIII of 1938)

AUTHORISED CAPITAL Rs.10 00 000/-

Divided into 20 000 shares of Rupees 50/- each

THE above Company has been started with the object of putting up a plant for the production of 25 tons of Vegetable Ghee per day along with Refined Castor Oil Soap and other by products as also the necessary oils for processing. It is also proposed to take up the manufacture of the other allied products in due course.

Davangere is splendidly suited for the location of the Company inasmuch as about 40 000 tons of groundnuts are produced every year in its surrounding area. The major portion of it is exported for the production of oils and Vegetable products.

The buildings are being constructed and the erection of the machinery plant is being undertaken. It is expected to commence production during the coming groundnut season under the expert supervision of the Technical Staff already engaged.

The situation of the Factory is on the Bangalore Poona Provincial Road which is at a distance of about a mile from Davangere Railway Station and about 200 miles from Bangalore. The Company has purchased about 35 acres of land for the purpose of the Factory and is one of the biggest of such concerns in India.

The Management of the Company is in the hands of Davangere Industrial Agencies Limited Davangere the members of which are important businessmen with a large experience.

The members constituting the Managing Agency Company are —
1 Messrs R. Rama Setty Cotton Merchant Managing Agent
Davangere Cotton Mills Ltd Davangere 2 Channagere Rangappa
Banker & Landlord Davangere 3 R. Lakshmanasetty Jeweller

THE HOUSE OF DEVKARAN NANJEE

THE HOUSE OF DEVKARAN NANJEE was founded by the late Seth Devkaran Nanjee J P in 1879. He was born of poor but respectable parents in 1858 in Porbandar (Kathuwar) in the Modh Bania (Hindu) community the same town and community as Mahatma Gandhi. At the age of 11 years he reached Bombay in a sailing ship in the company of his elder brother Chugondas by whom he was educated. Having matriculated in 1876 he started business. He died in 1922. To his foresight and sagacity is due the high position in which the House of Devkaran Nanjee stands to-day. It is also due to no small extent to the ability and brilliance of his youngest son, the late Mr Manoo Devkaran Nanjee who died in 1936 at the early age of 32.

The scope of the business operations of this House is both extensive and varied and in fact there is hardly an important market that is not covered by them. Being Financiers Merchants Dealers Brokers Bankers Printers and Publishers Landlords etc through their different Departments and Firms they occupy a unique place in the business life of India. Devkaran Nanjee's are one of the largest Dealers and Brokers in India in Government and allied safe Securities Shares Cotton, Gold and Silver and have their ramifications in all the principal cities of our country as well as Europe and America. One or the other of their firms are Members of the Bombay Chamber of Commerce the Indian Merchants Chamber the Marwari Chamber of Commerce Ltd the Native Share & Stock Brokers Association the East India Cotton Association Ltd the Bombay Cotton Merchants & Muccadams Association Ltd the Liverpool Cotton Association Ltd The Bombay Shroffs (Bankers) Association Ltd The Bombay Bullion Exchange Ltd the Bombay Overseas Freight Brokers Association the Grain and Seeds Brokers Association, the Property Owners Association etc. Their Head Office is situated at DEVKARAN NANJEE BUILDINGS Elphinstone Circle Fort and they also have their Bazaar Offices in all the important markets of Bombay. Their Securities firm is running under the name and style of CHUGONDAS & CO their Share Cotton and Bullion firms under the name and style of MESSRS DEVKARAN NANJEE and the other business under the name and style of DEVKARAN NANJEE & SONS.

Mr Choonlal Devkar Nanjee and Mr Pranlal Devkar Nanjee, JP are the Principal Partners of the different firms and in each of these they have two or three able associates aggregating nearly 20 gentlemen on whose shoulders dwell the responsibility of carrying on the business with efficiency and in accordance with their strict principles Mr Choonlal Devkar Nanjee has been for many years a Director and the Honorary Treasurer of the Bombay Stock Exchange Mr Pranlal Devkar Nanjee JP is on the Committee of several bodies and a Director of a number of Companies

The policy of the House of Devkar Nanjee has been conservative gradual expansion Every one of their enterprises has been preceded by years of thorough investigation and planning The founder's motto Speak the Truth Practise the Truth pervades all their undertakings

Seth Devkar Nanjee JP Founder of the House

Banking

The late Seth Devkar Nanjee was deeply alive to the utility of sound Banking institutions in India but unhappily his idea of starting one could not be put into practice during his lifetime However by their indefatigable energy and business acumen his successors fulfilled his wish and started the now well known and popular Bank the DEVKARAN NANJEE BANKING CO LTD The Bank has in all nine Offices at present six of them being in Bombay two at Nasik and a seasonal Sub-Office at Matheran The pace of progress of the Bank has recently accelerated considerably as will be seen from the following extract from the Times of India of 12th February 1942 'The steady progress of Devkar Nanjee Banking Co Ltd Bombay during 1941 was reviewed by Mr Pranlal Devkar Nanjee presiding over the fifth Ordinary General Meeting on Monday The Directors Report, adopted at the meeting showed 100 per cent expansion of

business during the year The DENABANK as it is popularly known was the first to put on the market 5 10 20 50 100 and 250 Tola SMALL SILVER BARS manufactured at His Majesty's Mint Bombay These are available from the Bank's Offices and nearly 139 other leading Banks and Dealers all over India

Insurance

In the field of Insurance also the House of Devkar Nanjee has not lagged behind The DEVKARAN NANJEE INSURANCE CO LTD has an influential Board of Directors and writes at present Life Insurance business It is under the management of an able Director in-charge and an enthusiastic Manager

Publications

The Publications of the House of Devkar Nanjee are a Weekly entitled DEVKARAN NANJEE WEEKLY MARKETS SURVEY

DEWAS STATE (Junior)

Its Industries

SINCE the present ruler took the reins of Government in 1934, Dewas has made considerable Industrial progress. Some of the main industries which have flourished are

Yeshwant Soap and Oil Factory—This factory was started about two years back with a capital of about Rs 30 000 and is perhaps the only factory of its kind in Central India. Considerable success has been achieved in the manufacture of edible and non-edible oils. The factory is on the All India list of approved contractors to the Government of India Supply Department for Soaps and Oils and has received contracts worth Rs 40 000 from the Department.

Shree Mhalsabai Cotton Weaving and Spinning Mills—These mills have recently started the Spinning Section only and have made profits. The mills are developing rapidly.

*H H Maharaja Sadasiv Rao Khase Sahab
Pawar Ruler of Dewas
Junior*

Hand-Loom Weaving Industries at Sarangpur—This is a very old industry of Sarangpur a Tehasil of Dewas on the Agra Bombay

Road. Cloth of different varieties of the finest texture is produced. This cloth is famous all over India. Sarangpur Puggies and

Sarees are specially in demand all over the country. The industry has not died in spite of the advent of Machinery and keen competition though it is affected. But the present time has brought a revival of the industry and with State patronage it is doing well. As a matter of fact it is being found difficult to meet the present demands of the market. A sum of about Rs 10 000 was spent in giving encouragement to the industry.

The Malwa Sugar Mills Ltd.—In spite of the vast areas under Sugar-cane cultivation sugar has to be imported into India. Among the pioneers of Indian Industries we may safely reserve a place of honour for the ruler of Dewas who by reason of his enterprise and initiative has made possible the foundation of the Malwa Sugar Mills with a number of Sugar Experts and Financiers of repute as the proprietors of the concern. The Mills are started with a capital of Rs 30 00 000 and with the coming into operation of this concern the country will have a greater supply of sugar.

The House of Fazalbhoys is well known throughout India as one of the premier Muslim business houses. Although the present organisation of Fazalbhoy Limited was registered in 1936 the firm founded by the late Mr Abdulla Fazalbhoy and his sons which controlled the Bombay Radio Company Ltd and Sound Equipment Co Ltd is a very old established one having been started in 1924.

The Radio trade owes much to the enterprise of Fazalbhoy. The late Mr Abdulla Fazalbhoy played a very prominent part in the introduction of broadcasting in India as one of the active members of the All India Radio Merchants Association which helped to a great extent the radio trade in India during the early period when broadcasting was the monopoly of a commercial organisation and it was mainly due to his efforts that the Government were finally induced to take over broadcasting as a state enterprise.

With the introduction of talking pictures in America and in Europe Mr Fazalbhoy did not lose the opportunity of taking interest in the new developments which were so closely allied to the radio trade in its technical aspects. The first double system equipment for recording talking picture was introduced in India by him and very soon he helped and aided a large number of people who were interested in the new business which had come up in India. The Film City studios was set up for helping the independent producers. It is interesting to note that the first Indian talkie produced in India ALAM ARA was exhibited at the Majestic Cinema which was equipped and installed by Indian enterprise and by Indian Engineers trained in the Fazalbhoy workshops. With this small start the Fazalbhoy organisation set up the Sound Equipment Co. Ltd. where cinema equipments and parts for talking pictures were stocked. This has now developed into the Photophone Equipments Ltd. of which Mr M. A. Fazalbhoy is now the Managing Director. PHOTOPHONE EQUIPMENTS LTD. is very closely allied to the great R. C. A. Manufacturing Co. of America which is one of the largest and most important manufacturers in the United States of America. The R. C. A. Organisation has been responsible for a number of improvements and inventions in the film industry as well as in Radio Broadcasting Television Wireless Telephony Telegraphy and several other allied lines. Whilst being a premier import house carrying goods from England America and Japan and before the war from many European countries the House of Fazalbhoy has not neglected the importance of establishing industrial enterprises in the country. As pioneers of the film industry one of their Directors Mr Y. A. Fazalbhoy is the Director in Charge of NATIONAL STUDIOS LIMITED the largest film producing concern in Western India. Further additions to the manufacturing organisations are the FAZALBHOY BOMBAY LABORATORIES LTD. manufacturing toilet preparations confectionery hardware cutlery and allied products. Another organisation is the FAZALBHOY INDIA TEXTILES LTD. for the manufacture principally of hosiery of all kinds. Fazalbhoy Limited has also not neglected two important fields which are responsible for the development of industry of a country namely Insurance and Banking.

Mr M. A. Fazalbhoy is a Director of Bombay Fire & General Insurance Co. Ltd. whose chief Agents in Bombay are Fazalbhoy Limited. He is also a Director of Vasant Insurance Co. Ltd. In the Banking World Mr M. A. Fazalbhoy was for a considerable time one of the members of the Board guiding the New Citizen Bank of India. He is now the director of Associated Banking Corporation of India Ltd. He is also the Chairman of the MERCANTILE FINANCE CO. LTD. a financing house which has aided many industries.

Abdulla Fazalbhoy Technical Institute which is now being conducted by St. Xavier's College was originally founded by the House of Fazalbhoy.

★ ★ The House of

Godrej

Godrej 8 ton Strong Door as supplied to Safe Deposit Companies and Banks

NEARLY fifty years ago the inspiration of the late Mr A B Godrej began a business which keeps on flourishing on the principles of Indian self-sufficiency which he laid down. Observing one fact which passed generally unrecognised in the last century that India has indigenous engineering skill he first enlisted the hereditary lock smiths of Malabar to make hand fitted locks. From this simple beginning the firm proceeded to develop the manufacture of dependable Safes and other security equipment then Metal Furniture and it has now reached the peak of skill in an Engineering factory by producing Machine tools (for its own use) for the first time in India.

Over two decades ago Mr A B Godrej envisaged the great necessity of a swadeshi soap industry and so was laid the foundation of another pioneer industry by the same man. He realised that good soaps should be made exclusively from vegetable oils and that India fortunately possesses both raw materials as well as markets for finished products. Much regard one feels for national industry but true pride comes when the home-made articles are better value than the imported. The contribution by Godrej is very substantial there are now practically no imports of security articles and the figure for soaps is only about 1 per cent of what it used to be twenty years ago.

SECURITY ENGINEERING

When the business was taken over by Mr P B Godrej its expansion was rapid. The metal products works in Bombay is today equipped with a powered plant of steel working machinery designed to undertake any kind of job in steel sheets or sections either by series-production or individual precision methods. It is difficult to think of any hardware which cannot be made by Godrej to the same standards.

and as economically as by any manufacturer in the world. A skilled staff of 2,000 is thus able to cope with anything from the supply of tens of thousands of bedsteads to the designing, building and equipment of giant Safe-Deposits.

The total output of the Godrej plant is worth Rs. 60 lakhs annually. It includes the following regular peacetime products:

Jointless Doors	Safes	Safe Deposits	Strong Rooms and
Steel Coffers and Cash Boxes	Steel Cabinets,		
Air tight Almirahs	Steel Shelving and Library-		
stacks	Bookcases	Filing and Card Index Cabinets,	
Steel and Chromium Furniture for Homes, Offices and			
Hospitals	Locks and Latches		

The stimulus of wartime demand has resulted in the manufacture of a large number of items—many of which have never been made in India before.

Fourteen original patents provide for economy in manufacturing methods and structures which ingeniously combine great strength with lightness. The finishes which have been developed for Godrej products are practically indestructible.

MANUFACTURE OF SOAP

The well known brown soaps—No. 1 and No. 2—were the first vegetable toilet soaps made by Godrej. And in the course of years the number of varieties has grown to over a dozen including shaving soap—for a variety of tastes all over India and overseas. The country wide distribution of Godrej Turkish Bath soap has made it a pleasure for the average Indian to keep himself clean by washing with a pure toilet soap that actually does not cost more than washing soap! The need for a very good popularly priced toilet soap was felt some time ago and although the price had to be the popular one, the quality had to be definitely superior to that of other makes. This has been achieved by Vatni, the new Godrej soap.

The recent extension to the factory had to be undertaken to meet the increased war time demand and for manufacturing Glycerine—an essential commodity in war time.

One of the Milling Machines in the Godrej Soap Factory

The Godrej factories and their extensive establishments are a living monument to the memory of their founder as also landmarks in the field of Indian Industry. Godrej are by far the largest manufacturers in their lines of metal products in the East and their soaps have made Godrej a household word in India. Moreover, Godrej products are made and financed exclusively by Indians to serve Indians.

Mr J B Greaves

GREAVES COTTON

THE firm of Greaves Cotton and Company was founded in 1870 on which date James Greaves took into partnership George Cotton (subsequently Sir George Cotton). Prior to that date James Greaves had traded for some years in Broach under the name of James Greaves & Co. The Manchester Branch of the Company trades under this name today.

At the outset Greaves Cotton and Company carried on general export business. In 1870 they opened an office in Bombay and soon after floated the Empress Mills. The business prospered and in successive years the following other mills were started:

Leopold Mills, James Greaves Mills, Howard and Bullough Mills, Connaught Mills, New Empress Mills, Alfred Manufacturing Co., Broach, Albert Edward Mills, Broach. Later on the agencies for the Imperial and Apollo Mills were secured by them.

Colonel Arthur Leshe joined the firm in 1889. He retired in 1908 and died in 1931. During his time he founded the Society of Honorary Presidency Magistrates in Bombay and was the first President. Incidentally Mr. John Brownson Greaves, the present head of the firm, was President of the Society in 1939.

SIR GEORGE COTTON

Sir George Cotton retired from Bombay in May 1900 but continued with the firm until his death in 1904. He was Sheriff of Bombay on one occasion and President of the Municipal Corporation on two occasions. On his retirement from Bombay in 1900, he was succeeded by John Greaves, the eldest son of James Greaves, the founder of the firm. John Greaves was a member of the Bombay Municipal Corporation and also at one time the Chairman of the Broach Municipality. He died in 1904 and was succeeded by Herbert Greaves, the second son of James Greaves. Herbert Greaves was Sheriff of Bombay in 1911 during the Governorship of Sir George Clark, was President of the Mill Owners Association and a Member of the Municipal Corporation and also of the Governor's Council prior to the Montague-Chelmsford Reforms.

Herbert Greaves died in 1921 leaving Mr. Neville Greaves Hunt as the surviving partner. In the same year Mr. John Brownson Greaves, the present Chairman of the Company and head of the firm, came out to join Mr. Hunt who retired in 1929.

LIMITED COMPANY

In 1922 Greaves Cotton & Co. was turned into a limited company. Amongst the first directors were Messrs J. B. Greaves, N. G. Hunt, A. McIntosh, Bomanji Hormusji Bharucha, and the late Mr. H. G. Davies, all of whom, with the exception of Mr. Davies, remain directors of the Company today. Mr. Bomanji Hormusji Bharucha joined the Company in 1883 and is of course today by far

AND COMPANY, LTD.

the most senior member of the staff Mr A. McIntosh was President of the Chamber of Commerce in 1938 and Mr J B Greaves has been one of the representatives of the Chamber of Commerce in the Legislative Assembly for many years Mr A Forreton was made a director in 1938

ENGINEERING BUSINESS

By 1921 Greaves Cotton and Company had relinquished all their mill agencies and had concentrated on developing their Engineering and General Merchandising business From 1922 until today the Company has developed more on engineering lines and today four large separate engineering and allied sections exist

Mr James Greaves

ELECTRIC SECTION

1 The Electrical Section which has now been formed into a separate company styled Greaves Cotton and Crompton Parkinson Ltd who handle throughout the Bombay Presidency Bengal and Northern India the whole of the products of Crompton Parkinson Ltd London and many other electrical concerns

TEXTILE MACHINERY

2 The Textile Spinning Machinery Section which has also been formed into a separate small company styled Indian Textile Engineers Ltd who represent Messrs Asa Lee & Co Ltd Brooks and Doxey Ltd Dobson and Barlow Ltd Howard and Bullough Ltd J Hetherington & Sons Ltd and Platt Brothers & Co Ltd—all of Lancashire This concern handles the bulk of the spinning machinery that is imported into India

MECHANICAL ENGINEERING

3 The Mechanical and General Engineering Section of Greaves Cotton & Co Ltd handles a number of machinery agencies the most important of which is the agency of Ruston and Hornsby Ltd the well known Lincoln oil-engine manufacturers

MILLSTORES AND WEAVING SECTION

4 The Millstores and Weaving Section handling the mills weaving and finishing requirements represents amongst others Messrs Henry Livesey Ltd of Blackburn and Messrs Mather and Platt Ltd of Manchester In addition this section handles normal millstores requirements of the mills

LOCAL MANUFACTURES

In addition the Chairman of the Company Mr John Brownson Greaves is on the Board of two closely connected companies—Crompton Parkinson (Works) Ltd Bombay who manufacture large quantities of Electric Fans and Motors and Ryston and Hornsby (India) Ltd Bombay manufacturing small Oil Engines

It is of interest to note that unlike many other commercial houses in India the head office of the Company has always been in Bombay Address 1 Forbes Street, Bombay

Gwalior Industries.

IN recent years there has been a growing appreciation of the increasing contribution which is made to the economic and industrial potentiality of India by Gwalior State. Gwalior is the principal Indian State of the vast hinterland of Central India, and by virtue of its geographical configuration particularly owing to the dispersion of its dominion in varied juxtaposition to Indian provincial and State territories the economic and industrial possibilities of the State are of vital significance to the nation's economy.

Four decades ago His Highness the late Maharaja Madhav Rao Scindia initiated a planned system of economic and industrial development in the State and if today Gwalior is in the vanguard of industrial development among the Indian States it is entirely due to the foresight and beneficence of this wise ruler who led the way to his brother Princes of India as the Patriarch of industrialism in the country.

During his brief regime the present young enlightened Ruler of Gwalior—H. H. Maharaja Sir Jiwaji Rao Scindia—has given ample token of his personal determination to lead the State on to the higher heights of industrial advancement. The policy of Durbar is to give private enterprise every possible encouragement rather than to cripple normal development by creating exclusive monopolies for the State.

Of the State owned industries the Gwalior Leather Factory, Gwalior Potteries Works, Alijah Durbar Press and the Gwalior Engineering Works have achieved outstanding success with an enormous output and sale since their establishment.

GWALIOR LEATHER FACTORY

The Gwalior Leather Factory was established as early as 1898 efficiently to meet the long felt need of the Gwalior Army's equipment. Pioneers of the leather industry in the State the Gwalior Leather Factory manufactures civil and military boots, shoes, gaiters, attache cases, leather weight bags, purses, riding and racing saddles, buttons, wallets and travelling kits. Lady's hand bags, leather photo frames, toys and other articles very suitable for presentation are also manufactured by the Factory.

Prior to the present war the tent section of the Factory was meeting the requirements of the civil and military departments of the State but since the outbreak of war the activities of this section are mainly focussed in meeting the increasing demands of the Supply Department of the Government of India. This is more evident from the fact that the section has so far executed war orders for the Government of India to the extent of 20 lakhs of rupees.

GWALIOR POTTERIES

The Gwalior Potteries Works, another big industrial concern owned by the State and the leading successful large-scale potteries in India, is being run on a commercial scale since 1926. Since its establishment the output of the Potteries has nearly been doubled and it now possesses a capital of more than 10 lakhs.

Its factories at Gwalior and New Delhi are fully equipped for the manufacture of crockery tiles flooring sanitary fittings drain pipes toys jars firebricks and insulators. With a reputation for excellence established in peacetime all over India the products of the Potteries particularly the tea, coffee and dinner sets toilet sets have proved their outstanding value. In spite of unprecedented rise in the prices of commodities the Potteries are placing before their customers a wide range of finest products to suit all pockets and modern and æsthetic taste.

ALIJAH DURBAR PRESS

A premier press in Central India the Alijah Durbar Press which came into being some 88 years ago occupies an important position amongst the Indian presses run by electricity. Since its establishment the Press has undergone numerous changes replacements and improvements costing about 3 lakhs of rupees. It is fully equipped with up-to-date printing and various kinds of machinery of the latest type. The addition of lino and mono machines has contributed to an efficient and quick printing service. The installation of modern machines such as mangle and record has brought about vast changes in the printing of superior class at cheaper rates. Besides printing lithography book binding die-stamping rubber stamp making gold edging of cards envelope making perforating ruling eyeletting the Press also deals in stationery and paper.

GWALIOR ENGINEERING WORKS

The Gwalior Engineering Works intended to be the locomotive carriage and wagon shops of the Gwalior Light Railway are well equipped with up-to-date machinery and the assembling and wood work are carried out on a highly skilled basis. Other works especially undertaken include iron and brass castings and metal work generally motor-car engines transmission gear and bodywork steam rollers furniture nuts bolts and rivets carts tongas and ambulances. For railway work trusses points, crossings and rail keys are manufactured. In addition the Engineering Works turn out gold and silver presentation articles and ornaments trophies medals and cups European and Indian silver utensils and photo-frames cigarette cases and water bottles. The silverware manufactured by the Engineering Works compares very favourably with the British makes.

GWALIOR & NORTHERN INDIA TRANSPORT COMPANY

Gwalior has a remarkable series of bus services which reach practically every corner of the State and which have been described as on a par with any transport organisation overseas. These services are run by Gwalior & Northern India Transport Co. Ltd. which since 1925 has been financed and controlled by the Gwalior Government.

The mileage covered by the busses of the company and the passengers carried by them in 1940 were 40 62 000 and 17 53 000 respectively.

The industries which are not entirely owned by the State but in which the Government have very substantial interest have achieved great progress in recent years. Textiles provide one of the most flourishing industries in the State. There are several cotton mills at Ujjain and Gwalior.

Hardcastle,

Alice Buildings, Hornby

THE Firm of Messrs Hardcastle, Waud & Co Ltd took over the Import & Export Business of the Firm of Messrs F E Hardcastle & Co Ltd in the year 1924. The Firm handles various well known commodities which fill the requirements of industry very extensively. With their Head Office in Bombay and branches in Calcutta Madras Karachi and Colombo they have a very thorough and extensive sales organization which is divided into various Departments each in charge of officials specially trained for the work.

Disinfectant and Deodorant Clearol Insecticide

HOLMES & CO, TARDEO, BOMBAY

This is a further associated firm of Hardcastle Waud & Co Ltd
who manufacture High Grade Distempers and Camouflage Paints
from purely indigenous materials under the registered trade mark of
SUNFAST

THE HINDUSTAN BICYCLE MANUFACTURING & INDUSTRIAL CORPORATION, LTD.

P O Phulwarisharif
PATNA

RAI BAHADUR
SYAMNANDAN
SAHAYA (Bihar)
M L C

*Chairman
and
Managing
Director*

THE Hindustan Bicycle Manufacturing & Industrial Corporation Limited was registered on the 26th May 1939. The share subscription was placed on the 16th December 1939 and was closed on the 6th January 1940 when it was over-subscribed. The authorised capital of the Company is Rs. 25,00,000 and the Paid up capital is Rs. 12,50,000 but the Directors have already spent Rs. 3,00,000 more as the price of the materials had gone up due to the outbreak of war.

Sir Syed Sultan Ahmad the Law Member of the Viceroy's Executive Council was the Chairman of this Corporation. RAI BAHADUR SYAMNANDAN SAHAYA M.L.C. Bihar is the Managing Director and now the Chairman too. Under the able guidance and full support of the Managing Director this Corporation is progressing very favourably. The Company has been very fortunate in getting RAI BAHADUR SYAMNANDAN SAHAYA as its Managing Director and through his untiring efforts the factory has started production and the bicycles of this Company are being sold throughout the length and breadth of India.

The Cycles of this factory have received expert approval and due to attractive price, beauty and durability have gained popularity very quickly. Messrs. Sales Organization Ltd. Calcutta, are the Agents for Calcutta and Orissa and Messrs. Industrial Stores & Agencies of Muzafferpur are the Sole Distributors for Bihar.

Mr G. H. Shrivastava is the Director in charge, and Mr S. Reza Haider B.A. (Alig), is the Secretary and Mr L. P. Molner is the chief engineer of this Corporation.

HOLKAR STATE

The Holkar State the largest and one of the most progressive States in Central India offers excellent opportunities to the capitalist desiring to invest in industries. The Government is following a policy of active assistance to industries the beneficial effects of which have already begun to be felt.

Textile Industry

Beginning with one mill in 1866 the textile industry of Indore now consists of 7 large spinning and weaving mills with 6 200 looms and about 2 lakhs spindles and produces about 200 million yards per year which is about 5 per cent of the all India production.

Sugar Factory

A sugar factory capable of crushing about 400 tons of cane a day is expected to start work shortly at Mehidpur. The factory is expected to result in an increase in the acreage under a paying cash crop like cane. Permission has also been given to utilise the molasses from the factory for the manufacture of power alcohol.

Slate Factory

The extensive deposits of slate in the State are being exploited and at present about 2 500 school slates per day are being manufactured at Pipha. A slate factory capable of producing about 10 000 school slates per day will shortly be erected.

Mineral Resources

A Geological Department was established in 1939 with a qualified Geologist who is engaged in carrying out a mineral survey of the State. Prospecting licenses have already been issued for iron ore and for barytes. A pottery works for the manufacture of firebricks and clay ware products is being organised in Pipha. A valuable mineral found in a very pure form in various parts of the State is limestone which promises to be of use in chemical industries especially the manufacture of bleaching powder.

Other known minerals in the State are manganese copper and ochres.

Forest Resources

The 2 000 square miles of forests in the State contain valuable timber and other produce. An economic forest survey undertaken last year is almost completed. The abundant production of grasses of a fairly high cellulose content and of water and lime in the neighbourhood makes Barwaha an ideal place for starting a paper and cardboard factory.

Other possible industries are the cigarette industry the starch industry the artificial silk industry etc.

Government assistance to industries mainly takes the form of a monopoly for a long period light taxation free supply of water lease of land at nominal rents etc.

THE INDIAN SMELTING & REFINING CO., LTD., Bombay.

The Indian Smelting & Refining Co Ltd are Pioneers in the Non Ferrous Metal Industry in India The Works which were started in 1932 have been constructed on most modern principles and are under the supervision of European experts who have many years experience in the Metallurgical line The Founder of the Company is Mr Francis Klein who is the Firm's Managing Director

The Works are equipped with an up to date Laboratory for analytical mechanical and microscopical tests and research Amongst other test apparatuses, a special metal microscope capable of a magnification up to 5 000 times has been installed in the test room All finished products leaving the Works are analysed and tested three times and all the products are fully up to the guaranteed standard

The Works and the Laboratory have been largely extended during recent years They are under the management of 4 European experts and 2 Indian Analysts and Chemists

The Works manufacture all metals and metal alloys of a non ferrous nature These metals are manufactured according to approved standard specifications as well as to the Works own formulae More over any Alloys can be manufactured according to customers specification Tests for customers are also carried out and the Works experts are at the disposal of interested parties for tackling any of metallurgical problems

The Works are on the approved list of the Indian Stores Department Director General of Munitions Production the Army Head quarters Simla all State and private Railways Public Works Departments Irrigation Departments Water Works and Municipalities

Success in Railways The Company has rendered pioneer service to the Indian State and private Railways in composing a new Phosphor Bronze for locomotive axle bearings under its proprietary name **IMPROVED PHOSPHOR BRONZE** This metal has been under trial for three years in one of the Indian Railways and after passing through the most severe tests unique results have been obtained The mileage obtained from this **IMPROVED PHOSPHOR BRONZE** bearings is about 72 000 miles which figure has never been reached before This success of **IMPROVED PHOSPHOR BRONZE** has prompted many Indian Railways to adopt this metal for their use

The Works are situated in Sion a suburb of Bombay and the Registered Office of the Company is in Shale Building Bank Street Fort Bombay

The labour is exclusively Indian

The Indian Radio & Cable Communications Co., Ltd.

RADIO HOUSE, APOLLO BUNDER, BOMBAY

The establishment of an Indian Radio Telegraph Company with a Rupee Capital controlled by an essentially Indian Board of Directors in the year 1923, was an event of historic importance. The Company was registered as the Indian Radio Telegraph Co. Ltd. on the 11th October 1923 and commenced business on 17th January 1924. The inauguration of the Beam Telegraph Service took place at the Central Telegraph Office Bombay on the 23rd July 1927 when H.E. The Viceroy Lord Irwin sent the following message to His Majesty King George V —

Before a new Service is opened which will render possible for the first time reciprocal communication by Wireless between India and the United Kingdom I send to Your Majesty a message of respectful greeting on behalf of India. This service will not only be of practical assistance in bringing more closely together the British and Indian peoples but it is an expression of the closeness of the ties which unite them in loyalty to Your Majesty a person

His Majesty the King Emperor's gracious reply was as follows —

I thank Your Excellency for the loyal greetings which you have sent me on behalf of India to mark the inauguration of reciprocal Wireless communication between India and this country. I am deeply sensible of the feelings of loyalty which unite my Indian and my British peoples and I am confident that the improvement of communications between the two countries which this new service will achieve cannot fail to bring them still closer together to the advantage of both.

The inauguration of the Beam Wireless Service thus marked a new era in India's external communications. The popularity of the new service led to further developments and the Beam and Cable

Services in India were amalgamated with effect from 1st July 1933 when the Indian Company took over the management of Cables and assumed its present name as The Indian Radio and Cable Communications Co Ltd. In association with Cable & Wireless Ltd the Indian Company thus established direct communication with all parts of the world. The I R C—Imperial route indicates India's telegraphic connection with the Empire and the world. Then followed the inauguration of the Japan Beam Service on 11th January 1933 and the Wireless Telephone Service with the United Kingdom and most countries of the world on 1st May 1933.

Telegraph Messages of different categories are accepted at all Government Telegraph Offices and transmitted by this Company. Special mention must be made of the facility afforded to residents in the British Empire for sending cheap rate social messages called G L T. For the benefit of His Majesty's Forces and their relations a new category has been introduced known as E F M. Details regarding above may be had from the General Traffic Manager of the Company Central Telegraph Office Bombay.

The Company holds a perpetual License for India & Burma from the Marconi's Wireless Telegraph Co Ltd London for all their Patents & Patent Rights and has supplied the necessary Wireless Equipments for the construction of the majority of the Broadcasting Stations in India. A large number of Wireless installations for point to-point communication commercial receivers Aircraft and Aerodrome Wireless Equipments etc have also been supplied by this Company. Marcomphone Broadcast Receivers which have now become a necessary part of every household owe their popularity to the vigorous efforts of the I R C C. The products of Companies associated with Marconi's Wireless-Telegraph Co Ltd such as RCA Manufacturing Co of Camden (U S A) and Amalgamated Wireless Australasia Ltd of Sydney (Australia) are marketed by this Company.

An Entrance Fee of Rs 12,000 is payable for admission to membership and members shall pay an annual subscription of Rs 120.

A member is privileged to nominate any eligible person in his place and stead in the event of his death or in case he desires to resign his membership after three years of his admission to membership, subject to the approval and sanction of the Directors.

THE INDIAN TEXTILE JOURNAL

*The Late Mr Sorabji
M Rutnagar the Founder*

THE *Indian Textile Journal* is a representative monthly publication for the textile, engineering & electrical industries of India. It was founded in 1890 by the late Mr Sorabji M Rutnagar and it holds according to the Commerce Member to the Government of India, a unique place among those devoted to commerce and industry and in the special field it has chosen it has no rival in this country. Indeed it bears comparison with the best journals of the kind produced in Europe or America.

The *Indian Textile Journal* has now been representing for fifty two years the foremost indigenous industry of the country—textile manufacturing. It enjoys unchallenged prestige and influence among all classes of millowners and technical staffs of mills in India and commands the confidence and interest of readers and manufacturers in all foreign countries. The advertisements in it have always been one of its distinctive features. In fact the *Journal* has been the most important source of information to machinery makers and merchants in all parts of the world about India's industrial developments and has been instrumental in helping to create an enormous trade which has meant so much to this country.

The Board of Directors of the Indian Textile Journal Limited consists of—Sir Homi Mehta KBE (Chairman) Sir Ness Wadia KBE CIE Sir Joseph Kay kt Mr J B Greaves CBE MLC JP and Mr Jal S Rutnagar (Ex-officio)

THE INDUSTRIAL & AGRICULTURAL ENGINEERING CO.

ELECTRICAL, MECHANICAL & TEXTILE ENGINEERS,
43, FORBES STREET, FORT BOMBAY

WHAT business integrity perseverance and expert knowledge in spite of initial lack of finance can do is amply portrayed in the progress year after year of the firm of the Industrial & Agricultural Engineering Co popularly now known as I A E C

Started in the year 1929 in a small single room Mr R D Char, Proprietor Engineer-Clerk and Despatch Boy has built up to-day a modern organisation employing several Indian Engineering Graduates with associated offices at Madras Bangalore and Hyderabad (Deccan)

The firm specialises among other Engineering lines in Ventilation and Humidification of Textile Mills and have to their credit several Mills equipped with their Plants all over India

The well known Continental Electrical Manufacturers Messrs Ganz Electric Co Ltd Budapest were represented by them before the War Thousands of Electrical Equipment have been supplied and installed in various industries

The Textile Machinery Department was organised in the year 1932 by Mr D Ramanna, L T M The increased activity of this Department necessitated the formation of a separate organisation—The Associated Textile Engineers

The Firm's policy has always been to co-operate with sound Indian Manufacturers The sale and popularity of the **MYSORE INSULATORS MYSORE LAMPS** and **TRAVANCORE CHINA CLAY** are due to the untiring enthusiasm and business foresight of the firm

JAIPUR STATE

AMONG the States in Rajputana and Central India Jaipur holds a prominent place for its Arts Industries and Commerce. The Ruling Chiefs have always given adequate facilities to the artisans and financiers and as a result the State ranks first for the variety and excellence of its art productions.

Jaipur is noted for the abundance of raw materials necessary for the starting of many large scale industries—Cotton Wool Oilseeds Sugar-Cane and also a host of important minerals necessary for the establishment of many mineral and chemical industries.

Applications from the famous multi millionaire merchant princes of Sheikhawati (Jaipur) for permission to start within the State many large scale industries have been received and the Director of Industries and Commerce has successfully negotiated and completed proposals for the establishment of a Cotton Spinning and Weaving Mill a Woollen Spinning and Weaving Mill a Woollen Press a Hosiery Mill and a Sugar Mill. These proposals are at present receiving the favourable consideration of His Highness's Government.

The Department of Industries is negotiating at present for a Glass Factory a Ceramic Factory an Oil Mill a Paint and Varnish Factory and for several chemical industries which can be successfully established within the State.

His Highness the Maharaja Sahib Bahadur evinces keen personal interest in the development of new industries and his popular Prime Minister Raja Gyan Nath C.I.E. has laid down a liberal policy of granting assistance and concessions for encouraging new industries.

The claims of labour have also not been ignored as the State fully realises that Capital and Labour both play important roles in industrial development. Consequently to safeguard the interest of the Working Classes the State Government has enacted the Factories Act.

Any narrative of the Jaipur Industries would be incomplete if it did not mention the most laudable work done in connection with the War effort by its private citizens. The State has given generous help in Men and Money and the citizens have contributed their quota in Materials. Supply Department orders worth several lakhs of rupees have been executed for dehydrated potatoes namdas felts and rolling mill stock.

Mention must be made of the Jaipur State Cottage Industries Institute promoted by a Jaipur Seth under the active guidance of the Director of Industries and Commerce with a capital of over a lakh of rupees for the purpose of manufacturing Army Blankets Namdas Felts Over-Coat Cloth Brass Buckles Wooden articles like tent mallets, tent heads etc. and generally to co-ordinate and put into practice the resolutions of the Small Scale Industries Conference held at Delhi recently.

THE HOUSE OF J. K.

Kamla Tower, CAWNPORE.

*The late Lala
Kamalapat
Singhania*

*Lala Padampat
Singhania.*

Among the leading business houses of this country which have paved the way for India's economic regeneration by making a notable contribution to the development and expansion of national industry on modern lines the HOUSE OF J K occupies a paramount place. Now the largest industrial combine in the north of India the seed of the great J K Industries popularly known as the J K (Jugglal Kamalapat) Group of Mills was sown in Cawnpore about the middle of the 19th century. The seed germinated into a healthy plant which being nursed and nurtured with fostering care soon began to spread its branches in all directions until the present day when the mighty structure of this great tree towers in the country's industrial firmament.

As stimulating a tale as any in the annals of India's commerce and industry is the story of the meteoric rise of the HOUSE OF J K.—pride of Cawnpore and a monument to the incomparable commercial genius of the late Lala Kamalapat Singhania. Providence had endowed him with the highest qualities of industrial planning enterprise and progressive efficiency and he realised his dreams by sagacious foresight vision perseverance and character. The combination of these rare gifts enabled him to found a chain of industrial concerns whose name is a household word throughout the length and breadth of this country and whose fame has crossed the country's borders and spread across the seas. The result is that to-day the name of Lala Kamalapat Singhania is more than a mere memory—something more concrete and stable than an inspiring legend.

The name of Cawnpore is permanently linked with the HOUSE OF J K. There is many an institution in the city which echoes their loving regard for all just and noble causes. As time goes on the HOUSE OF J K is bound to play an ever increasing part in the evolutionary processes relative to India's commerce and industry.

J K Industries are in every sense the nationalists' dream come true for the capital is Indian the management is Indian, the labour is Indian and all the raw-products consumed in the various mills are Indian.

Among themselves J K Industries are now producing a number of new articles while the range and output of the existing industries have considerably expanded. Every effort is made to replace imports wherever possible by indigenous production in order to attain the largest measure of self-sufficiency in the matter of national requirements. Thus they are doing everything to usher in an era of industrial emancipation and advancement.

THE JUPITER GENERAL INSURANCE COMPANY LTD.

(INCORPORATED IN INDIA)

Head Office Ewart House, Tamarind Lane, Fort Bombay

Freedom for India is coming sooner than most of us imagine. Indian business men have a great part to play in a free India as builders of the Nation along constructive lines having service of the poor as their ideal. THE JUPITER GENERAL INSURANCE COMPANY will develop into a mighty concern and play a great role in the economy of Free India.

MR S SATYAMURTHI

(18 11 1941)

It was in the year 1919 that the late Seth Lalji Naranj, an outstanding personality and brilliant figure in the commercial and business world conceived the idea of starting an Indian Insurance Company and the JUPITER GENERAL owes its existence to him as its founder. The late SETH LALJI NARANJIS services in the cause of Indian Business and Industry in general and Indian Insurance in particular met with wide public recognition. His name is closely associated with several well known institutions concerns undertakings and activities. The Indian Merchants Chamber named their building as Lalji Naranj Memorial Indian Merchants' Chamber Building thereby acknowledging the late Seth Lalji Naranj's services in the interest of Indian Commerce.

Late Seth Lalji Naranj (Founder)

The Jupiter General has an authorised capital of Rs 2 00 00 000 out of which Rs 1 50 00 000 is issued and subscribed the paid up capital being Rs 23,74 800

At first the Company transacted Fire Accident and Marine business and its early struggles were similar to the experience of all Indian undertakings started in those times. Numerous difficulties were encountered and surmounted. In spite of the various obstacles the Company progressed steadily and its continued growth is evidence of the great tact, business acumen, capacity and untiring energy of the Founder and his co-Directors.

*Seth Dharamsey Mulraj Khatau
(Chairman)*

In 1928 the Company started its life business for the first time. After facing the vicissitudes usual in the case of infant Life Insurance Companies JUPITER'S Life Department by the end of 1940 had become strong and had found a place for itself amongst leading Indian Life Offices. The steps taken by the Directors to achieve this object were immensely successful and in the year 1941 the business written in the Life Department was remarkably enough more than double the maximum of any of the previous years.

To-day due primarily to the uniform and unstinted patronage of our countrymen the Company has attained the proud position of being the second largest Composite Indian Office with Branches at Ahmedabad, Alleppey, Calcutta, Delhi, Indore, Jalgaon, Karachi, Lahore and Madras with a net work of Agencies in India, Ceylon and Africa. In London the Company's representatives are Messrs B W Noble Ltd.

Security and service have been the guiding policy of the Company since its inception and the present Directorate take the greatest care to see that the interests of the Shareholders and Policyholders are safe and also keep a very watchful eye on the numerous investments of the Company.

As at 31st December 1941 the gross annual premium income of the Company in all Departments was about Rs. 30 00 000 while the total assets of the Company on that date was about Rs. 80 00 000.

JODHPUR STATE

AN AGRI-PASTORAL COUNTRY NOW GETTING INDUSTRIALISED

JODHPUR (*Marwar*) State in Rajputana is the home of the Marwari trader the business genius of the country Lying mostly in the Thar the State stretches from the Aravalli in the East to the Rann of Cutch in the West and is therefore primarily agri-pastoral

Jodhpur has been an exporter of raw materials About 8 000 maunds of wool 65 000 maunds of cotton 13 000 maunds of hides and skins 66 000 maunds of bones and 16 000 maunds of oil seeds are annually available for export The State is also quite rich in mines, though none of the minerals is such on which large scale industries could be developed Mines of Wolfram Bentonite Gypsum Salt petre Mica Beryl and Falsper to mention just a few occur in some parts of the State Jodhpur (*Makrana*) marble was used to build the Taj Mahal of the Great Mughals and the Victoria Memorial of our own times Fullers-earth, lime lime-stone and the pink building stone is available in large quantities

In a State where about eighty five per cent of the population is engaged in Agriculture and cattle rearing and has most of its time unoccupied in single-cropped areas cottage industries naturally find a good scope The products consist of hand loom blankets woollen namdas and coarse cloth In some parts of the State small scale industries such as making of metal water bottles cooking utensils iron and brass cutlery saddlery and camel corps equipment have flourished well Handicrafts like ivory ware, lacquer ware embroidered shoes printed and Jodhpur process coloured silks and calico printing form another group of industries Of the jail factory products carpets, rugs and curtain hangings find a market even outside the State

A big cotton weaving and spinning mill has recently been completed at Pali at a cost of about Rs 40 00 000 The State has about fifty cotton pressing and ginning factories and about a dozen oil mills

In its war effort the State Economic Development Department has undertaken to prepare 16 000 Army Blankets At the Railway workshops twenty five pounder shells go through several early processes and the number now being turned out is four times as great as was promised or expected Crates for carrying shells, wheel barrows and pick-axe heads are being turned out in very large numbers

The State has an Economic Development Officer and an Industrial Planning Officer The Government is engaged in drawing up a practical scheme for the development of rural industries After careful consideration it has chosen as a compromise between large scale industries and the revival of cottage industries to establish an equilibrium between Man and Machine and to remove unemployment and poverty by providing new and profitable occupations for its people

THE HOUSE

of

KALYANMAL

KALYAN BHAWAN, INDORE

*Rajya Bhushan Rai Bahadur
Shrimant Seth Hiralal
Kalyanmalji*

RAJYA Bhushan Rai Bahadur Shrimant Seth Hiralal Kalyan malji succeeded to the leading firm of Bankers and Millowners of Rai Bahadur Danvir Tilockchand Kalyanmal of Indore Bombay and Ujjain Born on 12th June 1898 at Ajmer he was educated in local institutions and by private tutors

Rai Bahadur Hiralalji is connected with leading industries of India and holds the following positions in some of them —

Managing Director The Kalyanmal Mills Ltd., Indore

Director 1. Sar Hukumchand Mills Ltd., Indore 2. The Rajkumar Mills Ltd., Indore. 3. The Hira Mills Ltd., Ujjain. 4. The Bombay Fire and General Insurance Co. Ltd., Bombay

Proprietor 1. The Kalyanmal Mills Text Factory, Indore. 2. The Narendra Iron & Steel Works, Indore. 3. R. B. Hiralal & Co. (Textile, Woodwork and Engineering Departments), Indore. 4. Kalyanmal Waste Plant, Indore. 5. Diamond Glass Works, Rao.

The Mills produce all kinds of Textile materials and recently additions have been made in all departments of the latest machinery available They manufacture cloth required for the Army in India and abroad in considerable quantity Rai Bahadur Hiralalji is a Pioneer of the Tent Industry in Central India and also for the installation of most up-to-date Saw Mill in this Province

His Steel Works are turning out articles required by Public Utility concerns while the Woodwork and Engineering Factory is making articles required by the Army

He is connected with almost all public institutions in Indore and is the President of the Municipality of his town

He is a great philanthropist and runs many charities which include — Educational Institutions for boys and girls Ausadhalayas and Nursing home besides many religious institutions

Mr L R W Forrest

THE Firm of Messrs Killick Nixon & Co. Bombay was founded on 24th November 1857 by Messrs. Charles Killick and Robert Preston Nixon who arrived in Bombay the previous day by P & O s.s. Pottinger having according to the Passenger list embarked at Alexandria.

The Firm commenced trading as General Merchants and for the first 18 years or so the business was mainly confined to the import of Manchester piece goods and the export of cotton and seeds. In 1875 however they took over the business of the well known Firm of Messrs Edward Lawrence & Co who had commenced business in Bombay in the fifties and who were substantially interested in the export trade as well as in Shipping Coal and Insurance.

THE FIRM OF KILLICK,

In 1876 the late Mr L. R. W. Forrest became a Partner in Messrs. Killick, Nixon & Co. and it was largely due to his initiative that the Firm from the year 1896 decided to strike out on entirely new lines of business, in the direction of floating and managing various companies beginning with Railway Companies and the Kohinoor Mills. Other senior partners of the Firm in Bombay have been the late Sir Henry E. E. Procter, C.B.E. (Knighthood in 1911), Sir Thomas W. Burkett (Knighthood in 1918) the late Mr H. P. Hebblethwaite who died in November 1941 Mr F. C. Annandale who retired from the Firm in 1930 and Mr E. O. Reid, M.C. The present Partners in Bombay are Messrs. R. C. Lowndes, F. F. Stilleman, R. C. Giles, D. R. C. Hartley C.B.E., D.S.O., and V. F. Noel Paton.

The Firm has a small branch at Mormugao in Portuguese India and used to maintain a branch in Calcutta. The latter was taken over by Messrs Bird & Co in 1926 the Firm at the same time taking over Messrs Bird & Co's branch in Bombay. The Firm's Agents in London are Messrs Nixon, Forrest & Co., of 29 Great St. Helen's E.C.4.

IMPORT AND AGENCY

Although the original character of the Firm's business has changed greatly a considerable business is still carried on in Snowcrete and Colocrete cements Masonite products Remington Air-Conditioning Machines, Boilers

canvas and several other well known Agency Lanes They further represent Messrs Bird & Co as already stated, and Messrs Healgers & Co of Calcutta in Bombay and are Selling Agents for Silvertown Oils also for the Indian Paper Sales Association an organisation for the sale in Bombay Presidency and Kathiawar of the products of the Tita ghur India Paper Pulp Bengal and the Deccan Paper Mills

INSURANCE

In this line the Firm represents the Yorkshire British & Foreign Marine and Union Insurance Society of Canton Insurance Companies

Sir Henry E E Procter
C B E

NIXON & COMPANY

SHIPPING AND COAL

In addition to the Shipping Chartering and Coal business taken over from Messrs Edward Lawrence & Co in 1875 previously mentioned the Firm in 1898 amalgamated Sir Edward Bates & Sons Bombay Agency with their own business By virtue of this amalgamation the Firm has from that date been Agents for Ellerman's City & Hall Lines in Bombay The Firm are also Agents in Bombay for the Bibby Line and Harrison Line of Steamers and the Elder Dempster Steamships Co. Chartering is done through Messrs F W Healgers & Co, and Coal through Messrs Mitchell Cotts & Co for Natal coal and through other Agencies for Indian coal.

RAILWAY COMPANIES

The following Railway Companies have been floated by the Firm the Ahmedabad Prantel Railway Co. Ltd. in 1896 the Tapti Valley Railway Co Ltd. also in 1896 the Ahmedabad Dholka Railway Co Ltd in 1900, the Amritsar Patti Railway Co Ltd. in 1905 the Central Provinces Railway Co Ltd., in 1910, the Guzerat Railways Co Ltd., in 1911 the Mandra Bhon Railways Co Ltd in 1913 the Sialkot Narowal Railway Co Ltd in 1914. Jointly with Messrs Gillanders, Arbuthnot & Co of Calcutta the Sara Siraj gany Railway Co Ltd was floated in 1913, and the Mymensingh Bhakrab Bazar Railways Co Ltd. in 1914. In accordance with the Government of

India's policy of taking over the contracts of certain railways when they expire, those of the Ahmedabad Dholka Railway Co., Ltd. The Amritsar, Patna Railway Co. Ltd. and the Tapti Valley Railway Co. Ltd. have already been taken over, the last as from 31st March 1942

COTTON MILLS

As previously stated, the Kohinoor Mills Co. Ltd. was originally floated in 1896 with an initial installation of 28,768 spindles. It now incorporates the Naigaum and Courtauld's Mills in its organisation and with 94,568 spindles and 1,834 looms it is one of the leading mills in India.

MANGANESE ORE

In 1904 the Firm obtained control of valuable Manganese ore deposits in the Central Provinces and the Central India Mining Co. Ltd. was floated and, though it experienced a prosperous existence for many years it was unable to survive the serious slump in Manganese ore in 1929. In 1909 the Firm became interested in the large Manganese ore deposits of the Shivrajpur Syndicate Ltd. in the Panch Mahals and later took over the Managing Agency of that Company. In 1936 the Firm registered the Kanara Mining Co. Ltd. as a Private Company to take over from a previous Syndicate and operate various deposits of Manganese ore in the Kanara District.

COAL MINING

In 1909 the Hingur Rampur Coal Co. Ltd. was promoted, to take over coal deposits in Orissa.

ELECTRICITY

In the year 1913 the Ahmedabad Electricity Co. Ltd. was floated, originally with a capital of only Rs 4½ lakhs. The issued and Subscribed Capital of this Company is now Rs.1 Crore. In 1920 the Surat Electricity Co. Ltd. was promoted, and in 1929 the Firm floated the Bombay Suburban Electric

Control Room Ahmedabad

Bundi Cement Factory

Supply Ltd. for the purpose of distributing throughout the suburbs of Bombay and the Island of Salsette, energy purchased in bulk from the Tata Hydro-Electric Companies.

CEMENT

The Bundi Portland Cement Co. Ltd. was also formed in 1913, at Lakheri, in Bundi State where the well-known B.B.B. cement was first brought into production. The Punjab Portland Cement Co. Ltd., was floated in 1920. In 1925 the Firm was largely instrumental in forming the Indian Cement Manufacturers Association, the fore-runner of the Cement Marketing Company of India, which in 1930 was formed to take its place. This led to the idea of the amalgamation of practically all the Cement Companies in India which in 1936 were merged into the Associated Cement Companies Ltd. The amalgamation of 11 out of 12 of the Cement Companies then operating in India into this Company (which has an issued and Subscribed Capital of over Rs. 7 crores) was undertaken by the merging interests and no small portion of the heavy burden of co-ordinating this amalgamation of so many different Companies, owing to the sudden death of Mr. F. E. Dinshaw the originator of this Merger, fell upon the shoulders of Mr. E. C. Reid, the then Senior Partner of the Firm in India. The Management of the new Company was entrusted to Cement Agencies Ltd., comprising the joint management of Messrs. Killick Nixon & Co., F. E. Dinshaw Ltd., Tata Sons Ltd. and Mulraj Khatau & Sons, Ltd.

LEVER BROTHERS (INDIA) LIMITED, SOAP MANUFACTURERS

When William Hesketh Lever retired from the wholesale grocery trade and in 1885 started to manufacture soap he launched a sequence of events which today after nearly 60 years, are still powerful factors in world commerce. It is indeed probable that Mr. Lever had no unduly restricted ideas of the eventual scope of the activities arising from the original foundation of Lever Brothers and the manufacture of that great constellation of soaps of which Sunlight Soap was the first and is still the leader.

EARLY BEGINNINGS IN INDIA

Early in the Company's history contact was made with this market and Lever products manufactured in the United Kingdom were sold in India through a system of area agents until 1934. In this year Lever Brothers (India) Limited was founded and manufacturing was started in Calcutta and, later in Bombay. At these factories the world famous Lever Brands are manufactured as well as brands which for 100 years had been sold in the Indian market by Gossages, an old established Company which is now associated with the firm of Lever. The position today is that Lever Brothers (India) Limited market Indian made soaps and only rely on importations for trivial quantities of highly specialized products.

An associated company, United Traders Limited, is occupied in marketing toilet soaps and preparations and considerable headway is being made towards manufacturing these in this country. One of the leading brands handled by this Company is Pears Soap which it is reputed, has sold in India since 1786.

SERVICE—THE KEY TO SUCCESS

Lever laid down as a vital principle of the organizations which eventually came under his control, that no commercial or industrial concern could achieve or had any right to expect, permanent prosperity except on the basis of Service. Service interpreted as Service to the public, is the key to whatever success has been enjoyed by the Lever Company in the past and is the guiding principle in the policy of the Indian Company today.

IDEAL LABOUR CONDITIONS

Nevertheless, good conditions of labour and the workers' health and welfare have always been a requirement which all the companies connected with the name of Lever have been expected to fulfil as a pre-requisite of Service to the community at large. In pursuance of

Modern, well-planned, perfectly situated—one of Lever's Soap factories in India. All of the famous Lever Soap lines are made in this country.

this policy the factories at Bombay and Calcutta are practical testimony. These factories are designed to utilise human effort in the most productive way with the minimum of strain upon the individual. They are light and airy and are equipped with modern rest and refreshment rooms and are generously set in hygienic and attractive surroundings. Well equipped laboratories insist on a high standard of excellence in the products manufactured, and the processes are based on world wide experience.

By these means, coupled with wide scale marketing and mass production it is possible to supply the Indian public with goods of extremely high quality and at prices which are within the reach of all except the very poorest of India's 400 million.

A Sunlight Soap Cinema Van. Fully equipped with its own power plant standard 16mm projector slide projector and gramophone amplifier. The van is capable of giving a complete cinema performance to 2-3,000 people at a time.

CONTRIBUTIONS TO WAR EFFORT

War has produced a heavy crop of difficulties but, until the end of two years after war started prices had, generally been maintained at pre war levels notwithstanding the higher cost of production, a part of which was due to the greater burden of increased wages.

The Lever Company in India is a considerable source of the Government's supplies of glycerine. The Company also provides the Forces with large quantities of soap.

FAMOUS NAMES

The marketing of the Company's products covers the brands which are household words in many countries—Sunlight Lifebuoy Lux Toilet Soap Lux and Vim—in addition to the well known Gosage soaps, and is under the direction of Mr W G J Shaw who has been responsible for its fortunes since the formation of the Company eight years ago. In its work the Company has employed every practicable device calculated both to improve the public's standards of cleanliness and to sell the products of the Company.

WIDE-SPREAD PROPAGANDA.

Noticable developments in the field of marketing have been the creation of a fleet of propaganda vehicles which by means of loudspeakers and illustrated lectures, are designed to infiltrate health and cleanliness ideas amongst strata of the public largely out of reach of advertising of the ordinary kind. A more specialised departure on these lines has been a pioneer fleet of mobile cinema units each equipped for full-sized talking pictures. These units carry entertainment, educational and commercial films, including a number of Government interest films relating to the war effort. The future of this activity during the war is doubtful, but when peace returns new developments are scheduled. Incidentally the first sky writing in India was in support of Sunlight Soap and Pears.

INDIAN EXECUTIVES

Necessarily Lever Brothers (India) Ltd. was guided during its early development by men who had learnt the Company's methods in other parts of the world. Expansion of the executive staff, has, however been by the enthusiastic participation of young Indians of high qualifications who have been recruited and trained for executive responsibilities. Already nearly twenty of these have graduated into important executive positions and are members of the covenanted staff.

KIRLOSKAR BROTHERS, LTD.,

Kirloskarwadi, District Satara, Western India

THE name KIRLOSKAR is quite a household word. You may have seen it stamped on machinery or discreetly enamelled upon steel furniture or splashed in a thousand and one advertising media all over India. Messrs Kirloskar Brothers Ltd are by far the largest and most up-to-date manufacturers in India of iron and steel agricultural implements.

What was once a desolate spot in Satara District is now the handsome township of Kirloskarwadi, with its well laid roads, its electric lighting and power, its fine school, hospital and gymnasium. The remarkable development of Kirloskarwadi, a model industrial settlement, is largely due to the foresight and courage of one dynamic individual, Mr. Laxmanrao Kirloskar, the founder of the whole enterprise and still at seventy its energetic managing director.

Right from his school days Mr. Kirloskar had a natural aptitude for things mechanical. Starting as a teacher in draftsmanship through selling bicycles and windmills and acting as a building contractor, Mr. Kirloskar came to found this great industrial enterprise. Much material aid, including the very site for the factory, came from the Rajasahib of Aundh State. The little 32 acre kingdom given by the ruler of the State was organised in such a way that every employee should share the fullest communal benefits of health, education, recreation and comfort.

In the extensive grounds stand the various factory-departments: the machine shops, the foundry, the power house, the pattern and design department, the furniture department, the factory for power-loom, the pump house, the stock sheds and the Company's printing press and administrative offices. Chief among the manufactures are Agricultural Implements, Power and Hand Pumps, Steel Furniture, Power Looms, Dobbies and Crude Oil Engines.

THE MYSORE KIRLOSKAR, LTD., HARIHAR.

A new enterprise of Messrs. Kirloskar Bros. Ltd. is The Mysore Kirloskar Ltd. It meets an urgent requirement of Indian manufacturers by supplying them a high grade of machine tools. This Company has the active support of the Mysore Government. The Harihar plant, by providing the essential machine tools to the Indian manufacturer, is sure to contribute to the prosperity and progress of the whole nation.

R. E. MODY & CO.

BOMBAY

IN the year 1892 Mr Furdonjee Cursetjee Mody founded the firm of Messrs Furdonjee Cursetjee Mody & Sons

The name Mody is synonymous with the timber trade of India and Burma. The Policy of the firm then as now was to strike out boldly for the expansion of the timber trade not only throughout the East but in the Western Hemisphere as well.

The years which followed the last War were full of vicissitudes for the firm. But under the able management and firm guidance of the late Mr R E Mody then head of the concern the firm emerged as one of the largest and best known timber business in the East. A change of partnership in 1930 caused the name of the firm to be changed to R E Mody & Company.

The firm at present enjoys the reputation of being one of the largest timber concerns in the East and supplies timbers of all kinds indigenous as well as foreign to the Government Departments, Railways, Steamship Companies, Industrial Concerns, Mills and Indian States throughout the length and breadth of India. Indeed it is surprising that though the firm has no branches or Agents in any part of India its supplies extend from Srinagar (Kashmir) in the North to Bangalore in the South and Vizagapatam in the East.

The firm trades in almost all known commercial timbers of India and Burma. Plywoods, Hard Boards and finished Hard Boards suitable for panelling, dado furniture etc.

From the very commencement of the War the firm has been supplying Timber of all sorts to almost all the Defence Works such as for the manufacture of Army Trucks, Ammunition Boxes, Tent Poles, Stretchers, Trawlers and for other ships and for the Railways.

Mr F C Mody Founder

Mr R E Mody

Manickavelu Limited,

BANGALORE

THE house of Manickavelu Limited takes its name from its founder the late Mr V Manickavelu Mudahar. The story of the firm the story of its rise to prominence as an industrial house of note is the romance of a fourteen year old homeless but determined boy who from the humblest and the smallest beginnings shot up to celebrity as an industrial magnate. Cast in the mould of a leader of men, say with the Carnegie touch in him or that of a Jamshedji Tata Manickavelu Mudahar pinned his faith to trade and industry and emerged out of the struggle as the owner of three of the largest Chrome Ore mines in the world.

Youngest child of Mr V Gangadhara Mudahar sent out into the wide world by an elder brother who could not understand him young Manickavelu started life as a trader in a small way selling sweets and pencils to school children in Bangalore. With grim and unshakable determination he went his way graduating into bigger lines of business tea shoes groceries arrack oilman stores medical supplies and so on. He went through the whole gamut and stepped out as an exporter of hides and skins to the United States running at the same time 14 tanneries. An ill wind that blew across India brought disaster and the export business came toppling down with a crash. Manickavelu undaunted and undefeated sold his all and took a job as Manager of the Broach Industrial Spinning & Weaving Mills in far away Gujarat on a salary of Rs 1,000 per month. He made good, saved hectically and won the goodwill of those whom he served. He returned home with money saved and with an agency for piece-goods in his pocket and set himself up as a piece-goods man. While at it he turned his attention and his business acumen to other fields and started the Mahalakshmi Woollen & Silk Mills Co. Ltd. and The Manickavelu Banking Corporation Limited. Adventure was in his blood and he came out as the owner of Chrome and Manganese Mines.

A man of iron grit a self made man, Manickavelu never for a moment forgot his humble beginnings and was generous to a fault with his money. In his case it was not will to power but will to serve. The worker who served him was his partner and friend. A genuine nationalist communalism and anything that smacked of separatism was anathema to Manickavelu. As a glorious finishing touch to an active and useful career Manickavelu set his foot into a different field.

V Manickavelu Mudahar

V Sundaramurthy

of human activity and organised the Mysore State Congress. He could lay claim to be the pioneer of a popular political movement in the State. He suddenly passed away at the ripe age of 63, universally lamented.

The house is now presided over by Mr V. Sundaramurthy, Manickavelu's only son. Cradled in the hard school of business and industry by his father, Sundaramurthy's sole aim is to justify the ways of his father to man. Sundaramurthy dreams his industrial dreams with his heart set on a comprehensive industrialisation of India. Believing as he does that a country's most dependable first line of defence is her industrial strength and believing that an Indo-British friendship on the basis of equality is the most secure basis for the prosperity of the Empire and world peace, the war found Sundaramurthy making a gift of 2,000 tons of Chrome Ore for war and organising war funds and fetes. In the second month of the war, Sundaramurthy sent out an appeal to the Government of India and the Indian Industrialists to plan an all-out industrial war effort for economic co-ordination on a national scale. He exhorted the Government of India to make of the Eastern Group Conference something more than a dealer in supplies to make of it a planner of an arsenal of democracy in the East. He followed it up with a book entitled *India and the Greater War*, throwing out a suggestion for a Congress of Indian Industrialists, a live and alert economic council to guide industrialisation during the war and to prepare the blue-prints of an economic base for the India of the future. It is his conviction that a new world cannot be built on the basis of old assumptions, old prejudices and ante-dated economic theories.

MUKAND IRON & STEEL PIONEERS IN THE MANUFACTURE

Pouring molten metal from the electrical furnace

THE considerable demand in India for spring steel and tool steel is now met to some extent by the enterprise of Mukand Iron & Steel Works who a few years ago started a factory at Lahore. This factory was fitted with the most modern type of electrical furnace together with a fully equipped laboratory for controlling the composition during manufacture and testing the finished materials.

The demand for steel turned out by the Lahore factory from Railways, the Indian Stores Department and engineering firms was so great that a plant similar to the one in Lahore was installed by the company in Bombay. Here too the same high standards of manufacture are maintained with the result that Mukand's Tool Steel and Spring Steel have now become synonymous with outstanding excellence.

The Tool Steel, Spring Steel and other tested steels are manufactured by the firm under the expert supervision of an

WORKS LTD., Bombay & Lahore. OF TOOL STEEL AND SPRING STEEL

Rolling iron bars in the Steel Rolling Mills

experienced metallurgist trained in one of the most famous firms in England. Owing to the increasing demand for Mukand's quality steels the factories both at Lahore and Bombay have been considerably extended.

Mukand's also make steel and iron castings, hoops, structural work, rounds, squares, flats, angles, channels, as well as hammers, anvils, vices, etc.

In addition to fulfilling the requirements of the public demand from the Army, Indian Stores Department, Municipalities and Railways, is also met.

Mukand Iron & Steel Works Ltd. have an influential directorate, the Chairman of the Board of Directors being Mr. R. D. Birla and the Managing Director Mr. Jeevanlal Motchand, under whose able guidance the company is expanding daily and is establishing itself as one of the essential industries of India.

THE HOUSE OF Munjee Nathoobhoy & Co., *Pioneers of Kerosene,* **BOMBAY**

In 1874 India knew nothing of Kerosene or Petroleum. The traditional lighting oil was sweet oil and burning fuel was wood. The introduction of Kerosene is due to the enterprise of Mr. Munjee Nathoobhoy, the founder of the firm of that name.

When the old Standard Oil Company wished to introduce Kerosene into India, they met with considerable apathy from merchants in Bombay and elsewhere. The late Mr. Munjee realised and appreciated the tremendous future possibilities of Kerosene (called by some in those days as 'Only Water') and bought on his own account 100,000 cases, which he gradually introduced into the Indian market and thus educated India to the use of Kerosene and also founded his fortune.

In 1876 the Shell Transport Company, wishing to extend its operations to India, appointed Messrs. W. & A. Graham & Co. as their correspondents in India and for whom Messrs. Munjee Nathoobhoy & Co. became agents and through them began the long connection of the House of Munjees with the Burmah Shell.

Later on, when the Asiatic Petroleum Company wished to establish its own office in India, Messrs. Munjee Nathoobhoy & Co. at the request of the Grahams became their principal agents and gave the new Company considerable help in establishing and organising their field. They not only controlled most of the Agencies but also acted as their Guaranteed Brokers.

Mr. Munjee died in 1901 leaving three sons: Mr. Cassamally (the present head of the firm), Mr. Dostmahomed and Mr. Karmally. Upon Mr. Dostmahomed's premature death in 1935, Mr. Cassamally Munjee became its Sole Proprietor.

With the expansion of Kerosene trade, mechanisation of industry and transport during the Edwardian and the Great War periods, the activities of the Asiatic Petroleum Company increased enormously. Guaranteed brokerage was gradually eliminated and the firm of Messrs. Munjee Nathoobhoy & Co. co-operated in establishing independent agencies and gave the benefit of the change to their erstwhile employees. Some of the successful agents of the present day owe their origin and their fortunes to the firm of Messrs. Munjee Nathoobhoy & Co. The firm thereafter was appointed advisory agents to A.P.C. in addition to their other activities, such as Sellers, Shippers and Custodians of

their goods. They represent Messrs Burmah Shell for all products in Kathiawar Bombay Presidency and Central India.

Messrs Munjee Nathoobhoy & Co (Kathiawar), Ltd

In 1939 the firm's activities in Kathiawar were handed over to a limited liability company having the firm's name viz Messrs Munjee Nathoobhoy & Co (Kathiawar) Ltd. Their annual turnover runs into some millions of rupees.

Plastex Products Company

Apart from oil the firm under the initiative of its head has expanded its activities to various fields of commercial and industrial enterprise. The firm through its allied concern Messrs Plastex Products Company is manufacturing a Rubber Cement known as Plaster. It is used mainly for ship's decking and general flooring purposes. Messrs Plastex Products Co are the only concern manufacturing Rubber Cement in India. Amongst its many other uses are water proofing materials and making anti-corrosive paints.

Other Enterprises

They also run a shipyard for building country craft and run their ships between the Indian Coastal Ports. They have under consideration the formation of a big Bank to help Indian agriculture and industry. They are also Insurance Agents of well-established Insurance Companies. They are also Printers and Stationers owning the Berkeley Printing Press and the Berkeley Stationery Mart.

Their Organisation

Their selling and office organization are very efficient. A visit to the Bombay Office run entirely by Indian staff would impress one as a first rate European firm. The present head of the firm (and its allied concerns such as Messrs Munjee Nathoobhoy & Co (Kathiawar) Ltd, the Country Craft Shipping Co, Messrs Plastex Products Co) is Mr Cassamally Munjee. He is ably assisted by his brother sons and nephews all of whom are trained in England and a capable staff.

Mr Cassamally Munjee is a Deputy of His Highness The Aga Khan and a leader of the Khoja Ismaili community to which he belongs. He is a liberal contributor to educational institutions and is well known and respected by the mercantile community and the Rulers in whose domains he trades. He is very modest but has a firmness of purpose and the word *Izzat* is written all over him.

Messrs Munjee Nathoobhoy & Co are old associates of Messrs Burmah Shell of over 50 years standing having grown from strength to strength. They furnish to others an example of profitable trading with a first rate organization. The good old days may be no more but all is well in the present and the future is bright for the House of Munjees.

THE MURREE BREWERY

THE Murree Brewery Company Limited as its name implies was started at Ghoragali in the Murree Hills thirty two miles from the railway terminus of Rawalpindi in the year 1860. Later on having attained a very great reputation the Company's activities were expanded and Branch Breweries were erected in Quetta in 1888 and Rawalpindi in 1890 Rawalpindi being the largest military station in India proved an excellent choice for the expansion and prosperity of the Company's business.

View of Distillery Building

LATEST BREWING PLANT

Owing to high temperatures however during the summer months it was only possible to brew in Rawalpindi from the month of October to March and for the remaining period of the year the Rawalpindi Brewery was dependent on its outturn from the Brewery at Ghoragali. This obstacle was overcome by the adoption of the latest and most scientific devices which included the installation of a complete Nathan Brewing Plant. The principal problem of any fermenting process is the production of a clean and suitable beer. This problem in the Nathan system is solved. The whole system is so scientifically controlled from the refrigeration plant fermentation plant pure yeast plant and collection of CO₂ and is so perfect that it distinguishes itself fundamentally from brewing plants of the old style. The installation of this plant has proved an unqualified success and removed the necessity of having beer transported from the Ghoragali Branch and this Brewery was consequently closed in the year 1928.

View of Brewery Tun Room

CO., LTD., RAWALPINDI

IDEAL CONDITIONS

The Brewery is located in one of the most picturesque spots of Rawalpindi. The Brewery owns a very large estate and has ample room for any expansion.

A plentiful supply of water is obtained from the Company's own wells and has been found to be most suitable for the brewing of beer and for all other manufacturing purposes.

The Company have their own Railway siding which renders their position most accessible and facilitates the despatch of their many products.

MALT WHISKY, TOO!

The Company have recently erected one of the most modern and up-to-date French Distillation Plants and supply spirits of all descriptions. For many years the Company have produced a very excellent Malt Whisky which is manufactured in the true Scottish style and distilled in Pot Stills used only for this purpose. The French Still is capable of producing Alcohols of the very purest degree possible and has an outturn of 900 gallons per day. The Malt Whisky produced by the Company is considered to be as good as that imported from Home.

CHOICE INGREDIENTS

The materials used during the course of manufacture are the best obtainable only the best barley and hops being used for the production of the Beer. The barley is obtained from the districts of Rewari and Ferozepur which are well known for their high standard of quality. Samples of these barleys were recently examined by the Institute of Brewing and were pronounced to be equal to some of the best barley grown at Home. All hops however have to be imported from Europe and the British Isles only the best Kent and Californian hops being used. The molasses used for the production of the spirit is obtained from the large sugar growing districts in the United Provinces.

The Company also have a Mineral Water Department which produces mineral waters of very fine quality and which are most popular in the surrounding districts.

A normal staff of seven Europeans and three to four hundred Indians is employed.

MYSORE STATE INDUSTRIES

MYSORE represents the focal point in State industrialisation in India. The State's wonderful natural resources are being zealously harnessed to provide for Man's multitudinous needs in civilised life. Now India's teeming millions can 'wash themselves with Mysore Soap, dry themselves with Mysore towels, clothe themselves in Mysore Silks, drink Mysore coffee with Mysore sugar, build their homes with Mysore cement, Mysore timber and Mysore steel, furnish their homes with Mysore furniture, write their letters on Mysore paper and cure their ailments with Mysore medicines.

Government Sandalwood Oil Factory

The Government Sandalwood Oil Factory produces oil which conforms to the different pharmacopœias of the world. Modern methods of distillation under strict scientific control are adopted at the Factory.

Government Soap Factory

The Government Soap Factory, Bangalore, is one of the pioneer Soap Factories in India. It was started in 1918 and has since then made continued and steady progress. The factory manufactures not only household soaps but also high class toilet soaps and certain cosmetics like pomades, creams, tooth paste, etc. The factory also manufactures certain other household necessities such as 'Ecodure' boot polishes and 'quick fix'. The products of the factory enjoy an extensive sale in the home market and are in demand even in foreign markets.

Government Electric Factory

The Government Electric Factory is manufacturing amongst other things Electrical Transformers, Scientific Instruments, bakelite articles, black bolts and nuts, rivets, galvanized hardware for porcelain fittings, besides rendering useful service to other factories in the State as well as to the Railway Department by supplying spare parts for their plant.

Government Porcelain Factory

This factory is the only concern in South India which manufactures both High Tension and Low Tension Insulators which are supplied for defence purposes as well as to Government Departments and Corporations in India. An electrical tunnel kiln the first of its kind in Asia has been newly installed. The factory is manufacturing Crockery articles and also wall tiles. Experiments are being conducted in the manufacture of Acid Resistant Ware and Chemical Porcelain.

Government Silk Weaving Factory

This factory manufactures pure and unadulterated silk and laced fabrics out of pure Mysore Silk. The products of this factory are durable, washable and are sold at reasonable prices. The factory is now engaged in the manufacture of parachute silk.

Government Industrial & Testing Laboratory

This Laboratory is engaged in manufacturing pharmaceutical products. In addition to supplying the needs of the Mysore Government Medical Stores, the Laboratory has also been making supplies of its medicinal products to the Government of India etc. The Laboratory also manufactures Acetates and Citrates and Cream of Tartar for the Supply Department.

Mysore Government Implements Factory

The factory is now producing Munties, Pickaxes, Hammers, Pruning Knives, Digging Forks and various other Estate and Garden implements and also cutlery and scissors.

Mysore Government Lac & Paint Works

The chief lines of manufacture taken up by this factory are Shellac, Paints, Ready mixed oil paints, French polishes, Sealing waxes, Printing ink and Electrical insulating varnishes.

Sri Chamrajendra Technical Institute

This Institute was started with the main object of training students in several arts and crafts and to revive and improve many of the indigenous industries of the Mysore State. Show rooms are opened in the Institute Building to display the products of the Institute as well as those of the private artisans and Government Industrial concerns. Furniture in wood and rattan of an excellent quality are made in this Institute.

THE MYSORE CHEMICALS & FERTILISERS, LIMITED, MYSORE.

Mr E V Ganapati Iyer BSc
*Chairman and Managing
Director of the Company*

TO Mysore State belongs the credit of establishing the only factory in India for the fixation of atmospheric nitrogen—a basic industry in any country whether during peace time or war. **THE MYSORE CHEMICALS AND FERTILISERS LTD** **MYSORE** owes its existence to the forward industrial policy and encouragement given by the Government of Mysore following the establishment of the Mysore Sugar Company in Mandya and the Development of sugarcane cultivation under the Irwin Canal System.

Mr H K. Ramengar M.A. (Hons)
Secretary and General Manager

THE MYSORE CHEMICALS & FERTILISERS LTD was formed towards the end of 1937 with a share capital of Rs. 25 00 000 divided into 2 50 000 shares of Rs. 10 each

PRODUCTS

The Company's activities include three basic industries viz

- (i) Synthetic ammonia manufacture
- (ii) Sulphuric Acid manufacture
- (iii) Manufacture of Superphosphates

In addition to these heavy chemicals the manufacture of a number of other chemicals has been developed. These include Ammonium Sulphate, Liquor Ammonia Fortis, Ammonium Carbonate, Ammonium Chloride, various kinds of Mixed Fertilisers, Oleum, Hydrochloric Acid and Chlorosulphonic Acid. It is hoped that the manufacture of Nitric Acid will soon be taken up. The Company commenced production in April 1940 and within less than 2 years has achieved remarkable progress in the quantity and variety of its manufactures. All its products conform to the requirements of the British Pharmacopoeia and other standard tests. Supplies to the Government of India for war supply requirements conform fully to the specifications of the Supply Department. The Company has an active programme of further expansion of manufactures so that it may be reasonably hoped that these Works will soon be among the largest Chemical Works in South India.

AMMONIA FROM AIR AND WATER

For its products the Company makes the maximum possible use of the raw material resources of the country. The plant is of the most modern kind obtained from American manufacturers and erected by American Experts and is the only one of its kind in India. The synthesis plant produces ammonia from the abundant natural sources of air and water.

The products of the Company find a ready market though at the present time practically the greater part of its production is taken over by the Government of India for war purposes. The fertilisers made at the Works are used by coffee planters and agriculturists all over the country for large areas of cultivation of cane, paddy and other crops, and have already achieved a splendid reputation for quality and results.

This flourishing concern has led to the establishment in the Mysore State of industries for the manufacture of basic salts like Copper sulphate etc. and dichromates, and has paved the way for the formation of many more chemical industries in the State and its neighbourhood.

THE MYSORE CHROME TANNING CO., LTD.

MYSORE ROAD, BANGALORE

HISTORY

THE Mysore Tannery which was started in the year 1908 as a Limited Liability Company in Bangalore City for the purpose of Chrome Tanning of Cow Hides worked successfully for sometime. Thereafter the Company passed through various vicissitudes and in the year 1934 the Bangalore Bank Ltd. Bangalore acquired the ownership of the concern and effected several improvements in the manufacturing process thus increasing the productive capacity of the Tannery. The Tannery was the first to be established in Southern India and it had afforded occupation to a large number of skilled men. The Government of Mysore helped to start the concern and form it into a Limited Company on a Joint Stock basis with an authorised Share Capital of 5 lakhs of Rupees under the present name of Mysore Chrome Tanning Company Limited by taking up a portion of the shares. The Management is vested in the hands of a Senior Officer of the status of a Head of the Department.

ADVANTAGES

The Tannery is situated on the Mysore Road Bangalore City and the site covers an area of over 9 acres of land.

The climate of Bangalore is specially suited for tanning operations as the temperature is fairly low throughout the year which renders loss of hide substance very low and yields leather of good substance and tight grain. Added to this the Tannery has the advantage of a good supply of efficient and trained labour with an expert staff who have won a reputation for the products of the Tannery throughout the United Kingdom.

DEVELOPMENT

The Company has taken up the manufacture of Textile goods such as Picking Bands, Leather Belting, Gunning Washers, besides the Leather goods required by the Railways and Printed Leathers for War Purposes in addition to the manufacture of Box and Willow side and Calf Leathers. Arrangements are in progress for the manufacture of Bark Tanned Soles, Harness and Saddlery Leathers, Boots and Shoes and Attache Cases etc.

Besides meeting the demands in the Indian markets the Upper Leathers manufactured by the Company are popular in the United Kingdom.

Front view of the Factory

MYSORE GOVERNMENT IMPLEMENTS FACTORY

HASSAN (Mysore Rlys.)

THIS Factory was started with the object of manufacturing and supplying the needs of peasants and artisans in Mysore and elsewhere in the form of working tools implements etc. It is the only Factory of its kind in Mysore and is already meeting the deficiency caused by the War.

Power Forging Section

The Factory came into operation in October 1940 nearly one year after the war began and has since been making Mammooties Pick Axes Pruning Knives Digging Forks Mammooty Forks and other implements required for Tea Coffee & Rubber Estates and also Sledge Hammers Scissors and Cutlery of various kinds.

The products of the Factory are in good demand in Mysore and South India and they are also being sent to distant centres like Karachi, Bombay Assam and Colombo.

In addition to the products required for the Market the Factory has been making various War Supply articles like Ballpane Hammers, Peg Picketing Hammers Table Knives Flesh Forks etc. in increasing quantities.

The following list will give an idea of the wide variety of articles in demand manufactured by this Factory and the scope for expansion in view of the fact that millions of working class people must be provided with tools and implements of various kinds.

Mammooties	Digging Forks	Penknives
Pick Axes	Kodaly Forks	Table Knives
Weeding Hoe	Hand Forks	Vegetable Knives
Quintany	Wheel Barrows	Bread Knives
Sledge Hammers	Water Barrows	Scissors
Stone Breaking	Mysore Stoves	Garden Shears
Hammers	Felling Axes	Secateurs
Ballpane	Hatchets	
Hammers		

Inclusive of various sizes and varieties in the above items over 200 different articles are now being made.

PIPE FOUNDRY

THE MYSORE IRON & STEEL WORKS.

THE plant occupies an area of about 100 acres and comprised originally a modern Charcoal Blast Furnace with wood distillation and bye-products recovery plant with the auxiliary steam and power plants foundry and machine shop

Now the production has been widened by the addition of an Alcohol Refinery Plant and a Pipe foundry the latter for the manufacture of cast-iron pipes for water supply and drainage purposes an additional Pipe foundry to manufacture pipes up to 33" diameter an up-to-date Steel Plant and Rolling Mills for the manufacture of mild steel sections such as flats rounds squares angles reinforcing rods etc in all common sizes and a Cement Plant for the manufacture of Chamundi Brand Portland Cement to B S S

A structural shop has also been added to fabricate transmission line towers for the electrical department Steel towers and trusses are also made to order

Another addition is a plant for the manufacture of Formalin The major portion of the output is utilized for the manufacture of synthetic resin for which a Pilot Bakelite Plant is also put up

A Steel Foundry manufacturing special steel articles such as axle boxes anvils and other special castings has also been added as an experimental measure

With a view to assisting war efforts Government have sanctioned the installation of an additional Open Hearth Furnace for the supply of ingots and billets To increase the production of small rods and to roll strips $\frac{1}{2}$ " x 20 gauges orders have been placed for another Rod Mill as an extension to the Rolling Mills

One Electrical Steel Furnace for the manufacture of special steels and two Electric Furnaces for the manufacture of Ferro-silicon and Ferro-chrome at Mysore are under installation

THE MYSORE LAMP WORKS LIMITED, MALLESWARAM P O, BANGALORE

THE leading position occupied by South India generally and Mysore State in particular in Hydro-Electric development specially electrification of numerous towns and villages has led to the establishment of an important industry in THE MYSORE LAMP WORKS LTD. The starting of the concern itself has been due to the

progressive industrial policy of the Mysore Government who with great vision of the future readily gave the necessary encouragement

PRODUCTION

The Company was incorporated in August 1936 and production started in November 1937. It has an issued capital of 3 lakhs of rupees and the Government of Mysore have subscribed 10% of the share capital. It has a modern American plant automatic and efficient in operation with an average capacity of 3,000 lamps per day. It has its own gas plant and lamp life testing equipment.

The Company's normal products at present are vacuum and gas filled lamps in all standard wattages and voltages. The installation of additional equipment for the manufacture of high wattage railway service street series and other special types of lamps has been delayed owing to war conditions and the Company expects to have regular production of these products in the early future.

EFFICIENCY OF LAMPS

The Works mostly use raw materials of highest quality obtained from the leading American manufacturers and manufacture is carried out with an efficient and intelligent personnel trained under an American expert. All lamps are subjected to a rigorous test before they are marketed in attractive packing.

IMPORTANT USERS

MYSORE LAMPS under which name the Company's products are marketed have established a name throughout India for quality and efficiency. The Company counts among the regular users of MYSORE LAMPS the Mysore Government Electric Department leading textile mills in Bombay and Ahmedabad cities & corporations and factories in various cities of South India.

Mr E V Ganapati
Iyer B Sc Chairman

Available at moderate prices and with guaranteed long life produced out of best quality materials by skilled workers MYSORE LAMPS form a most popular and attractive proposition for the illumination of every home.

THE MYSORE MATCH CO., LTD.,

SHIMOGA

MANUFACTURE of Safety Matches dates back to 1925 in Mysore State. The Government of Mysore granted concessions in 1923 for exploitation of softwoods in the State at a nominal scigniorage and a Public Limited Company was registered in 1925 which commenced operations in 1927 at Shimoga being near the Malnad Forest Area and continued till 1934. In the year 1934 on the advent of Excise Duty on matches the Company had to suspend operations and finally stopped working in 1936.

As the industry had an important place in national economy and was calculated to utilise local resources and employ local labour the Government of Mysore again thought of resuscitating the old Match Factory. Accordingly a fresh Public Company was floated in May 1940 with some more concessions from Government for wood supplies power and subscribing 10 per cent towards Capital. The management has been entrusted to a Board of Directors of 9 members out of whom

three directors are nominated by Government with one of them as the Chairman. The new Company has as the Head of the Administration the Chairman of the Mysore Iron and Steel Works Bhadravati and the factory is located at Shimoga eleven miles from Bhadravati where The Mysore Steel and Cement Plants and also a Paper Mill exist.

The whole operation of the plant from cutting of logs to finishing is automatic only the banderolling and bundling of packets is done by manual labour. The production of the plant is rated at 1,000 gross per day.

In addition to the plant required for the manufacture of matches there is an additional 160 H.P. Gas Generator Set as a standby.

The present products are marketed under the Trade Mark JOG FALLS Safety Matches and are finding a ready sale in Mysore State and adjacent districts of Bombay and Madras Presidencies.

PAPER INDUSTRY IN MYSORE

THE Mysore Paper Mills owe their origin to the progressive industrial policy of the Government of His Highness the Maharaja of Mysore. A Joint Stock Company was formed in 1936 with the Government of Mysore taking a share both in the Capital and the Management.

The Mill at Bhadravati on the banks of the perennial Bhadra commands various facilities such as nearness to bamboo forests labour and workshop facilities. His Highness the late Sri Krishnaraja Wadiyar Bahadur laid the foundation of the Mill buildings on the 1st of April 1937.

The Mill designed and equipped on an all bamboo basis is fitted with the most modern type of paper machines and other accessories for the production of chlorine and recovery of chemicals.

The mill has a daily rated output of 17 tons of bamboo pulp, 2½ tons of rag pulp and 15 tons of high class finished paper or about 4,500 tons per annum.

Writing, Printing and Typewriting, Banks, Bonds, Manifolds, Antiques, Badamis and other varieties glazed and unglazed are manufactured and marketed under the Registered Trade Mark Bison Brand.

The Mills employ more than 100 educated men on an average and about 600 skilled and unskilled workers besides providing employment to 500 more in the extraction of bamboos.

Consequent on the outbreak of the War and the resultant News print shortage the Mysore Paper Mills undertook to manufacture

Emergency Printing Paper—a substitute for newsprint and thus came to the rescue of the local newspaper industry.

The quality of the Mysore Paper Mills products and their attractive prices created a demand greater than the Mills can meet in spite of increased production.

A regular town has grown up at Bhadravati with all modern amenities like protected water supply, electric lighting, sanitary arrangements, a co-operative society, a primary school and medical and maternity aid.

THE DRY END OF THE PAPER
MACHINE IN THE MYSORE MILLS

THE MYSORE SILK FILATURES, LTD.

T. NARASIPUR. (Mysore District)

SERICULTURE is an ancient Industry in India and the Mysore State owing to its climate produces some of the best silk in the world. On account of its furnishing a livelihood to nearly 8 lakhs of people Sericulture has been carefully cherished by the Mysore Government and the Mysore Silk Filatures Ltd was started in 1937 with the support and patronage of Government with an authorised capital of 10 lakhs (of which 4 lakhs have been issued).

The Company's Main Factory is on the Banks of the Kapini at T Narasipur 20 miles from Mysore in the very heart

of the State's richest silk area. It has branch factories at Mysore Siddlaghatta and Kuderu. Its object is to secure for Mysore Silk its due place in the World's market as a superb silk suitable for the highest manifestations of the weaver's arts.

The organisation of the factory aims at basic improvement of the Industry in all its stages from silk

worm egg production to reeling silk. The Company has an efficient and highly trained staff of technicians in all branches of sericulture and is every day evolving new methods and new machinery for the further improvement of its products.

*Mr N Rama Rao B A B L,
Chairman*

Its silk has earned a reputation throughout the world for softness lustre beauty and elastic strength. Besides an unlimited market in India the Company has business relations with Europe and Australia and it is probable that its products will shortly be welcomed by America as well. Since Mysore Filature Silk has been

found eminently suitable for parachute fabrics this industry is an indispensable empire asset.

The Company has a strong Directorate under the Chairmanship of Mr N Rama Rao B A B L. Retired Director of Industries & Commerce Mysore State who has made a life's study of Sericulture and is an authority on the subject.

THE MYSORE SPUN SILK MILLS, LTD., Channapatna.

MYSORE STATE

THE MYSORE SPUN SILK MILLS Ltd was promoted in 1936 aided by the Government of Mysore with a view to finding a profitable outlet for silk waste produced in India. The establishment of the Mill helps to stabilize the Sericultural Industry by ensuring a steady price for the waste produced by silk reeler.

The Factory manufactures Spun Silk yarns of all counts. Noil yarns of coarse counts and also Muga Tassar and Eri Spun Silk yarns and Grandrelle yarns from Muga and Tassar wastes and Eri Cocoons produced in the Central Provinces Bihar and Assam Provinces. Recently Embroidery yarns and Sewing Threads are also being manufactured as specialities.

The Mysore Spun Silk Mills Ltd

Spun silk yarn is used for sarees, shirts, coatings, etc. and for all purposes for which raw silk is used. Noil yarns are used for thick coatings, drapery, etc. Spun silk Noil yarn and Noils (the latter a by-product obtained in the course of manufacture of Spun Silk) are also useful for war purposes.

Spun silk sewing threads are being used in Ammunition production and for webbings for parachutes.

The authorised share capital of the Company is Rs. 10,00,000 and the issued and subscribed capital is Rs. 8,30,000. The paid up capital is Rs. 8,46,750. The Government of Mysore have subscribed ten per cent of the issued share capital.

The Mysore Tobacco Co., Ltd.

District Board Buildings, Kempegowda Road, Bangalore City

PURSUANT to the generous and progressive policy of encouragement to agriculture and industry by the Government of H H the Maharaja of Mysore the Mysore State was the first among the Native States in pioneering the planned growing of Harrison Special Virginian variety of tobacco. A Joint Stock Company called The Mysore Tobacco Co. Ltd. was floated in April 1937 with its Head Office at Bangalore City the Government themselves contributing one tenth of the Authorised Share Capital of ten lakhs of rupees.

The Company has for its part the raising of adequate nurseries at the respective Centres the ryots sharing the cultivation side under the trained supervision of executive staff of the Company. To stimulate growth of the best crop the Company helps the ryots with the advance of manure etc. Details regarding the soil climatic conditions etc. are given in a local vernacular (namely Kannada) leaflet published for information of the growers. The green tobacco leaves thus grown are picked and fine-cured. The cured leaves unloaded from the barns are transported carefully packed to the nearest Grading Station for being graded according to specified grades.

The agriculturists have been showing increasing eagerness to grow this variety of tobacco as is noticeable by the fact that over 7 000 acres have been planted against an acreage of 2 200 during the first year. Eight more new Tobacco Curing Centres have been opened in the Irwin Canal area this year. Besides the existing one at Whitefield a second Grading Station has been newly put up at Closepet to facilitate the grading of leaf produced in the Mandya and Mysore Districts. As many as 31 Centres have been opened in the several districts of the State.

The entire production of the cured and graded leaf tobacco has been covered by forward orders of prominent cigarette manufacturers and exporters in India. There

has also been a prospective market for Mysore Tobacco in the United Kingdom as is signified by the insistent demand for shipments being made by the Company. Mysore Tobacco has thus earned a reputation overseas for its high quality. With the unshakable reputation built up for the quality of Mysore Tobacco the Company looks forward to bright prospects in the years to come.

NARRONDASS MANORDASS

135 SHEIKH MEMON STREET

ESTABLISHED 1788

Bankers Bullion and Cotton Merchants, Refiners of Precious Metals and Manufacturers of Chemical Owners of Mines and Dealers in Minerals.

BOMBAY is one of the largest Gold and Silver markets in the world. Most of the imports into and exports from India generally take place from Bombay. In export import and actual handlings and dealings of Gold and Silver the firm of Messrs Narrondass Manordass stands first since several decades. The firm was founded in 1788 by Mr Narrondass Manordass and the business continues in the same family since the last seven generations occupying the same business premises for the last 150 years. Mr G P Sonawala senior partner of the firm is the seventh descendant of Mr Narrondass Manordass.

In order to facilitate their handlings of Gold and Silver the firm has set up an up to date Electrolytic Precious Metal Refinery since more than a decade. This refinery is the largest and the first of its kind in India as far as private refineries and enterprises are concerned. The capacity of this refinery is about $\frac{1}{2}$ of the refinery at His Majesty's Mint at Bombay. His Majesty's Mint at Bombay has accepted the assayed fineness of the firm.

The firm is also interested in the manufacture of chemicals and the development of the mineral resources of this country. A plant for the manufacture of heavy chemicals and other chemical products is going to be set up shortly at Kalyan on a site of about 100 acres.

The firm has a mining lease for the mining of bauxite chromite and other minerals and is carrying out prospecting operations for minerals in several provinces and states of this country.

The firm is also interested in investment, cotton and property

The Precious Metal Refinery at Sonawala Estate Tardeo Bombay

THE NEW BOOK CO.,

188-190, Hornby Road, Bombay

The New Book Company is no ordinary book shop but a vast organisation having business connections with every part of the world. In fact it is one of the largest and most up-to-date establishments of its kind east of Suez.

It might be supposed that it took the New Book Co. a few decades to build up such a fine reputation for itself. The truth is it came into existence only six years ago and with Service as its watchword has risen to its present enviable status.

Many and varied are the services it offers its patrons. For example the New Book Co. will trace and procure for you any book that is out of print or is not available ordinarily and there is an

Express Service for those needing books urgently. If any book is out of stock a cable is sent to the London or New York office of the firm and the book is despatched direct to the customer by the first mail.

Book Selection Service is another of their innovations. Periodically a picked collection of books according to individual taste is sent to their Patrons who have the option to retain all or any of the books and return the rest.

The Company publishes every month an interesting Literary Journal entitled The New Book Digest which in the words of The Claque London is a complete guide to current reading on every subject.

The New Book Co. has a very large stock of books on almost any subject under the sun and can send you descriptive lists on your favourite subjects on application. What is more the customer is free to examine the books in the marked shelves at leisure without being disturbed or embarrassed by the over-attentions of the staff. The New Book Co. also runs an up-to-date Stationery Department and undertakes printing and publishing work. They have published several distinctive works by well known authors and research scholars.

John Gunther the famous author who has seen all the capitals of the world has alluded to The New Book Co. as the Most Excellent Shop.

THE NEW CITIZEN BANK OF INDIA, LTD., Bombay.

The New Citizen Bank of India Ltd Bombay was incorporated on 31st July 1937 and commenced its banking business on 1st April 1938. The Company was promoted under the distinguished chairmanship of Mr Jamnadas M Mehta and the Board of Directors is composed of the following —

THE BOARD OF DIRECTORS

Chairman Mr Jamnadas M Mehta M A LL B Bar at Law

Depositors Director Mr G V Salvekar B A

Sir H P Dastur B A LL B Bar at Law P B Cole Esq
B A LL B Advocate Seth Govindas Narayandas Banatwala
Rao Bahadur N B Deshmukh B D Garware Esq G V
Puranik Esq G S Marathe Esq M A A I A Rao Sahib R
S Athavle B A Bhagwanji Murarji Goculdas Esq

Mr D D Deshpande B A has been the promoting Managing Director and the Bank has made fairly good progress under his able management

The Company had a paid up share capital of nearly Rs 85 000 and secured initial deposits of Rs 42 000 on the day it commenced business. Since then it has made rapid strides. The Bank had a paid up share capital of over Rs 5 06 400 in April 1939 and was placed in the second schedule with the Reserve Bank of India from 10th May 1939. The Bank has been able to extend its activities both in the City of Bombay and outside in the Deccan. It has now three local branches in Bombay at Girgaum Dadar and Javeri Bazar and four mofussil branches at Nasik Kolhapur Sholapur and Sangli.

The Bank has so far published three balance-sheets the last being as on 31st March 1941. From the third year's annual report and balance-sheet as on 31st March 1941 the Bank has made some profit and has been able to pay a dividend of 5 per cent to its 5 per cent Cumulative Preference Shareholders for the first two financial periods ending on 31st December 1939.

Since the issue of its third balance-sheet viz upto 31st March 1941 there has been further increase in business. The paid up share capital of the Bank has increased from Rs 5 06 000 to Rs 5 67 000 and the deposits of the Bank have increased from Rs 19 32 000 to Rs 25 52 000 as on 31 3 1942. The working capital of the Bank has also increased from Rs 25 00 000 to over Rs 32 00 000 by the end of March 1942. It will thus be seen that the Bank has been making a steady and sure progress during the short period of four years it has been in existence. The Bank hopes that in the future it will make even greater progress and become one of the leading Banks of Bombay.

The special feature of this Bank is that it has allowed representation to its depositors on the Board of Directors from its inception. There has been on the board a Director on behalf of the depositors. This is probably the only Bank in India which so allows representation to its depositors on its Board.

H E H THE NIZAM'S STATE RLY.

H E H the Nizam's State Railway was purchased by the Government of H E H the Nizam in the year 1930 from the Nizam's Guaranteed State Railway Company Limited. It is a system of both Broad and Metre Gauge construction and comprises 1,367 miles of open line, 693 of which are Broad Gauge and 674 Metre Gauge. This Railway connects the north of India with the south and the east of India with the west and links up the V S M Railway with the C I P Railway.

Secunderabad is the Headquarters. Through service carriages daily run between Secunderabad and Bombay, Secunderabad and Delhi and Secunderabad and Bangalore. Through service between Secunderabad and Madras is provided during the hill season.

From Berwada (A S M) the line runs in a north westerly direction till Kazipet, whence it turns due west towards Secunderabad and Wadi (G I P). There is a branch line from Domakal junction serving the Singareni and Kothagudem coal fields. At Kazipet another branch line runs due north and connects with the G I P Rly at Balharshah. This link is important as it constitutes the shortest route between northern and southern India and also serves the Tandur coal fields and the Surpur Paper Mills which is exploiting the vast bamboo resources in this area.

The Metre Gauge line from Dronachellam runs north east up to Secunderabad and from Secunderabad proceeds in a north westerly direction and connects with the G I P Railway at Manmad.

A branch line connects Vikarabad on the Secunderabad Wadi Section with Parbhani on the Metre Gauge main line.

Another Metre Gauge branch line connects Purna with Hingoli, an important cotton centre.

The Nizam's State Railway also operates more than 4,000 miles of Road Services. Air transport has also been brought under the management of the Railway.

PILGRIM CENTRES AND PLACES OF HISTORICAL AND ARCHÆOLOGICAL INTEREST

Bhadrachellam Standing on the left bank of the River Godavari at Bhadrachellam is the famous Sree Rama Temple.

Aundh has the magnificent temple of Nagnath which is hallowed by a Jyothirlinga.

Purli Vaynath is famous for its Siva temple which is said to be the oldest temple in India.

Verul is a village 11 miles from Daulatabad station with its famous temple dedicated to Lord Grishneswar.

Aurangabad is the headquarters of the District of the same name and is the most convenient station on the N S Ry from which to visit the world famous rock temples of Ellora and the frescoes of Ajanta.

Mahomedabad Bidar the city of a thousand legends is situated on the Vikarabad Parbhani branch line.

Nander is famous for the Sikh temple known as the Gurudwara which contains the tomb of Guru Govind.

The New Piece Goods Bazar Company, Ltd.

(THE MOOLJEE JAITHA MARKET)

(Established in 1871)

BOMBAY

BOMBAY the Gateway of India, boasts of a fine cloth market—the biggest in Asia and perhaps in the world having as it does over 770 shops under one roof. You wander through aisles of cotton cloth woollens and silks. There is colour glorious colour everywhere. The little shops gleam with their rich wares.

The idea of this beautiful market was conceived by that far-sighted and able business magnate a Bhatia gentleman the late Sheth Mooljee Jaitha. A company with a capital of Rs 600 000 was floated and named the New Piece Goods Bazar Co. Ltd. Its capital was later raised to Rs 18 00 000. This commendable project was launched at the explicit wish of Bombay's leading merchants who wanted to centralise the trade. When the scheme was put into execution there were only 30 shops. Gradually the Market expanded and today it covers 17 000 square yards.

Late Sheth Mooljee Jaitha.

The present Directors of the Company are (1) Mr Karsandas Dharamsey Soonderdas J P *Chairman* (2) Mr Chattrabhuji Gordhandas Soonderdas, J P (3) Mr Haridas Liladhar Jauram (4) Mr Chandrakumar Karsandas Dharamsey B.Com (5) Mr Krishnaraj Madhavjee D Thackersey BA (6) Mr Hansaraj Purshottam Vishram B.Com LLB (7) Mr Dwarkadas Meghji (8) Mr Laxmidas Kalyanji. The Secretary of the Company is Mr Padamsey Damodar Govindji J P.

It is gratifying to find that the Mooljee Jaitha Market today is a citadel of security and sound finance. Its capital has reached the figure of 18 lakhs and its assets stand at the respectable figure of 59 lakhs though actually they are much more. The peculiarity of this

unique institution is that all along it has been a Bhatia institution all the Directors being Bhatias. This Market is probably bigger than all other markets of the city put together. It controls the cloth trade to this day. It is as pointed out above by far the largest market for textiles in the East controlled by private individuals.

In the beginning 75 per cent of the tenants were Bhatias who controlled the cloth Trade. With the tragic crash of the Specie Bank in 1912 the business got deflected into other channels. The Trade was at its height in 1918-19. The merchants suffered a set-back in 1920 owing to the dramatic collapse of the Exchange. The Market is a lucky institution having had only one fire in its history on the 20th day of July 1920 inflicting a colossal loss of a crore of rupees on the cloth merchants. Since then half the portion of the market building was rebuilt in 1921-22. In the political crisis of 1930-31 the market had to be locked up for over 8 months. This closure entailed a heavy loss on the trade.

The Trade is generally divided into 5 or 6 channels (1) Wholesale Dealers (2) Retail Dealers (3) Dealers of woollen cloth (4) Dealers of Printed Cloth (5) Dealers of Gray unbleached cloth (6) Dealers of bleached and fancy cloth. Imported cloth comes principally from England and Japan. There is a large section of dealers in cloth manufactured by Indian Mills. And there is also a section of dealers who export cloth to Africa and Egypt. There is a monthly turnover of over 5 crores of rupees in the market. The secret of the Trade is that it has the confidence of the merchants and one shop is run by one member for more than 50 years. Some merchants are still founder members of the market prominent among whom are Messrs Valji Shampi Messrs Raghavji Anandji Messrs Damodar Handas Messrs Damodar Valji Messrs Ghela Dayal and Messrs Pragnji Vandravan.

The market owns besides cloth shops buildings occupied principally by Banks like the Central Bank and the Devkaran Nanjee Banking Co. Ltd. It also controls the old Sunderdas Mills property. The intrinsic value of the Market to-day is well nigh 2 00 00 000 of rupees. The Market remains closed under instructions from the Landlords who issue them at the request of the Traders Association. All disputes of the Trade are submitted to and settled mostly by Arbitration.

The Market is an everlasting monument to that great man Sheth Mooljee Jartha who raised the standard of textile Trade in the Bombay Presidency. Sheth Mooljee Jartha was a realist. His decisive nature was the key to his success. He framed ideal schemes to centralise the trade of Western India.

THE OGALE GLASS

OGALEVADI (Aundh State),

THE works were started in 1916 by Mr S P Ogale as a proprietary Concern Shrimant Rajasaheb of Aundh who has done so much for the development of industries in his small but progressive State granted a plot of land measuring 15 acres at a nominal price where the Works and the Industrial Colony of Ogalevadi are now situated

A small beginning with a capital of Rs 10 000 was made. Though a demand for indigenous articles was created by the last Great War the Works could not take advantage of it owing to difficulties in securing supplies of raw materials particularly of coal which was strictly controlled

In 1920 there were about 125 people working and the annual production had reached Rs 1 00 000

The proprietary Concern was converted into a Limited liability company with a capital of Rs 2 00 000 which was readily subscribed. The progress was steadily maintained and in 1923 the annual production reached Rs 2 00 000 with 250 people working. The Company paid three successive dividends during this period

A scheme to start the manufacture of Dietz type Hurricane Lanterns was prepared in 1925 and the authorised capital of the Company was increased to Rs 10 00 000. New shares to the extent of Rs 3 00 000 were issued and subscribed for—the Rajasaheb of Aundh subscribing a substantial portion thereof

Mr G P Ogale the Company's Engineer went to Germany and after visiting a number of Lamp Manufacturing Concerns there purchased a suitable plant and machinery for manufacturing 1 200 complete lanterns per day. Within about 4 months the machinery was brought to Ogalevadi fitted up and regular manufacturing commenced. The lanterns produced were very satisfactory and a complete success so far as the manufacturing side was concerned

About this time Germany, America and Japan started dumping their Lamps and Lanterns in this country and the price of lanterns which was round about Rs 27 per doz went down to Rs 15 per doz. It further dwindled down to Rs 9 4 0 per doz within the space of next 12 months

Front view of the Ogale Glass Works Ltd

WORKS LIMITED,

District, Satara

A case for protecting the Industry in the face of this killing competition was presented to the Government of India but without success. The Works continued to produce lanterns till about 1932 and thereafter finding it impossible to carry on considerably restricted their production.

There was also a very keen competition in the Glass trade and though the Indian Tariff Board recommended a certain measure of protection to the Industry Government turned down the Tariff Board's proposals. Both the glass and lantern Industries had to fight their way in the face of the worst competition from abroad and without any kind of protection at home. The management continued to make progress in the direction of producing new articles and bringing them to the standard of the imported articles.

The Raja Sahel of Aundh

One of the Ogale Brothers started a new Glass Factory at Nagpur in C P at this time.

The Enamelling Department was started in 1932 and the production of the Glass Lantern and Enamelling Sections reached a figure of Rs 5 00 000 with about 700 people working in all the sections.

The Company started the Mysore Glass & Enamel Works Ltd in 1939 and took up the Managing Agency.

The present War gave them a filip and all the Glass Lantern and Enamelling Sections doubled and trebled their production. They got the advantage of the various experiments they had made during the lean years.

The present production of the Works at Ogalevadi has reached Rs 1 25 000 per month. More than 1 200 people are now working. The Company paid a dividend last year and will pay a substantial dividend this year.

At the invitation of the Government of Ceylon Messrs Ogale Brothers have recently undertaken the erection and working of a Glass Factory in Colombo.

They propose to start a Factory for manufacturing Sheet Glass at Alwaye (Travancore State) where very cheap raw materials labour packing materials and transport facilities are available.

The Rajasaheb of Aundh gave his moral and material support to the Concern liberally and but for this help it would not have been possible for the Company to survive through the bad period of foreign competition.

THE HOUSE OF PATANWALLA

Honesty and Quality are the two foundation stones on which is built the glorious reputation of the House of Patanwalla which occupies a leading position in India's perfumery industry. The firm's romantic rise to prominence makes interesting and inspiring reading.

Way back in 1899 Ebrahim Sultanali Patanwalla a boy of ten came to Bombay from Patan a village in Rajputana. After a year of precarious existence Ebrahim became shop assistant in a perfumery store on a monthly salary of Rs 8. He liked his new job and tried his best to learn all he could of the fragrant business. But the business did not hold much prospect for him. It was a fourteen hour routine drudgery. So after six years of unprofitable toiling Ebrahim gave it up and began hawking on his own. In this university of hard knocks and experience he learnt the lesson that to be successful one must be honest in his dealings and sell only products of good quality. He began preparing Hair Oils himself and found a ready market for them.

With this preliminary success his confidence rose and with it his ambition.

In 1910 Mr Patanwalla opened a perfumery store—a small shop in Bhaipala Lane—still he would not give up canvassing personally all his regular customers. He then began making his own perfumes and brilliants and in 1918 began manufacturing on a large scale. An all India demand for toilettries compelled Mr Patanwalla to increase his staff. In 1926 he started manufacturing the now famous Afghan Snow. He put his heart and soul into the perfection of the product. Sample after sample were prepared tested and rejected until Afghan Snow as we know it today was finally brought out. Mr Patanwalla considered Afghan Snow his star production. He spared no pains to see it well

Mr E S Patanwalla
Founder

Mr F E Patanwalla.

The Patanwalla Factory

established in the market. He insisted on the best of packaging, the best of publicity and the best of distribution for it. Thus set the popularity of Afghan Snow soaring.

In 1930, taking advantage of the Swadeshi Movement, Mr. Patanwalla started a factory at Connaught Road. In 1935, he went to England to acquire a first-hand knowledge of Industrial Organisation. He was much impressed with what he saw there and, on his return to India, lost no time in having his factory completely overhauled. The most modern machinery was installed, factory lighting was modernised, and working conditions were generally improved. More experts were taken on the staff and manufactures rose from just a few products to well over 300 items. The factory now employs more than hundred workers in addition to a batch of chemists and research men.

In 1937, taking his cue from the knowledge he had gained abroad, Mr. Patanwalla separated the Sales Department from the Manufacturing Department situated at Abdul Rehman Street. This segregation stepped up efficiency. He converted the Sales Department into a private limited liability company with himself as its Managing Director and Mr. Khanali Allimohamed and Mr. Moosaji K. Rampuri as co-directors. In them, Mr. Patanwalla found excellent associates. Mr. Khanali Allimohamed joined the firm in the year 1914. Coming from Sunel in Holkar State, he is shrewd and pays much attention

to details. There is hardly anything in the Indian perfumery trade that Mr Khanall does not know. His infinite knowledge, his wide experience and his organising ability led to his appointment as partner of Mr Patanwalla's firm in 1931. In 1937 he became a director of Patanwalla Ltd.

The other director Mr Moosaj R Rampuri hails from Rampura in Central India. He joined Patanwalla's in 1922. He possesses the knowledge of an advertising expert and has been responsible for the firm's publicity since 1931 when he was appointed advertising manager. Some of the very distinctive labels on Patanwalla products are the creation of Mr Moosaj. In 1938 he became a director of Patanwalla Ltd.

Mr E S Patanwalla himself took charge of the Manufacturing Department. In 1938 after a very eventful career Mr E S. Patanwalla died leaving his son Fakhruddin Ebrahim Patanwalla in charge.

*Mr Khanall
Allimohamed
one of the
Directors*

*Mr Moosaj
R Rampuri
one of the
Directors*

Like father like son. Young Fakhruddin soon proved his mettle. Having come out a qualified chemist from the Victoria Jubilee Technical Institute he was determined to carry on his father's good work. He is responsible for several useful innovations at the factory. A keen student of advertising and selling he spares no pains to effect constant improvements in existing products and creating new ones. No wonder Patanwalla products have become famous for quality. Their packaging too displays a note of originality and modern treatment.

Starting from a humble one man show the firm of E S Patanwalla now occupies a leading position in India's perfumery industry. Patanwalla's products now enjoy a nation wide popularity. Besides they are in regular demand in such far off places as Africa, Iraq, Iran, Palestine, Syria, Burma and Afghanistan.

So far sighted is the management's policy that when war broke out Patanwalla were more than equal to meeting the rising demand. The fact that they have laid by ample stocks of raw materials is also a tribute to their far sighted policy.

PORBANDAR STATE INDUSTRIES.

Porbandar claims to be a pioneer State in Western India in regard to some important industries such as Cement engine turning on precious metals ghee processing stone quarrying etc The variety of industries which have sprung up may be attributed as much to the industrial instinct zeal and enterprize of the people as to the easy availability of raw materials and the facilities provided by the State to utilize them to the best advantage

Porbandar is by far the most ancient and exclusive Maritime State of Western India Porbandar the capital town is situated on the direct trade route between Bombay and Karachi and is as such a most convenient Port for ocean going steamers to drop anchor

Within 10 miles of Porbandar are situated the famous stone quarries which are traversed by the Quarry Railway line This fine Porbandar stone is employed in the construction of conspicuous buildings of metropolitan cities such as Bombay Calcutta and Madras The necessity of economising the use of steel has recently induced Engineers and Building Contractors to employ Porbandar Stone to a larger extent and in place of other forms of construction

The vast quantity of lime stone chippings and clay available so near Porbandar induced the Indian Cement Co Ltd of the House of Tata Sons to establish a Cement Factory at Porbandar the first of its kind in India in 1914

The Porbandar Ghee industry is as famous as it is ancient Porbandar Ghee sells at an assured premium in the Bombay Market and abroad After being processed in refineries it is graded in the Ghee Laboratory the first of its kind in Kathiawar packed in tins of all sizes manufactured in local Tin Factories and sealed and labelled AGMARK as a guarantee of its purity

Textile Mills Salt Works Match Works Homery Works Ship-building Cement Flooring Tiles Paints and Distempers Plaster of Paris Soap Whiting—these are some of the other industries in which the people take a lively interest Cottage industries and Handicrafts have been receiving no less attention

The Imperial Bank of India established its branch at Porbandar in 1928 The State has also a Darbari Bank

The steep rise in the population of the town of Porbandar from 33 444 in 1931 to 52 747 in 1941 is an index of the industrial progress of Porbandar during the decade

THE P. & O.

100 years of Indian Trade

The P & O Hindustan leaving Southampton 1842 to open the Indian Mail Service

THE years 1942 and 1943 mark the Centenary of an event of considerable importance both in the history of the Peninsular and Oriental Steam Navigation Company and of Indian transport. It was on the 14th September 1842 that the *Hindustan*, specially built and fitted for the route between India and Suez left Southampton to proceed to India by the Round the-Cape route. She successfully made the passage out in 91 days of which 8 were spent in port refuelling, watering and provisioning.

Next year the *Bentinck* went out by the same route and the regular service to Egypt and India began. This linked up with the European Service of the P & O which since 1837 had been carrying mail to ports of the Spanish Peninsula and in 1840 extended the service to Egypt. The Peninsular Company first obtained the mail contract for the Spanish Peninsula Service in 1837 and it was after the success of this had been proved by the remarkably regular running and well kept timetable across the stormy waters of the Bay of Biscay that tenders were asked by the Post Office for a steam service to Egypt and an extended service between India and Egypt, the two links to be joined by a proposed overland route across Egypt. On obtaining this further contract, the Company was incorporated under Royal Charter with the condition that the mail steamer extension to India should be carried out within two or three years.

This was the conclusion of many fruitless efforts to establish a regular India/Egypt mail Service. The great difficulties in the way were in the monsoon seasons which made the Red Sea an impassable obstacle for sailing ships and an extremely difficult one for the under-powered steamers which first attempted to navigate the route. For centuries the native craft of India had traded with ports in the Red Sea, taking advantage of the monsoon winds to carry them from India and then after a wait of months to return when the monsoon winds changed direction. This however only meant about one voyage a year so was impossible in the consideration of a regular mail service. When the P & O began the through service, coaling depots had to be established over the whole route and these were supplied by a large fleet of sailing vessels which carried the coal out round the Cape to the depots in the East. It was found to be impossible to carry coals to Suez or any other Red Sea port because of that same difficulty to the monsoon winds and for many years after the service was established the P & O had to carry coal for the voyage down the Red Sea by camel back across Egypt to the depot at Suez.

This Overland Route had been in existence for some years but was carried on in the most haphazard fashion and with an extreme delay and discomfort for any passengers who ventured to take it. One of the first tasks set about by the P & O was the improvement of this journey across Egypt. Outward bound the steamers took the passengers and mail to Alexandria. Here they were transferred to barges which were towed over a canal to join the waters of the Nile. Here again there was another transfer to a Nile steamer which ran between the end of this canal and Cairo, and from Cairo all passengers and baggage had to be conveyed by pony carriage, cart, camel and donkey back, across the Desert to Suez. The first barges over the canal were towed by horses, but very quickly the P & O sent out special tugs which towed the barges to and fro. Similarly special steamers were built for the passage of the Nile and across the Desert rest houses were established. After two or three years this organisation was working so smoothly that the total time taken to do the 250 miles from sea to sea had been reduced to 78 hours. The journey across the Desert with halts for rest and refreshment took 36 hours, a journey which is now made by many passengers who wish to visit Cairo on their way to and from India by luxurious motor cars which cover the distance over a well made road in two to three hours.

There had been long controversies and many sittings of Parliamentary Committees and investigators into the possibilities of steam communication with India and as mentioned several attempts had been made to establish the Eastern end of the road. As the result of all

One of the latest built of the P & O Liners

thus, the building and fitting of the *Hindustan* drew world attention and the ship's departure from Southampton was held as an event of national importance. All ships in the port and roadstead were dressed with flags and the warships' crews manned the yards as the *Hindustan* passed them. The *Hindustan* was of 2017 tons with direct acting engines of 520 indicated H.P. the largest and most powerful steamer then afloat. The *Bentlack* was very nearly the same size of 2074 tons with side lever engines of 520 H.P. The *Precursor* of 1817 tons was sent out to India in 1844 and new steamers were continually added and the service improved from then up to the opening of the Suez Canal.

The steam communication for mails made an enormous difference to the trade of India. Before the P & O Service opened, the whole trade of the East with the U.K. was put at £40 millions a year. Just before the Suez Canal was opened the value of the trade carried by the Overland Route rose to £40 millions a year. This was despite the fact that by then there were more ships trading with India by the Cape Route than there had been before the coming of steam, and the year before the Canal opened the value of Eastern trade was £170 millions a year. India derived other benefits from the coming of the P & O extensions of the service to Singapore, China and Japan, to Australia and to the Island of Remon, as well as to Egypt and England made India a centre of world ocean transport, and the establishment by the P & O of works and offices, docks and wharves, suitable for steamer traffic again was of immense value to India.

It is difficult at the present time to foresee what may be the outcome of the war and the political points now at issue but whatever these may be it is certain that the P & O and the people of India will continue mutually to benefit from the trade which the Company first opened a Century ago.

PHALTAN STATE

Industries

PHALTAN though a small State of the Deccan Group and covering only 397 sq miles of area is making a steady progress in industrialisation—especially agricultural industrialization. The State has taken early advantage of the advent of the Nira Right Bank Canal and owing to the impetus given to the sugar industry by the tariff facilities by the Government of India a Sugar Factory was established in 1933 in the State. This prompt measure was due to the alertness and progressive outlook of its Ruler Major Raja Shrimant Maloprao Nanasaheb Naik Nimbalkar who is as much keen on industries as on agriculture. The Phaltan Sugar Works Ltd must also be given their due share of credit as they are the pioneers of the sugar industry in the State.

1 Sugar and Sugarcane.—Sugarcane is the principal agricultural crop grown in the State in the irrigated area its acreage being about 4 000 acres. The Sugar Factory at Sakharwadi in the Phaltan State owned by the Phaltan Sugar Works Ltd produces about 15 000 tons of sugar every year. It started work in 1933 and is a reputed Sugar Factory in the Deccan.

Gul (Jaggery) is another finished product from cane. Gul making has been an old industry known to the country people. About 7 000 tons of Gul are produced annually in the State and the greater part of it is exported to British India. There are 7 power crushers working in the State and many other country-crushers for the manufacture of Jaggery.

2 Cotton and Hand-Loom Industry.—The area under cotton is about 2 000 acres and yielding about 1 000 bales of short and fair staple yarn.

About 150 Hand looms are worked for silk cotton and woollen yarn. Coarse country woollen blankets are produced in large numbers.

To supplement the income of agricultural workers in the State Shrimant Rajasaheb has caused a branch of the Maharashtra Charaka Sangh to be started in the State to give training in hand spinning and weaving to the poor people as a basic industry. The Sangh has begun its work only a year ago and has trained about 100 agriculturists in spinning yarn. One cotton ginning factory is working in the State and there is scope for a Cotton Press.

3 Oil and Oilcaks.—Groundnut is also an important crop in the State and improved varieties rich in yield and oil percentage are being sown with the efforts of the Rural Development Department. But Kardi seed is mainly used for oil extraction in the State. There

are 43 country oil presses working producing 3 000 maunds of Kardi Til and Groundnut oil per year Its bye product the oil cake is largely used for feeding cattle and also as manure for sugar cane

4 Fruit and Orchards.—The soil in the State is peculiarly fit for growing fruit trees and fruit like grapes oranges lemons sweetlimes and bannanas are grown in abundance in the locality

5 Village Industries.—Two small country tannaries are working at Phaltan which export tanned goods There is ample scope for a leather factory Brick making and rope-making are also other village industries

6 Public Utility and Transport Services.—The Phaltan Electric Supply Company satisfies the lighting demand of

Shrimant Raja Saheb of Phaltan

the town Power is not at present available for industrial purposes but it is hoped that the need will soon be met

Rao Sahab K V Godbole
Dewan

The Kishorsinh Motor Service Company with its head office at Phaltan carries on all the passenger traffic from Phaltan to Poona Lonand Baramati and Pandharpur It is by far the best bus service in the Deccan Its regularity fixed rates and above all the comfortable seating arrangements have won for it an enviable position The Company maintains a fully equipped motor workshop

Owing to the industrialization even on such moderate scale there are signs of prosperity coming to all classes of people in the State and also to the Durbar

The House of RAMNARAIN RUIA

The House of Ramnarain Ruia was founded by the late Seth Ramnarain Harnandrai who hailed from Rámgarh in Rajputana in the Samvat year 1953

Harnandrai Ramnarain for that was the name under which the late Seth Ramnarain traded were doing business principally as Bankers Financiers etc and were also the Managing Agents for the Phoenix Mills Ltd Bombay from 1918 It was on the death of Seth Ramnarain Harnandrai in 1929 following his express wishes that the firm RAMNARAIN SONS, LTD was incorporated with the following Board of Directors

Suvtadevi Ramnarain (*Chairman*)
Jannalal Bajar
Ramuwas Ramnarain and
Paliram Muthradas

Of these Seth Jannalal Bajar died in February 1942

RAMNARAIN SONS LTD carry on business as Bankers Financiers, Concessionaires Cotton Merchants Cotton Exporters and Importers and Commission Agents They took over the Managing Agency of the Bradbury Mills Ltd Bombay in 1934. This Mill is one of the largest of its kind in India and has about 848 looms and 30 448 Spindles. In addition to all the foregoing Ramnarain Sons Ltd., in recent years have developed their Raw Cotton business until today they are one of foremost cotton merchants in India Up to the outbreak of the present hostilities their exports covered all the foreign markets including the USA in which Indian cotton is used Today they are among the leading shippers to the United Kingdom and, through the British Ministry of Supplies their cotton finds its way into most of Lancashire's Mills Through their network of Agencies in most

of India's upcountry markets they purchase cotton that is used in India's domestic mills while for use by the Fine Count Section of the domestic industry their imports of Long Staple Foreign Cotton cover Egyptians Sudans Iraq Africans and Americans

The present Board of Directors of Ramnarain Sons Ltd consists of —

Suvtadevi Ramnarain
(Chairman)

Ramnirwas Ramnarain
(Managing Director)

Madanmohan Ramnarain
Radhakrishna Ramnarain

Sushil Kumar Ramnarain
and Paliram Muthradas

*The late Seth Ramnarain
Harnandrai*

The volume of business done runs into several Crores of Rupees annually

RAMNARAIN HARNANDRAI & SONS.

This firm is owned and conducted by the sons of the late Seth Ramnarain Harnandrai and the Managing Agency of the Phoenix Mills Ltd Bombay which was handled since 1918 by Harnandrai Ramnarain remains in the family and is today carried on by Ramnarain Harnandrai & Sons. The Mill is one of the largest of its kind in India and has 54 000 Spindles and about 800 Looms. It manufactures Yarn of Counts from 4s to 40s and Piecegoods such as Saris, Sheetings, Bedticking, Shirtings, Dhots, Long cloth and various types of other Grey and Fancy cloths. The number of persons on its pay roll today approximates 2,500.

INDUSTRIAL DEVELOP-

BEFORE the accession of the present ruler industrial activity in Rampur State was confined to a few cottage industries such as the making of knives betel nut crackers certain woven fabrics and Rampur caps During the past few years the position has entirely changed and the State has embarked on a policy of rapid industrialisation The keynote of this policy has been to provide employment in the urban area and create at the same time a market for the agricultural produce of the rural area The sugar industry was the first to be started in the State In 1933 the Raza Sugar Company Ltd with Messrs Govan Brothers as Managing Agents was established and was so successful that before 1934 was out a second sugar company namely the Buland Sugar Company Ltd was floated

VARIOUS INDUSTRIES

During the last four years industrial development has been even more rapid The Raza Textiles Ltd was floated about the end of 1938 with Sir J P Srivastava and Son as the Managing Agents and despite the difficulties brought about by the War the Mill succeeded in starting its operations without undue delay It is now working day and night largely on War supply orders The Dawn Match Factory which produces good class matches commenced production in June 1940 and is capable of manufacturing 50 cases a day The Fruit Canning Factory which is run by the Hindustan

Product Limit ed possesses an up to date machinery for the manufacture of tins and the canning of fruit The Rampur Tent and Army Equipment Manufacturing Company is fulfilling orders for the supply of tents to the Army An Oil

The Dawn Match Factory

Mill under the management of the Rampur Industries Ltd was constructed and commenced operations in 1940 The Rafat Ice Factory was

MENT IN RAMPUR STATE

started last hot season and a Ginning Mill also started operations during 1941

Agreements have been entered into with the J K Gas Manufacturing Co the J K Rubber Manufacturing Co and the Rampur Maize Products Ltd The former two are being managed by Mr Kailashpat Singhania the well known industrialist and the latter by Messrs. Govan Bros. (Delhi) Ltd. Usual facilities have been offered to these three new companies and it is hoped that in spite of the War they will be in operation soon

Cart Loads of Sugarcane arriving at the Raza Factory during the Crushing Season

To meet the increasing demand of industry a new large Power House has been constructed This Power House is capable of supplying 4 400 kilowatts of electrical energy A State Engineering Workshop was started in 1941 and has been manufacturing lathes fans machinery vices and motor car accessories

COTTAGE INDUSTRIES

Cottage industries have been developed and a flourishing Cottage Industries Institute has been established It has weaving hosiery paper making durne carpet making dyeing and silk printing departments The products of the Cottage Industries Institute and of local weavers who have been taught improved designs and methods are marketed by the Industries Department at Emponums in Rampur and Nain Tal The knife making industry has been improved Similarly the making of cutlery knives forks and spoons is being developed

EDUCATIONAL POLICY

Side by side with the development of industries efforts have been made to bring about a re-orientation of Educational policy in the State Already about 150 students most of whom are in receipt of stipends are receiving instruction in various technical institutions and it is hoped that before long the majority of young men who have completed their education up to the VIII Standard will be absorbed in technical institutions which will fit them for earning their livelihood through some form of craft or industry without neglecting the cultural side of their education

THE RELIABLE WATER SUPPLY SERVICE OF INDIA, LTD., LAHORE

Founded in 1925 by Rai Bahadur Tej Ram a retired Punjab P W D Executive Engineer this firm was incorporated into a limited liability company early in 1928

The Reliables were soon called upon to build big Tubewells for Water Works at Civil and Military stations for the Railways and Sugar Mills

Previous to Reliables coming into the field Tubewells mostly had wire strainers which were very costly to build These strainers with their short life were not extractable If the strainer went out of order the Tubewell became unusable and therefore a dead loss

Rai Bahadur Tej Ram patented in 1925 an all brass strainer now known as the 'Tej' strainer for tubewells With slit openings correct to the thousandth part of an inch this strainer has been found to be unchokable strong and easy to extract in case of trouble It gives a better discharge at low head needs no shrouding and thus saves in boring cost It is manufactured under license by Reliables

The Reliables soon came to manufacture and supply a complete range of water supply fittings and castings for sewerage schemes

In 1932 the Company was called upon to undertake pioneer work on Tubewells for the U P Govt The result of this pioneer work done by Reliables was later embodied in a scheme of over 1 300 Tubewells built by that Government which brought under effective command over 6 50 000 acres of land in that province The Reliables alone built with their 'Tej' strainer about 700 Tubewells with discharges ranging from one cusec to 4 cusecs the remaining 600 having been built during the same period by at least ten more agencies including the U P Agricultural Department

It is estimated that there are about 5 000 Tubewells in different provinces built by Reliables and other agencies using 'Tej' all brass strainers pumping over a million and a half gallons of water a minute day in and day out

In 1938 a Rock Boring Department was added to the Company's activities This is equipped with up-to-date boring rigs and expensive tools to work in N W Frontier Province Central India and elsewhere

Rai Bahadur Tej Ram still guides the Company in its day to day activities as its Chairman with Mr Vidya Prakash a qualified Civil Engineer as Managing Director The general management vests in Mr A R Sethi with Mr D N Tondon a British qualified Sales and Factory Manager as Sales Advertising and Works Manager

The Company's Calcutta Office is ably managed by S Narayan Singh Ahluwalia, an engineer

THE RENOWN Biscuit Co.

Connaught Road,
Byculla, BOMBAY

LIKE nearly all big concerns the famous Renown Biscuit Company started on a very modest scale. It was established in 1923 with a staff of fifteen employees only and with one solitary machine. But the demand being far in excess of the supply it was found necessary to expand the organisation. This expansion took place in 1927 when an additional unit of full capacity was set up employing in all 100 persons.

This rapid expansion has enabled the firm to cover an all India market and also to export its products to Ceylon, Burma and even beyond. It owes its phenomenal growth, prosperity and popularity to the personal efforts and business acumen of the partner Mr D D Kerawalla who is ably supported by his co-partner Seth Mahomed Yakub Sahib.

Biscuits manufactured by the firm conform to the highest standards of quality. They are well known in thousands of India's homes for their oven fresh crispness and high nutritive value. There is an excellent variety of biscuits in the Renown range. They are marketed in attractive airtight cartons and tins.

With every improvement in quality the demand for Renown biscuits soared and a further expansion was called for. Just a few months before the outbreak of war the proprietors ordered out from Europe yet another unit. It was installed in the factory just a month before Germany attacked Poland.

The proprietors have taken good care to employ only experts. They know their job thoroughly and ensure the production of biscuits that are quite as good as the best of imported ones. Only the best grades of raw materials are used and at no stage in manufacture are the biscuits touched by hand.

Renown are playing an important part in keeping India supplied with first class Indian goods. There is an all-India organisation with agencies in all the important cities and towns.

The House of SHALEBHOY

REPRESENTS A CENTURY OF

*Exterior view of
Shale Building
Bank Street*

ESTABLISHED in 1840 this firm is one of the oldest largest and the most reliable amongst Government Railway and Shipping contractors in India. Its Head Office is housed in a magnificent building named Shale Building in Bank Street Fort with floor space of over 15 000 sq ft. Further business expansion has necessitated its branching out to other parts of India and acquiring additional premises to accommodate workshops.

The founder was Mr Tyebjee to whose indefatigable energy and sound business acumen goes the credit for its first forty years of progress. Since then it has grown from strength to strength as the management passed on from father to son for three generations. Its wide miscellany of business includes general hardware, railway and engineering tools, ship-chandlery and many other imported or locally manufactured goods which the firm supplies on a very large scale.

TYEBJEE & SONS

PROGRESSIVE SERVICE, 1840-1942

*Interior view of

offices*

to Municipalities Public Works Departments The Royal Indian Navy leading Steamship Companies Port Trusts and Railways

Among the agencies held by this Company may be mentioned the following Beldam's Packing and Jointings Paripan Paints Locomotive Brand Manila Ropes Lines etc Brunton's wire ropes for ships collieries and mines Ansell's patent self-oiling wire rope pulley blocks Colussus brand chains anchors shackles etc Vertex brand high tension bronze bars and sheets and many others too numerous to mention Recent developments include Vacuum Brake fittings rubber as well as mechanical and locomotive fittings

In short the firm of Shalebhoj Tyebjee & Sons is a pioneering enterprise that has made an immense contribution to business development in India during the last one hundred years

SHRI RAMA SILK MILLS LTD.

Manufacturers of

SILK YARN FOR ALL WEAVING REQUIREMENTS AND SILK CLOTH

THE SHRI RAMA SILK MILLS LTD has its nucleus in the Shri Rama Silk Throwing Factory established by Mr Narayan Govinda Naik in 1926

From a small beginning of 500 spindles the Factory grew to its present magnitude and is now working with 5000 spindles and employs 400 workers. The Factory is equipped with the latest machinery to produce quality products. The motive power for the whole plant is electricity.

*Mr Narayana Rao Naik the
Managing Director*

Weaving in silk has been introduced and every requirement in the line is met with. The Factory caters to

all tastes and needs. Sarees, bodice cloth in lace floral silk designs and borders, shirtings and coatings of different patterns are being manufactured. The factory's products have a big market throughout India and Ceylon. At Present the factory is engaged in manufacturing silk cloth and other components required for parachutes by the War Supplies Department of the Government of India.

Silk yarn of enchanting fast colours and shades from 13 to 15 ranging to 40 to 45 deniers is turned out.

The concern was converted into a private Limited Company on November 29 1939 for expanding its business. The capital invested is about Rs. 3 lakhs.

Mr Narayana Rao Naik has been the proprietor since the inception of the Company and is now its Managing Director on its conversion into a limited company.

Mr Naik is a prominent businessman in Mysore State. He was the President of the Mysore Chamber of Commerce for one term and continues to be a prominent member of it. He went to Japan specially to study the silk industry there and the outcome of this tour was the founding of the Mysore Silk Filatures Ltd. at T Narasipur, Mysore District. He is also the Managing Agent of the said concern. He gave valuable evidence before the Indian Tariff Board which inquired into the Silk Industry.

Mr Naik is the Director of the Mysore Silk Filatures Ltd., Mysore Spun Silk Mills Ltd., The Mysore Glass and Enamel Works Ltd. and is also a prominent member of the Mysore Silk Association.

Under his guidance the Shri Rama Silk Mills have grown from strength to strength and today it is the foremost silk manufacturing company in South India.

THE UNITED COFFEE SUPPLY Co., Ltd.

T STANES & Co, Ltd, (Managing Agents)

COIMBATORE

About the year 1899 T Stanes & Co commenced a business for the sale of Coffee retail and about the same time certain Planters on the Nilgiri Hills formed a Company in Coimbatore called the United Coffee Growers Co Ltd for the same purpose. In the year 1908 The United Coffee Supply Co was formed for acquiring and amalgamating the retail business of T Stanes & Co and the business of the United Coffee Growers Co Ltd. Soon after that date the Company commenced packing its coffee under the well known RED ENSIGN Trade Mark and this brand may be considered the most popular coffee in India. During the years 1916-1917 the Company supplied large quantities of Roasted and Ground Coffee in tins for the British Troops in Mesopotamia. In the year 1917 the Company acquired the Tea business of Messrs T Stanes & Co Ltd which they had worked as the Glendale Tea Agency and which they had taken from Glendale Tea Estate at their request. The capital of the Company was then increased to enable it to deal with its rapidly expanding business. Soon after that date the Company also commenced packing its Teas under the well known STANES ENSIGN BRANDS which have become equally well known and popular throughout India. In the year 1922 owing to the increasing demand for Tea the Company purchased an interest in certain Tea Estates on the Nilgiris and now hold a large number of shares in the United Nilgiri Tea Estates Co Ltd which own several high elevation Estates producing high grown teas of which a large proportion is used in the Ensign brands supplied by this Company.

A more recent extension has been the purchase in 1935 of the Business and Coffee Estates of Messrs Bayly & Brock Ltd who has been retailing tea and coffee under the Shell Brand mark for many years. A few years ago the Company found it necessary to erect a modern Tea Factory at Kotagiri to cope with the increasing demand for Stanes Teas.

In recent years the Cashewnuts trade showed rapid developments and exports of this commodity have increased annually but unfortunately due to the War progress is likely to be retarded. In 1938 the Company secured a fairly large holding of shares in the Indian Cashewnuts & Plantations Ltd a Company formed to meet the increasing demand for Cashewnuts both in this country and abroad. Stanes Cashewnuts raw and roasted and salted have rapidly gained popularity in India and the United Coffee Supply Co Ltd should be congratulated on its enterprise in this new line.

The Founder of the Company Sir Robert Stanes Kt., arrived in India in 1858 and may be said to have made the town and name of Coimbatore and Stanes famous throughout India. After 78 years of useful and benevolent work in India he died at Coonoor on the 6th September 1936 at the age of 95—a record which can be equalled by few.

For Household Articles of the **FINEST QUALITY**

SEWRI BOMBAY

FOR those discerning people who go by sheer value and solid quality when buying household articles there is no better guarantee than that offered by the Tata Oil Mills Company

TATAPURAM COGNIN ESTATE

TATA OIL MILLS CO., LTD.,

TATAPURAM & BOMBAY

A. V. THOMAS & COMPANY, LIMITED

(Incorporated in Travancore)

Head Office ALLEPPEY, SOUTH INDIA

Founded by a well known Planter and Business man of South India Mr A V Thomas with six other leading men of Business on January 14th 1935

The beginning was modest but the Company made rapid progress from the very commencement and continued to maintain steady development It holds a unique position in South India and manages eight prominent Plantation Companies The Coorg Rubber Co Ltd The Fringford Estates Ltd The Highland Produce Co Ltd The High Range Cardamom Co Ltd The Kaipetta Estates Ltd The Midland Rubber and Produce Co Ltd The Rajagiri Rubber & Produce Co Ltd and The Velliamattam Rubber Co Ltd with a paid up Capital exceeding rupees 38 lakhs and controlling about 2 600 acres of Tea 5 900 acres of Rubber and 1 600 acres of Cardamoms Coffee etc

Mr A V Thomas
Managing Director

Realising that the future of the Country depends upon Industrial development alongside Agricultural development the Company extended its activities in this direction and has under its managing agency the reputed firm of Ship builders and Engineers Messrs Brunton & Co Engineers Ltd of Cochin The Corr Yarn & Textiles Ltd and the West Coast Chemicals & Industries Ltd of Alleppey

A recent development was the registration of an Associate Company in British India under the name of A V Thomas & Co (India) Ltd with Head Office at Madras

Situated in Alleppey the most important Commercial Town and Seaport of Travancore a progressive State ruled by a Democratic young Maharajah and close to Cochin Harbour this Company with its ramifications throughout India is pre-eminently suited to serve the Trade and Industry of this Country

TRAVANCORE INDUSTRIES

TRAVANCORE essentially an agricultural country has in the course of the last decade taken up a systematic and well-planned programme of industrialisation. The Pallivasal Hydro Electric works inaugurated in 1939 is designed to supply the cheap power indispensable for industrial development. Road transport has recently been taken over by Government thus ensuring efficient and inexpensive transport facilities. In the Travancore University technical and technological studies are emphasised and a Department of Industrial Research is maintained at a maximum of efficiency. Power Transport and Research have thus been co-ordinated so as to foster and accelerate industrial progress.

A number of industrial concerns are being run under Government auspices. **The Travancore Rubber Works, Trivandrum**, manufactures cycle tyres and tubes motor car tubes surgical tubings sheets electric standards dipped goods hoses gharry tyres etc. from rubber. This concern is also engaged in the manufacture of goods specially designed for war purposes. The discovery of large deposits of china-clay on the shores of the Ashtamudi Lake has led to the starting of the **Government Ceramic Factory at Kundara**. The clay which is washed and refined there is used for the sizing of textile fabrics paper etc. and it stands comparison with the finest clay available elsewhere. Porcelain ware sanitary ware drainage and household stone ware electrical goods crockery fancy and artistic ware are also being manufactured there.

The Travancore Sugars and Chemicals Limited, comprise three concerns a sugar factory at Thuckalay which refines jaggery produced in the State a distillery at Nagercoil for manufacturing alcohol and a factory at Trivandrum for the manufacture of pharmaceutical pro-

ducts From the soft timber available in the State in large quantities wooden toys of exquisite workmanship are turned out in the **Toy Factory at Trivandrum**. An **Aluminum Smelting Factory at Alwaye** and a **Plywood Factory at Trivandrum** are nearing completion

A **Cement Factory** will shortly be started the raw material to be used for the purpose being lime which is available in abundance in the coastal lakes and is a pure form of calcium carbonate

A scheme for developing the **Fishing Industry** by the introduction of modern methods and instruments of fishing and improved methods of export is being worked out The State is also exploring the possibilities of developing **subsidiary industries**, of which one of the first fruits is the manufacture of shark liver oil which has proved to be a useful substitute for cod liver oil

There are several industrial concerns conducted by private enterprise which bear witness to the liberal policy of the State In the **Coir Factories** at Alleppey and Shertallai are manufactured mats matting rugs druggets cables etc from cocoanut fibre The **mineral companies** at Manavalakunchi and Chavara extract rare mineral sands like monazite ilmenite zircon sillimanite rutile etc from the littoral sands Letta a kind of reed which grows profusely in the Travancore forests is being utilised for the manufacture of paper in the **Punalur Paper Mills**. In Quilon and Alwaye are large **Tile-Works** for the manufacture of roofing and floor tiles and bricks from inferior varieties of clay There are over fifty **cashewnut factories** in Quilon and neighbouring places providing employment to two hundred thousand people The kernels of the nuts of the cashew tree (*anacardium occidentale*) which is grown widely in the wastelands and hillocks are roasted and shelled there and packed for export The collection and export of **cocoanut shell charcoal** is a new industry which has sprung up as a consequence of the War the material being used in the making of gas masks The **Salt Factories** in South Travancore numbering about sixteen make the State self sufficient in respect of salt supply The High Ranges are the home of **Tea Plantations**, and tea to the value of two crores of rupees is exported every year

Apart from these large-scale industries a large number of **cottage industries** are being run in thousands of homes in different parts of the State Among them may be mentioned the **making of copra** and the **expression of oil** therefrom the **making of jaggery** and the **distillation of oil from lemon grass**; the **spinning of coir yarn**, the **making of screw-pine mats**, **handloom weaving**, **embroidery and lace making**, **ivory carving and inlay work**; and the **manufacture of leather goods**

The name that stands for "Quality"

The Brand that guarantees "Excellence"

The symbol of "Perfect Products"

The Trade mark that is universally known to all sportsmen

The House of Uberoi Ltd Sialkot (India) needs no introduction to the Sporting Public. In fact its very name has become so synonymous with Sports that it has now become a household word wherever games or sports of any kind are indulged in.

The Founder of the Sports Goods Industry in India was the late Sardar Ganda Singh Uberoi who founded Uberoi Ltd in 1888.

LARGEST IN THE EAST

The largest power driven modern factory in India and the East for the manufacture of Sports Goods the works of Uberoi Ltd cover over six acres of land and comprise one of the largest groups of buildings of their type employing over 600 skilled craftsmen under expert supervision besides providing labour to thousands of workmen outside the factory for making and supplying War Material to the War Supply Board.

The workshops possess special Departments for forging and general metal work spinning, timber conversion, bending turning leather working net making gut string manufacture stringing and finishing. A feature of the factory is the repairs section.

FAMOUS PRODUCTS

The goods produced by this firm command enormous sales in this country and a demand has been created from all parts of the world to which large quantities are exported

They are patentees of several models of footballs designed to ensure a perfect and waterproof ball The Entirent and Aero-flux tennis rackets the Fibo-Sleeve Polo stick the Spinal propeller Hockey Stick the Meteor cricket ball their Klimatik tennis gut string (a perfect tropical gut string that stands the most trying conditions and which does not slack) the wrought T tennis post and the Kompakt tennis bat press are all notable and unique improvements Catalogues of sports gear and details of these improvements will be forwarded post free on application There is a lot of very useful and really interesting information to be had in their literature

A UNIQUE DISTINCTION

This firm has had the unique distinction of being favoured by the All India Olympic Hockey Team and the All India Military Hockey Team who selected Uberoi products for their equipment on their English and Continental tours and also on the New Zealand tour

WAR WORK

Besides meeting the greatly increased demand for their products in India and abroad the Company is now busily engaged in manufacturing and supplying to the Government huge quantities of war materials and other implements

BRIGHT PROSPECTS

Mr Hardev Singh Uberoi the present Chairman and Managing Director of the Company took over control of the business in 1938 on the death of his father who founded the firm He was the Chief Executive Officer of the firm for over 20 years and gained practical experience in the manufacturing and executive side of the business. The Company is now making rapid strides towards progress and prosperity beating all previous records It has at present more than 40 branch offices covering India and Burma an office in London and agencies all over the world Many improvements have been made in the organisation and all orders large and small are executed promptly without any delay

Pilot Officer Desmond Vernon
R A F V R

VERNON &

36, 2nd Line Beach,

In the year 1930 Desmond Vernon, an energetic and enterprising Irishman who had previous business experience in the City and Singapore severed his connection with one of the larger Madras firms and started business on his own very much a one man show as he opened a one room office with one clerk one typist one storekeeper and

one peon. His first venture was the establishment of trade with South Africa in Natal coal and oranges. Despite attempts to freeze him out he held his own and on securing the Philips agency early in 1931 cabled home for his old friend and associate Ian Cumming to join him. Since then the firm has made progress by leaps and bounds and a third member was added towards the end of 1938 in the person of J. Hills who had also previously been in Madras but his participation was short lived as he joined the R A F V R in the first batch in November 1939. In 1940 Mr Vernon flew home to recuperate after enteric and on his return joined the R A F V R in December when he proceeded overseas immediately and has seen service in all the Middle East campaigns. In the meantime the firm is carried on by Colonel Cumming who commands the Southern Provinces Mounted Rifles and Mrs. Cumming ably assisted by an Indian staff of 50.

Since its inception the firm's policy has been not to endeavour to compete in well established lines but to look for something new and if possible non-competitive which can be developed by energy and intelligence. The success of the Natal orange venture resulted in the establishment of a trade with South Africa in fresh fruit which was carried in refrigerated space and stored in a cold chamber which the firm constructed specially on their premises. They were then appointed agents for the South African Co-operative Deciduous Fruit Exchange Ltd and the trade subsequently extended to Rhodesia, Jaffa, Australia, Tasmania, New Zealand and North India but its scope has

COMPANY

Post Box 79, Madras

naturally been curtailed by war time shipping restrictions. In 1934 a subsidiary company was floated. The Indian Mutual Sales Corporation Ltd for the retail distribution of fruit direct to consumers but owing to the difficulty of securing employees of suitable calibre had eventually to be wound up.

*Lt Col Ian Cumming
F D A D C*

Radio was then in its infancy and its potentialities were quickly realised. The Philips agency proved a most important one and was later followed by Mullard, Invicta, Paillard and Ultra. And negotiations are now in progress with American manufacturers. Under this department comes the Hammond Electric Organ with its revolutionary principles which has swept the States and Britain and is now installed in most of the larger churches in India and Burma. During this period gas discharge lighting made its first appearance with Philips as the pioneers and thus provided another field which has been extensively exploited for municipal and industrial lighting. Examples of non-competitive activities which have now been developed and highly organized are The Performing Right Society Ltd, Automatic Machine Co (India) Ltd and Eastern Scales Ltd.

The development of indigenous industries was another essential part of the firm's policy and its agencies include Philips lamps (made in Calcutta), Indian Smelting & Refining Co Ltd (non ferrous metals alloys etc manufactured in Bombay), Gwalior Potteries Ltd, Andhra Provincial Potteries Ltd etc. Indian granite had been shipped to England mainly for kerbstones but it had been shown that polished granite memorials could be satisfactorily turned out in this country and when Italy entered the War this trade was developed. Complete polishing machinery was imported from home and the services of a specialist had been obtained when import restrictions were instituted.

Head Office Building Madras

in U K and the project had to be temporarily shelved. The increasing anti malarial measures carried out by Government and public bodies in South India offered additional scope and a campaign was instituted for the introduction of Pyrocid 20 (standardised extract of pyrethrum flowers) which met with considerable success with the result that this insecticide is now used almost exclusively throughout South India and the Native States. A further development was the manufacture and introduction of Pip a ready to-spray insecticide with a Pyrocid 20 base.

Other branches of the firm's activities are Dunlop sports goods Insurance in all its branches (agencies being held for General Accident Fire & Life Assurance Corporation Ltd. Eastern Insurance Co. Ltd. New Zealand Insurance Co. Ltd. Norwich Union Life Insurance Society Manufacturers Life Insurance Co. British Bloodstock Agency etc.) On the import side are fans and motors, paint oil etc. from U.S.A. electrical accessories from Hongkong, Buchu leaves from South Africa, toilet goods (Cussons), tinned milk (Wilt's United Dairies), grinding wheels etc. from Great Britain. The firm also acts as Madras Branch for Hardcastle Waud & Co. Ltd. Bombay with a very large business in specialised lubricants, heat treatment products, paints, paper and engineering sundries of all descriptions and conducts business in clearing and forwarding and coal. In 1938 an Enquire Within service was started which has proved of considerable value to upcountry customers. This consists of the furnishing of information entirely free of charge on an infinite variety of subjects and the purchase on commission of any requirement.

Despite the War expansion continues uninterrupted and fresh agencies are being taken up, preferably for indigenous manufactures.

THE UNIVERSAL FIRE & GENERAL INSURANCE Co Ltd.

THE year 1919 was a remarkable year in the annals of Indian Insurance. In that year Indian enterprise turned to the promotion of companies for underwriting Fire Accident and Marine Insurance. The Universal owes its inception to the pioneering spirit of the late Seth Motilal Kanji, the late Seth Varajdas Bhaidas and the late Mr Keshavlal H. Setalvad whose promotion of the Universal was a mile stone in the onward march of Indian commercial-enterprise.

Progress of the Universal:—The company was incorporated on 8-9-1919. It commenced writing Fire Insurance on 7-1-20. Marine Insurance in 1921 and Motor Insurance in 1924.

Diwan Bahadur
K. M. Jhaveri

GENERAL DEPARTMENT

Year	Total premium income	Claim ratio	Reserve fund
1920	Rs 1,98,700	20.6%	40,436
1930	15,40,889	50.6%	2,78,555

Capital and Reserve.—The company has an authorised capital of Rs 50 lacs, a subscribed capital of Rs 27,39,400 and a paid up capital of Rs 6,34,925. In 1938 the company moved into its own building at Sir Phirozshah Mehta Road.

Management.—To-day the Universal may with justifiable pride be called one of the oldest and leading Indian Composite Insurance companies. It owes its position to-day to the foresighted and prudent management of its affairs since its inception by its Managing Agents M/s M. Kanji & Co. Diwan Bahadur Krishnalal M. Jhaveri B.A., LL.B. J.P. is the present Chairman of the Board of Directors.

Salomon Volkart

THE FIRM OF FOUNDED

THE Firm of Volkart Bros was founded in Switzerland and India in 1851 by Salomon Volkart and Joh George Volkart brothers of an old established Swiss family

In starting this business the underlying idea was to establish direct commercial relations between India and the Continent of Europe. This had become possible only two years previously by the Repeal in 1849 of the British Act of Navigation. This was an Act which prohibited the transport by Sea from British Possessions by any other than British ships and further provided that the first European Port entered by such vessels should be British. Volkart Brothers were thus practically the first to establish direct trade relations between India and the Continent of Europe and thereby opened up a new era in India's trade relations with the rest of the world.

FIRST OFFICE IN INDIA

Their first Office in India was opened in Bombay in 1851 : it was still in the days of the old East India Company. Joh George Volkart was in charge of it till 1863 when he died. He was buried in Bombay. The firm's business gradually expanded and other Branch Houses were opened in Colombo Ceylon (1857) Cochin Malabar Coast (1859) Karachi Sind (1861) etc etc. In 1868 an Office was also opened in London and from that date the firm has been participating in the export trade of India to the U K. and the import trade from the U K.

Business at the outset was confined to the export of Raw Cotton to Europe and the import of manufactured goods to India. Later on the export of Coconut Oil, Coffee Cinnamon, Pepper and other Indian Produce was taken up. Cotton Ginning and Pressing—Factories were started and later on also Pressing—Factories for Coir yarn. Curing Works for Coffee and recently the firm also acquired Coffee Estates.

VOLKART BROS.

IN 1851

John George Volkart

IMPORTANT EVENTS

As interesting incidents during the long career of the firm may be mentioned the opening of telegraphic communications between Europe and Bombay in 1865 which revolutionized communications between India and Europe and the opening of the Suez Canal in 1869 which made the long route round the Cape unnecessary

During all these years the firm's business was also affected by several Wars of which the most important ones were the American Civil War the Franco German War the World War 1914 1918 and now the present World War Fortunately the firm is still continuing its progressive career

In the course of time the firm also went into the Insurance Business (Fire Accident Marine and Life) in which line they represent a number of leading Companies They also took up the representation of Shipping Companies trading with India And a few years ago they also obtained the representation of international Air Lines

In their Import business they gradually adapted themselves to the changing requirements of this country

When the industrialisation of India gathered momentum Volkart Brothers took up the representation of leading Manufacturers of Electrical, Mechanical Textile and Agricultural Machinery and Stores and recently also of Refrigeration and Air conditioning Equipment They also import Dyes Chemicals and Pharmaceuticals and a large number of other articles required by modern India

All lines are handled by Experts who have made it their career to give the best possible service These developments show that the firm's activities have continuously been adapted to the changing

Volkart Bros Office in Bombay

economic tendencies in India and it is the intention of the firm to follow this policy also in future and to contribute thereby to the country's economic development and prosperity.

ORGANISATION OF 1700

To day Volkart Brothers have an Organisation spreading throughout India with Branch Offices at all important Ports and Agencies at numerous inland places. They have a permanent staff of over 1700 qualified European and Indians apart from those temporarily employed or on daily wages. Their Imports come from a variety of countries and their Exports from India go to all the five Continents of the World. These Exports include now no longer only Raw Produce but also finished articles such as Textiles to Australia and South Africa which illustrates the most recent development in India's industry.

Outside India and Europe Volkart Brothers Organisation has spread to China, Japan, North America, South America, etc. In the two first mentioned countries business has been suspended for the time being owing to the War.

THE PARTNERS

The firm has always been a Family Concern. The present Partners are George Reinhart and Werner Reinhart (residing in Switzerland) both grand-sons of Salomon Volkart founder of the firm and Peter Reinhart (residing in New York) a great grandson of the founder. A brother of the latter is at present in India undergoing a training in the various lines handled by the firm.

The Govt. U.P.

Handicrafts

In the United Provinces as many cottage The handicrafts of the not only in India but in thanks to Government's

vinces there are twenty workers as factory hands U P are now famous many parts of the world powerful aid in developing new markets

EARLY EFFORTS

The first permanent sales arrangement by the U P Government was about 40 years ago and took the shape of putting up for sale specimens of better handicrafts at the Provincial Museum Lucknow. The next attempt was made in 1915 when Village Industries was started at Cawnpore and out of this institution has developed the present Central Marketing Organisation—The Govt U P Handicrafts. In order to help the craftsman and supply him with new ideas and designs the institution was attached to the School of Arts & Crafts in 1919.

HANDLOOM TEXTILES

In 1935 a new department for textiles was opened to aid handloom weaving. Four years later the Handloom and the Arts & Crafts Departments were amalgamated to form The Govt U P Handicrafts. Its main objects are to supply designs, organize production and distribution centres, carry on propaganda and publicity both in India and abroad and assist the workers by buying their products outright for sale in places where there are no co-operative societies.

INTERNATIONAL EXHIBITIONS

Selections of artware and textiles have been exhibited at various international expositions including those at Wembley, Lyons, Budapest, Milan, Toronto and the British Industries and Leipzig Fairs. The industries that have benefited considerably by these exhibitions among others may be mentioned Calico Printing, Benares Brocades, Cotton Textiles and Moradabad Brassware. Not only have these industries received tremendous publicity in Europe but have increased their overseas business.

TECHNICAL IMPROVEMENTS

The Govt U P Handicrafts is responsible for the improvements in design and finish of Moradabad Brassware. Ivory carving has also increased its scope with the help of the organisation. There has been an improvement in the design and technique of Khurja Pottery too. The best achievement in the Handloom Section has been the weavers securing a pride of place among the world's textile workers. He now produces everything from suitings to furnishing fabrics of distinction.

In conclusion it may be said that the organisation has created an awakening among workers, decreased unemployment and enabled them to hold their own even in these days of keen competition. There is every promise of the organisation developing on a much larger scale in the near future.

WESTERN INDIA LIFE INSURANCE COMPANY, LTD, SATARA

(Incorporated in India in 1913)

Head Office—SATARA CITY

A Review of Progress and present position

The Company was established in the year 1913 at Satara. Capital of the Maratha Kings and commenced business that very year. Not only was it the first Insurance Office of the Marathi-speaking Districts of the Bombay Presidency but was also one of the first few pioneer Indian Insurance Companies with full Indian control Indian Capital and Indian Administration.

The Company's policy schemes are both simple and attractive and premium rates charged are comparatively low. That the Western India has followed its course of business with strict adherence to sound principles and tested methods has been admitted by its consulting actuary financial journals such as Indian Finance and Capital of Calcutta and by great Indian industrial and commercial leaders like Sir M. Visvesvaraya Sir Homi Metha, Mr G. D. Birla and Mr Gowar dhandas Morari.

The Company has maintained very rigidly its traditions of economy sound investments and stability as the following figures as at the end of 1941 will show —

Total Business in Force exceeds	Rs 5 34 00 000
Total Assets	1 66 73 586
Annual Income	31 60 430
Life and Reserve Funds	1 50 71 339
Cost Price of Investments	1 33 31 919
Market Value of Investments	1 48 39 051
Resulting Hidden Reserves	15 07 131
Reserves shown in the Balance Sheet	5 96 707

Dividend to shareholders—10%

Expense Ratio 2 41 one of the lowest in the Country

Triennial Bonus Per Thousand

Endowment—Rs 54

Whole Life—Rs 67½

Maximum in the Country

Mr W G Chirmule President

Although the Company has its Head Office at a wayside town in the Presidency the organisation of the Company has spread over all the Provinces of India and the Company has been securing a large business from outside Bombay Presidency. It has amongst its organisers some very highly educated young men from different provinces. It has branches at Poona, Bombay, Nagpur

Ahmedabad Karachi Lahore Delhi and Calcutta Organising offices at Indore Nasik Kolhapur Sholapur and Belgaum and Chief Agencies at Ellore Baroda and B E Africa And even during the war the Company has maintained its progress The total paid for business at the end of 1941 is Rs 68 72 648 which is even a little in excess over last year's business figure and its expense ratio for that year is expected to be still further reduced which viewed along with its reserves and bonuses and dividends to Shareholders makes a record in the history of Indian Life Insurance and has no equal not only among companies of the age of Western India but even amongst almost all other Companies

Western India House Bombay

Sir M Visvesvaraya wrote in his foreword of 24th January 1939 to the Silver Jubilee Souvenir of the Company as follows —

This is a commercial undertaking which the leading citizens of Satara have made a notable success It will be difficult for the present generation in India when more than two hundred Indian Life Offices are actually functioning to visualise the value of the pioneering work done by this Company and by its president Mr W C Chirmule in particular in the days when the Indian mind was suspicious and even opposed to the very idea of Insurance

The success of the Company and its present position are worthy of all praise They are claimed by the promoter as a contribution towards the reorientation of the economic life of the people of the Deccan What has pleased me most in all the history of this Company is the spirit of service and sacrifice and the tradition of selfless patriotism which has characterised the efforts of many of the pioneers and leading men who have directed its affairs I wish to associate my elf with the hope that Western India may prove a model to Life Offices generally in this Country

And again while presiding over the Silver Jubilee celebration of the Company on 26th February 1939 Sir M Visvesvaraya paid the following tribute to the Company

My inquiries go to show that the administration of the affairs of the Company is conducted with great caution and no relaxation of sound principles or practices is tolerated in the eagerness to attract business I understand too that the expenses of the management are low that lapses are few and that while adhering to a stringent valuation basis the Company has maintained profits at a high level The satisfactory financial results the Company is able to show in these days of cheap money is an evidence that its investments are carefully selected and judiciously distributed

Head Office Winchester House Old Broad Street London and at Metal Exchange

The Company was established as a Partnership Concern in 1880 and comprised Messrs J Gray Buchanan, Stewart Berry and R Russell Walker. Originally Mr Bonar Law later to become the Prime Minister of Great Britain was also a Partner.

In its early trading the Company dealt mainly in Metals and Rubber. They were very large Dealers in Pig Iron and gradually became a great force in the Metal Market of London. Their export trade was carried on throughout India, Burma and China with various connections in Egypt, Europe and North and South America.

In those days the Home trade was the main concern of the Company but in the gradual development of its 60 odd years existence Branches have appeared at various points in the East and Far East. At the beginning of this century in view of the large volume of business which it had developed in India the Company decided that the time was ripe for opening Offices of its own. Consequently a representative was sent out to study the possibilities and shortly afterwards William Jacks & Co opened its first branch in India in Bombay. This was a small office in Meadows Street close to where our present Show Room stands. The staff consisted of one European, 2 clerks and a peon. Within a year or two however this staff was found inadequate and had to be considerably increased. Shortly afterwards in view of the volume of business being put through in Bombay it was decided to open a similar branch in Calcutta which started very much on the same lines.

The main business done by these small branches was in connection with the sale of Hall's Distemper and Expanded Metal. Both of these products were new to the Indian market and a considerable amount of spade-work was necessary. As the scope of the business increased it was found that the original premises was much too small and the office was moved to Wandby Road where another assistant was found necessary. At the same time reciprocal agreements with the firms to whom the Company was making large supplies of basic materials, etc in England gave them additional agencies to handle.

From this point the firm's interests in India rapidly developed. It was found necessary to augment the office staff and to increase the number of European employees. The firm at this stage was, however, an entirely mercantile concern and had not interested itself in Engineering to any extent but about 25 years ago in view of the rapidly increasing industrial development in India, the Company decided to interest itself in Engineering. To do this it had to engage qualified Engineers for its staff.

The firm pioneered into India among other things the Caterpillar Tractor and Electric Steam Boiler, but also interested itself in the importation of Asbestos Cement Products in the form of Sheets, Pipes etc. and rapidly built a name in the building trade as suppliers.

Jacks Built . . .

of all kinds of building products. The engineering business developed on parallel lines and the Company now regards itself justifiably as one of the leading Specialist Engineering concern in this country having on its staff in India qualified Electrical, Mechanical and Agricultural Engineers.

During this period branches were opened up in Karachi, Lahore, Madras and in Rangoon. Subsequently in Delhi and in Quetta.

For many years the Karachi Office has been prominent in connection with the export of wool from that port.

A few years ago the firm decided to take an interest in the Machine Tool business and now represent the Craven group of Manufacturers of all classes of Machine Tools. Their supplies are now mostly confined to Government undertakings.

The Company has also interested itself in Industrial enterprise in this country. For instance up to the commencement of this war our Associated Co. The Crittall Mfg Co (India) Ltd. was the leading importers of Metal Windows but owing to the severe export conditions from Great Britain the firm decided to manufacture windows in India. For this purpose it formed a new Company known as William Jacks & Co (Manufacturers) Ltd. and built a Works in Karachi in order to locally manufacture windows. This venture has been most successful from the outset.

The firm is also financially interested in Messrs. J. C. Gammon Ltd. one of the leading concrete Engineering Concerns in India and in Messrs. Carstairs & Cumming (Karachi) a Structural Engineering Concern.

Prior to the declaration of war there was an establishment of 700 European Assistants as well as a number of European trained Indian Officers in Bombay, a big number in Calcutta and lesser numbers in the other Branches. The bulk of the European Assistants are now serving in His Majesty's Forces.

It has always been the policy of the Directors in London to arrange for training of Assistant before proceeding to India and it is an accepted understanding with all Assistants when proceeding on leave to Europe that they will take refresher course in Principal Works. This has been found to keep the knowledge of the staff up-to-date. Members of our staff regularly visit Works in Great Britain and in America so as to keep in touch with the latest developments. This policy has been found to pay itself very well.

The grand old man of the Company Mr. J. Gray Buchanan has been for many years a leading member of the London Chamber of Commerce. He is the Chairman of Directors of the Company and has for many years been the guiding hand at the helm. Mr. Buchanan was educated at Glasgow High School in Scotland and joined the then young firm of William Jacks & Co. Later the Company moved its Head Office to London to begin its great career as leaders in the Metal and Export world. He can now look back upon 54 years' association with William Jacks & Co. He is a Director of the Expanded Metal Co., G. M. Callender & Co. and a Member of the Institute of Structural Engineers. Apart from these activities, he has been a very prominent member of the London Metal Exchange. His *Forerunner* Saga, published every week giving Metal Market forecasts has always been much sought after by metal merchants.

Mr. R. Russell Walker, the Managing Director of the Company is largely responsible for the development of its Eastern ramifications and is in control of the entire export side of the business. Needless to say his shrewd knowledge of foreign markets has been invaluable in opening new branches and when it was decided that these were necessary. Mr. Walker was educated at Allen Glen's School, Glasgow.

Mr. W. G. Buchanan, who is the son of Mr. J. G. Buchanan, spent 6 years in Singapore with the Associated Company William Jacks & Co (Malaya) Ltd. before returning to settle down in London.

Mr J. C. Gammon is the very well known authority on concrete engineering. Mr Gammon is the Director and Founder of J. C. Gammon Ltd. and Gammon (Malaya) Ltd. both of which Companies are very well known in their respective areas as Reinforced Concrete Specialists.

Recently we regretted to announce the death of Mr. Stewart Barry, one of the early Partners of the Company. Mr. Barry was a specialist in Metals and was largely responsible for the firm's amazing expansion in this branch of its business. His activities were confined almost exclusively to the Home trade of the Company.

In the year 1909 Mr. J. W. Jessop was appointed in London to proceed to Bombay as an Assistant in the then small office at Meadows Street. Mr. Jessop came straight from Halesbury College to India, being probably the youngest Assistant ever appointed to the firm. He has been closely associated with our Directors in the expansion of the Company in India and Burmah and may be said to be largely responsible for its phenomenal growth in this country. It is to a large extent due to his foresight that instead of continuing our more or less non-technical business of importing paints etc. we embarked on the more specialised engineering and building trades and these ventures on his part have been more than fully justified. He has for many years been Senior Manager and is well known throughout India. He takes a leading part in commercial affairs in Bombay and is a Justice of the Peace. Among his other activities he is the Managing Director of the Crittall Mfg. Co. (India) Ltd., Director of J. C. Gammon Ltd. and Chairman of Directors of Messrs. William Jackson & Co. (Manufacturers) Ltd.

In 1911 the Partnership was turned into a Limited Liability Co. in order to control its very considerable holding in India and the Far East. It has financial interests in many important Eastern concerns but its policy has always been to allow complete freedom in action to its various Branches throughout the world.

In spite of its huge export business the Company have always specialised in the Metal Market even to this day and by dint of hard work and efficiency the Company in London are the Sales Organization for the huge Indian Metal interest represented by Messrs. Burn & Co.

The standing of William Jackson & Co. is reflected by the class of Manufacturers who have placed their faith in our ability to handle their goods. It is not possible to mention the names of all these Companies but such concerns as those mentioned below speak for themselves.

James Firth & John Brown Ltd., Firth Vickers Stainless Steels Ltd., Crittall Mfg. Co. Ltd., Cleveland Tractor Co. (S.A.), Carborundum Co. Ltd., J. Samuel White & Co. Ltd., Wipac Ltd., Laurence Scott & Electromotors Ltd., Brush Electrical Engineering Co. Ltd., The Paraffine Co. (S.A.), Ransomes Sims & Jeffries Ltd., Sissons Bros. & Co. Ltd., Petter & Co. Ltd., Consolidated Pneumatic Tool Co. Ltd., Bastian & Allen Ltd.

We should also mention that the Company in India are the Secretaries for the Consolidated Pneumatic Tool Co. Ltd. who are probably the largest importers of compressed air machinery in this country.

The war which has now developed in the Far East has to a considerable extent affected our undertaking in that territory. Within a short space of a month we lost contact with our Offices in Shanghai, Hongkong, Penang, Ipoh, Teluk Anson and Kuala Lumpur.

Our Malayan business naturally specialises in the export of Rubber and Tin. It has also been interested in a large number of enterprises in Malaya and has been for many years agents for the Government of Brunei. Though actually in a separate concern our Far Eastern Associates developed in the same way and along the same lines as we have in India.

The franchise which our London office holds for so many different manufactures in Britain and America extends in most cases to India, Burma, Ceylon, Malaya and China.

This huge undertaking has been solely built up as a result of many years forethought and care. It has suffered some setbacks but has overcome them one by one. We are confident that those which it meets during the present troublous times will be overcome.

It is no empty compliment therefore that we pay to the three original Partners who extended energy and money in the Company's great development in the 60 odd years of its existence.

THE WOLVERHAMPTON WORKS Co., LTD., BOMBAY

THE common heavy metals have been known since antiquity but the light metals are a product of the last century. The Wolverhampton Works Co. Ltd. are the pioneers in India of the use of aluminium, the commonest of the light metals. Started in 1896 by Walter A. Cresswell the Company was the first to produce utensils made from aluminium imported from England. They were expensive and looked upon with suspicion. To day the Wolverhampton Works is one of the largest producers of not only utensils but spinings and die and sand castings covering many hundreds of the uses to which aluminium is put.

Mr W M Martin

Aluminium has become a serious competitor of the more well-known metal brass and has many advantages over that metal which renders it more suitable for many purposes.

The Wolverhampton Works has its factory at Worli employing some 250 men with its office at the Bank of Baroda Building Apollo Street. It is closely connected with the British Aluminium Co. Ltd. of England from whom most of its aluminium is obtained. Overhead conductor sheet, ingot wire, powder sections and foil are a few of the aluminium products in which a large business is done. The present Manager is Mr W. M. Martin, M. Inst., Met. J. P.

INDEX

Note—Every effort has been made to give a comprehensive Index to the information given in the Year Book, and it is hoped that it will facilitate easy reference. Should, however, anyone have suggestions or criticisms to offer calculated to improve the index, they are welcome and will be carefully considered.
